Department of Sociology and Anthropology ................................. 140
  B.A. in Anthropology .................................................................. 145
  B.A. in Sociology ........................................................................ 147
  Minor in Anthropology ................................................................. 148
  Minor in Sociology ..................................................................... 148
Interdisciplinary Majors and Minors

Department of Theatre and Film

B.A. in Film/Video

B.A. in Theatre

Minor in Cinema Studies

Minor in Film/Video

Minor in Stage and Screen Performance

Minor in Theatre Arts

Minor in Theatre Design and Technology

Department of Women's and Gender Studies

B.A. in Women's and Gender Studies

Minor in Sexualities Studies

Minor in Women's and Gender Studies

Department of World Languages and Cultures

B.A. in French

B.A. in German

B.A. in Spanish

Certificate in Intercultural Competency

Certificate in Issues in Second Language Teaching

Certificate in Spanish Translation and Interpretation

Certificate in World Language Proficiency

Minor in Applied German

Minor in Arabic

Minor in French

Minor in General German

Minor in Japanese

Minor in Spanish

Minor in World Cultures

Interdisciplinary Majors and Minors

Africana Studies Program

B.A. in Africana Studies

Minor in Africana Studies

Asian Studies Program

B.A. in Asian Studies

Minor in Asian Studies

Data Analytics Programs

B.A. in Data Analytics

Minor in Data Analytics in Social Science

Disability Studies Program

B.A. in Disability Studies
Minor in Surveying .................................................. 245
Department of Electrical Engineering and Computer Science ................................................................. 245
BS in Computer Science and Engineering .......................... 251
BS in Electrical Engineering ........................................ 253
Minor in Computer Science ........................................ 254
Department of Engineering Technology .......................... 255
BS in Computer Science and Engineering Technology ... 256
BS in Construction Engineering Technology ................... 257
BS in Electrical Engineering Technology ........................ 258
BS in Information Technology ...................................... 260
BS in Mechanical Engineering Technology ..................... 262
Minor in Cyber Security ............................................ 263
Minor in Software Engineering .................................... 264
Department of Mechanical, Industrial and Manufacturing Engineering .................................................. 264
BS in Mechanical Engineering ...................................... 270
Materials Science & Engineering, Certificate ................... 272
Minor in Mechatronics .............................................. 272
Special Programs for Undergraduates ............................ 272
Early Admission to Master of Science in Engineering .... 272
Joint B.S. in Engineering or Engineering Technology/M.B.A. Program ................................................. 273
Minor in Business Administration ................................. 273
Presumptive Admission Program to the University of Toledo College of Law ....................................... 273
Faculty ..................................................................... 273
College of Health and Human Services .......................... 277
Contacts ................................................................... 277
Degrees/Programs Offered .......................................... 278
Admission Policies ..................................................... 278
Academic Policies ...................................................... 279
Student Services ....................................................... 280
Degree Requirements ................................................ 280
Department of Exercise & Rehabilitation Sciences ............ 281
BS in Exercise Science ................................................ 291
BS in Recreation Therapy ........................................... 295
BS in Registered Respiratory Therapy ............................ 298
BS in Respiratory Care ............................................... 299
BS in Speech Language Pathology ................................ 301
Minor in Exercise Science ......................................... 301
Department of Human Services .................................... 302
Associate of Applied Science in Paralegal Studies .......... 309
BS in Criminal Justice .............................................. 309
BS in Paralegal Studies .............................................. 309
BSW in Social Work .................................................. 309
Certificate in Chemical Dependency Counseling ............ 309
Certificate in Nurse Paralegal ...................................... 309
Minor in Criminal Justice .......................................... 309
Minor in Counseling .................................................. 309
Minor in Data Science .................................................. 309
Minor in Forensic Science Investigation ......................... 309
Minor in Legal Specialties .......................................... 309
Post Baccalaureate Certificate in Paralegal Studies ........... 309
Department of Population Health .................................. 309
BS in HealthCare Administration .................................. 314
BS in Health Care Administration 2+2 ......................... 315
BS in Health Information Administration ....................... 316
BS in Public Health .................................................... 317
Minor in Public Health .............................................. 320
Faculty ..................................................................... 320
College of Medicine and Life Sciences ......................... 323
Emergency Medical Services (EMS) Education ............... 323
EMS Paramedic Certificate ......................................... 324
EMT Basic, Certificate ............................................... 326
College of Natural Sciences and Mathematics ................ 327
Contacts ................................................................... 327
Degrees Offered ....................................................... 328
Accreditation ............................................................ 328
Admission Policies ..................................................... 328

Student Services ....................................................... 330
Student Responsibilities ............................................ 330
Degree Requirements ................................................ 332
BS in Data Science .................................................... 335
BS in General Studies ............................................... 340
Pre-Medical, Pre-Dental and Pre-Veterinary Concentrations ................................................................. 341
Honors .................................................................... 341
Department of Biological Sciences ............................... 342
BA in Biology .......................................................... 346
BS in Biology ........................................ 348
BS in Medical Technology ............................ 353
Minor in Biology ...................................... 355
Department of Chemistry & Biochemistry ............. 355
BA in Biochemistry .................................. 362
BA in Chemistry ..................................... 364
BS in Biochemistry .................................. 366
BS in Chemistry ...................................... 368
Minor in Chemistry .................................... 369
Minor in Green Chemistry & Engineering ................. 370
Department of Environmental Sciences .................. 370
BA in Environmental Studies ............................ 377
BS in Biology with a Concentration in Ecology and Organismal Biology .................. 378
BS in Environmental Geology ......................... 379
BS in Environmental Sciences ......................... 381
Minor in Environmental Biology ....................... 383
Minor in Environmental Sciences ....................... 383
Minor in Geology ..................................... 383
Department of Mathematics and Statistics ............... 384
BA in Mathematics ................................... 391
BS in Mathematics ................................... 395
Minor in Mathematics .................................. 402
Department of Physics and Astronomy .................... 402
BA in Astronomy ...................................... 407
BA in Physics ......................................... 408
BS in Physics ......................................... 410
Minor in Astrophysics .................................. 417
Minor in Physics ........................................ 417
Minor in Renewable Energy ............................. 417
Faculty .................................................. 418
College of Nursing .................................... 422
Contacts ................................................ 422
Degrees Offered ....................................... 422
BSN .................................................... 425

Admission Policies

NEW FIRST-YEAR STUDENTS

Required for Unconditional Direct Admission:

- 2.5 GPA or higher for test optional applicants
- 15 ACT/830-870 SAT and a minimum 2.5 GPA
- 16 ACT/880-910 SAT and above with a minimum 2.0 GPA

Minimum GPA requirements for test-optional applicants are determined by academic college, and the information is represented below.

Subject to Review:

- Test-optional applicants between 2.0 and 2.49 GPA
- Under a 15 ACT or 830-870 SAT and a 2.75 GPA or above
- 15 ACT or 830-870 SAT and a 2.0-2.49 GPA
- 16 ACT or 889-910 SAT and above, but less than a 2.0 GPA

Students should also have successfully completed a minimum of three years of high school mathematics (algebra I, algebra II and geometry) and high school chemistry.

Music

Audition required (call 419.530.2448 for an appointment)

Pre-Medicine, Pre-Dentistry, Pre-Veterinary Medicine

Pre-medicine, pre-dental and pre-veterinary medicine are pre-professional concentrations, not undergraduate majors. Students in any major may declare any concentration of their choosing in consultation with the Pre-Health Advising Center.

CHANGE OF COLLEGE

Students in good standing (i.e., with a cumulative UT GPA of 2.0 or higher) who wish to change from another college of The University of Toledo to the College of Arts and Letters should make an appointment with a college Advisor in the College Student Services Office to discuss their new major and have their academic records reviewed. All college requirements, including core, major and related field requirements, must be fulfilled as specified in the catalog for the year in which the student enters the College of Arts and Letters. Credit restrictions and level requirements for College of Arts and Letters students will apply.
ADMISSION WITH TRANSFER CREDIT FROM ANOTHER INSTITUTION

Course work from other institutions is accepted at the level of the UT course equivalent. All Study Abroad credit is accepted as transfer credit. Students with transfer credit are generally expected to fulfill all University and college course requirements for a degree in the College of Arts and Letters as specified in the catalog for the year in which they enter the College of Arts and Letters. In some cases, not all the credits that transfer into The University of Toledo will apply toward a degree in the College of Arts and Letters, e.g., developmental courses and elective credits in the major. Transfer students from other institutions must take at least 30 semester hours at The University of Toledo, including 12 semester hours of work in their major field (22 semester hours in Psychology) and 9 semester hours in their minor field, regardless of the number of hours transferred.

Students transferring to the University of Toledo in Spring 2007 or later, including transfer readmits, must meet minimum GPA requirements in their Arts and Letters majors and minors with both

1. the grades of all courses attempted at UT and

2. in a second calculation, the grades of all courses applied to the major from all institutions (including UT).

The grades of all courses (from all institutions) that are used by students to satisfy the core curriculum must be used in the calculation of the UT core curriculum GPA.

UT students who attend other institutions as guests or transient students in Fall 2008 or later must also meet minimum GPA requirements in their Arts and Letters majors and minors with

1. the grades of all courses applied to the major at UT and

2. in a second calculation, the grades of all courses applied to the major at all institutions (including UT).

The grades of all courses (from all institutions) that are used by students to satisfy the core curriculum must be used in the calculation of the UT core curriculum GPA. For the purposes of meeting minimum cumulative GPAs in a student’s major(s) and/or minor(s) and the core curriculum, the grades of all courses attempted at all institutions will be included in the GPA calculation(s).

Transfer students should note that The University of Toledo will include all course work taken at all institutions of higher education in the calculation to determine if a student will graduate with honors. All college course work ever taken is computed in determining eligibility for graduation with Latin honors (e.g. cum laude), although no student will be awarded a level of honors above that indicated by The University of Toledo cumulative grade point average (GPA). Note: The University of Toledo requires a minimum of 30 semester hours of standard letter graded courses from UT in order to qualify for graduation with Latin honors.

An applicant who has undertaken courses at a regionally accredited college or university and who submits an official transcript through the Office of Undergraduate Admission for Adult, Transfer and International Students will be admitted to the College of Arts and Letters, provided the student has maintained a minimum GPA of 2.0 on a 4.0 scale.

Exceptions to this minimum admission requirement for academic majors are rarely made and require the applicant to explain in a written petition the special circumstances that warrant waiver of the requirement. The undergraduate associate dean will consult with the appropriate academic offices and render a decision. Approval of the petition is not automatic, and those students who are admitted by petition will be placed on special probationary status and must meet certain conditions to remain enrolled.

If the college from which the applicant transfers lacks proper accreditation, the student may be denied transfer credit on the basis of the transcript, but may be allowed to obtain credit by passing advanced standing examinations with at least a C grade. Official transcripts of records from all schools previously attended must be on file with the Office of Undergraduate Admission for Adult, Transfer and International Students before the student will be permitted to register.

A SECOND DEGREE OR MAJOR AT THE UNIVERSITY OF TOLEDO

A student earning a first degree at The University of Toledo in a college other than Arts and Letters may earn a second bachelor’s degree in the College of Arts and Letters by satisfying all requirements for both degrees. An undergraduate with a degree from another institution is considered a transfer student. Note that students who readmit subsequent to earning their first degree may earn a second bachelor’s degree as long it is not concurrent with their residency for the first degree and does not duplicate the initial credential. In these cases, such a student is then considered a candidate for a second degree. See requirements for admission with transfer credit from another institution. See also sections on majors and minors for restrictions.

A student earning a degree at The University of Toledo in the College of Arts and Letters may earn a second degree in the college by completing the requirements of both degrees. General education courses that meet the requirements of both degrees will count for both. The two degrees must be of a different type (BFA and BM, BFA and BA, or BA and BM), and both must be offered by the College of Arts and Letters.

A student earning a Bachelor of Arts in the College of Arts and Letters may concurrently earn a second major in the same degree by completing the requirements of both majors. The second major may serve as a replacement for the “Related Fields” requirement in the Bachelor of Arts degree with department approval. It is important to understand that completing this pathway will result in the achievement of a single degree but with dual majors, from the College of Arts and Letters.

REQUIREMENTS FOR STUDENTS WITH AN ASSOCIATE’S DEGREE

Students holding an Associate of Arts or Associate of Science degree from an accredited college are encouraged to enroll in the College of Arts and Letters and, in many instances, may expect to earn an appropriate baccalaureate upon completion of two years of full-time study. Students with an Associate’s degree in a technical program will likely require more time to complete a bachelor’s degree. The following regulations apply:

- Students must complete the equivalent of the specified University and college core curriculum and distributive requirements for a
bachelor’s degree. In all baccalaureate programs, a minimum of 60 - 64 hours must be taken at the 2000 to 4000 levels; of these, a minimum of 30 - 32 hours must be taken at the 3000 to 4000 levels in baccalaureate degree-granting colleges. Course work from other institutions is accepted at the level of the UT course equivalent.

- Students may enroll in any departmental or interdisciplinary program for which they meet the admission criteria. All of the usual major and related fields requirements must be fulfilled as specified in the catalog for the year in which the student entered the College of Arts and Letters.

READMISSION OF FORMER STUDENTS
Students who have withdrawn from the College of Arts and Letters (or a previously-existing college containing a major currently offered in the College of Arts and Letters) and The University of Toledo and have not attended any other institution in the interim may be readmitted, provided they were eligible to continue enrollment in the college at the time they discontinued attendance. Such students should readmit through the Admissions Office. Students who readmit after more than 12 consecutive months’ absence must comply with existing college requirements at the time of readmission.

Academic Policies
Refer to UToledo Policy website (http://www.utoledo.edu/policies/) for academic policies that apply to all students.

ACADEMIC ADVISING
Academic advising is a process intended to help students derive as many benefits as possible from their education. This occurs when Advisors help students develop and reach academic and career goals. While the ultimate responsibility for making personal and educational decisions rests with the student, Advisors assist by helping to identify and assess alternatives and the consequences of decisions. Advising can be much more than selecting courses. The more frequently students arrange to meet with their Advisors, the better their needs can be served. New students, transfer students, students changing colleges, and continuing students are advised in the Student Services Office, University Hall Room 3000, by college staff Advisors. They:

- provide essential information;
- help students select courses to meet university general education and college requirements;
- suggest courses for the exploration of majors and minors; and
- help students evaluate academic progress and adjustment to university life.

Students with declared majors and/or minors are advised by departmental major or program Advisors, faculty who provide general information as well as more specialized information about majors and minor programs, departmental course offerings, and career and graduate opportunities. They help students select courses for core, major, related fields, and other requirements. Students seeking more than one major or degree, a minor, or admission to professional school should meet periodically with one or more additional Advisors. Departmental major advisors will be assigned within the department. Students can see their assigned academic advisor on their student profile in the the self service portal.

STUDENT RESPONSIBILITIES
Students are responsible for correctly selecting courses for their programs of study each semester and for fulfilling all degree requirements. Although Advisors will assist wherever possible, the final responsibility rests with the student. Students are expected to make sure that they are fulfilling all degree requirements, as published in the issue of the catalog under which they entered. Students who have been out of the College of Arts and Letters for 12 consecutive months are responsible for the requirements in the University catalog under which they reenter.

TRANSCRIPTS AND DEGREE AUDIT REPORTS
A transcript is a complete chronological list of a student’s academic course work (including all courses attempted and grades earned). It does not show how specific courses apply or do not apply to University and college requirements as stipulated in this catalog. For example, developmental, non-repeatable and certain other courses are not counted toward minimum credits for degrees, but appear on transcripts.

The Degree Audit Report (DAR) details all requirements applicable to a student’s academic program (degree, major, minor) and applies the student’s courses on the transcript (including transfer credit) to those requirements. The DAR should be used to identify requirements remaining when all registered courses are completed. Students may view their transcript and DAR through the myUT portal.

DECLARING OR CHANGING A MAJOR OR MINOR
To declare a College of Arts and Letters major or minor or change a College of Arts and Letters major or minor previously declared, students must send an email to ALSMadvising@utoledo.edu from their Rocket email account.

SEQUENCE OF COURSES
There is no single prescribed sequence of courses, except that all first-year students should take AR 1000 Orientation, College Composition I and II, and math unless their program of study indicates otherwise. Students should consult the later sections of the catalog devoted to programs of study and course offerings, and they should review their programs with their academic advisors to ensure they complete courses in the proper sequences. In addition, students should use their Degree Audit Reports to track their progress.

Outside the major, during the first two years, they should be sure to take those courses in the core requirements that are prerequisite to courses they wish to take as juniors and seniors.

STUDY ABROAD OR STUDY AWAY
Students who plan to study abroad or away must be sure that their proposed course of study is properly accredited. Its academic acceptability should be verified before departure. Students also should ascertain in advance from their Advisors whether the course work will count toward their core curriculum requirements, majors, or related
areas or only be regarded as elective. Credit for foreign language study is subject to the approval and recommendation of the department of foreign languages.

Information about study abroad programs is available from the Center for International Studies and Programs, Snyder Memorial, suite 1000: http://www.utoldeo.edu/cisp/. Your Advisor will also have general information about study abroad.

**TRANSIENT (GUEST) ENROLLMENT AT ANOTHER INSTITUTION**

College of Arts and Letters students must have advance permission both to enroll elsewhere as a guest and to take specific courses. The Transient Student form for this purpose is available in the Student Services Office and on the website: http://www.utoldeo.edu/offices/studentservices/facultystaff/faculty_forms.html.

Students enrolling without permission will be considered transfer readmits upon their return to UT. Arts and Letters students enrolled as transients or guests at another institution must submit an official transcript to the UT Office of Admission at the conclusion of the enrolled term after final grades have posted. Grades of all courses attempted in the major, minor, and the UT core curriculum will be used in cumulative GPA calculations.

**GPA RECALCULATION FOR REPEATED COURSES**

The College of Arts and Letters permits a maximum of 18 semester hours of course work to be deleted from the GPA calculation. Students who have had their GPAs recomputed under the Academic Forgiveness Policy are not eligible for grade deletions. Criteria governing GPA recalculation are given in the undergraduate policy 3364 71 07: Repeating a course and calculating GPA at http://www.utoldeo.edu/policies/academic/

Students should check with the Student Services Office for more specific information on this policy. Students may not use repeat courses taken at other institutions to qualify for a GPA recalculation.

**WITHDRAWAL POLICY (W, IW, DR GRADES)**

A student who wants to withdraw from a course must withdraw online or file a petition in the Registrar's Office by the deadline in the term of enrollment - https://www.utoldeo.edu/offices/registrar/forms.html. The number of credit hours of W (or the former grades of IW or DR - see note below) is limited to 22 hours for all undergraduate students in degree programs in the College of Arts and Letters. Once a student has accumulated 22 hours of W, IW or DR, any further withdrawal will be counted as an F in computation of the student's GPA for purposes of probation or suspension. In addition, students who receive financial aid risk the loss of financial aid if they accumulate excessive withdrawal hours.

Students who transfer into the College of Arts and Letters from another college at The University of Toledo will bring with them the number of W, IW and DR grades accumulated in their previous work.

**Note:** Assignment of the IW and DR grades has been discontinued at The University of Toledo.

**ACADEMIC PROBATION**

A student whose cumulative GPA is less than 2.0 is automatically placed on probation until a 2.0 cumulative GPA is achieved (See Withdrawal Policy above). It is recommended that a student on probation not enroll for more than 12 to 14 credits.

**ACADEMIC SUSPENSION**

Academic suspension means that a student is prohibited from registering at The University of Toledo for a period of at least one semester. Students are subject to academic suspension if their GPA falls below the minimum GPA listed below or if they fail to make sufficient progress toward attainment of the degree. (See Withdrawal Policy). Students may remove Incompletes while under suspension.

A student is subject to academic suspension if the cumulative GPA is less than:

- 1.0 for 10 to 19 hours attempted
- 1.5 for 20 to 29 hours attempted
- 1.7 for 30 to 39 hours attempted
- 1.8 for 40 to 49 hours attempted
- 1.9 for 50 to 59 hours attempted
- 2.0 for 60 or more hours attempted

After accumulating 60 credit hours without suspension, a student may be suspended if the cumulative GPA falls below 2.0 for two consecutive semesters.

**Trial Readmission Policy**

After the required suspension period, a student may petition for readmission to the College of Arts and Letters through the Student Services Office. Full details including procedures, deadlines, and how to file a petition for reinstatement can be found on the Student Services website (https://www.utoldeo.edu/offices/studentsservices/reinstatementpolicy1.html). If the petition is accepted, the college committee will determine the terms of the conditional registration agreement, under which the student will be permitted to re-enroll. Suspended students who are granted readmission must maintain the designated GPA for each semester thereafter and meet the conditions of their readmission agreement.

Students failing to meet these conditions are subject to a one-year suspension.

**Dismissal Policy**

Students who fail to meet the conditions for readmission after their second suspension are subject to dismissal and are not eligible for readmission to the College of Arts and Letters for at least three years. Criteria governing this policy are detailed in the undergraduate policy 3364 71 06: Academic Forgiveness - http://www.utoldeo.edu/policies/academic/

**ACADEMIC GRIEVANCE**

A student has the responsibility and right to call to the attention of an instructor any grade that the student believes to be in error or unfair.
A student may appeal the decision of the instructor, in order, to the department Chair, then to the college appeals committee, and then the Dean if the problem is not resolved. If the problem is not resolved at the college level, the student may appeal to the student grievance council (See also The University of Toledo Student Handbook on the Student Affairs webpage: http://www.utoledo.edu/studentaffairs/index.html (http://www.utoledo.edu/studentaffairs/)). A student must begin the appeals process no later than the end of the semester following the one in which the grievance arose.

**STATEMENT ON ACADEMIC DISHONESTY**

A student found to be academically dishonest by a faculty member may appeal, in order, to the department Chair, the college appeals committee, the Dean and the University student grievance council. The procedures for making an appeal to the student grievance council may be found in The University of Toledo Student Handbook on the Student Affairs website at http://www.utoledo.edu/studentaffairs/index.html (http://www.utoledo.edu/studentaffairs/).

Criteria governing this policy are detailed in the undergraduate policy 3364 71 04: Academic Dishonesty: http://www.utoledo.edu/policies/academic/undergraduate/

**COLLEGE LEVEL EXAMINATION PROGRAM (CLEP)**

The College of Arts and Letters will accept a maximum of 21 semester hours of CLEP through successful completion of the four general examinations. Additional credit may be earned through satisfactory scores on individual subject examinations. Specific information about general examination scores and credit can be found in the general section of the catalog: https://nextcatalog.utoledo.edu/general-section/earning-alternative-college-credit/ (http://utoledo-public.courseleaf.com/general-section/earning-alternative-college-credit/).

**ADVANCED PLACEMENT PROGRAM**

Refer to the University of Toledo Office of the Registrar webpage at http://www.utoledo.edu/offices/registrar/student_records/advan_credits.html for specific information on minimum scores and credits awarded for Advanced Placement examinations administered by the College Board Advanced Placement Program.

**PASS/NO CREDIT OPTION**

Refer to the individual programs of study in the undergraduate section of this catalog for the limitations on pass/no credit grading in effect for different majors. Undecided students, as a general rule, should not elect pass/no credit grading in major-level courses.

**GRADUATION EVALUATION REQUIREMENTS**

Detailed instructions on planning for graduation and ensuring the completion of requirements are available on the Student Services website: https://www.utoledo.edu/offices/student-services/faq/grad_steps.html

**FIELD EXPERIENCE/INTERNSHIP**

Policies and procedures for incorporating field experiences or internships in academic programs vary from major to major. Some majors require a field experience or internship; for other majors, they are optional. Students should seek information from their major departments and obtain advance approval for all field experiences or internships.

**Student Services**

The Office of Student Services supports Arts & Letters students throughout their academic careers, helping them derive as many benefits as possible from their education. The office's academic advisors are vital links to successful degree completion, providing students with services and resources to help them accomplish their goals.

Advisors assist students in understanding degree requirements, assessing progress toward degree completion, selecting courses and prerequisites, monitoring academic performance, discussing plans for the future, as well as one-on-one academic mentoring to students with academic issues or on academic probation.

For more information, go to the website at http://www.utoledo.edu/offices/studentservices/. (http://www.utoledo.edu/offices/studentservices/)

Michelle Sullivan, Interim Director of Student Services
University Hall Room 3000
michelle.sullivan@utoledo.edu (Adam.hintz2@utoledo.edu)
Phone: 419.530.2671

**Degree Requirements**

**Grade Point Averages**

A cumulative grade point average (GPA) reflects all grades earned, including grades of F and grades in repeated courses. Students must earn a minimum overall cumulative GPA of C (that is, a 2.0 GPA on a 4.0 scale) for all UT course work. In addition, students must earn a minimum cumulative GPA of C in the major, minor (optional) and UT core curriculum requirements with the grades of all courses attempted included in the GPA calculation. Some programs require a higher GPA in the major. Criteria governing this policy are detailed under 3364 71 07: GPA recalculation (http://www.utoledo.edu/policies/academic/undergraduate/pdfs/3364-71-07%20%20Repeating%20Course%20and%20GPA.pdf).

**Residency Requirement**

Students transferring from other institutions must earn at least 30 hours of credit at The University of Toledo; at least 12 of these must be in the major area except for Psychology which requires 22. For students pursuing a minor, at least 9 hours must be earned at The University of Toledo. Full-time students should take their last semester, and part-time students their last 12 hours, in residence, unless alternative arrangements have been made in advance with Student Services.

**Credit Hours and Levels**

1. Students must complete 120-124 credit hours of course work that must include the University and college core curriculum requirements,
and an area of concentration (major) and course work related to the major. The exact number of hours is determined by the program.

2. In all baccalaureate programs, a minimum of 60-64 hours must be taken at the 2000 to 4000 levels; of these a minimum of 30-32 hours must be taken at the 3000 to 4000 levels. (Courses transferred from community, junior or technical colleges offering Associate degrees will count at the levels of their UT equivalents.)

3. Students are cautioned to make use of their degree audit and review remaining requirements with their Advisor before every registration in order to make progress toward completion of their requirements in an orderly, timely manner.

4. Insofar as a student can complete the basic courses and the courses required for a chosen major in fewer than the hours required for a degree, the student must choose elective courses to complete the total hours, subject to the restrictions outlined below.

Credit Restrictions
Total earned hours shown on a student's transcript may not all be applicable to the 120-124 credits required for a degree, as follows:

1. Students with entrance deficiencies in mathematics and other students who are required or choose to take developmental course work will not be able to count those hours toward the degree.

2. No more than four hours of credit in performing ensembles (MUS 3010 to MUS 3190) will apply toward the degree.

3. No courses in typing, shorthand or keyboarding will apply toward the degree.

4. No more than two hours in Student Leadership Development I and II will apply toward the degree.

5. Duplicate credit - except for courses identified as repeatable courses, students will not receive credit for repeated courses (taking the same course twice), whether taken at The University of Toledo or elsewhere.

6. The college reserves the right to deny credit for other specific courses (including most SKLS and some UC courses) and for blanket technical credit not applicable to a student’s specific program.

7. A maximum of 2 credits of sport and physical courses are applicable toward a degree.

University General Education/Core Requirements
Students earning baccalaureate degrees in all colleges and programs are required to complete between 36 and 42 credit hours of courses that comprise the university core curriculum. Those courses are distributed in the areas of English composition, humanities/fine arts, social sciences, natural sciences and mathematics, and multicultural studies. Some colleges and programs require courses in these areas above those required to fulfill University core curriculum requirements. Students should consult their degree audit or their advisor for specific details.

Departmental Major
Every student must complete either a departmental major or an interdisciplinary major. Courses given in other colleges of the University may be credited to the major only with the approval of the Dean of the College of Arts and Letters upon recommendation of the Department Chair. Waiver of a required course or the substitution of a course from another department does not necessarily reduce the minimum credits required in the major.

See the complete list of departmental majors under “Degrees Offered” in the College of Arts and Letters section of this catalog.

The minimum number of semester hours a student must complete for a departmental major is prescribed by the department. A student may have two majors from two different departments within the College of Arts and Letters, provided the requirements of both programs are satisfied. Work in the second major may be accepted as fulfilling the related course requirement, but requires the approval of the Advisors in both departments. A student cannot use courses from the first major to satisfy the second and vice-versa. See section on "Earning a Second Degree" for the statement on requirements when two or more desired major programs are offered as different degrees.

Interdisciplinary Majors
A student may complete one of the interdisciplinary majors if accepted into that particular program. A student completing a departmental major and a second major in an interdisciplinary or interdepartmental major cannot use courses from the first major to satisfy the second or vice-versa. See the complete list of interdisciplinary majors under “Degrees Offered” in the College of Arts and Letters section of this catalog.

Minors
Many College of Arts and Letters departments and interdisciplinary programs offer minors. In addition, non-program minors are offered in the college. Specific minor requirements are listed under Programs of Study. Students wishing to pursue minors should consult with their primary program Advisors and then with an Advisor in Student Services. Not all minors can be added to all degree programs. Courses selected for the minor must be chosen from courses acceptable for credit toward a major in the college. In meeting requirements for some majors, work in the minor may be accepted as fulfilling the 18 hours of related courses, but only with the approval of the student’s major Advisor. At least 12 hours of the minor must be distinct from any credit hours used to fulfill any major the student is pursuing.

No more than six hours of courses taken for minor credit may be applied to the total College of Arts and Letters core curriculum requirements. A minimum GPA of 2.0 is required in the minor. Credit hours for a minor contained in the College of Arts and Letters vary from 18 to 22 hours, depending on the minor. At least nine of those hours must be completed at The University of Toledo. All minors must be declared and completed prior to graduation.

Certificates
The College of Arts and Letters offers several certificates containing credit-bearing courses which appear on an official transcript and give added value to career goals. See the programs in the Departments of Art, Economics, Communication, and World Languages and Cultures for more information.
Orientation
All new first-year students are required to take AR 1000 Orientation. The course is optional for transfer students.

Related Fields Courses
Every student who chooses a departmental major or interdisciplinary major also must complete a minimum of 18 hours in courses related to the major. These 18 hours must be in addition to courses taken to fulfill the basic requirements listed above. Each department defines the areas from which courses may be chosen by its majors, and these listings are given in other sections of this catalog under Programs of Study or in the student’s online degree audit. Related fields must be chosen from courses acceptable for credit in a College of Arts and Letters major. Generally, these are upper-level courses.

Courses offered by other colleges of the University may be credited to the major or to related courses only with the approval of the department Chair.

Writing Across the Curriculum
Students must pass both Composition I and II with a C or better. The College of Arts and Letters recommends that these requirements be met before completing 45 hours of course work.

After completing Composition I and II with a C or better, students must pass two writing intensive courses. The College of Arts and Letters recommends that the first of these writing courses be completed within the first 65 hours of course work, and the second within the first 90 hours. One of these courses must be within the student’s major. Students with dual majors must take a writing intensive course in each major. Students with interdisciplinary majors will meet this requirement by selecting courses in consultation with their Advisors, who will monitor students’ progress to help them complete these requirements in a timely fashion.

Transfer students from institutions that have required writing intensive courses should forward the syllabus to the Registrar’s office for review (transfer@utoledo.edu) to show that they have completed writing intensive courses comparable to those required in the College of Arts and Letters. Transfer students who have not taken writing intensive courses must meet the College of Arts and Letters Writing Across the Curriculum requirements.

Pre-Medical, Pre-Dental and Pre-Veterinary Program
Students interested in professional medical, dental or veterinary careers may choose to apply for the pre-medical, pre-dental or pre-veterinary programs. Students choosing this option must also complete the requirements for a major in a specific discipline or in an interdisciplinary baccalaureate program.

Students who have declared the pre-medical, pre-dental or pre-veterinary concentration will have access to additional advising support through the Pre-Health Advising Center, https://www.utoledo.edu/success/pre-health-advising/. (https://www.utoledo.edu/success/pre-health-advising/)

Arts and Letters Requirements
Students should consult with their Advisors in selecting courses that will meet college requirements. With careful planning, students will be able to satisfy both the UToledo Core Curriculum and the College of Arts and Letters requirements by taking the minimum required hours. A student may take no more than two courses (or two courses and one lab for natural sciences) under each departmental code in satisfying the Core requirements.

</table>
Option 1 - Demonstrate proficiency in a single foreign language

Select one of the following options:

1. Students majoring in the Social Sciences and Interdisciplinary Studies will take two courses (6 hours), one in the Arts and one in the Humanities in addition to those taken to meet the English composition, literature and history requirements listed above.

2. Students majoring in the Humanities (rather than the Arts) are required to complete one Fine Arts course.

3. Students pursuing the BM in Music or the BFA in Studio Art are exempt from this requirement.

4. Students are placed into foreign language courses through placement testing (see footnote 10.) Every student is required to demonstrate proficiency in a single foreign language (Arabic, Chinese, French, German, Japanese, Latin or Spanish) through the intermediate level (foreign language 2150) in option 1, or through the Elementary level (1120) in option 2, by successfully completing the foreign language course at this level, or by achieving an appropriate score on a proficiency/placement test administered by the Department of World Languages and Cultures that reflects the equivalent. Students may, alternatively, complete the sequence of SPED to fulfill this requirement.

5. Students must pass Composition I and Composition II with a grade of C or better.

6. Non-native speakers will take an English placement test to determine appropriate level.

7. Non-Native speakers of English should choose an ESL designated section of ENGL 1110.

8. Students are placed into mathematics courses by ACT scores or placement tests.

9. May replace with any mathematics course greater than MATH 1180.

Some majors require different Math courses - check with your Advisor.

10. Students are placed into mathematics courses by ACT scores or placement tests.

American History

**HIST 1130** Introduction To Historical Thinking (WAC)

**HIST 1200** Main Themes In American History

**HIST 2010** America To 1865

**HIST 2020** America From 1865

**HIST 2040** Ancient Near East

**HIST 2050** Ancient Greece

**HIST 2060** Ancient Rome

C. Students may choose any other core Arts and Humanities courses to complete additional Core Curriculum requirements, including courses that fulfill a Multicultural requirement, with the following restrictions:

1. Students majoring in the Social Sciences and Interdisciplinary Studies will take two courses (6 hours), one in the Arts and one in the Humanities in addition to those taken to meet the English composition, literature and history requirements listed above.

Arts and Humanities electives (for students majoring in Social Sciences and Interdisciplinary Studies):

- Students may select courses from art, art history, communication, English, film, foreign languages, history, humanities, music, philosophy, religious studies and theatre. The complete list of Arts and Humanities core courses can be found in the General part of the undergraduate catalog, in the Core Curriculum section.

2. Students majoring in the Humanities (rather than the Arts) are required to complete one Fine Arts course.

Fine Arts (for Humanities majors)

- Select 3 hours (course must be an appreciation or theory course, not a studio or skills course.)

4. Natural Sciences (University of Toledo Core Curriculum and College of Arts and Letters requirement)

UToledo Core Curriculum requirement is two courses for a minimum of 6 hours and must include one laboratory course. Students must take two courses from two different departments. The complete list of Natural Science core courses can be found in the General part of the undergraduate catalog, in the Core Curriculum section.

5. Social Sciences (University of Toledo Core Curriculum and College of Arts and Letters requirement)

UToledo Core Curriculum requirement is two courses for six hours in two different disciplines; Students majoring in Arts and Humanities will take nine hours of courses in Social Sciences. Students may select Social Science courses that also will meet a multicultural requirement. Students may select courses from anthropology, economics, geography, political science, psychology, and sociology. The complete list of Social Science core courses can be found in the General part of the undergraduate catalog, in the Core Curriculum section.

6. Foreign Language (College of Arts and Letters requirement)

Select one of the following options:

**SPAN 2150** Intermediate Spanish II

Option 2 - Complete study in a single language through 1120 or demonstrate competency to that level, AND complete either 6 additional hours of culture courses, or complete one semester in a study abroad program. Refer to the degree audit for a complete list of approved culture courses.

- Students must pass Composition I and Composition II with a grade of C or better.
- Non-native speakers will take an English placement test to determine appropriate level.
- Non-Native speakers of English should choose an ESL designated section of ENGL 1110.
- Students are placed into mathematics courses by ACT scores or placement tests.
- May replace with any mathematics course greater than MATH 1180.
- Some majors require different Math courses - check with your Advisor.
- Students pursuing the BM in Music or the BFA in Studio Art are exempt from this requirement.
- Students are placed into foreign language courses through placement testing (see footnote 10.) Every student is required to demonstrate proficiency in a single foreign language (Arabic, Chinese, French, German, Japanese, Latin or Spanish) through the intermediate level (foreign language 2150) in option 1, or through the Elementary level (1120) in option 2, by successfully completing the foreign language course at this level, or by achieving an appropriate score on a proficiency/placement test administered by the Department of World Languages and Cultures that reflects the equivalent. Students may, alternatively, complete the sequence of SPED to fulfill this requirement.
- Students beginning a foreign language should enroll in their chosen language at the elementary I level (1110) and take four semesters of foreign language if pursuing option 1, and two semesters if pursuing option 2. Those continuing a foreign language or attempting to demonstrate competency by examination should take a proficiency/placement test. Students with two or more years of French, German or Spanish in high school who place below an intermediate course may enroll in an intensive review course (1500) that covers the material in the first two semesters (1110 and 1120), and then complete the intermediate level courses (2140 and 2150.)
- Culture courses selected to fulfill this requirement will not simultaneously satisfy core curriculum US Diversity or Non-US Diversity requirements.

**HIST 2010** America To 1865

**HIST 2020** America From 1865

**HIST 2040** Ancient Near East

**HIST 2050** Ancient Greece

**HIST 2060** Ancient Rome

**HIST 1200** Main Themes In American History

**HIST 1130** Introduction To Historical Thinking (WAC)

**HIST 2040** Ancient Near East

**HIST 2050** Ancient Greece

**HIST 2060** Ancient Rome

**HIST 1130** Introduction To Historical Thinking (WAC)

Fine Arts (for Humanities majors)

- Select 3 hours (course must be an appreciation or theory course, not a studio or skills course.)

4. Natural Sciences (University of Toledo Core Curriculum and College of Arts and Letters requirement)

UToledo Core Curriculum requirement is two courses for a minimum of 6 hours and must include one laboratory course. Students must take two courses from two different departments. The complete list of Natural Science core courses can be found in the General part of the undergraduate catalog, in the Core Curriculum section.

5. Social Sciences (University of Toledo Core Curriculum and College of Arts and Letters requirement)

UToledo Core Curriculum requirement is two courses for six hours in two different disciplines; Students majoring in Arts and Humanities will take nine hours of courses in Social Sciences. Students may select Social Science courses that also will meet a multicultural requirement. Students may select courses from anthropology, economics, geography, political science, psychology, and sociology. The complete list of Social Science core courses can be found in the General part of the undergraduate catalog, in the Core Curriculum section.

6. Foreign Language (College of Arts and Letters requirement)

Select one of the following options:

**Option 1** - Demonstrate proficiency in a single foreign language through the intermediate level.

- **ARBC 2150** Intermediate Arabic II
- **CHIN 2150** Intermediate Chinese II
- **FREN 2150** Intermediate French II
- **GERM 2150** Intermediate German II
- **JAPN 2150** Intermediate Japanese II

**SPAN 2150** Intermediate Spanish II

Option 2 - Complete study in a single language through 1120 or demonstrate competency to that level, AND complete either 6 additional hours of culture courses, or complete one semester in a study abroad program. Refer to the degree audit for a complete list of approved culture courses.

- Students must pass Composition I and Composition II with a grade of C or better.

- Culture courses selected to fulfill this requirement will not simultaneously satisfy core curriculum US Diversity or Non-US Diversity requirements.

**Honors**

- Departmental Honors in Arts and Letters (p. 20)
- Student Selection and Admission for the Jesup Scott Honors College (p. 20)
- Requirements for the Jesup Scott Honors College (p. 20)
- Honors Courses (HON) (p. 20)

Honors work in the College of Arts and Letters is available to academically talented and highly motivated students. Students may pursue Departmental Honors only, offered by individual departments within the college, or they may pursue College Honors, which is offered in conjunction with the Jesup Scott Honors College (p. 475) and requires...
students to complete both Departmental Honors and the full JSHC requirements.

DEPARTMENTAL HONORS IN ARTS AND LETTERS
All departments in the College of Arts and Letters offer Departmental Honors, which requires the successful completion of an honors thesis, creative activity, or original research project in the student’s major that is supervised by a faculty member in that department. Each College of Arts and Letters department sets its own specific requirements for Departmental Honors, and those requirements are described under the departmental entries in this catalog. Students who meet the criteria for Departmental Honors in their major can pursue Departmental Honors without being enrolled in the Jesup Scott Honors College.

STUDENT SELECTION AND ADMISSION FOR THE JESUP SCOTT HONORS COLLEGE
Students majoring within the College of Arts and Letters may apply to the Jesup Scott Honors College in order to receive College Honors. Students entering directly from high school are admitted based on a review of application materials, which include a high school transcript, references, an essay, and an extracurricular resume. Students with a high school GPA of 3.75 or higher are encouraged to apply. Highly motivated students with a minimum high school GPA of 3.5 also are considered for admission to the program.

Currently enrolled University of Toledo students and transfer students may apply for admission to the College Honors Program if they have completed at least 15, but not more than 60, graded semester hours of college work, and earned a minimum GPA of 3.3 (4.0 scale).

Students are admitted to the College Honors program on a space-available basis. For further details on the Jesup Scott Honors College, please see: http://www.utoledo.edu/honors/.

REQUIREMENTS FOR THE JESUP SCOTT HONORS COLLEGE
Please see the Jesup Scott Honors College requirements here for a full overview: https://catalog.utoledo.edu/undergraduate/jesup-scott-honors/jesup-scott-honors-college-program/

Note that College of Arts and Letters students enrolled in the Jesup Scott Honors College are required to take Departmental Honors as part of the JSHC curriculum. Double majors in JSHC need fulfill Departmental Honors in only one of their majors.

HONORS COURSES (HON)
Honors courses are of two kinds - those offered by the Jesup Scott Honors College and those offered by various departments and colleges. Consult the appropriate portion of this catalog for a listing.

Department of Art

ACCREDITING BODY: National Association of Schools of Arts and Design (NASAD)

Barbara WF Miner, Chair

The Department of Art, housed in the Center for the Visual Arts, and the Center for Sculptural Studies on the museum campus, features new
AED 3300 Crafts In Art
[3 credit hours]
This course is designed to investigate the philosophy and variety of craft processes used to make art. Topics that may be covered include fibers, metal crafts, ceramics, paper making.
Term Offered: Spring, Summer, Fall

AED 3500 Innovations In Art Education
[3 credit hours]
An introduction to new directions in secondary art education. Current views of philosophy and psychology are implemented as the rationale for contemporary curricula in art education. Field experience is to be arranged.
Term Offered: Spring

AED 3940 Art Field Placements In The Elementary School
[1-4 credit hours]
Field placement in an elementary school setting allowing the undergraduate student, with art teacher approval, to develop a course of study that will satisfy the special needs of the student in art education.
Term Offered: Spring, Summer, Fall

AED 4140 Art Education For The Special Child
[3 credit hours]
This course introduces and surveys a wide variety of art strategies and instructional adaptations for use with the child with physical, emotional or mental differences.
Term Offered: Spring, Fall

AED 4200 Computer Graphics In Art Education
[3 credit hours]
This course examines the tools, technology and instructional applications of computer graphics in art settings. This course is especially appropriate for art educators interested in integrating art concepts using the Macintosh environment.
Term Offered: Spring

AED 4230 Integrating Aesthetic Experiences
[3 credit hours]
This course will provide students in education an overview of the role of art and music in curriculum development. (Students may enroll in either art or music education sections.)
Term Offered: Fall

AED 4300 Media And Methods In Therapeutic Art
[3 credit hours]
An investigation into group and individual processes as they relate to art media and methods in therapeutic art will be presented. Experiences in art media will be explored.
Prerequisites: AED 4560 with a minimum grade of D-
Term Offered: Spring

AED 4450 Curriculum In Art Education
[3 credit hours]
An exploration of discipline-based art education (DBAE) philosophy in the schools. Field placement in the Toledo Museum of Art's Youth program and the area schools will be used to implement the theoretical base.
Term Offered: Spring, Fall

AED 4560 Introduction To Therapeutic Art
[3 credit hours]
This course will introduce students to therapeutic art through investigation of theories in art education and art therapy. Students will explore art media and methods in therapeutic art programming.
Term Offered: Fall

AED 4900 Seminar In Professional Development
[2 credit hours]
This seminar is designed to enhance the student teacher's final preparation for employment. Professional issues, ethical behavior, interview techniques and other processes and concerns involved in entry into the profession will be examined.
Corequisites: AED 4930
Term Offered: Spring, Fall

AED 4930 Student Teaching In Art
[6-12 credit hours]
Planned field experiences in public school classrooms under the direction of experienced art teachers. Gradual acceptance of full responsibility by student teacher. A scheduled time will be included to facilitating professional practices.
Prerequisites: Upper Division with a score of 1
Term Offered: Spring, Fall

AED 4950 Innovations In Art Education
[3 credit hours]
Students are introduced to a variety of activities and materials based upon children's interests and needs, available materials, and time allotted to art activities in the self-contained classroom.

AED 4990 Individual Study In Art Education For The Undergraduate Student
[1-4 credit hours]
Individual study is designed to provide the student the opportunity to work individually on professional problems under the direction of the art education staff without formal class meetings.
Term Offered: Spring, Summer, Fall

ART 1030 Multi-Cultural Art Appreciation A Lived Game of Contemporary Art
[3 credit hours]
This course uses a narrative framework drawn from Alternate Reality Games (ARGs) so that it is not just a venue for being told about or discussing artworks, but for experiencing them. In the course, encounters with art in virtual and real spaces are reflected on through an online journal, image collections, the creation of visual artifacts, and individualized feedback on each student's own work from peers. Not for major credit in Art, Art History or Art Education.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities

ART 1040 Foundations of Art Studio Technology
[3 credit hours]
Historical and hands-on overview of human interaction with tools; from simple levers to 3D printers and CNC machines. Through studio projects, research, assigned readings and written analysis, students will integrate philosophical and practical concepts. Students will acquire skills and understanding of the tools, techniques and collaborative processes necessary to respond to a rapidly changing global economy and job market. Web-assisted course.
Core Arts & Humanities
ART 1050 Foundations of Digital Media  
[3 credit hours]  
This course introduces students to the basic digital technologies of contemporary art and design. Web-assisted course. Humanities core course.  
Term Offered: Spring, Fall  
Core Arts & Humanities

ART 1060 Foundations of 3D Design  
[3 credit hours]  
Exploration of design concepts, formal and conceptual skills, materials and color, through media manipulation and study of three-dimensional space. Discussion of contemporary studio practices and critiquing skills included. Web-assisted course. Humanities core course.  
Term Offered: Spring, Fall  
Core Arts & Humanities

ART 1070 Foundations of Digital Media  
[3 credit hours]  
This course introduces students to the basic digital technologies of contemporary art and design. Web-assisted course. Humanities core course.  
Term Offered: Spring, Summer, Fall  
Core Arts & Humanities

ART 1080 Foundations of Drawing I  
[3 credit hours]  
Various approaches to drawing intended to develop skills, perception, and visual acuity. Introduction to a broad range of subject matter and a variety of graphic media. Web-assisted course. Humanities core course.  
Term Offered: Spring, Summer, Fall  
Core Arts & Humanities

ART 1090 Foundations of Drawing II  
[3 credit hours]  
Dimensional, perspective and volumetric drawing applied to natural, man-made forms, environment and the figure. Rendering techniques, skills and exploration of media integrated with formal composition. Web-assisted course. Humanities core course.  
Prerequisites: ART 1080 with a minimum grade of D-  
Term Offered: Spring, Fall  
Core Arts & Humanities

ART 1110 Art Journey  
[3 credit hours]  
Distance learning course that introduces aesthetic, cultural and social interpretations of art, community and justice against the background of a "virtual" journey across the United States. Web-assisted course. Humanities core course.  
Term Offered: Spring, Summer  
Core Arts & Humanities, Trans Mod Arts and Humanities

ART 1990 Special Topics in Art  
[3 credit hours]  
Group study in studio topics by various instructors. Web-assisted course. May be repeated under different course titles.  
Term Offered: Spring, Summer, Fall  
ART 2010 Graphic Design I  
[3 credit hours]  
This course introduces student to fundamental tools for graphic design. Image manipulation, typography, and composition are all explored through bitmap, vector, and page layout programs. Web-assisted course.  
Prerequisites: ART 1070 with a minimum grade of D-  
Term Offered: Spring

ART 2020 Graphic Design II  
[3 credit hours]  
This course introduces students to fundamental tools for web and interactive design. Topics from Graphic Design I (image manipulation, typography, and composition) are further developed through web-based projects exploring issues specific to digital display and mobile devices. Web-assisted course.  
Prerequisites: ART 1070 with a minimum grade of D-  
Term Offered: Fall  
ART 2030 Introduction to Photography  
[3 credit hours]  
An introduction to photography as a fine art medium; includes digital and traditional camera operations, printing processes, presentation techniques and historic and contemporary photographic concerns. Web-assisted course.  
Term Offered: Spring, Summer, Fall  
ART 2100 Life Drawing  
[3 credit hours]  
Development of visual and technical skills necessary to represent the figure, working from live models. Presentations focused on artistic understanding of the human body in architectural space, proportion, volume, and anatomy. Web-assisted course.  
Prerequisites: ART 1090 with a minimum grade of D-  
Term Offered: Spring, Fall  
ART 2110 Introduction to Printmaking  
[3 credit hours]  
Study of basic print materials and media, including relief, monoprint, planographic and intaglio process, general print shop skills, and safety practices. The course forms the basis for further exploration. Web-assisted course.  
Prerequisites: ART 1050 with a minimum grade of D- and ART 1080 with a minimum grade of D-  
Term Offered: Spring, Fall  
ART 2200 Introduction to Sculpture  
[3 credit hours]  
An exploration of the application of traditional methods of sculpture making to additive, subtractive, constructive, and replicative processes with clay, plaster, wood, stone, and metal. Formal and expressive content addressed. Web-assisted course.  
Prerequisites: (ART 1040 with a minimum grade of D- or ART 1060 with a minimum grade of D-)  
Term Offered: Spring, Fall  
ART 2210 Introduction to Ceramics  
[3 credit hours]  
Basic ceramic techniques explored. Introduction to hand-building, simple mold techniques and the potter's wheel. Basic glaze and clay body formulation and firing procedures. Web-assisted course.  
Term Offered: Spring, Fall  
ART 2300 Introduction to Painting  
[3 credit hours]  
Introduction and overview of painting materials and techniques; may include oil, acrylic, and watercolor media. Explores design concepts, formal and conceptual skills, and color theory. Web-assisted course.  
Prerequisites: ART 1050 with a minimum grade of D- or ART 1090 with a minimum grade of D-  
Term Offered: Spring, Fall
ART 2800 Visual Literacy-Data Visualization
[3 credit hours]
This course introduces students to the concepts of visual literacy and data visualization. Students will learn to observe and analyze imagery and data. Web-assisted course.
Term Offered: Spring, Fall

ART 3000 Photography: Topics
[3 credit hours]
Varying studio topics in fine art photography and digital imaging, including Digital Photography Expanded and B&W photography. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2030 with a minimum grade of D-
Term Offered: Spring, Fall

ART 3010 Interactive Coding
[3 credit hours]
Varying studio topics in interactive new media including web-art and the exploration of interface design and information dissemination. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2020 with a minimum grade of D-
Term Offered: Fall

ART 3100 Printmaking: Topics
[3 credit hours]
Studio courses focusing on one of the following disciplines: drawing, painting, or printmaking, within separate class settings. Courses explore various topics and techniques. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2110 with a minimum grade of D-
Term Offered: Spring, Fall

ART 3110 2D: Topics
[3 credit hours]
Studio courses in any of the following disciplines: drawing, painting, or printmaking, or mixed media within separate class settings. Courses may explore various concepts and processes relating to the creation of works of art. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2110 with a minimum grade of D- or ART 2300 with a minimum grade of D-
Term Offered: Spring, Fall

ART 3120 Painting: Topics
[3 credit hours]
Studio course in one of the following disciplines: drawing, painting, or printmaking, within separate class settings. Courses deal with various concepts and topics. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2300 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

ART 3200 Sculpture: Topics
[3 credit hours]
Varying studio topics in 3D art, including the creation of works and the exploration of new models of sculpture including installation. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2200 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

ART 3210 Ceramics: Topics
[3 credit hours]
Varying topics in ceramics creation and processes, including ceramics form execution. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2210 with a minimum grade of D-
Term Offered: Spring, Fall

ART 3400 Concepts in Art, Studio and Theory
[3 credit hours]
This course surveys advanced theories and practices of contemporary art while creating a forum for engaging visiting artists and the broader art community. The course prepares studio art majors for their degree capstone. Web-assisted course.
Prerequisites: ART 1050 with a minimum grade of D- and ARTH 2050 with a minimum grade of D- or ARTH 2060 with a minimum grade of D-
Term Offered: Fall

ART 3450 Contemporary Design Methods and Practices
[3 credit hours]
Survey of methods, techniques, and professional practices in new media design including: historical overview, creative and design processes, new media design environments, marketing, commerce, workflow, and collaboration. Web-assisted course. May be offered as WAC. Web-assisted course.
Term Offered: Spring, Fall

ART 3500 Visual Literacy-Data Visualization
[3 credit hours]
This course introduces students to the concepts of visual literacy and data visualization. Students will learn to observe and analyze imagery and data. Web-assisted course.
Term Offered: Spring, Fall

ART 3510 Ceramics: Topics
[3 credit hours]
Varying topics in ceramics creation and processes, including ceramics form execution. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2210 with a minimum grade of D-
Term Offered: Spring, Fall

ART 3520 Ceramics: Topics
[3 credit hours]
Varying topics in ceramics creation and processes, including ceramics form execution. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2210 with a minimum grade of D-
Term Offered: Spring, Fall

ART 3530 Ceramics: Topics
[3 credit hours]
Varying topics in ceramics creation and processes, including ceramics form execution. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2210 with a minimum grade of D-
Term Offered: Spring, Fall

ART 3540 Ceramics: Topics
[3 credit hours]
Varying topics in ceramics creation and processes, including ceramics form execution. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2210 with a minimum grade of D-
Term Offered: Spring, Fall

ART 3550 Ceramics: Topics
[3 credit hours]
Varying topics in ceramics creation and processes, including ceramics form execution. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2210 with a minimum grade of D-
Term Offered: Spring, Fall

ART 3560 Ceramics: Topics
[3 credit hours]
Varying topics in ceramics creation and processes, including ceramics form execution. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2210 with a minimum grade of D-
Term Offered: Spring, Fall

ART 3570 Ceramics: Topics
[3 credit hours]
Varying topics in ceramics creation and processes, including ceramics form execution. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2210 with a minimum grade of D-
Term Offered: Spring, Fall

ART 3800 Visual Literacy-Data Visualization
[3 credit hours]
This course introduces students to the concepts of visual literacy and data visualization. Students will learn to observe and analyze imagery and data. Web-assisted course.
Term Offered: Spring, Fall

ART 3850 Gallery Practices
[3 credit hours]
Workshop covering the planning, installing, promoting, and documenting of exhibitions. Offers hands-on training and directly engages students in all aspects of UT's CVA Gallery operations. May be offered as WAC. Web-assisted course.
Term Offered: Spring, Fall

ART 3900 Advanced Graphic Design: Topic
[3 credit hours]
Advanced studio courses in graphic and interactive design within separate class settings. Topics such as publication design, identity and branding, merchandise design, data visualization, and environmental graphics may be covered. May be repeated under differing course titles. Web assisted course. Prerequisite: ART 2020 Web-assisted course.
Prerequisites: ART 2020 with a minimum grade of D-
Term Offered: Spring, Fall

ART 3910 Outsider Art and Community Practice
[3 credit hours]
This course will study the role and advantage of community-based “Supported Studios”; art studios facilitated by practicing artists specifically attuned to the needs of people with disabilities. Students will study the history and contemporary positioning of such creative spaces and the relevant pedagogical imperatives inherent in the delivery of services. Students will also research evolving definitions of “ Outsider Art” and “ Outsider Artists”. A variety of methods of study, including visiting working Supported Studios will be employed.
Term Offered: Spring, Fall

ART 3950 Contemporary Design Methods and Practices
[3 credit hours]
Survey of methods, techniques, and professional practices in new media design including: historical overview, creative and design processes, new media design environments, marketing, commerce, workflow, and collaboration. Web-assisted course. May be offered as WAC.
Term Offered: Fall

ART 3990 Special Topics in Art
[3 credit hours]
Group study in studio topics by various instructors. Web-assisted course. May be repeated under different course titles.
Term Offered: Summer, Fall
ART 4000 Advanced Photography: Topics
[3 credit hours]
Advanced studio courses in fine art photography and digital imaging, within separate class settings that may include a variety of processes and topics. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2030 with a minimum grade of D-
Term Offered: Spring, Fall

ART 4100 Game Design: Topic
[3 credit hours]
Advanced studio courses in digital game design and interactive media within separate class settings. Courses focus on developing interactive artworks using 2D and 3D game design tools. Topics such as virtual reality, coding, graphics, character design, interface, interaction, and sound may be covered. May be repeated under different course titles. Web assisted course.
Prerequisites: ART 3010 with a minimum grade of D-
Term Offered: Spring, Fall

ART 4120 Advanced Painting: Topic
[3 credit hours]
Advanced studio courses in painting and related media within separate class settings. Courses deal with various concepts and topics. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2110 with a minimum grade of D- and ART 2300 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

ART 4200 Advanced Sculpture: Topic
[3 credit hours]
Advanced studio courses in 3D form creation that, within separate class settings, address a variety of processes and topics. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 1050 with a minimum grade of D- and ART 1060 (may be taken concurrently) with a minimum grade of D- and ART 1080 with a minimum grade of D- and ART 1090 with a minimum grade of D- and ART 2200 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

ART 4210 Advanced Ceramics: Topic
[3 credit hours]
Advanced studio topics in 3D art include the creation of works and the further exploration of emerging issues in contemporary ceramics. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2210 with a minimum grade of D-
Term Offered: Spring, Fall

ART 4240 Bio-Design Challenge
[3 credit hours]
Interdisciplinary teams research and prototype solutions to complex global challenges. Student teams may include but are not limited to: Biology, Art & Design, or Engineering. Students fabricate experimental design solutions in response to challenges that combine design, biotechnology and biomaterials with a focus on future applications. The course culminates in a locally juried competition, the winning team travels to the annual Biodesign Summit at which students present and compete for prizes in an international forum.
Term Offered: Spring, Fall

ART 4300 Bio-Design Challenge
[3 credit hours]
Interdisciplinary teams research and prototype solutions to complex global challenges. Student teams may include but are not limited to: Biology, Art & Design, or Engineering. Students fabricate experimental design solutions in response to challenges that combine design, biotechnology and biomaterials with a focus on future applications. The course culminates in a locally juried competition, the winning team travels to the annual Biodesign Summit at which students present and compete for prizes in an international forum.
Term Offered: Spring, Fall

ART 4360 Installation Art
[3 credit hours]
Study of altering a defined physical and psychological space as an art medium. Includes a study of the history of installations.
Prerequisites: ART 2200 with a minimum grade of D- or ART 2210 with a minimum grade of D- or ART 2200 with a minimum grade of D- or ART 2110 with a minimum grade of D- or ART 2300 with a minimum grade of D- or ART 2010 with a minimum grade of D- or ART 2030 with a minimum grade of D-
Term Offered: Spring, Fall

ART 4370 Wearable Conditions
[3 credit hours]
In this course, students will experiment with and combine media through technology and traditional construction methods to enhance their abilities to see form and to develop personal and group visual language. Students are encouraged to become more effective and original communicators through the experience of using materials in innovative ways and through the examination of the possibilities of these materials for creative expression.
Prerequisites: ART 2200 with a minimum grade of D- or ART 2210 with a minimum grade of D- or ART 2100 with a minimum grade of D- or ART 2110 with a minimum grade of D- or ART 2300 with a minimum grade of D- or ART 2010 with a minimum grade of D- or ART 2030 with a minimum grade of D-
Term Offered: Spring, Fall
ART 4380 Mixed Media: Topics
[3 credit hours]
Studio course in one of the following disciplines: drawing, painting, or printmaking, within separate class settings. Courses deal with various concepts and topics. Web-assisted course. May be repeated under different course titles.
Prerequisites: ART 2200 with a minimum grade of D- or ART 2210 with a minimum grade of D- or ART 2100 with a minimum grade of D- or ART 2110 with a minimum grade of D- or ART 2300 with a minimum grade of D- or ART 2010 with a minimum grade of D- or ART 2030 with a minimum grade of D-
Term Offered: Spring, Fall

ART 4400 BFA Thesis
[3 credit hours]
A capstone course to be taken by BFA students during the fall semester that creates a context for accomplishing a professional gallery exhibition with supporting materials. Web-assisted course.
Term Offered: Fall

ART 4410 BA Thesis Project
[3 credit hours]
A capstone course taken by BAVA students resulting in topic-based projects and published bodies of work relating to their area(s) of focus. Web-assisted course.
Term Offered: Spring

ART 4850 Professional Practices
[3 credit hours]
Professional skills WAC course for advanced art students. Topics include portfolios, resumes, taxes, contracts, shipping, documenting artwork, artists’ statements, exhibitions/competitions, galleries, artists’ talks and more. Web-assisted course.
Term Offered: Fall

ART 4910 Independent Study
[1-6 credit hours]
Individual study into special studio problems. Weekly critiques. Every semester. Time arranged. Web-assisted course. May be repeated as topic varies.
Term Offered: Spring, Summer, Fall

ART 4940 Internship
[1-4 credit hours]
Student works in professional venue related to a diversity of art fields or endeavors. Web-assisted course. May be repeated for a maximum of 8 credit hours.
Term Offered: Spring, Summer, Fall

ART 4950 Design Project: Topics
[3 credit hours]
Working with AMP students and art history faculty, students will create an exhibition or special project related to topic studied in ARTH 3950. Web-assisted course.
Prerequisites: ART 3900 with a minimum grade of D-
Term Offered: Spring, Fall

ART 4990 Special Studies
[1-6 credit hours]
Group study in studio topics by various instructors. May be repeated when the topic varies.

ARTH 1500 Art In History
[3 credit hours]
Introduction to the aesthetic, cultural and social interpretation of works of art and architecture, and to the historical relationships of artists, patrons, and audiences in art’s production and purposes. Web-assisted course. Humanities core course. (Not for major credit in Art History, Studio Art or Art Education).
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

ARTH 2050 History Of Western Art I
[3 credit hours]
Introduces students to major styles of western art from prehistoric to Early Renaissance. Students will learn to analyze art in terms of formal, cultural, historical, and iconographic contexts. Web-assisted course.
Term Offered: Spring, Fall

ARTH 2060 History Of Western Art II
[3 credit hours]
Introduces students to major styles of western art from the Renaissance through the modern era. Students will learn to analyze art in terms of formal, cultural, historical, and iconographic contexts. Web-assisted course.
Term Offered: Spring, Fall

ARTH 2080 History Of Modern Art
[3 credit hours]
European and American art 1700-1940, from the Rococo through Romanticism, Impressionism, Expressionism, Cubism, Dada, and Surrealism. Web-assisted course. Humanities core course.
Term Offered: Spring
Core Arts & Humanities

ARTH 2100 Asian Art
[3 credit hours]
An introduction to the architecture, painting and sculpture of India, China and Japan and their relationship to the major religions and philosophies of each culture. Web-assisted course.
Multicultural Non-US Diversity

ARTH 2200 Ethnographic Art
[3 credit hours]
Contextual exploration of traditional art forms in the principle cultures of the Americas, Africa and Oceania. Web-assisted course.
Term Offered: Spring, Fall
Multicultural Non-US Diversity

ARTH 2300 Introduction To Architecture
[3 credit hours]
Study of architectural design (function, materials, structure, aesthetics and symbolism), with focus on significant historical examples from antiquity through the late 20th century. Web-assisted course.
Term Offered: Fall
ARTH 2550 History of Graphic Design
[3 credit hours]
History of Graphic Design introduces students to the history and theory of graphic design from the Roman codex to the modern poster. Topics examined include: how imagery interacts with text aesthetically and visually, the logic and development of typefaces, and the relationship and importance of graphic design to social and political developments throughout history. This three-credit course addresses graphic design from Western cultures and dynamic eras. ARTH 2550 partially fulfills the curricular requirements in Humanities and Fine Arts and is an elective within the Department of Art.
Core Arts & Humanities

ARTH 2700 Women Artists In History
[3 credit hours]
An introductory survey of women artists from the Middle Ages to the present with consideration of their position in the formation of art history's canon. Web-assisted course.

ARTH 2980 Special Topics
[1-3 credit hours]
Topics in art history selected by instructor; may be repeated when topic varies. Web-assisted course.
Term Offered: Spring, Fall

ARTH 3080 The Power of Visual Persuasion
[3 credit hours]
This course is designed for the non-specialist. The course is intended to increase understanding and appreciation of visual culture through readings, recorded lectures and documentary films, discussion, reflective and critical writing, and a visit to a local or regional museum. The development of cognitive and critical processes, as they relate to visual culture, is emphasized.
Term Offered: Spring, Fall

ARTH 3110 Topics In Ancient Art
[3 credit hours]
Special topics in the history of the art or architecture of the ancient world; may be repeated when topic varies. Web-assisted course. May be offered as WAC.
Term Offered: Summer

ARTH 3130 Topics In Medieval Art
[3 credit hours]
Special topics in the history of western art or architecture from 200 to 1500 A.D.; may be repeated when topic varies. Web-assisted course. May be offered as WAC.
Term Offered: Fall

ARTH 3150 Topics In Renaissance Art
[3 credit hours]
Special topics in the history of Renaissance art or architecture; may be repeated when topic varies. Web-assisted course.
Term Offered: Spring, Fall

ARTH 3190 Topics In 19th-Century Art
[3 credit hours]
Special topics in the history of 19th century art. May be repeated when topic varies. Web-assisted course.

ARTH 3210 Topics In 20th-Century Art
[3 credit hours]
Special topics in the history of 20th century art. May be repeated when topic varies. Web-assisted course. May be offered as WAC.

ARTH 3230 Topics In American Art
[3 credit hours]
Special topics in the history of American art or architecture. May be repeated when topic varies. Web-assisted course.
Term Offered: Spring, Fall

ARTH 3290 Topics In Architecture
[3 credit hours]
Special topics in the history of architecture; may be repeated when topic varies. Web-assisted course.
Term Offered: Spring

ARTH 3300 African Art
[3 credit hours]
Study of the diversity of African art. The course will emphasize region and style with focus upon the collections of African art in the Toledo Museum of Art. Web-assisted course.
Term Offered: Spring, Summer, Fall
Multicultural Non-US Diversity

ARTH 3350 Ancient Art Of The Americas
[3 credit hours]
A course that focuses on the artifacts produced by the indigenous populations of the Americas before the arrival of Columbus in the New World. Web-assisted course.
Term Offered: Spring, Summer, Fall
Multicultural Non-US Diversity

ARTH 3400 Contemporary Art
[3 credit hours]
This WAC course introduces students to art of the 20th and 21st centuries, relating recent makers and movements to critical, cultural, and social issues. Web-assisted course.
Term Offered: Spring, Fall

ARTH 3500 History Of Photography
[3 credit hours]
An in-depth study of the history of photography. Web-assisted course.
Term Offered: Fall

ARTH 3600 History Of New Media
[3 credit hours]
This course explores the development of technology as an art medium with a focus on significant historical examples from the 19th through the 21st centuries. Web-assisted course.
Term Offered: Fall
ARTH 3700 Art And Feminism
[3 credit hours]
A WAC course offering study of 20th and 21st century feminist thought in relation to contemporary art makers and social issues, with consideration of performance and installation. Web-assisted course.
Term Offered: Spring

ARTH 3750 Art and Disease - WAC
[3 credit hours]
This WAC course considers how objects of material culture (film, photography, painting, sculpture, etc.) have intersected with disease while studying disease-related texts and histories of contagion (e.g., AIDS). Web-assisted course.
Term Offered: Spring

ARTH 3820 Visual Construction Of Gender
[3 credit hours]
This WAC course focuses on the ways in which images reflect and shape our understanding of gender. Students learn to analyze visual material to identify and articulate their cultural significance in relation to gender. Web-assisted course.
Term Offered: Spring, Summer

ARTH 3900 Art Museum Practices
[3 credit hours]
Overview of issues and professional practices in art museums, including curatorial responsibilities, interpretation of collections, conceptualization and design of exhibitions, development, education, marketing, and administration. Web-assisted course.
Term Offered: Spring, Fall

ARTH 3920 Exhibition
[3 credit hours]
Study of art historical topic with culmination in an exhibition in a Toledo Museum of Art gallery. Web-assisted course. May be repeated when topics varies.
Term Offered: Spring, Fall

ARTH 3950 AMP
[3 credit hours]
Study of art historical topic theme relating to Toledo Museum of Art works. Precedes ARTH 3960, Exhibition course, but may be taken independently. Web-assisted course. May be repeated when topic varies.
Corequisites: ART 3950
Term Offered: Spring, Fall

ARTH 3960 TMA Exhibit
[3 credit hours]
Working with faculty and museum professionals, students create a Toledo Museum of Art exhibition relating to topic studied in ARTH 3950. Web-assisted course. May be repeated when topic varies. Permission of Instructor.
Prerequisites: ARTH 3900 with a minimum grade of D- and ARTH 3950 with a minimum grade of D-
Term Offered: Spring, Fall

ARTH 3980 Special Studies
[3-5 credit hours]
Topics in art history selected by the instructor. Web-assisted course. May be repeated when topic varies.
Term Offered: Spring, Fall

ARTH 4500 Contemporary Art And Theory
[3 credit hours]
A WAC course offering study of 20th and 21st century critical theory in relation to contemporary art makers and social issues, with a consideration of modernist versus postmodernist eras. Web-assisted course.
Term Offered: Spring

ARTH 4910 Senior Thesis I
[2 credit hours]
Directed research in the history of art for the Senior Thesis. May only be taken with consent of instructor; see department for application form. Must be taken consecutively with ARTH 4920, Senior Thesis II. Web-assisted course.
Term Offered: Spring, Fall

ARTH 4920 Senior Thesis II
[2 credit hours]
Writing the Senior Thesis. May only be taken after successful completion of ARTH 4910, Senior Thesis I, and with instructor's consent. See Department for application form. Web-assisted course.
Prerequisites: ARTH 4910 with a minimum grade of D-
Term Offered: Spring, Fall

ARTH 4940 Internship
[1-4 credit hours]
Student works in professional venue related to a diversity of art fields or endeavors. Web-assisted course. May be repeated for a maximum of 8 credit hours.
Term Offered: Spring, Summer, Fall

ARTH 4950 AMP Seminar
[1 credit hour]
Analysis of the AMP experience and creation of a written project focusing on art museum practices.
Term Offered: Spring

ARTH 4980 Special Topics
[1-5 credit hours]
Topics in art history selected by instructor; may be repeated when topic varies. Web-assisted course. May be offered as WAC.
ARTH 4990 Independent Study In Art History
[1-4 credit hours]
Independent Study in special problems of art history. Web-assisted course. May be repeated when topic varies.
Term Offered: Spring, Summer, Fall

B.A. in Art History
Thor Mednick, Ph.D., Head, Art History
Thor Mednick, Ph.D., Head, Art Museum Practices concentration
Mysoon Rizk, Thor Mednick: Undergraduate Advisors

The bachelor of arts program provides a foundation in the history of art and architecture through introductory course work in the styles, subjects and social history of Western and non-Western art and architecture, and through advanced course work and optional directed study in art, architecture, theory and criticism. The program makes extensive use of the collections and research facilities of the Toledo Museum of Art. Internships for credit may be arranged with the Toledo Museum of Art and with other local arts organizations.
The Art History program also offers a B.A. in Art History degree with a concentration in Art Museum Practices (AMP) with a focus on professional standards, practices and procedures used in contemporary museums of art. In this unique program, students take maximum advantage of their remarkably advantageous relationship with the Toledo Museum of Art, an institution of international stature.

The curriculum leading to the B.A. in Art History requires a minimum of 33 hours of art history courses and a maximum of 45 hours, which must include the following:

Total Hours: 33

1. A survey of the history of Western art composed of a sequence of two three-credit hour courses. The courses may be taken in any order.

Majors with a GPA in the major of at least 3.00 may apply to pursue up to six hours in Independent Study (ARTH 4990), which requires the permission of an art history faculty member who will direct the Independent Study project.

The art history major also must take 18 hours of related courses, which must be chosen from courses acceptable for major credit in studio art, anthropology, classical civilization, literature courses in English or in a foreign or classical language (in addition to the college language requirement), basic courses in a second foreign language, history, music history or literature, philosophy or religion, theater or film history, or in other areas approved by the Advisor.

Concentration in Art Museum Practices (AMP)

Students interested in learning about art museums or pursuing museum-based careers may elect to pursue the Concentration in Art Museum Practices (AMP), whose course work may be part of the minimum 33 credit hours needed for the B.A. in Art History.

(Students not majoring in Art History and who qualify may participate in AMP courses, but are not eligible for the concentration.) Completion of the Concentration in Art Museum Practices requires an overall GPA of at least 3.0 and a GPA in the Art History major of 3.20.

The Art Museum Practices Concentration consists of 12 hours in the major (in addition to the required courses for the B.A., for a minimum of 33 hours in Art History) and 3 hours in the related area:

As part of the Art History major a student pursuing the AMP concentration is required to take:

**CONCENTRATION IN ART MUSEUM PRACTICES (AMP)**

Students interested in learning about art museums or pursuing museum-based careers may elect to pursue the Concentration in Art Museum Practices (AMP), whose course work may be part of the minimum 33 credit hours needed for the B.A. in Art History.

(Students not majoring in Art History and who qualify may participate in AMP courses, but are not eligible for the concentration.) Completion of the Concentration in Art Museum Practices requires an overall GPA of at least 3.0 and a GPA in the Art History major of 3.20.

The Art Museum Practices Concentration consists of 12 hours in the major (in addition to the required courses for the B.A., for a minimum of 33 hours in Art History) and 3 hours in the related area:

As part of the Art History major a student pursuing the AMP concentration is required to take:

Elective 2

Total Hours 120

1 Must choose enough 3/4000 level courses in related and elective areas to meet graduation requirements. Students in the Art Museum Practices concentration have specific required electives.

2 Art Museum Practices (AMP) Concentration requires ART 3950 and 13 credits from: ARTH 3900, ARTH 3950, ARTH 3960, ARTH 4940 or ARTH 4950.

Honors in Art History

To earn the B.A. degree with honors in art history, the student must fulfill all requirements listed above. In addition, the student must maintain an overall GPA of 3.0 and a GPA of 3.5 in the major. In addition to the major requirement for 33 hours in art history courses, the honors student must complete two, two-credit courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTH 4910</td>
<td>Senior Thesis I</td>
<td>2</td>
</tr>
<tr>
<td>ARTH 4920</td>
<td>Senior Thesis II</td>
<td>2</td>
</tr>
</tbody>
</table>

Total Hours 4

The thesis must be sponsored and supervised by a member of the art history faculty and shall be approved in final form by that faculty member.

Identification abilities: Students will accurately identify works of art and/or architecture in terms of artist/architect/culture, title, location, and/or date.

Analytic abilities: Students will analyze the form and content of works of art and/or architecture in relation to social, historical, and cultural contexts.

Research skills: Students will identify and assess research sources, including effective uses of multiple global resources, to gather information about areas of interest specific to a topic and/or arena of study.

Written communication skills: Students will be able to describe, interpret, and summarize ideas in written work through the effective use of content, syntax, and organization of information.

Oral communication skills: Students will be able to describe, interpret, and summarize ideas in oral presentations through the effective use of content, syntax, and organization of information.

B.A. in Visual Art

The Bachelor of Arts program in Visual Art provides students with a solid foundation in art through introductory courses in drawing, design and the history of art. The program offers advanced study in four areas of studio art as well as advanced work in art history. These department offerings are deeply integrated with the core curriculum of the Colleges of Arts and Letters, and Natural Sciences and Mathematics (humanities and sciences requirements and directed electives) with the purpose of using visual art as a special instrument for cognitive growth, knowledge discovery and cultural engagement. The B.A. in Visual Art is a special kind of liberal arts degree based in studio art - students seeking a professional degree should consider the B.F.A. in Studio Art degree program. Though there is no studio concentration offered, students may choose from 2D studies (drawing, printmaking, painting), 3D studies (sculpture, ceramics), and/or photography and digital media (photography, digital art, graphic design) for their advanced studio coursework.

The curriculum leading to the B.A. in Visual Art requires a minimum of 48 hours of courses in the major (50 hours maximum), which must include the following:

<table>
<thead>
<tr>
<th>Code</th>

or ARTH 3500  History Of Photography
or ARTH 4500  Contemporary Art And Theory

1 The AAS courses provide a consistent framework of categories within each of the following areas: 2D, 3D, NM. Within each of these area categories, specific course topics and content are offered on a rotational basis and appear in the catalog using a prefix and descriptive course subtitle. For example, in a given semester, ART 3100 would appear as ART 3100: Screen-printing.

2 Students may not take the same course in both the CORE and Advanced Studies categories. ART 4910 or 4940 can be taken with department approval to use in Advanced Studies.

Note: All Foundation Art Studies courses, 2 Core Art Studies courses, and either ARTH 2050 or ARTH 2060 Art History Survey should be taken before the 3000/4000 level. BA Visual Art students select from the same pool of course offerings as the B.F.A. students, except for the capstone thesis project.

Students pursuing the B.A. degree may not elect the PS/NC option in studio art or art history courses or in related courses.

Art majors should meet every semester with their Advisor.

Below is a sample plan of study. Consult your degree audit for your program requirements.

Honors in B.A. in Visual Art Degree

Qualified juniors and seniors may apply to the Honors Program in studio art. The following are requirements for entrance into the Honors Program in studio art:

1. Admission
   a. 3.5 minimum GPA in studio art
   b. 3.3 minimum cumulative GPA
   c. 6 hours must be completed in the area of concentration, plus 9 hours of Foundational Art Studies
   d. Instructors’ permission (areas of concentration: 2D Studies, 3D Studies, New Media Studies)

2. Requirements
   A student must have completed a minimum of six hours of honors course work in studio art before beginning the thesis project.
   (Note: This does not include six hours of concentration needed for admission into the Honors Program.) The student must take the BA Thesis Project capstone as an honors course with additional requirements. The designation “honors” on the diploma will be given to students who receive a grade of A on the honors thesis project and maintain a minimum GPA of 3.5 in studio art.

Aesthetic abilities: Students will create artworks with an aesthetic order that expresses meaning and furthers cognitive growth.

Technique and the comprehension of a medium’s potential: Students will use the appropriate tools and art/design materials to develop creative projects within and beyond their area of concentration.

Presentation/career preparedness: Students will plan, develop and create artistic projects in an exhibition, portfolio, and/or publication format.

Writing and communication skills: Students will discuss, interpret and summarize complex ideas effectively through written, oral, and visual rhetoric.

Research skills: Students will use multiple global resources in the arts, humanities, and sciences for developing creative projects.

The University of Toledo

B.A. in Visual Art 32
B.Ed. in Art Education

Jason Cox, Ph.D., Head, Art Education & graduate studies in art education, undergraduate and graduate advisor.

For details on the baccalaureate program in art education, see the Judith Herb College of Education (p. 539) section of this catalog.

B.F.A. in Studio Art

Overview

Dan Hernandez, Head, Studio Art
Deborah Orloff, Coordinator for undergraduate Advisors
Barbara Miner, Barry Whittaker, Dan Hernandez, undergraduate Advisors.

The Bachelor of Fine Arts (BFA) degree provides an intensive educational experience for the student who is preparing for professional commitment to the field of studio art. In distinction from the B.A. degree, the BFA curriculum provides the student with a more in-depth experience in the major area of studio concentration and studio electives.

BFA students may choose from the following 4 areas of studio concentration:

• 2D Studies (drawing, printmaking, painting, mixed media),
• 3D Studies (sculpture, ceramics, installation, mixed media),
• Photography and Digital Media (photography, digital arts, time-based media, mixed media),
• Graphic and Interactive Design (graphic design, interactive design, coding, games, video/time-based media, etc.).

Note: studio courses for the latter two concentrations use the NM prefix.

Admissions

BFA: Students may opt into the BFA degree at any time by simply declaring the major and selecting a concentration.

BFA with Departmental Honors (BFA Honors): Students interested in pursuing the BFA Honors degree must apply and be accepted into the program.

Students interested in admission to the BFA Honors program must apply to the Chair of the BFA Honors Committee. The student should obtain the appropriate application materials from the Chair of the Committee or from the departmental office. Before applying, the student must consult with their Faculty Advisor(s) about the application process, and subsequently the application form must be signed by the required number of faculty mentors (3). The student must submit a completed application form to the office at least 5 calendar days before the review.

Before applying to the BFA Honors program, a student must have completed or be in the process of completing 30 semester hours of undergraduate study, which must include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ART 1080</td>
<td>Foundations of Drawing 1</td>
<td>3</td>
</tr>
</tbody>
</table>

At the time of application, the student must have maintained at least a 3.25 GPA in all studio art and art history courses. The department allows adjusted GPAs to be used in reaching the 3.25 benchmark in accordance with the UToledo policy of recalculated GPAs (https://www.utoledo.edu/offices/registrar/student_records/gpa_recalculation.html) as well as previously adjusted incoming transfer GPAs for coursework used in the major and related fields. If required courses are still in process at the time of application, acceptance is provisional until all courses are completed and the GPA standard is maintained. Applications are reviewed every Fall and Spring semester. If the application is denied, the student may reapply the following semester.

Students pursuing the BFA or BFA Honors degree may not elect the PS/NC option in studio art or art history courses or in related courses. Art majors pursuing the BFA Honors degree must meet every semester with their Advisors who are assigned by the BFA Honors committee.

B.F.A. IN STUDIO ART DEGREE - With Departmental Honors

BFA students are encouraged to earn Departmental Honors. The following criteria must be met to earn the BFA Honors degree:

1. BFA Honors students must meet all requirements of the BFA program.
2. Residency: Minimum 4 semesters within the BFA Honors degree enrolled in studio art courses.
3. BFA Honors Reviews: Pass a minimum of 4 BFA Honors reviews:
   • The initial application review
   • Two semester progress reviews
   • Final B.F.A Exhibition review
4. GPA: BFA Honors candidates must maintain a 3.25 minimum GPA average in all studio art and art history courses during residency as well as upon completion of the degree. The department allows adjusted GPAs to be used in reaching the 3.25 benchmark in accordance with the UToledo policy of recalculated GPAs.
5. Pass ART 4400 BFA Thesis (student must register for the Honors section)

Disqualification from the BFA Honors program:

One or more of the following criteria will disqualify candidates from the BFA Honors program:

1. ARTH 2050 or ARTH 2060 and not ARTH 1500.
2. GPA: BFA Honors candidates must maintain a 3.25 minimum GPA in all studio art and art history courses. The department allows adjusted GPAs to be used in reaching the 3.25 benchmark in accordance with the UToledo policy of recalculated GPAs (https://www.utoledo.edu/offices/registrar/student_records/gpa_recalculation.html) as well as previously adjusted incoming transfer GPAs for coursework used in the major and related fields. If required courses are still in process at the time of application, acceptance is provisional until all courses are completed and the GPA standard is maintained. Applications are reviewed every Fall and Spring semester. If the application is denied, the student may reapply the following semester.

Students pursuing the BFA or BFA Honors degree may not elect the PS/NC option in studio art or art history courses or in related courses. Art majors pursuing the BFA Honors degree must meet every semester with their Advisors who are assigned by the BFA Honors committee.

B.F.A. IN STUDIO ART DEGREE - With Departmental Honors

BFA students are encouraged to earn Departmental Honors. The following criteria must be met to earn the BFA Honors degree:

1. BFA Honors students must meet all requirements of the BFA program.
2. Residency: Minimum 4 semesters within the BFA Honors degree enrolled in studio art courses.
3. BFA Honors Reviews: Pass a minimum of 4 BFA Honors reviews:
   • The initial application review
   • Two semester progress reviews
   • Final B.F.A Exhibition review
4. GPA: BFA Honors candidates must maintain a 3.25 minimum GPA average in all studio art and art history courses during residency as well as upon completion of the degree. The department allows adjusted GPAs to be used in reaching the 3.25 benchmark in accordance with the UToledo policy of recalculated GPAs.
5. Pass ART 4400 BFA Thesis (student must register for the Honors section)

Disqualification from the BFA Honors program:

One or more of the following criteria will disqualify candidates from the BFA Honors program:
1. Failure to maintain residency,
2. Failure to attend and pass BFA Honors progress reviews,
3. Failure to maintain a 3.25 GPA in all studio art and art history courses
4. Failure to pass ART 4400

If disqualified, the student may not reapply to the BFA Honors program, but may still complete the BFA degree (without honors).

1. The student will not be awarded the honors designation upon completion of their BFA degree.
2. Once disqualified, the student is no longer required to continue participating in BFA reviews.
3. The student may not reapply to the BFA Honors track.

**REQUIREMENTS**

Students pursuing the B.F.A. degree may not elect the PS/NC option in studio art or art history courses or in related courses. Art majors pursuing the B.F.A. degree must meet every semester with their Advisors who are assigned by the B.F.A. committee.

The curriculum leading to the B.F.A. in studio art requires a minimum of 63 hours of courses in the major (66 hours maximum) plus 18 hours of related coursework for a total of at least 81 credits, which must include the following:

### 2D Studies Concentration

### Core Art Studies for the 3D Studies Concentration

**2D Core Studies:**

Select two of the following: 6

- ART 2110 Introduction to Printmaking
- ART 2100 Life Drawing
- ART 2300 Introduction to Painting

**3D Core Studies:**

- ART 2200 Introduction to Sculpture 3
- ART 2210 Introduction to Ceramics 3

**NM Core Studies:**

- ART 2100 Graphic Design I 3
- or ART 2030 Introduction to Photography

**Advanced Art Studies**

Select 18 hours: 2

- ART 3200 Sculpture: Topics
- ART 3210 Ceramics: Topics
- ART 4200 Advanced Sculpture: Topic
- ART 4210 Advanced Ceramics: Topic
- ART 4300 Bio-Design Challenge 2
- ART 4360 Installation Art 2
- ART 4370 Wearable Conditions 2
- ART 4380 Mixed Media: Topics 2

**Advanced Art Studies Outside the Concentration**

Select 2 courses for 6 credits

- ART 3000 Photography: Topics
- ART 3010 Interactive Coding
- ART 3100 Printmaking: Topics
- ART 3110 2D: Topics
- ART 3120 Painting: Topics
- ART 3850 Gallery Practices
- ART 3910 Outsider Art and Community Practice
- ART 3950 Contemporary Design Methods and Practices
- ART 3990 Special Topics in Art
- ART 4000 Advanced Photography: Topics
- ART 4010 Game Design: Topic
- ART 4020 Time, Motion, Space: Topics
- ART 4100 Advanced Printmaking: Topic
- ART 4110 Advanced 2D: Topics
- ART 4120 Advanced Painting: Topic
- ART 4300 Bio-Design Challenge 2
- ART 4360 Installation Art 2
- ART 4370 Wearable Conditions 2
- ART 4380 Mixed Media: Topics 2
- ART 4950 Design Project: Topics

### Support Courses

1. The Advanced Art Studies courses provide a consistent framework of categories within each concentration (2D, 3D, Photography and Digital Media and GID). Specific course topics and content are offered on a rotational basis and appear in the catalog using a prefix and descriptive course title. For example, in a given semester ART 3100 (TOPIC) would appear as ART 3100: Printmaking: Topics. Students may repeat TOPICS courses up to 18 credits so long as the TOPIC differs.

2. The following may be used as either a concentration course or technical elective course so long as a single course is only used once in either category. ART 4300, 4360, 4370, or 4380. Students may use a 2000-level studies course, ART4910, or ART 4940 with departmental approval.

3. This course is typically taken during the final year. It is taught as a Fall-only option, so student should plan their degree completion accordingly

4. An exhibition-based capstone taken in the final year. Course is taught Spring only, so students should plan accordingly with their degree completion planning.

1. Students will work with their advisor to choose 6 hours of technical courses from departments across the College of Communication and the Arts as well as CMPT courses.
2 The AAS courses provide a consistent framework of categories within each area of concentration:
• 2D Studies,
• 3D Studies,
• Photography and Digital Media,
• Graphic and Interactive Design.

Within each of these areas, specific course topics and content are offered on a rotational basis and appear in the catalog using a prefix and descriptive course subtitle. For example, in a given semester ART 3100 (TOPIC) would appear as ART 3100: Printmaking: Topics. Students can retake a given course category to fulfill their AAS credit requirements as long as it is offered with a different topic title.

3 Students are permitted to take 2000 level courses in circumstances where they need to fulfill core prerequisites in order to take selected AAS level courses. See the catalog listing of offerings and prerequisites.

4 Usually taken in the student’s junior or senior year.

5 An exhibition-based capstone course usually taken during the student’s final year.

6 May be selected from courses offered in art history or from the degree audit.

### Plan of Study

Below are sample plans of study. Consult your degree audit for your program requirements.

- 2D Studies Concentration (p. 38)
- 3D Studies Concentration (p. 39)
- Photography and Digital Media Concentration (p. 39)
- Graphic and Interactive Design Concentration (p. 40)

Learning Outcomes

Aesthetic abilities: Students will create artworks with an aesthetic order that expresses their unique vision.

Technique and the comprehension of a medium’s potential: Students will use the appropriate tools and art/design materials to develop creative projects within and beyond their area of concentration.

Presentation/career preparedness: Students will plan, develop and create artistic projects in a portfolio, and/or publication format.

Writing and communication skills: Students will discuss, interpret, and summarize complex ideas effectively through written, oral, and visual rhetoric.

Research skills: Students will use multiple resources in the arts, humanities, and sciences for developing creative projects.

Minor in Art History

Students may minor in art history through the declaration of the minor with the College of Arts and Letters and the completion of a minimum of 21 hours of art history courses, which must include the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTH 2050</td>
<td>History of Western Art ¹</td>
<td>3</td>
</tr>
<tr>
<td>ARTH 2060</td>
<td>History of Western Art II</td>
<td>3</td>
</tr>
</tbody>
</table>

Select at least one of the following courses in non-Western art:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTH 2100</td>
<td>Asian Art</td>
<td></td>
</tr>
<tr>

<td></td>
</tr>
<tr>
<td>ARTH 3300</td>
<td>African Art</td>
<td></td>
</tr>
<tr>
<td>ARTH 3350</td>
<td>Ancient Art Of The Americas</td>
<td></td>
</tr>
</tbody>
</table>

Select remaining hours from any courses offered by the art history program ²

<table>
<thead>
<tr>
<th>Hours</th>
<th>12</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Hours</td>
<td>21</td>
</tr>
</tbody>
</table>

¹ Survey history of Western art courses may be taken in any order.

² The remaining hours for the minor may be selected from any courses offered by the art history program. Minors may elect to pursue up to three hours in Independent Study (ARTH 4990). Independent Study requires the permission of an art history faculty member who will direct the Independent Study project.

Minor in Community Arts Education

<th>9</th>
</tr>
</thead>
</table>

These three courses comprise foundational knowledge of Graphic Design. Students completing these classes will have a marketable basis of design knowledge and experience, preparing them for the successful completion of both online and print projects.

• Aesthetic abilities: Students will create artworks with an aesthetic order that expresses meaning and furthers cognitive growth.

• Technique and the comprehension of Graphic Design potential: Students will use the appropriate tools and art/design materials to develop creative projects.

• Presentation/career preparedness: Students will plan, develop, and create artistic projects in a portfolio, and/or publication format.

• Writing and communication skills: Students will discuss, interpret, and summarize complex ideas effectively through written, oral, and visual rhetoric.

• Research skills: Students will use multiple resources in the arts, humanities, and sciences for developing creative projects.

Disability Studies majors must select courses that are not being used to fulfill the major.

DST 2020 Introduction to Disability Studies (for non-DST-majors only)
DST 3030 Disability Culture
DST 4200 Crip Arts, Crip Culture
Or other DST course chosen in consultation with advisor.

Total Hours 18

Minor in Studio Art

The minor in studio art provides a general introduction to the use of tools and materials and an understanding of traditional and experimental media for the production of fine art. The minor in studio art is further designed to enrich the student's life by increasing her/his awareness of the world by developing skills of visual perception and communication. Students electing to minor in studio art must complete 21 hours of course work, including nine hours of Foundational Art Studies (see below), which provide the basic technical and theoretical skills essential for a fundamental understanding of the discipline as well as a rigorous preparation for the advanced/upper division courses.

<table>

</tr>
<tr>
<td>Art History: Choose any art history course</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Total Hours</td>
<td></td>
<td>18</td>
</tr>
</tbody>
</table>

Students must maintain a minimum GPA of 2.0. for all course work in the minor (in keeping with College of Arts and Letters standards). Candidates for the minor in studio art should have their course work verified and approved by an Advisor in studio art or the Chair of the department prior to making formal application for graduation.

Department of Communication

W. Benjamin Myers, Chair
Lisa Bollman, Advisor

The Department of Communication has offices and studio facilities in Rocket Hall. Communication offers courses of study leading to two undergraduate degrees, the Bachelor of Arts in Communication and the Bachelor of Arts in Media Communication. Students opting for a degree in Communication will study subjects related to public relations and organizational communication. Students selecting study in Media Communication will focus on journalism and broadcast/telecast/webcast video production. The department has equipment and state-of-the-art video production facilities in Rocket Hall as well as Savage Arena and produces event coverage for the university. Classrooms and computer labs are located near faculty offices in Rocket Hall.

Degrees Offered

- B.A. in Communication Studies (p. 46)
- B.A. in Media Communication (p. 50)
- General Communication Minor (p. 51)
- Media Production Communication Certificate (p. 52)
- Organizational Communication Certificate (p. 52)
- Public Relations Communication Certificate (p. 52)
- Social Media Communication Certificate (p. 52)

COMM 1010 Comm Principles And Practices
[3 credit hours]
An introductory course that provides instruction and practice in human communication including interpersonal communication, group discussion, public speaking and mass communication.

Term Offered: Spring, Summer, Fall

Core Arts & Humanities

COMM 2000 Mass Communication And Society
[3 credit hours]
Overview of the media of mass communication, which considers social, economic and intellectual impact on American culture and democracy. Exploration of various mass media and their methods of shaping public perceptions.

Term Offered: Spring, Summer, Fall

Core Arts & Humanities

COMM 2120 Reporting
[3 credit hours]
Introduction to writing for publication in the student newspaper, developing skills in interviewing, listening, using primary sources, thinking critically, and mastering electronic data-collection methods.

Prerequisites: COMM 2130 with a minimum grade of D-

Term Offered: Fall

COMM 2130 Media Writing 1
[3 credit hours]
Through various assigned readings, discussions, reporting and writing, students will become fully immersed in the media writing process. Students will develop story ideas, interview sources and write publication-ready news articles. Emphasis will be placed on journalistic ethics, credibility, accuracy and news judgment.

Term Offered: Spring, Summer, Fall

COMM 2150 Digital Publishing
[3 credit hours]
Introduction to Writing, Editing, Design approach in editing newspapers, newsletters, electronic and similar publications. Fundamentals of desktop publishing, copy editing, headline writing, typography, layout, design, use of photos, illustrations.

Term Offered: Spring
COMM 2160 Single Camera Production  
[3 credit hours]  
This is a laboratory/lecture course designed to introduce the student to the terminology and single camera production procedures used in field television production and serve as a foundation for story-telling through this medium.  
Term Offered: Spring, Summer, Fall  
COMM 2180 Media Producing and Performance  
[3 credit hours]  
The class is designed to give students experience being in front of the camera through a variety of assignments that will give them practice at interview skills, reading off the Teleprompter, and adlibbing. Also, students will gain experience producing and coordinating productions.  
Term Offered: Spring, Fall  
COMM 2210 Audio Production I  
[3 credit hours]  
The class is designed to introduce students to studio recording and editing sound. Students will produce commercials, public service announcements, and demos for announcing jobs. Audio Production I is also designed to be a pre-requisite class for Audio Production II.  
Term Offered: Spring, Fall  
COMM 2220 Television Studio Production  
[3 credit hours]  
Students will work together to produce various types of live studio productions and will be introduced to the process of remote video acquisition and editing for use in living productions.  
Prerequisites: COMM 2160 with a minimum grade of D-  
Term Offered: Spring, Fall  
COMM 2300 Photojournalism  
[3 credit hours]  
An applied study of the conceptual, ethical, philosophical, historical and commercial aspects of photojournalism.  
Term Offered: Spring, Fall  
COMM 2500 Social Media I: Introduction to Social Media  
[3 credit hours]  
This introductory course focuses on the development and use of social media in cultural, professional, and personal contexts. Students will explore niche and mainstream platforms across the world to become familiar with the landscape and global influence of social media. The practical, legal, and ethical role of social media in professions such as marketing, advertising, and public relations will also be covered. Students will use their acquired knowledge to reflect upon and enhance their professional digital presence.  
Term Offered: Spring, Summer, Fall  
COMM 2600 Public Presentations  
[3 credit hours]  
Applies the principles of informative and persuasive communication in the construction, delivery, and critique of public presentations.  
Term Offered: Spring, Summer, Fall  
COMM 2810 Nonverbal Communication  
[3 credit hours]  
Survey, analysis and application of research in nonverbal communication variables and phenomena.  
Term Offered: Spring, Summer, Fall  
COMM 2820 Group Communication  
[3 credit hours]  
Theory and practice of group communication variables and processes with an emphasis on problem-solving approaches.  
Term Offered: Spring, Summer, Fall  
COMM 2830 Organizational Communication  
[3 credit hours]  
This course examines the principles and theories of organizational communication. Particular attention will be devoted to how communication skills, culture, systems, ethics, new technology and power all affect, create and define organizations.  
Term Offered: Spring, Summer, Fall  
COMM 2840 Interpersonal Communication  
[3 credit hours]  
Review and application of interpersonal communication theory and research in a variety of one-to-one social contexts.  
Term Offered: Spring, Summer, Fall  
Core Arts & Humanities  
COMM 2870 Communication Theory  
[3 credit hours]  
An introduction to human communication theory and research directed toward understanding and applying theory and research in various communication contexts and for various communication outcomes.  
Term Offered: Spring, Summer, Fall  
COMM 2890 Crisis & Conflict in Organizations  
[3 credit hours]  
An examination of communication variables that may reduce the potential for workplace conflict. Students survey theoretical models, conduct interviews with professionals and write analyses of case studies of successful conflict management.  
Term Offered: Spring, Summer, Fall  
COMM 2990 Independent Study  
[1-4 credit hours]  
A freshman/sophomore seminar in which the student pursues a problem of special interest in communication. A prospectus must be submitted to the faculty member with whom the student will work.  
Term Offered: Spring, Summer, Fall  
COMM 3120 Media Writing II  
[3 credit hours]  
This course will focus on identifying, developing and writing online articles about community and business issues. Students also will become versed in major state, local and national news.  
Prerequisites: COMM 2130 with a minimum grade of D-  
Term Offered: Spring  
COMM 3150 Feature Writing  
[3 credit hours]  
Theory and practice in writing in various kinds of discourse for newspapers, magazines and electronic publications and writing for specialized audiences. Developing context, analysis, background and appropriate standards of evidence for publication.  
Prerequisites: COMM 2130 with a minimum grade of D-  
Term Offered: Spring, Fall
COMM 3180 Mass Communication Law
[3 credit hours]
Case studies and readings in libel, privacy, access and other legal issues arising from constitutional, judicial and administrative laws that affect mass communication.
Prerequisites: COMM 2000 with a minimum grade of D-
Term Offered: Spring, Fall

COMM 3210 Audio Production 2
[3 credit hours]
This advanced course is designed to further enhance students’ proficiency of audio and program production skills through project based learning.
Prerequisites: COMM 2210 with a minimum grade of D-
Term Offered: Spring, Fall

COMM 3260 Live Sports Production
[3 credit hours]
This is a laboratory/cooperative course held in collaboration with other university departments and clients with the result of producing live video content for broadcast on the ESPN online platform, via the WatchESPN app & ESPN+ subscription service, and for live display in various venues such as the Glass Bowl, Savage Arena, Doermann Theatre, and online live streaming.
Term Offered: Spring, Fall

COMM 3270 Multimedia Newswriting
[3 credit hours]
Training in the skills required in the preparation, writing and editing of both radio and television news.
Prerequisites: COMM 2130 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

COMM 3330 Consumer Culture & the Media
[3 credit hours]
The examination of practices, techniques, tools and strategies used in advertising and public relations campaigns and the subsequent impact these campaigns have on the growth of a contemporary consumer culture. In addition, this class will research the theory and techniques, historical underpinnings, and the overarching power structure of a capitalist media system.
Prerequisites: COMM 2000 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

COMM 3340 Visual Communication I
[3 credit hours]
Application of the principles of visual communication to informing, persuading, and entertaining the public through digital photography, layout & design in print, Web design, and a multimedia presentation.
Term Offered: Spring, Summer, Fall

COMM 3350 Graphic Communication 1
[3 credit hours]
To develop the ability to create successful mediated messages through the use of new technologies and software from concept to the end product. The student will be able to proficiently utilize the Internet, and critically analyze design issues in mediated communication. The students will also develop a foundation for using tools to produce graphics for television and online. This course is the prerequisite for Graphic Communication 2.
Term Offered: Spring, Fall

COMM 3500 Social Media II: Social Media Communication Strategies
[3 credit hours]
This intermediate course will focus on the presence of social media in various contexts of communication (e.g., interpersonal, organizational, public, media, etc.). With an emphasis on diversity and inclusion, students will learn strategies for using social media in these contexts to effectively communicate with others. The strategies covered will focus on influential tools for social media engagement, content creation and maintenance techniques, the principles of social media analytics, building relationships with customers and clients, as well as planning, executing, and evaluating social media campaigns. Students will earn an external social media certificate and will use their acquired knowledge to analyze the effectiveness of social media communication strategies as well as create a digital portfolio. Social Media I is a prerequisite for this course.
Prerequisites: COMM 2500 with a minimum grade of C-
Term Offered: Spring, Summer, Fall

COMM 3610 Speech Writing
[3 credit hours]
Applies principles of effective public relations communication to the practice of developing speeches for others and composing publicity materials.
Term Offered: Spring, Fall

COMM 3720 Introduction to Public Relations
[3 credit hours]
Public relations principles, planning and methods in business, government, educational institutions and other organizations. Examination of law, ethics, professionalism, history, theory, strategies and practices of the profession.
Prerequisites: COMM 2130 with a minimum grade of C-
Term Offered: Spring, Summer, Fall

COMM 3750 Cultural Diversity in Communication
[3 credit hours]
Cultural Diversity in Communication examines the basic elements of interpersonal communication and culture as the two relate to one another in a public relations environment. Emphasis is given to the influence of culture on the interpretation of the communication act and to the communication skills that enhance cultural diversity in communication while practicing public relations.
Term Offered: Spring, Summer, Fall

COMM 3760 Health Communication
[3 credit hours]
Review and application of health communication theory, research, and practice in a variety of contexts.

COMM 3760 Health Communication
[3 credit hours]
Review and application of health communication theory, research, and practice in a variety of contexts.

COMM 3800 Social Media III: Social Media Campaigns
[3 credit hours]
In this advanced course, students will apply the knowledge they have garnered in previous social media courses to develop, implement, and evaluate a social media campaign for an actual client. The course will focus on key elements such as determining campaign objectives, identifying target markets, developing strategies to engage those markets through relevant social media channels, content creation and management, and metrics to measure progress and success. Social Media I and II are prerequisites for this course.
Prerequisites: COMM 2500 with a minimum grade of C- and COMM 3500 with a minimum grade of C-
Term Offered: Spring, Summer, Fall
COMM 3820 Persuasion Theory
[3 credit hours]
Examination of the theory and practices used in persuasive communication in public presentations, advertising, sales and political campaigns.
Term Offered: Spring, Summer, Fall

COMM 3830 Basic Principles Of Debate And Forensics
[3 credit hours]
Theory and practice in reasoned discourse; analysis, evidence, logical forms and fallacies. Problems and procedures in administering a forensic program, teaching and directing debate and individual speaking events.
Term Offered: Spring

COMM 3850 Research Methods
[3 credit hours]
Introduction to qualitative and quantitative methods in communication research. Focus on evaluating and interpreting reports in various forms of communication.
Prerequisites: COMM 2000 with a minimum grade of D-

COMM 3880 Professional Business Communication
[3 credit hours]
Developing oral and written business communication skills through practice in public speaking, interviewing, resume writing, and communication in various formats.
Term Offered: Spring, Summer, Fall

COMM 4040 Storytelling in Public and Private Spaces
[3 credit hours]
Students will apply traditional storytelling techniques to empower sources to tell anecdotes during interviews, to tell their own true stories, to help readers understand the meaning of news as well as life's challenges. Via human-interest articles, writers will show rather than tell things.
Term Offered: Spring

COMM 4090 Mass Communication Ethics
[3 credit hours]
Investigation of problems and practical application of classical theories as well as current strategies to confront ethical crises in mass-media settings.
Prerequisites: COMM 2000 with a minimum grade of D-
Term Offered: Fall

COMM 4100 Multimedia Journalism
[4 credit hours]
Developing a thorough understanding of researching, writing, and presenting television/online news. Includes studio and remote productions.
Prerequisites: COMM 2220 with a minimum grade of D- or COMM 2160 with a minimum grade of D- and COMM 2130 with a minimum grade of C-
Term Offered: Spring, Fall

COMM 4110 High School Publications
[3 credit hours]
Problems involved in the production of high school newspapers and yearbooks including approaches to design, advertising, content, news, editorials, administration and business management.
Term Offered: Fall

COMM 4220 Advanced Television Production
[4 credit hours]
Advanced principles and aesthetic considerations in the production of various television programs. Includes working with remote equipment and digital editing.
Prerequisites: COMM 2160 with a minimum grade of D-
Term Offered: Spring, Fall

COMM 4250 Mass Communication History
[3 credit hours]
Historical consideration of the media from colonial era to the present, with special emphasis on learning through problem-solving and critical thinking about the role of mass communication as a force in shaping national identity.
Prerequisites: COMM 2000 with a minimum grade of D-
Term Offered: Spring

COMM 4260 Communication in Non-Profit Organizations
[3 credit hours]
COMM 4260 COMMUNICATING IN NON-PROFIT ORGANIZATIONS. [3 hours] This course examines the communication strategies Non-Profit Organizations use to publicize their charitable goals to potential donors and how they describe their progress to governmental watchdog committees.

COMM 4270 Special Event Planning
[3 credit hours]
Examines the practices, and procedures associated with identification, analysis, planning, evaluation and control of the operational, fiscal, and legal risks of event planning.
Term Offered: Spring, Summer, Fall

COMM 4330 Integrated Media
[3 credit hours]
The goal of this course is media design literacy. Students will develop the ability to create successful mediated messages through various mediums and new technologies.
Prerequisites: COMM 2630 with a minimum grade of D- or COMM 3340 with a minimum grade of D- or COMM 2130 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

COMM 4340 Visual Communication II
[3 credit hours]
Advanced theory, application, and interpretation of visual communication and rhetoric to inform, persuade and entertain the public through digital photography, layout and design in print, Web design, and digital multimedia.
Prerequisites: COMM 2630 with a minimum grade of D- or COMM 3340 with a minimum grade of D-
Term Offered: Spring

COMM 4350 Graphic Communication 2
[3 credit hours]
To develop the ability to create successful mediated messages through the use of new technologies and software from concept to the end product. The student will be able to proficiently utilize new technology, and critically analyze design issues in mediated communication. The goal of this course is advanced visual design literacy. The students will also develop a thorough understanding for using tools to produce graphics for television and online.
Prerequisites: COMM 3350 with a minimum grade of D
Term Offered: Spring
COMM 4630 Public Relations Campaigns
[3 credit hours]
A thorough examination of the practices, techniques, tools and strategies used in contemporary public relations campaigns. Students will research the techniques and components of a PR strategic plan and then compile two original plans during the course of the semester.
Prerequisites: COMM 3720 with a minimum grade of D-
Term Offered: Spring, Fall

COMM 4640 Public Relations Case Studies
[3 credit hours]
Analysis of successful and unsuccessful public relations efforts and programs. Emphasis on the theoretical and ethical foundations of successful public relations programming.
Prerequisites: COMM 3720 with a minimum grade of D-
Term Offered: Spring, Fall

COMM 4820 Family Communication
[3 credit hours]
Explores variables and processes of family communication emphasizing theory, definitions of family, roles & rules, conflict, intimacy, societal influences, and effects on the individual and the family as a whole.
Term Offered: Spring, Summer

COMM 4830 Gender, Culture & Communication
[3 credit hours]
Cross-listed as WGST-4350. Explores how gender and culture simultaneously shape and are shaped by communication through relationships, institutions, and society. WAC class.
Term Offered: Spring, Summer, Fall

COMM 4900 Communication Seminar
[3-4 credit hours]
An in-depth examination of a communication topic, problem or media event. May be writing intensive.
Term Offered: Spring, Summer, Fall

COMM 4910 Communication Studies Capstone
[3 credit hours]
Application of knowledge and skills through a project or research investigation related to an area of communication.
Prerequisites: COMM 2000 with a minimum grade of D- and COMM 2130 with a minimum grade of D- and COMM 2600 with a minimum grade of D- and COMM 2820 with a minimum grade of D- and COMM 2840 with a minimum grade of D- and COMM 2870 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

COMM 4940 Communication Internship
[1-6 credit hours]
Professional training in communication relating to newspaper work, public relations, broadcasting etc. Arrangements with the appropriate communication organization must be made in consultation with the internship director prior to enrollment. Course offered P/NC.
Term Offered: Spring, Summer, Fall

COMM 4990 Independent Study
[1-4 credit hours]
A seminar in which the student pursues a problem of special interest in communication. A prospectus must be submitted prior to registration to the participating faculty member.
Term Offered: Spring, Summer, Fall

Honors in Communication
Communication majors may graduate with departmental honors by meeting the following qualifications:

1. Admission
   • 3.25 minimum GPA in Communication
   • 3.0 minimum cumulative GPA

2. Requirements
   • Completion of 12 hours in courses designated as Communication Honors, and 4 credits of COMM 4990:091 Honors Thesis

Any Communication course may be designated as "Honors" with the Instructor's permission and his/her assignment of suitable reading and research/project in addition to normal course work.

B.A. in Communication Studies
Undergraduate faculty advisers (including Honors) are assigned by the Department. Contact the Department Chair.

Bachelor of Arts Degree in Communication Studies
The Bachelor of Arts program provides a foundation for students to excel in organizational environments such as corporations, non-profits, and mass media. A balance of skills training and critical thinking subjects prepare students for careers in public relations, corporate communication, and related areas. Students are encouraged to be active in experiential and service learning projects through the department-sponsored student organizations such as the Communication Honors Society Lambda Pi Eta, professional fraternity Zeta Phi Eta, and PRSSA (Public Relations Student Society of America).

Communication studies has three concentration in which you can major:

• Communication Studies, Digital Communication Concentration, BA
• Communication Studies, Interpersonal Communications Concentration, BA
• Communication Studies - Organizational And Strategic Communication Concentration, BA

Communication Studies, Digital Communication Concentration, BA
Communication Studies, Interpersonal Communication Concentration, BA (p. 47)
Communication Studies - Organizational And Strategic Communication Concentration, BA (p. 47)

Total Hours: 120
Communication Studies, Digital Communication Concentration, BA
1. Articulate the history and evolution of digital communication.
2. Create successful visual narratives in a variety of digital contexts with a broad understanding of information architecture.
3. Discriminately select appropriate digital platforms, tools, and content to reach and professionally communicate information to (a) defined audience(s).
4. Evaluate, critique, and refine digital content.
5. Effectively and ethically use various digital tools and platforms to accomplish personal and professional goals.
6. Apply gained knowledge and skills to enhance digital citizenship.
7. Understand and be adequately prepared for a career in the rapidly evolving digital industry.

Communication Studies, Interpersonal Communication Concentration, BA
Define, explain, and apply basic terminology, principles, and theories to a variety of communication situations in interpersonal relationships.
1. Analyze, adjust, and improve communication behaviors to achieve interpersonal communication goals.
2. Evaluate characteristics of specific audiences and effectively use a variety of communication channels to successfully communicate in personal and professional settings.
3. Evaluate and apply how concepts like culture, gender, ethnicity, and other societal categories impact interpersonal communication in various settings.
4. Create a portfolio that can be used for application to graduate school or in a career search in areas such as sales; training; consulting; fundraising; advocacy; research; management; negotiation; and direction and coordination of community outreach programs, corporate communication, customer service, nonprofit organizations, and more.

Communication Studies - Organizational And Strategic Communication Concentration, BA
1. Create original and persuasive public relations campaigns.
2. Devise solutions to contemporary challenges in public relations campaigns.
3. Demonstrate comprehension of public relations theory.
5. Construct and deliver persuasive oral presentations based on audience analysis.

B.A. in Media Communication

Bachelor of Arts Degree in Media Communication
The Bachelor of Arts program provides a foundation for students to excel in mass media and communications-related fields such as journalism, video production, and program broadcast/telecast/webcast. Special emphasis is provided in all aspects of sporting event video production and design. A balance of skills training and critical thinking subjects prepare students for careers in writing, production, news, sports, and the use of social media platforms. Students are encouraged to be active in experiential and service learning projects through either the department’s award-winning student news program, UT-10, the department’s student-sponsored organization, Zeta Phi Eta, or UT student media such as the Independent Collegian and WXUT-FM, 88.3.

The curriculum in Media Communication requires a minimum of 36 hours of coursework in the major with a maximum of 50 hours, which must include the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 2000</td>
<td>Mass Communication And Society</td>

**Total Hours** 15

Social media professionals manage social media strategy for organizations. In this certificate program, students will learn how to:
- manage social media feeds
- use social media analytics to monitor public image
- conduct market research analysis via social media
- design social media campaigns
- develop content for specific social feeds
- write press releases to be shared on social media

Department of Economics

David Black, Interim Chair, Advisor

Early Admission to Master’s Degree Program in Economics

A special opportunity exists for undergraduate students at the University of Toledo interested in pursuing a Master’s of Arts Degree in Economics. Being evaluated by the same criteria as graduate students, undergraduate students have the opportunity to apply advanced-level work to their undergraduate degree requirements while, at the same time, securing a significant “head start” toward satisfying the requirements for a master’s degree in Economics. Qualifying undergraduate students are allowed to apply particular courses (and associated credit hours) towards both their undergraduate and graduate degree requirements.

If accepted into this program, undergraduate students may register for up to 3 graduate-level Economics courses (9 credit hours). Because the M.A. degree in Economics requires 30 credit hours of graduate-level work, students who complete 9 of those hours as an undergraduate student have to complete only 21 additional credit hours as a graduate student to receive their master’s degree.

Undergraduate students with a declared major in Economics and a cumulative GPA in Economics courses of 3.3 or higher are eligible for this program. Students accepted into this program must consult and receive prior approval from the Department of Economics’ graduate director as to which courses at the University of Toledo may be applied for dual credit toward both undergraduate and graduate degree requirements. Students interested in this program are encouraged to speak with the Department of Economics’ Chair, graduate director, or undergraduate advisor for additional information and the application form for this program.

Degrees Offered

- B.A. in Economics (p. 57)
- Advanced Economics Certificate (p. 61)
- Advanced Quantitative Economics Certificate (p. 61)
- Environmental Economics Certificate (p. 61)
- Public Economics Certificate (p. 62)
- Minor in Economics (p. 62)
- Minor in Environmental Economics (p. 62)
- Minor in Public Economics (p. 63)

Qualified juniors and seniors are invited to work for the citation “honors in economics.”

1. **Admission**: The Honors Program is open to all undergraduate economics majors whether or not they are enrolled in College Honors. Interested students should speak with the department undergraduate advisor. Ordinarily, the student must have a minimum cumulative GPA of 3.0.

2. **Requirements**: To be awarded departmental honors in economics, the student must take nine of the 30-hour major requirements in the honors and honors recognition courses offered by the department. Every honors student must complete ECON 4960: Senior Honors Thesis and then two other honors courses. Every regularly scheduled 3000 or 4000-level course can be given honors recognition by completing an honors contract with the course instructor detailing the readings and research in addition to the normal requirements of the course. Moreover, any student accepted into the department’s early admission program and taking up to two 5000 level economics courses will have those 5000 level courses given honors recognition. To remain in the program, the student ordinarily must maintain a minimum GPA of 3.3 in the major.

**ECON 1010 Introduction To Economic Issues**

[3 credit hours]
Basic concepts and theory applications to major economic problems and controversies. Designed primarily to meet requirements of students not planning to take upper level economics courses. (not for major credit)

**Term Offered**: Spring, Summer, Fall

**Core Social Sciences, Trans Mod Social Science**

**ECON 1150 Principles Of Macroeconomics**

[3 credit hours]
Explaining the level and the growth of economic activity, its fluctuations and ways of achieving greater stability, including the roles of money, banking and international finance.

**Term Offered**: Spring, Summer, Fall

**Core Social Sciences, Trans Mod Social Science**

**ECON 1155 Principles of Macroeconomics with Data Applications**

[3 credit hours]
Theoretical explanations on the level and the growth of economic activity, its fluctuations and ways of achieving greater economic stability – complimented by introductory data analysis examining the veracity of predictions by theoretic models. No prior experience using data is necessary for successful completion of this course.

**Term Offered**: Spring, Summer, Fall

**Core Social Sciences**

**ECON 1200 Principles Of Microeconomics**

[3 credit hours]
Theories of consumer behavior; determination of input and output; prices and quantities in factor and product markets; analysis of international trade and policy; applications include labor markets and income distribution.

**Term Offered**: Spring, Summer, Fall

**Core Social Sciences, Trans Mod Social Science**

**ECON 2400 The American Economy In The Twentieth Century**

[3 credit hours]

**ECON 2500 Topics In International Economics**

[3 credit hours]
Why nations trade; comparative advantage and gains from trade; free trade versus protectionism; free versus "fair" trade; balance of payments problems.
ECON 2810 Introduction to Econometrics  [3 credit hours]
Introduction to econometrics with an emphasis on the intuitive understanding and practical applications of the basic tools of regression analysis. Course covers hypothesis testing, single and multiple regression equations, and the problems and possible solutions to data that are associated with multicollinearity, autocorrelation and heteroskedasticity.
Prerequisites: MATH 2600 (may be taken concurrently) with a minimum grade of D- or MATH 3610 (may be taken concurrently) with a minimum grade of D- or BUAD 2060 (may be taken concurrently) with a minimum grade of D- or PSY 2100 (may be taken concurrently) with a minimum grade of D- or SOC 3290 (may be taken concurrently) with a minimum grade of D- or GEPL 4420 (may be taken concurrently) with a minimum grade of D-
Term Offered: Spring, Fall

ECON 3030 Consumer Economics  [3 credit hours]
Economic role of the consumer, theory of choice-making - rational purchasing of food, housing, health care, transportation, insurance, credit, budgeting, investing and tax returns.
Prerequisites: ECON 1150 with a minimum grade of D- or ECON 1200 with a minimum grade of D-

ECON 3050 Economics Of Gender  [3 credit hours]
Analysis of labor market outcomes and income distribution characteristics resulting from gender differences; gender-related economic outcomes: the "feminization of poverty," persistent male-female wage differential, expanding proportions of female-headed and same sex households.
Term Offered: Spring, Summer, Fall

ECON 3070 Economics And Law  [3 credit hours]
Methodologies of Law and Economics; Legal institutions; Economic Theory of Property; Property Rights; Contract Theory; Economic Theory of Torts and Tort Law, Common Law Process; Economics of Crime and Punishment.
Prerequisites: ECON 1150 with a minimum grade of D- or ECON 1200 with a minimum grade of D-

ECON 3080 Economics Of Crime  [3 credit hours]
Study of crime as an economic activity; costs of crime to the community; economic approach to crime reduction.
Prerequisites: ECON 1150 with a minimum grade of D- or ECON 1200 with a minimum grade of D-
Term Offered: Spring, Fall

ECON 3120 Topics In Monetary And Financial Economics  [3 credit hours]
Current issues in money, banking and finance; interest rate theory; international money and banking; monetary policy and modeling monetary economies.
Prerequisites: ECON 1150 with a minimum grade of D-
Term Offered: Fall

ECON 3150 Intermediate Macroeconomic Theory  [3 credit hours]
National income accounting; theory of income determination; causal relationships; analysis of consumption, investment, government and foreign demand functions; integration of theories of income, output, money and interest.
Prerequisites: ECON 1150 with a minimum grade of D-
Term Offered: Spring, Fall

ECON 3200 Intermediate Micro-Economic Theory  [3 credit hours]
Consumer theory, utility and indifference curve analysis, theory of the firm, industry pricing in perfect and imperfect competition and distribution theory.
Prerequisites: ECON 1200 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

ECON 3240 Environmental Economics  [3 credit hours]
Economic analysis of the causes of environmental problems; Examination of various economic policies for addressing current environmental issues such as pollution control policies and optimal use of resources.
Term Offered: Spring, Summer, Fall

ECON 3250 Economics Of Sports  [3 credit hours]
This course will survey the theoretic and applied economic issues within the world of professional and amateur sports, focusing on industrial organization, labor economics and public finance.
Prerequisites: ECON 1200 with a minimum grade of D- or ECON 1150 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

ECON 3260 The Economics of Climate Change  [3 credit hours]
Climate change can be viewed as a fundamentally economic problem. However, climate change has a unique set of attributes that make standard economic analysis difficult to apply. It is a global problem requiring unprecedented international cooperation. Economists view climate change as a risk that creates uncertainty about the future. Students will learn how people value alternative reductions in climate risk. An understating of this trade-off is necessary to help design more cost-effective climate change policy.

ECON 3270 Natural Resource Economics  [3 credit hours]
Economic analysis of natural resource conservation and use, considering the objectives of efficiency and sustainability. Topics include energy, minerals, marine resources, land and agriculture, outdoor recreation, biodiversity and wildlife management.
Term Offered: Spring, Summer, Fall

ECON 3300 BENEFIT-COST ANALYSIS  [3 credit hours]
The study of the evaluation of competing public policy alternatives and projects to more efficiently allocate society's resources. Applications include transportation, public health, criminal justice, education, and the environment.
Prerequisites: ECON 1150 with a minimum grade of D- or ECON 1200 with a minimum grade of D- or ECON 3240 with a minimum grade of D- or ECON 3270 with a minimum grade of D-
Term Offered: Spring, Fall
ECON 3410 World Economic History
[3 credit hours]
Study of economic growth throughout the world, particularly in Europe, Asia, Africa and Latin America. Analysis of economic institutions, technological change, industrialization and living standards.
Prerequisites: ECON 1150 with a minimum grade of D- or ECON 1200 with a minimum grade of D-

ECON 3500 Comparative Economic Systems
[3 credit hours]
Theory and ideology of market, socialist and mixed economic systems. Case study of the economies of U.S., Russia, China and India.
Prerequisites: ECON 1150 with a minimum grade of D- or ECON 1200 with a minimum grade of D-
Term Offered: Spring, Summer
Multicultural Non-US Diversity

ECON 3600 Urban Economics
[3 credit hours]
Analysis bearing on intermetropolitan and intrametropolitan growth processes.
Prerequisites: ECON 1150 with a minimum grade of D- or ECON 1200 with a minimum grade of D-

ECON 3810 Applied Econometrics
[3 credit hours]
Topics emphasize applications of a wide range of statistical approaches to time-series, cross-sectional, panel, and other types of data. Included are micro-econometric topics such as panel data models, qualitative choice models, hazard models and others. The time series macro-economic topics include model solidarity, cointegration, error correction mechanisms, ARCH and GARCH models, economic forecasting, and others.
Prerequisites: ECON 2810 with a minimum grade of D-
Term Offered: Spring, Fall

ECON 3900 Undergraduate Seminar
[1-4 credit hours]
Small group study of special topics initiated either by student or a faculty member.
Term Offered: Spring, Fall

ECON 3910 Honors Research
[1-4 credit hours]
Study of special topics initiated either by student or a faculty member.
Term Offered: Spring, Fall

ECON 3920 Honors Reading
[1-4 credit hours]
Study of special topics initiated either by student or a faculty member.
Term Offered: Spring, Fall

ECON 3980 Current Economic Issues
[3 credit hours]
Course content varies as changes in the interaction between economic topics and writing assignments occur.

ECON 4050 Population Economics
[3 credit hours]
Interaction of economic changes and demographic variables; topics include birth rates, women’s employment, marriage and divorce, aging and mortality, migration and overpopulation.
Prerequisites: (ECON 1150 (may be taken concurrently) with a minimum grade of D- or ECON 1200 (may be taken concurrently) with a minimum grade of D-) and ECON 2810 (may be taken concurrently) with a minimum grade of D-
Term Offered: Spring

ECON 4120 Monetary Theory
[3 credit hours]
Modern theories of financial markets, money and the theory of interest rates, money’s role in general equilibrium and growth models and money’s ability to cause inflation.
Prerequisites: ECON 3150 with a minimum grade of D-
Term Offered: Spring

ECON 4130 Monetary And Fiscal Policy
[3 credit hours]
Changes in the quantity of money and alternative government spending, taxation and debt policies, interrelations of fiscal and monetary policies in stabilization programs.
Prerequisites: ECON 3150 with a minimum grade of D-
Term Offered: Spring

ECON 4150 Advanced Macroeconomic Theory
[3 credit hours]
Prerequisites: ECON 3150 with a minimum grade of D-
Term Offered: Fall

ECON 4200 Advanced Microeconomic Theory
[3 credit hours]
Advanced topics in microeconomic theory, consumer behavior, the firm and market structure, distribution theory, equilibrium conditions, welfare economics.
Prerequisites: ECON 3200 with a minimum grade of D-
Term Offered: Fall

ECON 4230 Poverty And Income Distribution
[3 credit hours]
Causes and consequences of current trends in poverty and income distribution in the U.S.; analysis of policies dealing with problems in these areas.
Prerequisites: ECON 1150 with a minimum grade of D- or ECON 1200 with a minimum grade of D-

ECON 4240 Applied Environmental Economics
[3 credit hours]
The economics of the environment and natural resources using applied welfare theory, benefit-cost analyses, and nonmarket valuation. Examination of economic instruments, such as marketable permits, for solving environmental problems.
Prerequisites: ECON 1200 with a minimum grade of D- or ECON 3240 with a minimum grade of D- or ECON 3270 with a minimum grade of D-
Term Offered: Spring
ECON 4250 Labor Economics [3 credit hours]
The labor market is studied. Topics include labor force characteristics, wage determination, hours and condition of work, human capital models, unemployment, labor union structure and growth, and modern labor legislation.
Prerequisites: ECON 1200 (may be taken concurrently) with a minimum grade of D- and ECON 2810 (may be taken concurrently) with a minimum grade of D-
Term Offered: Spring

ECON 4260 Behavioral Economics [3 credit hours]
Economic analysis of decisions made by people. Topics include decision-making under risk and uncertainty, strategic decision-making, and experimental economics.
Prerequisites: ECON 1200 (may be taken concurrently) with a minimum grade of D- and ECON 2810 (may be taken concurrently) with a minimum grade of D-

ECON 4280 Energy Economics [3 credit hours]
This course explores the theoretical and empirical perspectives on the demand and supply sides of the energy markets. This course starts with an energy outlook in both domestic and global scales. Then it discusses the natural resource modelling, energy supply, and the behavioral underpinnings of the energy demand. The course continues with current and historical aspects of national and global markets for oil, natural gas, coal, electricity, nuclear power, and renewable energy.
Prerequisites: ECON 1150 with a minimum grade of D- and ECON 1200 with a minimum grade of D-
Term Offered: Spring

ECON 4300 Mathematical Economics [3 credit hours]
Development and applications of the mathematical tools used by economists. Differential and integral calculus, linear algebra, transcendental functions and series.
Prerequisites: ECON 1150 with a minimum grade of D- or ECON 1200 with a minimum grade of D-
Term Offered: Fall

ECON 4410 American Economic History [3 credit hours]
Exploration of economic growth in America from pre-Columbian times to the present day. Analysis of economic institutions, technological change, industrialization and standards of living.
Prerequisites: ECON 1150 with a minimum grade of D- or ECON 1200 with a minimum grade of D-
Term Offered: Fall

ECON 4510 International Economics I [3 credit hours]
Theory of international trade; commercial policy; costs and benefits, economic integration; trade and economic growth and balance of payments problems.
Prerequisites: ECON 1150 with a minimum grade of D-
Term Offered: Spring, Summer

ECON 4550 Economic Development [3 credit hours]
Economic problems and policies in less-developed countries, including such topics as schooling, population growth, urbanization, landholding, income distribution, capital formation and development strategies.
Prerequisites: ECON 1150 with a minimum grade of D- or ECON 1200 with a minimum grade of D-

ECON 4620 Regional Economics [3 credit hours]
Examination of regional income estimates and social accounts, regional multipliers, diverse location theories, supplemented with techniques of regional analysis.
Prerequisites: ECON 1200 with a minimum grade of D-

ECON 4660 Public Finance Economics [3 credit hours]
An analysis of the government sector in the economy, government expenditures, taxation and borrowing and their effects on employment, price levels and growth.
Prerequisites: ECON 1200 with a minimum grade of D-
Term Offered: Spring

ECON 4750 Health Economics [3 credit hours]
Economic analysis of health and health services. Topics currently include medical and allied manpower, hospitals, drugs and cost-benefit analysis of selected health programs.
Prerequisites: ECON 1200 (may be taken concurrently) with a minimum grade of D- and ECON 2810 (may be taken concurrently) with a minimum grade of D-
Term Offered: Spring

ECON 4810 Econometrics Models And Methods I [3 credit hours]
An introduction to econometric methods and their use in quantitative analysis of economic theories. Diagnostics for problems typically encountered are detailed along with techniques for correcting these problems.
Prerequisites: MATH 2600 with a minimum grade of D- or ECON 2810 with a minimum grade of D- or PSY 2100 with a minimum grade of D- or SOC 3290 with a minimum grade of D- or GEPL 4420 with a minimum grade of D-
Term Offered: Fall

ECON 4820 Econometrics Models And Methods II [3 credit hours]
An introduction to forecasting methods for economic time-series including Bayesian methods. Both theory and application of forecasting models and methods are covered.
Prerequisites: ECON 4810 with a minimum grade of D-
Term Offered: Spring

ECON 4830 Econometrics Models And Methods III [3 credit hours]
Econometric methods that apply to survey, spatial and cross-sectional/time-series data along with other specialized modeling techniques are covered.
Prerequisites: ECON 4810 with a minimum grade of D-
ECON 4900 Undergraduate Research Experience
[0 credit hours]
Undergraduate students will participate in directed research or scholarship activities with faculty mentors.
Term Offered: Spring, Summer, Fall

ECON 4910 Research
[1-4 credit hours]

ECON 4920 Readings
[1-4 credit hours]

ECON 4940 Economics Internship
[1-4 credit hours]
A prearranged work-study experiential learning course where students gain practical experience applying their economic knowledge with a specific firm, government agency, or nonprofit group. The course is variable credit from 1 to 4 credits. Each academic credit hour requires 40 hours of internship work, e.g., a 3 credit ECON 4940 course requires 120 hours. ECON 4940 will be graded as “credit/ no credit”.
Prerequisites: ECON 1150 with a minimum grade of D- and ECON 1200 with a minimum grade of D- and ECON 2810 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

ECON 4960 Senior Honors Thesis
[1-4 credit hours]

B.A. in Economics

Undergraduate Research
The department of economics offers students the opportunity to gain research experience under faculty guidance. Research topics can be theoretical analysis, empirical analysis or both. Further options regarding the level of research are available, as the department offers junior- and senior-level courses - ECON 3900, ECON 3910, ECON 4910 and ECON 4920. A student interested in conducting research needs to register for one of those four courses with the consent of a faculty member who agrees to direct the student’s research. Students may enroll in these courses more than once. If they do, however, they are encouraged to work with different faculty members to obtain more diverse research experiences. The department also has available undergraduate research grants from the Shapiro scholarship fund. Please see the department undergraduate advisor for more information.

- B.A. in Economics (p. 57)
- Economics -Concentration In Data Analytics In Economics, BA (p. 57)
- Economics- Concentration In Environmental Economics, BA (p. 58)

B.A. IN ECONOMICS
The requirement of 30 hours in economics must include, from among the following, 15 hours of core courses and 15 hours of electives including at least one WAC course in Economics.

In the major area, 21 hours are to be taken under the regular grading system; the P/NC option is available for the remaining 9 hours and for all related courses.

Economics majors are required to take the following courses:

<table>
<thead>
<tr>
<th>Code</th>

Total Hours 30

1 Majors are encouraged to meet the mathematics and statistics requirements at an early stage of their course work. Students must meet those requirements by choosing one calculus and one statistics course. Majors are encouraged to meet the mathematics and statistics requirements at an early stage of their coursework. For the calculus requirement, students may be exempted from this prescribed requirement through the successful completion of ECON 4300. Students who earn credit for ECON 4300 as a major elective will have the calculus requirement in the related fields waived and they may complete the required 18 credits with any electives from the published course list in the degree audit.

Economics -concentration in Data Analytics in Economics, BA
The requirement of 30 hours in economics must include, from among the following, 15 hours of core courses, 3 hours of electives including one WAC course in Economics, and 12 hours of concentration courses.

In the major area, 21 hours are to be taken under the regular grading system; the P/NC option is available for the remaining 9 hours and for all related courses.

Economics majors are required to take the following courses:

Electives
Select 3 hours, chosen in consultation with the Economics Advisor

Optional Concentration in Data Analytics in Economics
To earn the concentration in data analytics in economics, students must complete 12 credits from the following elective courses as part of their major:

- DANN 2000 Proseminar in Data Analytics I
- DANN 4000 Proseminar in Data Analytics II
- ECON 3810 Applied Econometrics
- ECON 4810 Econometrics Models And Methods I
- ECON 4820 Econometrics Models And Methods II

OR a substitution of one 3/4000 economics elective that includes a required data analysis component chosen in consultation with the economics undergraduate advisor.

**Related Courses**

- MATH 1850 Single Variable Calculus I (or equivalent)
- or MATH 1730 Calculus with Applications to Business and Finance
- MATH 2600 Introduction To Statistics (or equivalent)
- or BUAD 2060 Business Statistics

**Total Hours** 30

Majors are encouraged to meet the mathematics and statistics requirements at an early stage of their course work. Students must meet those requirements by choosing one calculus and one statistics course.

**Economics- concentration in Environmental Economics, BA**

The requirement of 30 hours in economics must include, from among the following, 15 hours of core courses, 3 hours of electives including at least one WAC course in Economics, and 12 hours of concentration courses.

In the major area, 21 hours are to be taken under the regular grading system; the P/NC option is available for the remaining 9 hours and for all related courses.

Economics majors are required to take the following courses:

**Code** | **Title** | **Hours**
--- | --- | ---
ECON 1150 | Principles Of Macroeconomics | 3
ECON 1200 | Principles Of Microeconomics | 3
ECON 2810 | Introduction to Econometrics | 3
ECON 3150 | Intermediate Macroeconomic Theory | 3
ECON 3200 | Intermediate Micro-Economic Theory | 3

**Elective**

Select 3 hours, chosen in consultation with the Economics Advisor.

**Optional Concentration in Environmental Economics**

To earn the concentration in environmental economics, students must complete four of the following elective courses as part of their major:

- ECON 3240 Environmental Economics
- or ECON 3270 Natural Resource Economics
- ECON 3300 BENEFIT-COST ANALYSIS
- ECON 4240/5240 Applied Environmental Economics (OR alternative economics course at 3000 level or above chosen in consultation with the undergraduate economics advisor)

**ECON 4280/5280** Energy Economics (OR alternative economics course at 3000 level or above chosen in consultation with the undergraduate economics advisor)

**Related Courses**

- MATH 1850 Single Variable Calculus I (or equivalent)
- or MATH 1730 Calculus with Applications to Business and Finance
- MATH 2600 Introduction To Statistics (or equivalent)
- or BUAD 2060 Business Statistics

**Total Hours** 30

Majors are encouraged to meet the mathematics and statistics requirements at an early stage of their course work. Students must meet those requirements by choosing one calculus and one statistics course.

- B.A. in Economics (p. 57)
- Economics-Concentration In Data Analytics In Economics, BA (p. 57)
- Economics- Concentration In Environmental Economics, BA

**B.A. IN ECONOMICS**

Students accepted in to the BA in Economics should be academically prepared to be placed in MATH 1730 or MATH 1850. Students placing into lower MATH levels - MATH 1180, MATH 1200 or MATH 1340, are able to replace elective credits with these courses and still complete their degree within 120 hours.

*Below is a sample plan of study. Consult your degree audit for your program requirements.*

**Total Hours**: 120

---

1. For the calculus requirement, students may be exempted from this prescribed requirement through the successful completion of ECON 4300. Students who earn credit for ECON 4300 as a major elective will have the calculus requirement in the related fields waived and they may complete the required 18 credits with any electives from the published course list in the degree audit.

---

### Economics - concentration in Data Analytics in Economics, BA

Students accepted into the BA in Economics should be academically prepared to be placed in MATH 1730 or MATH 1850. Students placing into lower MATH levels - MATH 1180, MATH 1200 or MATH 1340, are able to replace elective credits with these courses and still complete their degree within 120 hours.

---

| Related or minor course (WAC) | 3 |
| Related or minor course | 6 |

**Hours**: 15
Describe opportunity cost and its importance in decision making, marginal analysis, and the importance of understanding economic incentives. Explain the basic models of consumer and firm theory, such as the demand-supply model. Explain economic efficiency and the mechanism by which competitive markets lead to an efficient allocation of scarce resources. Recognize when markets fail to achieve efficiency and discuss the potential for efficiency-improving government intervention into inefficient markets. Explain the distinction between real and nominal values, and why this matters for understanding consumer and firm behavior as well as the national economy. Predict the impact of government fiscal and monetary policy - use of deficits, changes in the money supply, etc. - on overall economic performance. Explain and discuss the determinants of economic growth. Discuss the costs and causes of unemployment, and assess public policies to ameliorate it. Assess the tradeoff between unemployment and inflation.
Apply economic models to analyze issues related to their employer’s objectives, in either a profit maximizing business, or equality goals of a non-profit agency, or policy objectives of a government agency. Apply economic theory to a range of economic problems and effectively produce analysis through oral and written forms that are coherent, organized, concise, and engaging. Discuss economic globalization and the inter-connectedness of nations through the importance of international trade. Use various computer applications to perform statistical analysis and interpret the results in an economically meaningful way. Evaluate how economic concepts are used in economic analyses published in the popular media (newspapers, internet sources, etc.)

**Advanced Economics Certificate**

Advanced Economics Certificate, 10 credits (3 courses); prereq: acceptance into the Early Admission Program for Econ’s One Year Master’s Program:

<table>

Two elective ECON courses from the following list. One at the 5000 level (3 or 4 credits) and one at the 4000 level (3 credits):

- ECON 4620 Regional Economics
- or ECON 562E Regional Economics
- ECON 4050 Population Economics
- or ECON 505Population Economics
- ECON 4750 Health Economics
- or ECON 575Health Economics
- ECON 4250 Labor Economics
- or ECON 525Labor Economics
- ECON 4260 Behavioral Economics
- or ECON 626Behavioral Economics
- ECON 4280 Energy Economics
- or ECON 528Energy Economics
- ECON 4240 Applied Environmental Economics
- or ECON 524Applied Environmental Economics
- ECON 4660 Public Finance Economics
- or ECON 566Public Finance Economics
- ECON 4120 Monetary Theory
- or ECON 512Monetary Theory
- ECON 4130 Monetary And Fiscal Policy
- or ECON 513Monetary And Fiscal Policy
- ECON 4300 Mathematical Economics
- or ECON 530Mathematical Economics
- ECON 4510 International Economics I
- or ECON 551International Economics I
- ECON 4550 Economic Development
- or ECON 555Economic Development

**Advanced Quantitative Economics Certificate**

Advanced Quantitative Economics Certificate, 9 credits (3 courses)

Students in the Early Admission master's program can take up to 2 of these courses at the 5000/6000 level.

Select one elective ECON course from the following; all include data analysis applications:

- ECON 4050 Population Economics
- or ECON 505Population Economics
- ECON 4750 Health Economics
- or ECON 575Health Economics
- ECON 4250 Labor Economics
- or ECON 525Labor Economics
- ECON 4260 Behavioral Economics
- or ECON 626Behavioral Economics
- ECON 4280 Energy Economics
- or ECON 528Energy Economics
- ECON 4300 Applied Environmental Economics
- or ECON 530Applied Environmental Economics

Total Hours 9

**Environmental Economics Certificate**

Environmental Economics Certificate, 9 credits (3 courses):

I. Identification abilities. Students will demonstrate the ability to identify and describe economic phenomena using economic terms and concepts from the provided information and data.

II. Analytic and quantitative abilities. Students will demonstrate the ability to analyze economic models and its implications using graphical and quantitative tools. Students will demonstrate the ability to analyze economic data. In particular:

III. Application abilities. Students will demonstrate the ability to apply economic theory to a range of economic problems.

IV. Communication skills. Student written work and/or oral presentations will demonstrate the ability to convey, interpret, and summarize ideas effectively in terms of content, clarity, syntax, and organization of information.

I. Analytic and quantitative abilities. Students will analyze economic models using advanced quantitative tools such as regression analysis.

Total Hours 9

I. Identification abilities. Students will identify and describe public policy economic phenomena using economic terms and concepts from the provided information and data.

II. Analytic and quantitative abilities. Students will analyze public policy economic models using graphical and quantitative tools.

III. Application abilities. Students will apply economic theory to a range of public policy economic topics.

IV. Communication skills. Students written work and/or oral presentations will demonstrate the ability to interpret and summarize ideas effectively in terms of content, clarity, syntax, and organization of information, particularly for public policy economic issues.

Minor in Economics

Students electing to minor in economics must complete a minimum of 18 hours of course work. The 9 hours of required course work listed below for a minor in economics provide the theoretical and quantitative skills essential for a fundamental understanding of the discipline of economics and a rigorous background for an in-depth appreciation of upper division courses. Each program of study for a minor must receive the prior approval of the departmental Adviser. A minimum GPA of 2.0 must be achieved in courses within the minor.

Advanced Placement Program

Refer to the University of Toledo’s Registrar page at https://www.utoledo.edu/offices/registrar/student_records/advan_credits.html for specific information on minimum scores and credits awarded for Advanced Placement examinations administered by the College Board Advanced Placement Program.

Degrees Offered

• B.A. in English (p. 69)
• Minor in English (p. 73)

ENGL 1010 College Composition 1 Co-Requisite
[3 credit hours]
Explanatory and persuasive writing in both personal and public genres; instruction and practice in generating, focusing, developing, researching and presenting ideas in ways consistent with one’s subject, purposes and intended audiences.
Term Offered: Spring, Summer, Fall
Core English Composition

ENGL 1020 Writing And Grammar For Students Of English As A Second Language
[3 credit hours]
Course work focuses on the major grammatical patterns of academic writing in English as well as accuracy in the mechanics of academic writing. The primary emphasis is on these features in the context of the students’ own written work. Eligibility by placement exam only. A maximum of 3 semester hours in ENGL 1020 and 1120 may be counted toward fulfilling the 124 hour requirement for graduation.
Prerequisites: English Placement with a score of 1020
Term Offered: Spring, Fall
ENGL 1110 College Composition I
[3 credit hours]
Explanatory and persuasive writing in both personal and public genres; instruction and practice in generating, focusing, developing, researching and presenting ideas in ways consistent with one’s subject, purposes and intended audience. ESL students must have completed ENGL 1020 with grade of Pass. From Composition I with Workshop, Composition I and Composition II, no more than 6 hours apply toward graduation.
Prerequisites: ACT Composite with a score of 18 or Accuplacer Sentence Skls Engl with a score of 88 or Accuplacer NG Writing with a score of 263 or TOTAL SCORE with a score of 940
Term Offered: Spring, Summer, Fall
Core English Composition, Trans Mod English Composition

ENGL 1130 College Composition II: Academic Disciplines And Discourse
[3 credit hours]
Reading and analyzing documents from specific disciplines to synthesize results from multiple perspectives and produce disciplinarily appropriate writing from your research. A significant focus on academic argument and advanced research writing skills included. Discipline-specific sections offered. Web enhanced. Critical reading, research papers required.
Prerequisites: ENGL 1110 with a minimum grade of D- or ENGL 1010 with a minimum grade of D-
Term Offered: Spring, Summer, Fall
Core English Composition, Trans Mod English Composition

ENGL 2010 Advanced Composition
[3 credit hours]
Instruction and practice in writing expository and persuasive prose for a variety of audiences with particular attention to the effect of content and style upon readers. Introduction to advanced methods for critical thinking, argumentation, and research writing. Writing for discipline-specific and/or public audiences encouraged.
Prerequisites: ENGL 1130 with a minimum grade of D- or ENGL 1140 with a minimum grade of D- or ENGL 1150 with a minimum grade of D- or ENGL 2950 with a minimum grade of D- or ENGL 2960 with a minimum grade of D- or HON 1010 with a minimum grade of D- or HON 1020 with a minimum grade of D- or ENGL 1130 with a minimum grade of D- or ENGL 1140 with a minimum grade of D- or ENGL 1150 with a minimum grade of D- or ENGL 1160 with a minimum grade of D- or ENGL 1170 with a minimum grade of D- or ENGL 1190 with a minimum grade of D- or ENGL 1210 with a minimum grade of D- or ENGL 1220 with a minimum grade of D- or ENGL 1230 with a minimum grade of D-
Term Offered: Spring, Fall

ENGL 2710 Reading Fiction
[3 credit hours]
Exploration of various kinds of fiction with goals of literary appreciation and analytical insight. (not for major credit)
Prerequisites: ENGL 1100 with a minimum grade of D- or ENGL 1110 with a minimum grade of D- or ENGL 1110 with a minimum grade of D- or ENGL 1110 with a minimum grade of D- or ENGL 1110 with a minimum grade of D- or ENGL 1130 with a minimum grade of D- or ENGL 1140 with a minimum grade of D- or ENGL 1150 with a minimum grade of D- or HON 1020 with a minimum grade of D-
Term Offered: Spring, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

ENGL 2720 Reading Drama
[3 credit hours]
Exploration of various kinds of drama with goals of literary appreciation and analytical insight. (not for major credit)
Prerequisites: ENGL 1100 with a minimum grade of D- or ENGL 1110 with a minimum grade of D- or ENGL 1110 with a minimum grade of D- or ENGL 1130 with a minimum grade of D- or ENGL 1140 with a minimum grade of D- or ENGL 1150 with a minimum grade of D- or HON 1020 with a minimum grade of D-
Term Offered: Spring, Fall
Core Arts & Humanities

ENGL 2730 Reading Poetry
[3 credit hours]
Exploration of various kinds of poetry with goals of literary appreciation and analytical insight. (not for major credit)
Prerequisites: ENGL 1100 with a minimum grade of D- or ENGL 1110 with a minimum grade of D- or ENGL 1110 with a minimum grade of D- or ENGL 1130 with a minimum grade of D- or ENGL 1140 with a minimum grade of D- or ENGL 1150 with a minimum grade of D- or HON 1020 with a minimum grade of D-
Term Offered: Spring, Fall
Core Arts & Humanities

ENGL 2770 Ethnic American Literature
[3 credit hours]
Study of US Ethnic American Literature. The literature of a particular group may be specified; consult Time Schedules for specific topic.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Multicultural US Diversity

ENGL 2800 Writing About Literature
[3 credit hours]
A writing-intensive (WAC) course introducing the process of writing various types of papers and analyzing literary works. Special emphasis on discovering a topic and on revision and structure in expository writing.
Prerequisites: ENGL 1100 with a minimum grade of D- or ENGL 1110 with a minimum grade of D- or ENGL 1130 with a minimum grade of D- or ENGL 1140 with a minimum grade of D- or ENGL 1150 with a minimum grade of D- or HON 1010 with a minimum grade of D- or HON 1020 with a minimum grade of D-
Term Offered: Spring, Summer, Fall
Core Arts & Humanities

ENGL 2950 Science And Technical Report Writing
[3 credit hours]
Instruction and practice in multiple forms of technical and scientific communication for varied scientific and technical audiences. Emphasis on writing informational and analytical reports and documents in medical, scientific or technical fields. Additional focus on writing for multiple audiences and in different mediums, including online mediums.
Prerequisites: ENGL 1010 with a minimum grade of D- or ENGL 1110 with a minimum grade of D-
Term Offered: Spring, Summer, Fall
Core English Composition, Trans Mod English Composition
ENGL 2960 Professional and Business Writing
[3 credit hours]
Instruction and practice in multiple forms of professional and business writing within an organizational context. Emphasis on the analytical report based on research. Additional focus on writing for multiple audiences and in different mediums, including online mediums.

Prerequisites: ENGL 1110 with a minimum grade of D- or ENGL 1010 with a minimum grade of D-
Term Offered: Spring, Summer, Fall
Core English Composition, Trans Mod English Composition

ENGL 3010 Creative Writing
[3 credit hours]
A basic introduction to creative writing. Students write poems, stories or creative nonfiction which serve as the basis for classroom discussion and for conferences with instructor.

Prerequisites: ENGL 1130 with a minimum grade of D- or ENGL 1140 with a minimum grade of D- or ENGL 1150 with a minimum grade of D- or ENGL 2950 with a minimum grade of D- or ENGL 2960 with a minimum grade of D- or ENGL 2970 with a minimum grade of D- or ENGL 9010 with a minimum grade of D- or ENGL 9020 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

ENGL 3020 Readings for Writers
[3 credit hours]
Through the analysis of a diverse range of literary genres, this course will teach writers how to develop their own material by studying as models the formal strategies of other writers, including but not limited to language, structure, narrator or speaker, character, dialogue, plot, tone, and the many other elements of literature. This course will also offer a unit on professionalism.

Prerequisites: ENGL 3010 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

ENGL 3040 Playwriting
[3 credit hours]
Creative writing for the theatre analyzing traditional and contemporary structure and style.

Prerequisites: ENGL 2720 with a minimum grade of D- or THR 2299 with a minimum grade of D-
Term Offered: Spring, Fall

ENGL 3050 Persuasive Writing
[3 credit hours]
Analysis of and practice in the techniques of persuasive writing. Emphasis varies from writing about legal issues to writing about issues of public controversy.

Prerequisites: ENGL 1130 with a minimum grade of D- or ENGL 1140 with a minimum grade of D- or ENGL 1150 with a minimum grade of D- or ENGL 2950 with a minimum grade of D- or ENGL 2960 with a minimum grade of D- or ENGL 2970 with a minimum grade of D- or ENGL 9010 with a minimum grade of D- or ENGL 9020 with a minimum grade of D-
Term Offered: Spring, Fall

ENGL 3060 Screenwriting
[3 credit hours]
This course involves practical analysis of screenplays, emphasizing story structure and characterization. Students plan, write and refine story lines before writing actual scripts.

Term Offered: Spring, Summer, Fall

ENGL 3070 Writing Within the Community
[3 credit hours]
This service learning course will teach students how to teach creative writing with compassion in small communities with a need to have their voices heard.

ENGL 3080 The Art And Process Of The Book
[3 credit hours]
This course examines all aspects of the printed book - from scrolls to Gutenberg to contemporary publishing - as students work towards designing, printing and binding a finely printed edition.

Prerequisites: ENGL 1130 with a minimum grade of D- or ENGL 1140 with a minimum grade of D- or ENGL 1150 with a minimum grade of D- or ENGL 2950 with a minimum grade of D- or ENGL 2960 with a minimum grade of D- or ENGL 2970 with a minimum grade of D- or ENGL 9010 with a minimum grade of D- or ENGL 9020 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

ENGL 3150 Linguistic Principles
[3 credit hours]
An introduction to modern linguistic theories about the nature and structure of language with emphasis on English.

Term Offered: Spring, Fall

ENGL 3250 The Detective Story
[3 credit hours]
A selective study of the genre from its beginning in the 19th century to the present, with attention to the variety of sub-genres and styles.

ENGL 3260 Contemporary Fiction
[3 credit hours]
A study of recent trends in American, British, and World fiction.

ENGL 3300 Introduction to Poetry and Poetics
[3 credit hours]
This course serves as an introduction to the techniques and ideas that underlie poetry. It will feature a broad array of poems from multiple times and places, major statements on poetics, and discussion of how poets conceive of what poetry is and how poetics affects reading.

ENGL 3360 American Literary Traditions
[3 credit hours]
Introduction to literary history, and the terminology and techniques of the historical study of American literature, intended as preparation for the English major. Texts may include works from the colonial period to the 21st-century.

Term Offered: Spring, Summer, Fall
ENGL 3610 British Literary Traditions
[3 credit hours]
Introduction to literary history, and the terminology and techniques of the historical study of British literature, intended as preparation for the English major. Texts may include works from the Medieval period to the 21st-century.
Term Offered: Spring, Fall

ENGL 3620 Children's and Young Adult Literature
[3 credit hours]
Study of the history and major themes of children's and young adult literature. Appropriate for both majors and non-majors.

ENGL 3630 American Literature, Beginnings to 1865
[3 credit hours]
Study of the writing of colonial North America and the United States before 1865, in literary and historical contexts. 3 credits.

ENGL 3640 American Literature 1865 to the Present
[3 credit hours]
Study of the writing of the United States after 1865, in literary and historical contexts. 3 credits.

ENGL 3650 Science Fiction And Fantasy Literature
[3 credit hours]
This course examines literary works of science fiction and fantasy, and related scholarship, from a variety of perspectives. Readings are selected from prominent writers in both genres.
Term Offered: Spring, Summer, Fall

ENGL 3660 Latinx Literature in the U.S.
[3 credit hours]
Introduction to Latinx writers, literatures, and cultures in the United States from the 1960s to the present moment.
Term Offered: Spring, Fall

ENGL 3670 Literature Of Diverse and Nonwhite Communities
[3 credit hours]
Introduction to study of non-white authors representing formerly colonized countries or other nonwestern and diasporic communities. May include African-American, Caribbean, Central and South Asian, or African literature. Will include texts written in English and/or translated from other languages. Intended as preparation for the English major.
Term Offered: Spring, Fall

ENGL 3680 British Literature from the Middle Ages to 1789
[3 credit hours]
Study of the writing of the British isles before 1789, in literary and historical contexts. 3 credits.

ENGL 3690 British Literature from 1789 to the Present
[3 credit hours]
Study of the writing of the British isles after 1789, in literary and historical contexts. 3 credits.

ENGL 3710 Literature Of The Old Testament
[3 credit hours]
A study of the Old Testament from the literary point of view, including ancient poetry, history, romance, short story, hymn, prophecy, and wisdom writing.
Term Offered: Spring, Summer, Fall

ENGL 3720 Literature And Mythology
[3 credit hours]
Study of classical and biblical mythologies in modern Western literature, private mythologies and literary adaptations of patterns from legend and folklore.
Term Offered: Spring, Fall

ENGL 3730 Folktale
[3 credit hours]
A survey of the field of folktale with an emphasis on folk narrative, folk music and material culture in America.
Term Offered: Spring, Fall

ENGL 3740 Folktale And Literature
[3 credit hours]
A study in the relationship of oral and written literature. Focus is on the literary uses of folk forms and use of tradition by specific writers and schools.
Term Offered: Fall

ENGL 3750 Women And Literature
[3 credit hours]
Offered as Writing Across the Curriculum (WAC) course. Examines literary works in light of major issues raised by feminist criticism and gender studies.
Term Offered: Spring, Summer, Fall

[3 credit hours]
Offered as Writing Across the Curriculum (WAC) course. A selective study of works of European literature (in translation) from the Ancient Greeks and Romans and Medieval and Renaissance European cultures other than Britain. Particular texts vary, but may include a variety of genres and authors across the periods. Recommended: ENGL 3600, 3610, or 3790.
Term Offered: Fall

ENGL 3770 World Literature And Cultures
[3 credit hours]
This course examines texts and cultures form around the world (and in particular the non-western world). The genres examined include autobiography, poetry, short fiction, novels, plays and histories.
Term Offered: Spring, Fall

ENGL 3780 Modern European Literature
[3 credit hours]
Literature of Europe other than Britain from the 16th century to the present, in English translation.
Term Offered: Fall
ENGL 3790 Foundations Of Literary Study
[3 credit hours]
Writing Across the Curriculum Course. An overview and introduction to
the discipline of literary study.
Prerequisites: ENGL 1130 with a minimum grade of D- or ENGL 1140
with a minimum grade of D- or ENGL 1150 with a minimum grade of D-
ENGL 2950 with a minimum grade of D- or ENGL 2960 with a minimum
grade of D- or HON 1010 with a minimum grade of D- or HON 1020 with a
minimum grade of D- or ENGL 1180 with a minimum grade of D-
ENGL 1190 with a minimum grade of D- or ENGL 1210 with a minimum grade of D-
ENGL 1220 with a minimum grade of D- or ENGL 1230 with a minimum grade of D-
Term Offered: Spring, Fall

ENGL 3810 Shakespeare I
[3 credit hours]
An introduction to the study and interpretation of Shakespeare's works in
literary, theatrical, and historical context, with a focus on his drama.
Term Offered: Spring, Fall

ENGL 3850 LGBTQ Literature
[3 credit hours]
Study of literature by LGBTQ people. Individual sections may focus
specifically on one geographic region or historical period.
Term Offered: Spring, Fall

ENGL 3980 Special Topics in Literature
[3 credit hours]
Group study of a period, genre, author, or special literary topic. May be
repeated with change of specialty number. Topics will be announced in
the semester Time Schedules.
Term Offered: Spring, Fall

ENGL 4030 Writing Workshop In Nonfictional Prose
[3 credit hours]
Directed study of nonfiction genres, rhetorical forms and elements of
style; extensive practice in the writing and critical evaluation of prose.
Prerequisites: ENGL 2010 with a minimum grade of D- or ENGL 3010 with
a minimum grade of D-
Term Offered: Spring, Fall

ENGL 4070 Writing Workshop In Poetry
[3 credit hours]
An advanced workshop in writing poetry emphasizing a wider range of
readings, craft and technique.
Prerequisites: ENGL 3010 with a minimum grade of D-
Term Offered: Spring, Fall

ENGL 4080 Writing Workshop In Fiction
[3 credit hours]
An advanced workshop emphasizing a wider range of readings, craft and
technique. May be repeated once for credit.
Prerequisites: ENGL 3010 with a minimum grade of D-
Term Offered: Spring, Fall

ENGL 4090 Current Writing Theory
[3 credit hours]
A study of current theory and research connecting reading, critical
thinking, and writing with applications of theory to students' writing
practice.
Prerequisites: ENGL 1130 with a minimum grade of D- or ENGL 1140
with a minimum grade of D- or ENGL 1150 with a minimum grade of D-
ENGL 2950 with a minimum grade of D- or ENGL 2960 with a minimum
grade of D- or HON 1010 with a minimum grade of D- or HON 1020 with a
minimum grade of D- or ENGL 1180 with a minimum grade of D-
ENGL 1190 with a minimum grade of D- or ENGL 1210 with a minimum grade of D-
ENGL 1220 with a minimum grade of D- or ENGL 1230 with a minimum grade of D-
Term Offered: Spring, Fall

ENGL 4100 The History Of English
[3 credit hours]
Study of the changes that have taken place in the English language from
the earliest days to the present.
Term Offered: Spring, Summer, Fall

ENGL 4110 Old English
[3 credit hours]
A study of phonology, morphology and syntax with representative
readings in verse and prose.
Term Offered: Fall

ENGL 4120 Middle English
[3 credit hours]
Study of the phonology, morphology and syntax of Middle English, with
special attention to literary and cultural background. Representative
readings in verse and prose.

ENGL 4200 British Fiction: 18th Century
[3 credit hours]
The development of British fiction in the 18th Century. Recommended:
ENGL 3610 or 3790.

ENGL 4210 Issues in ESL Writing
[3 credit hours]
Course content includes key concepts in ESL writing instruction and
research; characteristics of second language writers and their texts;
curricular options; and responding to and assessing ESL writing.
Term Offered: Spring, Fall

ENGL 4280 American Fiction: 20th and 21st Century
[3 credit hours]
Major developments in the 20th-century and 21st Century American short
story and novel. Recommended: ENGL 3600 or 3790.

ENGL 4300 Medieval and Early Tudor Drama
[3 credit hours]
A study of drama and performance from the British Isles and relevant
continental traditions in the late Middle Ages through the early 16th
century, in their cultural, material, and performance contexts. Course may
include performance traditions and texts such as monastic and liturgical
drama, civic Creation-to-Doomsday play cycles, manuscript collections of
drama, morality plays, passion plays, miracle and saints' plays, folk plays,
courtly interludes and mumming, and royal entries, as well as modern
revivals.
ENGL 4310 British Drama To 1642  
[3 credit hours]  
A study of drama in England from the opening of the first public theaters to their closing in 1642. May include plays produced for public performance and other dramatic works. Emphasis will be on playwrights other than Shakespeare. Recommended: ENGL 3610, 3790, or 3810

ENGL 4340 Modern Drama  
[3 credit hours]  
Drama in English or translation from the 1870s to the 1930s.

ENGL 4400 British Literature: The Medieval Period  
[3 credit hours]  
The study of British literature before 1500, often in translation. Topics vary between early medieval texts and culture (8th to 11th centuries), late medieval texts and culture (12th to 15th centuries, excluding Chaucer), and specific themes or genres across sub-periods. Check departmental course descriptions for the specific topic in a given semester. May be repeated for credit if topics are different. Recommended: ENGL 3610, 3790, or 3810.

Term Offered: Spring, Fall

ENGL 4420 British Literature: Renaissance  
[3 credit hours]  
Poetry and prose of the 16th century, with emphasis on the Elizabethan period. Recommended: ENGL 3610, 3790, or 3810.

Term Offered: Spring, Fall

ENGL 4440 Early 17th Century English Literature  
[3 credit hours]  
Poetry and prose from 1603 to 1660. Recommended: ENGL 3610, 3790, or 3810.

Term Offered: Spring, Fall

ENGL 4460 British Literature: Restoration And 18th Century  
[3 credit hours]  
Drama, poetry, and prose of the Restoration, neo-classical and pre-Romantic periods. Recommended: ENGL 3610, 3790, or 3810.

Term Offered: Spring

ENGL 4500 British Literature: The Romantic Period  
[3 credit hours]  
Study of major authors, genres, and ideas of the Romantic period: approximately 1789 to 1837.

Term Offered: Spring, Fall

ENGL 4520 British Literature: The Victorian Period  
[3 credit hours]  
Study of major authors, genres, and ideas of the Victorian period: approximately 1837 to 1901.

Term Offered: Spring, Fall

ENGL 4540 British Literature: The 20th and 21st Centuries  
[3 credit hours]  
Study of major authors, genres, and ideas of 20th-century and 21st-century British literature.

Term Offered: Spring, Fall

ENGL 4550 Literature of the British Empire, Beginnings to 1850  
[3 credit hours]  
Study of the development of race, empire, and colonialism through literary texts written in (or translated into) English from the late-thirteenth century to the abolition of the British slave trade in the early-nineteenth.

Term Offered: Spring, Fall

ENGL 4560 Literature of the British Empire 1850 to the Present  
[3 credit hours]  
Studies in texts from Britain and its former colonies. Genres may include the novel, travel writing, memoir, and film.

Term Offered: Spring, Fall

ENGL 4600 Early American Literature  
[3 credit hours]  
The poetry and theology of the New England Puritans, especially Bradstreet and Taylor, the literature of the American Enlightenment, the beginnings of American Romanticism in Bryant and Cooper. Recommended: ENGL 3600 or 3790.

Term Offered: Fall

ENGL 4610 Nineteenth-Century Latinx Literature  
[3 credit hours]  
Cultural production of Latinx peoples in the nineteenth century United States. Topics to include the social and cultural impact of colonization in the Southwestern part of the U.S and the Atlantic world and identity formation among Hispanophone Black, Indigenous, and people of color (BIPOC).

Term Offered: Spring, Fall

ENGL 4620 American Romanticism  
[3 credit hours]  
Literature of the United States from the early nineteenth century through about 1865, with concentration on the literary production between 1840 and 1865. Recommended: ENGL 3600 or 3790.

Term Offered: Fall

ENGL 4630 American Literary Realism  
[3 credit hours]  
American literature from the post-Civil War period to the early 20th Century. Recommended: ENGL 3600 or 3790.

Term Offered: Fall

ENGL 4640 Early 20th Century American Poetry  
[3 credit hours]  
Study of American poetry from 1900 to 1950. Recommended: ENGL 3600 or 3790.

Term Offered: Spring

ENGL 4650 African American Writers Before The 20th Century  
[3 credit hours]  
A survey of African-American prose, poetry, drama and fiction from 1760 to 1915. Recommended: ENGL 2800, or 3790.

Term Offered: Spring, Fall

ENGL 4650 African American Literature In The 20th and 21st Century  
[3 credit hours]  
A course focused on 20th and 21st century African American poetry, fiction, nonfiction, and drama.

Term Offered: Spring, Summer, Fall

ENGL 4660 African American Literature Since World War II  
[3 credit hours]  
An exploration of American literature from 1945 to the present day with a focus on both poetry and fiction, and possibly drama and other literary forms. Recommended: ENGL 3600 or 3790.

Term Offered: Spring, Fall
ENGL 4690 Native American Literature And Culture
[3 credit hours]
Study of texts by and about Native Americans, including the oral traditions of storytelling and mythology.
**Term Offered:** Spring, Fall
Multicultural US Diversity

ENGL 4730 World Cinemas And Cultures
[3 credit hours]
Study of cinematic representations across cultures and the relations between film, its subjects and the camera.
Multicultural Non-US Diversity

ENGL 4780 Principles Of Literary Criticism
[3 credit hours]
A comparative study of the principles of literary criticism, including readings from representative critics of all ages, and of basic aesthetic theories underlying the major approaches to literature. Recommended: ENGL 2800, or 3790.

ENGL 4800 Chaucer
[3 credit hours]
A study of Geoffrey Chaucer's major works and cultural, literary, and critical contexts. All works will be read in Chaucer's original Middle English. Course has two variations: one focusing on The Canterbury Tales and another on the dream visions and Troilus and Criseyde. Consult Time Schedules or departmental course descriptions for the specific topic. May be repeated for credit with different topic. Recommended: ENGL 3610, 3790 or 3810.
**Term Offered:** Spring, Fall

ENGL 4810 Shakespeare II
[3 credit hours]
Advanced study of Shakespeare's plays, particularly his later plays. Recommended: ENGL 3810.
**Term Offered:** Spring, Fall

ENGL 4820 Milton
[3 credit hours]
A study of the poetry and selected prose of John Milton. Recommended: ENGL 3610, 3810, or 3790.
**Term Offered:** Spring, Fall

ENGL 4850 Studies In The Work Of A British Author
[3 credit hours]
Author changes with each offering. Consult Time Schedules for authors to be studied. Can be repeated for credit if topic is different. Recommended: ENGL 3610, 3810, or 3790.
**Term Offered:** Spring, Fall

ENGL 4900 English Honors Seminar
[2 credit hours]
The Honors Seminar is taken in conjunction with the Honors Thesis ENGL 4960. Required of all candidates for departmental Honors.
**Term Offered:** Fall

ENGL 4940 Internship In English
[1-4 credit hours]
Internship with an approved program, company or agency employing research, writing editing or linguistics expertise. Student must submit proposal for approval by advisory and a departmental committee. (Repeatable for a maximum of 4 hours credit.)
**Term Offered:** Spring, Summer, Fall

ENGL 4950 Special Topics For Writers
[3 credit hours]
An advanced course in genre writing. Content varies with each offering. May be repeated once for credit.
**Term Offered:** Spring, Fall

ENGL 4960 English Honors Thesis
[4 credit hours]
Research and writing of a thesis on a topic in English or linguistics required of all candidates for departmental honors.
**Corequisites:** ENGL 4900
**Term Offered:** Spring, Fall

ENGL 4980 Special Topics In Literature
[3 credit hours]
An undergraduate course on a special topic. Consult Time Schedules for topic to be studied and semester offered.
**Term Offered:** Spring, Fall

ENGL 4990 Independent Study
[1-3 credit hours]
Supervised independent study in special topics of British and American language and literature. Courses may be repeated more than once for credit.
**Term Offered:** Spring, Summer, Fall

**B.A. in English**

The English major offers two concentrations: Literature and Creative Writing.

Both concentrations require a minimum of 36 credit hours, and the major core is required of both concentrations. These courses are offered at least once a year.

An English honors candidate must be a junior or senior, have completed 15 hours of 3000-4000 level English courses, and have a GPA of 3.6 or higher. Any student interested in pursuing departmental Honors must discuss the possibility of departmental Honors with the English Honors advisor prior to enrolling in ENGL 4900 and ENGL 4960. In order to receive the designation of honors, the student must fulfill the departmental Honors requirements in addition to the hours required for the major, and receive an A on the thesis. Students do not have to be enrolled in the College Honors program to pursue departmental Honors.

### Literature Concentration

**First Term**
- **AR 1000**  | First Year Orientation  | 1
- **ENGL 1110**  | College Composition I  | 3
- Natural Sciences Core  | 3
- Arts/Humanities Core (Fine Arts)  | 3
- Elementary Foreign Language I  | 4
- Social Sciences Core  | 3
- **Hours**  | 17

**Second Term**
- **ENGL 1130**  | College Composition II: Academic Disciplines And Discourse  | 3
- **MATH 1180**  | Reasoning With Mathematics  | 3
- **HIST 1010-HIST 1220**  | Arts/Humanities Core (History)  | 3
- Social Sciences Core  | 3
- **Hours**  | 17

**Third Term**
- **ENGL elective (3000-4000 level)**  | 3
- Natural Sciences Core  | 3
- Social Sciences Core  | 3
- Diversity of US  | 3
- Intermediate Foreign Language I or approved culture course  | 3
- **Hours**  | 15

**Fourth Term**
- One course from introduction to critical practice category  | 3
- One course from literature excluded from the traditional canon category  | 3
- Natural Sciences Core  | 3
- Natural Sciences Core (Lab)  | 1
- Related or Minor course  | 3
- Intermediate Foreign Language I or approved culture course  | 3
- **Hours**  | 16

**Fifth Term**
- One course from literature before 1800 category  | 3
- One single-author course  | 3
- Related or Minor course  | 3
- Related or Minor course  | 3
- Elective  | 3
- **Hours**  | 15

**Sixth Term**
- One course from literature before 1800 category  | 3

---

1. ENGL 3810 is recommended for either of these two requirements, but may not count for both requirements.

---

**Seventh Term**
- One course from literature before 1800 category  | 3
- One course from literature after 1800 category  | 3
- **ENGL elective (3000-4000 level)**  | 3
- Related or Minor course 3000/4000 level  | 3
- Elective  | 1
- **Hours**  | 13

**Eighth Term**
- **ENGL elective (3000-4000 level)**  | 3
- **ENGL elective (3000-4000 level)**  | 3
- Elective  | 3
- Elective  | 1
- Related or Minor course 3000/4000 level  | 3
- **Hours**  | 13

---

1. ENGL 3810 is recommended for either of these two requirements, but may not count for both requirements.

---

1. Recognize literary form, genre, and structure and to recognize historical literary periods and their characteristics
2. Discuss literary texts from various theoretical and critical perspectives, formulate ideas and connections between literary concepts and themes
3. Recognize canonical authors and text; recognize race, gender, and class issues with respect to canon; and recognize differences between aesthetic and cultural concerns; for Creative Writing: recognize competent creative work in the genres of poetry, essay and fiction
4. Demonstrate command of literary terminology and methodology, construct complex arguments, formulate hypotheses and thesis sentences to validate arguments; for Creative Writing: write persuasively about creative work, and offer constructive critiques
5. Employ interpretive strategies – e.g. to perform exegesis, to show relations between form and content, to parse connections among individual words with respect to emotional connotations and denotative significance, and to construct arguments about the aesthetic, emotional, and intellectual relations among literary components of individual texts; for Creative Writing: apply critique to one’s own creative work
6. Write short essays, impromptu essays, and long research papers, showing knowledge of conventional rhetorical strategies; for creative writing, write competent creative work in one or more genres
Minor in English

</table>

Select one of the following: 3

- ENGL 3600 American Literary Traditions
- ENGL 3610 British Literary Traditions
- ENGL 3760 European Literature To The Renaissance
- ENGL 3770 World Literature And Cultures
- ENGL 3810 Shakespeare I

Select one of the following: 3

- ENGL 2800 Writing About Literature
- ENGL 3010 Creative Writing
- ENGL 3020 Readings for Writers
- ENGL 3790 Foundations Of Literary Study

Select at least three English courses at the 4000-level. At least one must be a literature course (numbered between 4200 and 4890). 9

Select an English elective at the 3000- or 4000-level. 3

Total Hours 18

No more than 12 credits used for a major, minor, or concentration in any college may be used toward the English minor.

Department of Geography and Planning

Patrick Lawrence, Chair
Beth Schlemper, B.A. Coordinator, Undergraduate Advisor

Advanced Placement Program

Refer to the University of Toledo's Registrar page at https://www.utoledo.edu/offices/registrar/student_records/advan_credits.html for specific information on minimum scores and credits awarded for Advanced Placement examinations administered by the College Board Advanced Placement Program.

Degrees Offered

- B.A. in Geography (p. 76)
- Minor in Geographic Information Science and Technology (p. 80)
- Minor in Human and Environmental Geography (p. 80)
- Minor in Urban and Regional Planning (p. 80)

- GEPL 1010 People, Places, and Society [3 credit hours]
  This course provides an overview of the geographic dimensions of human diversity with an emphasis on understanding the uneven distribution of people and resources in the context of globalization. It is a systematic treatment of the major concepts of human geography and their application to modern problems, population, migration, cultural patterns and processes, political organization of space, agricultural and rural land use, industrialization and economic development, and urban land use. (not for major credit)
  Term Offered: Spring, Summer, Fall
  Core Social Sciences, Trans Mod Social Science

- GEPL 1100 Environmental Sustainability [3 credit hours]
  While gaining a fundamental understanding of the world's physical environment, students explore the processes and spatial distributions of anthropological changes to the world's lands, freshwater, biota, oceans and atmosphere. Current issues such as global warming, acid rain, ozone depletion, deforestation and desertification are addressed.
  Term Offered: Spring, Summer, Fall
  Core Social Sciences, Trans Mod Social Science

- GEPL 2010 Fundamentals Of Geography [3 credit hours]
  An introduction to basic geographic concepts of both physical and human geography, with emphasis on the interrelationships of people with their physical and cultural environments.
  Term Offered: Spring

- GEPL 2030 Cultural Geography [3 credit hours]
  A learning-through-writing course. Systematic applications of the concepts of culture and cultural diversity to geographical themes and case studies.
  Term Offered: Spring
  Multicultural Non-US Diversity

- GEPL 2040 World Regional Geography [3 credit hours]
  This course explores the cultural, demographic, socio-economic, historical and political geographies of the world outside of the United States. World regions are examined and discussed with a focus on the forces that create both differences and interconnections among regions. The course uses the themes of globalization and human-environmental interaction, with an emphasis on understanding how these forces operate at different scales to create our global geography.
  Term Offered: Spring, Fall
  Core Social Sciences, Multicultural Non-US Diversity

- GEPL 2050 World Cities [3 credit hours]
  This course discusses the physical, cultural, socio-economic aspects of the mega cities of the world - the World Cities. It examines the causes and stages of growth and the decline of cities.
  Term Offered: Spring, Fall
## Course Descriptions

### GEPL 2110 Maps and Map Analysis
[3 credit hours]
This course provides an overview of the appropriate use of maps, a basic tool of analysis in geography and planning. Topics will include map scale and map projections, types of maps and their particular uses, elements of map design, effective communication with maps, special requirements of spatial data, and the fundamentals of spatial analysis using maps. The focus is on the use of maps as tools for spatial analysis and not the production of maps.
**Prerequisites:** GEPL 2010 with a minimum grade of D-
**Term Offered:** Fall

### GEPL 3030 Geography Of Europe
[3 credit hours]
An introduction to the geography of Europe with an emphasis on boundaries, economic development, integration, identity, nationalism, and regional differences. The course includes an examination of how Europe has been defined and what it means to be European in both historical and contemporary contexts. It provides a critical perspective on the geography of Europe as it is impacted by local, regional, and global forces.
**Term Offered:** Spring

### GEPL 3050 Geography of US and Canada
[3 credit hours]
Systematic and regional survey of physical, social and economic geography of the region. Emphasis on the region with respect to worldwide/continental problems and prospects in economic development, management of resources and population adjustment.
**Term Offered:** Spring, Summer, Fall
Multicultural US Diversity

### GEPL 3120 Geography Of Asia
[3 credit hours]
Compares and contrasts physical and human aspects of Asian countries and peoples in relation to economic development.
**Term Offered:** Spring, Fall
Multicultural Non-US Diversity

### GEPL 3220 Geography Of Africa
[3 credit hours]
Course begins with a general overview of Africa’s physical environment, its colonial history and its people and cultures. It then examines a variety of themes associated with development, population, urban and political geography.
**Term Offered:** Fall
Multicultural Non-US Diversity

### GEPL 3300 Geography of Latin America and the Caribbean
[3 credit hours]
This course explores one of the world’s most vibrant regions, Latin America. This world region stretches across diverse landscapes, from tropical rainforests to the snowcapped peaks of the Andes, from megacities to empty deserts and plains. The diversity of environments fosters great cultural diversity, despite sharing similar historical roots. This course explores the geography of Latin America through a combination of thematic and regional approaches.
**Term Offered:** Spring, Summer, Fall
Multicultural Non-US Diversity

### GEPL 3440 Population Geography
[3 credit hours]
A learning through writing course. Space and place facets of population size, growth, migration, distribution and composition with emphasis on the population trends and patterns in both developing and developed nations.

### GEPL 3610 Conservation And Resources
[3 credit hours]
A timely examination of some basic philosophies, principles and ethical issues in conservation and resource discourses in geography and across the disciplines. Provocative case studies. A learning-through-writing (WAC) course.
**Term Offered:** Spring

### GEPL 3650 Industrial Geography
[3 credit hours]
An introduction to industrial geography; including industrial location theory, competing production systems, and shifts from manufacturing to service-based economies.
**Term Offered:** Spring, Fall

### GEPL 3900 Environmental Planning
[3 credit hours]
Study of how humans are impacting the health and sustainability of the earth by their actions and activities and means by which we can reduce the impacts by better planning and management of human uses. Topics include water resources, forests, natural hazards, and the Great Lakes, through conservation, protected areas, better use of science, stewardship, cooperation and community actions. Will include use of local examples and case studies drawn from Ohio and the US.
**Term Offered:** Spring, Fall

### GEPL 4040 Geography Education Strategies
[3 credit hours]
Use of geographic inquiry in the emerging integrated social studies and standard geography education curricula for K-12 instruction.
**Term Offered:** Fall

### GEPL 4110 Geographic Information Systems
[3 credit hours]
Introduction to computerized methods for the capture, storage, management, analysis and display of spatially-referenced data for the solution of planning, management and research problems.
**Term Offered:** Spring, Fall

### GEPL 4160 Patterns Of World Development
[3 credit hours]
An examination of contemporary global economic patterns and trends. Compares and contrasts population problems; the diffusion of multinational corporations, and the emergence of post-industrial economies.
**Term Offered:** Fall

### GEPL 4180 Geographic Information Systems Applications
[3 credit hours]
Advanced applications in geographic information systems (GIS) with an emphasis on advanced GIS analysis techniques, Global Positioning System applications in GIS, database design, and a survey of vector- and raster-based GIS software and databases.
**Prerequisites:** GEPL 4110 with a minimum grade of D-
**Term Offered:** Spring
GEPL 4210 Land Use Planning
[3 credit hours]
A broad review of urban and regional planning in the US and Western Europe, introducing land use planning concepts and practices and their role in shaping the direction of urban development.
Term Offered: Spring

GEPL 4310 Geography Of Gypsies (Romanies) and Travelers - WAC
[3 credit hours]
Explorations into identities and distributions of Gypsies (Romanies) and Travelers (GR&T peoples) worldwide and the challenges that their study presents to Geography and to other social science disciplines.
Term Offered: Spring, Summer, Fall

GEPL 4420 Quantitative Methods in Geographic Research
[3 credit hours]
An examination of quantitative methods commonly used in geographic research with an emphasis on spatial statistics and cartographic analysis.
Term Offered: Fall

GEPL 4490 Remote Sensing Of The Environment
[3 credit hours]
Introduction to theory, methods and techniques used to gather and analyze remote sensor data. Topics range from low altitude air photo interpretation through satellite image acquisition. Recommended: GEPL 3550.
Term Offered: Fall

GEPL 4500 Digital Image Analysis
[3 credit hours]
Using imagery captured by earth orbiting satellites, students will document changes on the surface of the earth addressing environmental issues. Students will have the opportunity to learn applications of this technology including project based work in the classroom.
Prerequisites: GEPL 4490 with a minimum grade of D- or EEES 4490 with a minimum grade of D- or GEPL 5490 with a minimum grade of C or EEES 5490 with a minimum grade of C
Term Offered: Spring

GEPL 4520 Analytical And Computer Cartography
[4 credit hours]
The theoretical and mathematical foundations of the mapping process in a digital environment. An introduction to the structure and manipulation of graphic and nongraphic geographical data to produce maps.
Prerequisites: GEPL 4510 with a minimum grade of D- or GEPL 4110 with a minimum grade of D-
Term Offered: Spring

GEPL 4530 Principles Of Urban Planning
[3 credit hours]
An introduction to planning theory, the planner’s role in land use regulation economic development, housing and social service delivery is reviewed.
Term Offered: Fall

GEPL 4540 Weather And Climate
[3 credit hours]
A survey analysis of meteorology and climatology. The physical processes of weather and the pattern of climate provide the basis for this course.
Term Offered: Summer, Fall

GEPL 4570 Land Development And Planning
[4 credit hours]
The exploration of theoretical location analysis, pragmatic land development issues and analytic feasibility tools, and the consequences of land use policies that affect development.
Term Offered: Spring

GEPL 4580 Location Analysis
[4 credit hours]
The application of geographic location theory, spatial interaction modeling, optimization techniques and geographic information system processing to the solution of facility location problems.
Term Offered: Spring

GEPL 4600 Urban Design
[3 credit hours]
Concepts and procedures for the organization, design and development of public and private urban forms and spaces at the micro level, including a survey of intraurban elements, cultural, ecological and aesthetic considerations, and interdisciplinary collaboration.
Term Offered: Fall

GEPL 4650 Geography of Earth Systems
[3 credit hours]
Introduction to theory, methods and techniques used to gather and analyze remote sensor data. Topics range from low altitude air photo interpretation through satellite image acquisition. Recommended: GEPL 3550.
Term Offered: Fall

GEPL 4700 Community Planning Workshop
[3 credit hours]
This course introduces the skills and techniques used by practitioners in the planning process. Assignments will focus on the collection, analysis and communication of information by following community planning approaches.
Term Offered: Spring

GEPL 4710 Urban Environments
[3 credit hours]
Geographic perspectives on the social, political and economic functions of cities. Issues of land use, redevelopment, residential and commercial geographies are examined in contemporary North American cities.
Term Offered: Spring, Fall

GEPL 4750 Transportation Geography
[3 credit hours]
This course introduces students to the culture of transportation planning while honing their critical reading and analytical skills. The approach combines two types of analysis. One is a historical political–economic treatment of the evolution of the transportation systems, including the evolution of associated institutions, concluding with contemporary transportation planning issues. The other type of analysis is an introduction to the rational method for determining appropriate public responses for dealing with current transportation planning issues.
Term Offered: Spring, Fall
GEPL 4810 Political Geography
[3 credit hours]
An examination of political actors and power relations at local, regional, national and global scales, and their impact on spaces and places. The course includes topics, such as state formation, electoral geography, identity and social movements, nationalism and regionalism, imperialism and post-colonialism, urban politics, feminist political geography, elites and marginalized individuals, and geopolitics.

Term Offered: Spring, Fall

GEPL 4900 Proseminar in Geography
[3 credit hours]

GEPL 4910 Research in Geography
[1-4 credit hours]

GEPL 4920 Readings in Geography
[1-3 credit hours]

GEPL 4960 Honors Thesis in Geography
[4 credit hours]

GEPL 4990 Geography and Planning as Disciplines and Professions
[1 credit hour]
This course provides an overview and synthesis of geography and planning as academic disciplines and as professions. The course proceeds along two tracks. In the first, students will read and discuss some of the classic literature that attempts to define both fields. In the second, students will learn about career resources for geographers and planners and learn to present themselves as professionals in the fields.

Prerequisites: GEPL 2010 with a minimum grade of D-

The honors program in the Department of Geography and Planning is open to all qualified undergraduate majors whether or not they are enrolled in College Honors. The following are requirements for entrance into the Honors program in Geography.

Admission:
1. The student must maintain a 3.5 minimum GPA in Geography courses.
2. The student must maintain a 3.3 minimum cumulative GPA.
3. 12 hours completed work in Geography.
4. Qualification as a Geography major whether or not they are enrolled in College honors.

Requirements:
A student must complete 9 hours in designated honors courses in Geography and a 4-hour senior honors thesis project. During the final year before graduation, the student will meet with the department’s undergraduate advisor to select a faculty research advisor, complete and submit to the department’s faculty for approval a senior honors project (GEPL 4960).

Senior Honors Thesis
The title of the senior honors thesis is reported to the undergraduate advisor who will then select a faculty research advisor for the student. The title of the honor’s thesis must be filed no later than one semester prior to the expected date of graduation. A copy must also be filed in the library of the Department and students are also expected, as a courtesy, to provide members of their thesis committee with copies.

1 If no Writing Across the Curriculum (WAC) course has been taken in the major, this elective must be a WAC course.

State the basic nature of most of the various subfields in human geography (e.g., cultural, economic, environmental, political, social, urban, etc.);
Appraise the major aspects of two of those subfields including an ability to read and understand basic research in the subfield;
Describe the basic nature of most of the subfields of physical geography (biogeography, climatology, geomorphology, hydrology, meteorology, etc.) and if emphasizing physical geography discuss one of those subfields in more depth;
State the dominant forces that have shaped and continue to shape two major world regions;
Apply the basic tools of geographic analysis (quantitative and qualitative) to investigate a geographic issue;
Construct a map using appropriate cartographic design, visualization and quantitative data manipulation;
Identify the fundamental concepts of Geographic Information Systems, and evaluate their importance in the further study of this evolving science;
Integrate information from a range of academic disciplines, and support the importance of holistic approaches to problem solving;
Weigh the importance of human/environment relationships a traditional focus of geography;
Develop appropriate written and oral skills necessary for graduate study or a professional career, including the ability to present oneself in a professional manner;
Understand the importance of geographic inquiry and problem solving in a rapidly globalizing world, and construct an argument to explain that importance to those who are ignorant of it.

HIST 1010 Europe To 1600
[3 credit hours]
A survey of western Europe, including its ancient Jewish, Greco-Roman and Christian roots; the Middle Ages, Renaissance and Reformation.
Term Offered: Spring, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

HIST 1020 Europe From 1600
[3 credit hours]
A survey of European history from the 17th century to the present with emphasis on the major political, economic, social and cultural trends.
Term Offered: Spring, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

HIST 1050 World History To 1500
[3 credit hours]
A survey of world history from the first humans to 1500. Focuses on how agriculture changed human life, the early development of world religions, and contact across cultures. Learn about empires such as China, Persia, Rome, Mali, and the Aztec.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

HIST 1060 World History From 1500
[3 credit hours]
A survey of world history from 1500 to the present. Cultural and political topics are treated so as to draw comparisons between the most significant modern societies.
Term Offered: Spring, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

HIST 1070 The Contemporary World
[3 credit hours]
This thematic survey of the 20th century from a historical and global perspective emphasizes the origins of the world in which we live and discusses some of our alternative futures.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Multicultural Non-US Diversity, Trans Mod Arts and Humanities

HIST 1080 East Asia To 1800
[3 credit hours]
Multidisciplinary introduction to traditional East Asia (origins-1800) with emphasis on the historical development, political traditions, socio-economic patterns, religious and philosophical values, and cultural accomplishments of China and Japan.
Core Arts & Humanities, Multicultural Non-US Diversity, Trans Mod Arts and Humanities

HIST 1090 East Asia From 1800
[3 credit hours]
Multidisciplinary introduction to the history, civilization, political organization, international relations, social and economic patterns, and cultural trends of China and Japan since 1800.
Term Offered: Spring, Fall
Core Arts & Humanities, Multicultural Non-US Diversity, Trans Mod Arts and Humanities

HIST 1100 Latin American Civilizations
[3 credit hours]
A thematic survey from pre-Columbian times to the present. Covers Native American cultures, European colonial policies and institutions, independence movements, the emergence of new nations and twentieth-century problems.
Term Offered: Spring, Fall
Core Arts & Humanities, Multicultural Non-US Diversity, Trans Mod Arts and Humanities

HIST 1110 African Civilization
[3 credit hours]
General cultural and historical survey of Africa south of the Sahara from earliest times to the 20th century. Includes topics on art, literature, philosophy, religion and society.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Multicultural Non-US Diversity, Trans Mod Arts and Humanities

HIST 1120 Middle East Civilization
[3 credit hours]
General cultural and historical survey of the Middle East and Islam from 600 to the 20th century. Includes topics in historical movements, literature, religion, and social and intellectual history.
Term Offered: Spring, Fall
Core Arts & Humanities, Multicultural Non-US Diversity, Trans Mod Arts and Humanities
HIST 1130 Introduction To Historical Thinking
[3-4 credit hours]
(Not for major credit) An introduction to the nature, concepts and skills of the discipline of history designed to improve historical awareness and the ability to think historically. Occasionally offered as a writing intensive course.
Term Offered: Spring, Fall
Core Arts & Humanities

HIST 1200 Main Themes In American History
[3 credit hours]
This thematic survey introduces students to historical theory, methods, and the primary sub-fields of American history from colonial conquest to the present day.
Core Arts & Humanities

HIST 2000 Methods Seminar
[4 credit hours]
Research techniques, writing of term papers and book reviews. Introduction to historiography. Offered as a writing intensive course.
Term Offered: Spring, Fall

HIST 2010 America To 1865
[3 credit hours]
The development of the United States from its Native American and immigrant roots through the Civil War.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

HIST 2020 America From 1865
[3 credit hours]
Survey of American history since the Civil War, with special attention to political, social, economic and cultural developments.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

HIST 2030 Great Americans
[3 credit hours]
The careers of selected Americans in politics, business, science, religion and literature.
Term Offered: Spring, Fall

HIST 2040 Ancient Near East
[3 credit hours]
Survey of the Sumerian, Babylonian, Hittite, Assyrian, Egyptian, Palestinian and Persian worlds.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Multicultural Non-US Diversity, Trans Mod Arts and Humanities

HIST 2050 Ancient Greece
[3 credit hours]
Survey of the Greek and Hellenistic world.
Term Offered: Spring, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

HIST 2060 Ancient Rome
[3 credit hours]
Survey of the Roman Republic and Empire.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

HIST 2170 Great Britain To 1714
[3 credit hours]
An introductory course on English history from the Roman conquest to 1714. Emphasis on the Norman conquest, social and political life in medieval England, the monarchy, and common law.
Term Offered: Summer, Fall

HIST 2180 Great Britain From 1714 To The Present
[3 credit hours]
An introductory course on British history from the Hanoverian dynasty to the present. Emphasis on English maritime power, the industrial revolution and two world wars.
Term Offered: Spring

HIST 2190 Britain And Ireland
[3 credit hours]
From the 17th to the 20th century, the mutual influences in literature and history of colony and colonizer are examined.
Term Offered: Spring

HIST 2250 World War I
[3 credit hours]
World War I from origins to conclusion and its effect on the course of the 20th century. Political and diplomatic background, conduct, termination, technology, and the war's effect on society and the 20th century.
Term Offered: Fall

HIST 2260 World War II On Film
[3 credit hours]
Analysis of contemporary and retrospective documentary film treatments of major aspects of World War II, with emphasis on their historical accuracy and authenticity.

HIST 2280 Toledo: Emergence Of A City, 1750-1880
[3 credit hours]
Early history of Toledo and the Maumee River Valley, including Indian settlement, imperial rivalries, Maumee Valley towns, economic growth, immigrant arrivals and the creation of neighborhoods.
Term Offered: Fall

HIST 2290 Toledo: Metropolitan Era, 1880-1980
[3 credit hours]
The growth of Toledo in the 20th century, including suburbanization, the city's leadership in the national Progressive Movement, Depression and New Deal, organized labor, individual suburbs, and recent problems.

HIST 2340 American Indian History
[3 credit hours]
An introduction to Indian-White relations from pre-Columbian times to present. Emphasizes tribes of the United States, Mexico and Canada.
Term Offered: Fall
Multicultural US Diversity

HIST 2450 Canada To 1867
[3 credit hours]
Canadian history from before European contact to Confederation. Considers European-Native contact, Canada as an extension of Europe and the beginnings of Canadian identities.
HIST 2460 Canada Since 1867
[3 credit hours]
Term Offered: Fall

HIST 2640 Medieval Russia
[3 credit hours]
Russia from the 9th century to 1700, including Kievan and Moscovite Russia.
Term Offered: Fall

Multicultural Non-US Diversity

HIST 2650 Modern Russia
[3 credit hours]
Russia from 1700 to the present, including Imperial and Soviet Russia.
Term Offered: Spring, Fall

Multicultural Non-US Diversity

HIST 2700 Japan And World War II
[3 credit hours]
A study of the factors behind Japan’s entry into World War II with the United States and the Allied Powers and an in-depth treatment of Japan at war.
Term Offered: Spring, Fall

Multicultural Non-US Diversity

HIST 2720 History Of Tokyo
[3 credit hours]
An examination of Japanese urban social and cultural history. Treats the foundations of Edo, transition to Tokyo, the modern rise, the great earthquake, the war, the Olympics and the present.
Term Offered: Spring, Fall

Multicultural Non-US Diversity

HIST 2730 The Chinese Revolution
[3 credit hours]
This course examines the process by which Mao Zedong and the Chinese Communist Party came to power. It treats the political, economic and social forces behind the Chinese revolution (1900-49).
Term Offered: Spring

Multicultural Non-US Diversity

HIST 2980 Special Topics
[1-4 credit hours]
Topics selected by various instructors. May be repeated when the topic varies.
Term Offered: Spring, Fall

HIST 3100 European Middle Ages I
[3 credit hours]
The history of Western Europe from its beginnings to the eve of the First Crusade.
Term Offered: Spring, Fall

HIST 3110 European Middle Ages II
[3 credit hours]
Europe from the First Crusade to the late fifteenth century.
Term Offered: Spring, Fall

HIST 3120 Women in Medieval Europe
[3 credit hours]
Women’s lives in medieval Europe from a range of perspectives, including nobleswomen, townswomen, peasant women, religious women. Students will gain an appreciation of how medieval women’s lives were different from and similar to those of modern women, as well as a broader understanding of the European middle ages.

HIST 3130 Tudor England
[3 credit hours]
Tudor England from 1485 to the end of the reign of Elizabeth I, emphasizing political, economic and social developments.

HIST 3160 The American West
[3 credit hours]
Settlement since the Civil War; mining rushes and Indian wars; violence and outlaws; farming and cattle ranching. Twentieth-century politics; ethnicity; and economics. Growth of California and the Sunbelt states.
Term Offered: Spring, Summer, Fall

Multicultural US Diversity

HIST 3190 Britain From 1763 To 1832
[3 credit hours]
An intensive examination of the slave trade, factory system, radicalism, Parliamentary Reform, insurrection, by means of reading primary sources such as Tom Paine.

HIST 3200 Colonial Latin America
[3 credit hours]
Latin American history to 1825. Covers pre-Columbian Indian civilizations including Aztecs and Incas; Spanish and Portuguese conquests and Africans in the Americas; colonial policies and institutions; colonial society and independence movements.
Term Offered: Spring, Fall

Multicultural Non-US Diversity

HIST 3210 Modern Latin America
[3 credit hours]
Major economic, political and social developments from independence to the present. Covers the export boom, neocolonialism, nationalism, and revolutions in Latin America. Considers how, in spite of the region’s tremendous diversity, there is a shared “Latin American” experience.
Term Offered: Spring, Summer, Fall

Multicultural Non-US Diversity

HIST 3230 Early Caribbean History
[3 credit hours]
This course covers the history of the early Caribbean through emancipation in the mid-nineteenth century. Topics include: The Carib and Taino Indians, European exploration and colonization, the Atlantic slave trade, and the golden age of piracy.

HIST 3240 Modern Caribbean History
[3 credit hours]
This course examines Caribbean history in the nineteenth and twentieth centuries. Topics include: history of Caribbean culture and music, migration, tourism, and social, political, and economic challenges of the twentieth century.
HIST 3250 African-American History To 1865
[3 credit hours]
An examination of the historical experiences of African-Americans in the
United States from 1619 to 1865.
Term Offered: Spring, Fall
Multicultural US Diversity

HIST 3260 African-American History From 1865
[3 credit hours]
An examination of the historical experiences of African-Americans in the
United States since 1865.
Term Offered: Spring, Fall
Multicultural US Diversity

HIST 3270 The City In American History, 1607-1850
[3 credit hours]
Examination of early American urban development and culture. Topics
include the development of urban infrastructure, crime and disorder;
moral reform; religious revival; immigration; prostitution; the development
of commercial entertainment.
Term Offered: Spring, Fall

HIST 3280 City And Metropolis In Modern America, 1850 To The Present
[3 credit hours]
The growth of the 19th-century city and the emergence of the 20th-
Term Offered: Spring, Fall

HIST 3290 Ohio History
[3 credit hours]
From colonial times to the present.
Term Offered: Spring, Summer, Fall

HIST 3310 Ethnic America
[3 credit hours]
American ethnic diversity from the colonial era to recent decades. A
study of individuals and groups. Topics include American identity and
Americanization, migration, legislation, nativism.
Term Offered: Spring, Summer, Fall
Multicultural US Diversity

HIST 3320 Indians In Eastern North America
[3 credit hours]
Native Americans in Eastern North America from prehistoric times
through Jacksonian Indian Removal. Emphasis on intercultural
interactions.

HIST 3330 Western American Indians
[3 credit hours]
Native Americans of the Far West from prehistoric times through recent
years. Emphasis on European contact and governmental policies.
Term Offered: Spring

HIST 3360 American Intellectual History I
[3 credit hours]
Development and influence of major ideas from the colonial period to
1865. Topics include Puritanism, the Enlightenment, Democracy and
Transcendentalism.
Term Offered: Spring

HIST 3370 American Intellectual History II
[3 credit hours]
Major developments in American thought from 1865, including Social
Darwinism, pragmatism, ideological conflict, modern science, education.
Term Offered: Spring

HIST 3380 Business And American Society
[3 credit hours]
The growth of American business from the eighteenth century to the
present. Examines enterprise and its relationship to culture, politics,
technological developments and economic change.
Term Offered: Spring, Fall

HIST 3390 American Social And Cultural History, 1850-The Present
[3 credit hours]
American social and cultural patterns, institutions and forces from the
mid-19th century to the present.
Term Offered: Fall

HIST 3400 American Military History
[3 credit hours]
The development of the strategy, tactics, organization, operation and
policies of the armed forces of the U.S.; the interaction with technological
factors, foreign policy goals, international problems and American
society.
Term Offered: Fall

HIST 3410 American Military History In The 20th Century
[3 credit hours]
Intensive examination of the history of land, sea, air and intelligence
factors. Emphasizes the historical development of the strategy and
tactics of wars, peacetime planning, technological developments and
military-societal relationships.

HIST 3440 American Radicalism
[3 credit hours]
Origins and development of radical social movements and their
ideologies from the American Revolution to the New Left of the 1960s.
Abolitionism, Feminism, Communitarianism, Marxism, Anarchism,
Populism, Communism and the Peace Movement are among the topics to
be studied.
Term Offered: Fall

HIST 3470 U.S. Disability History
[3 credit hours]
Provides a historical overview of the lived experiences of people defined
as disabled and changing historical definitions of disability in the region
that became the United States
Term Offered: Spring, Fall

HIST 3480 American Labor And Working Class History
[3 credit hours]
Development of working class communities, cultures, organizations and
ideology from colonial era to the present. Topics include industrialization,
unionization, labor law, gender and race constructions.
Term Offered: Spring
Multicultural US Diversity

HIST 3500 European Diplomacy 1648-1815
[3 credit hours]
The foreign policies and foreign relations of the great powers from 1648
to the Congress of Vienna, 1815.
HIST 3530 20th Century Germany
[3 credit hours]
Germany’s development from the end of World War I to the present with emphasis on the rise of Nazism, World War II, and the division and new unification of Germany.
Term Offered: Fall

HIST 3540 History Of The Middle East From 600 To 1500
[3 credit hours]
A survey of Middle East history from the emergence of Islam and the formation of Islamic states until the establishment of the Ottoman and Persian empires in the 15th-16th centuries.

Multicultural Non-US Diversity

HIST 3550 History Of The Middle East Since 1500
[3 credit hours]
History of the Middle East from the collapse of the Medieval Muslim States and the rise of the Ottoman Empire in the 16th century through the period of European intervention to the development of independent Middle Eastern states in the 20th century.
Term Offered: Spring, Fall
Multicultural Non-US Diversity

HIST 3560 Early Modern France
[3 credit hours]
A survey of early modern French history from c. 1600-1789.

HIST 3600 Women In American History
[3 credit hours]
This course presents American history from early settlement to the present by examining the contributions of women, in interaction with men, to the immensely complex fabric of American life.
Term Offered: Spring, Fall
Multicultural US Diversity

HIST 3630 Africa To 1800
[3 credit hours]
Africa from antiquity to 1800. Topics include the peopling of the continent, growth of centralized political institutions, stateless societies, Islamic penetration, African slave trade.
Term Offered: Spring, Summer, Fall
Multicultural Non-US Diversity

HIST 3640 Africa Since 1800
[3 credit hours]
Africa from 1800 to the present. Subjects include 19th century, colonial and independent Africa. Specific topics: the rise of South Africa, imperialism, African resistance and nationalism and independent African political, cultural and economic systems.
Term Offered: Spring, Summer, Fall
Multicultural Non-US Diversity

HIST 3870 Junior Honors Research I
[3 credit hours]
Independent research on specific historical topics.
Term Offered: Spring, Summer, Fall

HIST 3880 Junior Honors Research II
[3 credit hours]
Independent research on specific historical topics.
Term Offered: Spring, Fall

HIST 3980 Special Topics
[1-4 credit hours]
Topics selected by various instructors. May be repeated when the topic varies.
Term Offered: Spring, Summer, Fall

HIST 4010 Greek History
[3 credit hours]
Selected topics on the political and social institutions of Greece in the classical and Hellenistic periods.
Term Offered: Fall

HIST 4020 Roman History
[3 credit hours]
Selected topics on the political and social institutions of Rome during the Republic and Empire.
Term Offered: Spring

HIST 4030 Europe In The 14th-15th Centuries
[3 credit hours]
The late Middle Ages and the development of the Renaissance in Western Europe.

HIST 4050 Muslims, Christians, and Jews in Medieval Spain
[3 credit hours]
This course will provide an overview of the political and cultural history of medieval Spain while allowing students time and space to grapple with primary sources and historical arguments. The class will investigate the concept of convivencia or “living together,” tracing its development in the works of historians, and evaluating whether it is a concept that can adequately be applied to medieval Spain.
Term Offered: Spring, Fall

HIST 4060 Age Of Absolutism
[3 credit hours]
The growth and decline of the absolute monarchies in Europe and the development of a world market economy, c.1550-1715.

HIST 4080 Age Of Revolution
[4 credit hours]
The age of the French Revolution and Napoleon, c.1785-1848.

HIST 4100 Europe Since World War I
[3 credit hours]
Internal and international development of the major European states from World War I to the end of the twentieth century.

HIST 4150 Critics Of Victorian Society
[3 credit hours]
Principal critics of society like Ruskin, Carlyle, Cobbett, Marx, Engels, Morris, Mill are read with a view to understanding capitalism, industrialism and England.

HIST 4170 The British Empire: For And Against
[3 credit hours]
The emergence of England as a maritime power, as an empire, and as a financial force, with emphasis upon resistances and decolonization.
Term Offered: Fall

HIST 4180 Topics In English Social And Economic History
[3 credit hours]
Selected topics on English society and economy will be covered, such as urbanization, family and gender relations, enclosures, work and crafts.

[3 credit hours]
Witchcraft, religion and magic in western Europe from the 12th through 17th centuries, focusing on the origins of witchcraft belief, diabolical magic, the witchcraze and its decline.
Term Offered: Spring, Fall

HIST 4620 Central Europe
[3 credit hours]
Central Europe from medieval times to the present. The Habsburg Empire, Poland, the Balkans, twentieth-century changes.

HIST 4660 Imperial Russia, 1700-1917
[3 credit hours]
Rise and fall of the Russian Empire. Politics and society from the time of Peter the Great to the 1917 Revolution.
Multicultural Non-US Diversity

HIST 4680 20th Century Russia
[3 credit hours]
Russia from the 1917 Revolution to the present. Topics include Marxism, Communism, Stalinism, Cold War.
Multicultural Non-US Diversity

HIST 4720 Modern Chinese History
[3 credit hours]
China in transition under the impact of the West; forces leading to the revolution of 1911, the Nationalists' struggle, the emergence of the People's Republic of China and aspects of post-revolutionary China.
Term Offered: Spring
Multicultural Non-US Diversity

HIST 4740 Modern Japanese History
[3 credit hours]
Japan in transition under Western influence, forces leading to the Meiji Restoration, the modernization of Japan, Japan's rise as a world power, war and postwar developments.
Term Offered: Spring
Multicultural Non-US Diversity

HIST 4750 Europe And Asia: Exploration And Exchange, 1415-1800
[3 credit hours]
Motivation and process of European expansion to Africa and Asia from 1415-1800.

HIST 4790 The Holocaust
[3 credit hours]
This advanced course deals with selected aspects of the history and memory of Nazi genocide against the Jews of Europe, with special emphasis on visual and survivor sources.
Term Offered: Spring

HIST 4830 Theory Of Public History
[3 credit hours]
The definition, philosophy and evolution of public history as well as the current literature and debates within the field. Public history is the application of historical knowledge and methodology beyond academe.

HIST 4840 Public History Practicum
[3 credit hours]
Course provides students with hands-on experience in the practice of public history by completing a project using specialized techniques, client-oriented research and teamwork. May be repeated for credit.
Term Offered: Spring

HIST 4870 Senior Honors Research I
[3 credit hours]
Open to College Honors students, to History Honors students and to Honors students from other departments. Independent research in specific topics.
Term Offered: Spring, Summer, Fall

HIST 4880 Senior Honors Research II
[3 credit hours]
Open to College Honors students, to History Honors students and to Honors students from other departments. Independent research in specific topics.
Term Offered: Spring, Fall

HIST 4940 Public History Internship
[0-8 credit hours]
Supervised experiential learning in history.
Prerequisites: (HIST 2000 with a minimum grade of D- and HIST 4830 with a minimum grade of D-)
Term Offered: Spring, Fall

HIST 4980 Special Topics
[1-4 credit hours]
Topics selected by various instructors.
Term Offered: Spring, Fall

HIST 4990 Independent Studies
[1-4 credit hours]
Research and writing on topics designed to meet individual needs.
Term Offered: Spring, Summer, Fall

Honors in History
Qualified students are invited to work for the degree citation “honors in history.”

1. Admission: History majors who demonstrate unusual promise in the study of history are invited by the department to enroll in the University Honors Program; departmental honors may be pursued concurrently. Admission to departmental honors is based on the following:
   a. Sophomore standing
   b. Overall minimum GPA of 3.0
   c. A minimum GPA of 3.3 in all history courses (a minimum of 10 hours)
   d. Recommendation from two professors
   e. An interview with the Advisor
2. **Requirements**: To earn departmental honors in history, each student will satisfactorily complete the following. The required credit hours are included among the 33 hours necessary for the major in history.
   a. Honors recognition in two history courses. Honors recognition courses are regularly scheduled 3000 to 4000 level courses in which special recognition is achieved by reading and research in addition to the normal requirements of the course.
   b. Three hours of independent research under Junior Honors Research (HIST 3870).
   c. Six hours of thesis under Senior Honors Research (HIST 4870, HIST 4880) leading to the completion of a senior thesis.
   d. Oral examination covering the area of the senior thesis.

**B.A. in History**

The major of 33 hours in History must be distributed as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Required Courses</td>
<td></td>
<td></td>
</tr>
<tr>
<td>HIST 2000</td>

<td>4</td>
</tr>
<tr>
<td>Three courses in fields of United States history</td>
<td>9</td>
<td></td>
</tr>
<tr>
<td>Three courses in fields of non-United States history</td>
<td>9</td>
<td></td>
</tr>
<tr>
<td>11 additional hours</td>
<td></td>
<td>11</td>
</tr>
<tr>
<td>Total Hours</td>
<td></td>
<td>33</td>
</tr>
</tbody>
</table>

   1. 12-16 hours (4 courses) must be at the 4000 level.

Additionally, history majors must complete a minor, a second major, or meet the requirement of 18 hours in “related fields” courses. These classes are chosen from at least 3 of the following areas: economics, political science, English and American literature, foreign language, geography, philosophy, sociology, psychology, art history, music history, women’s and gender studies, or theatre history. Courses accepted to meet this requirement are listed in the student Degree Audit Report. At least 12 of the hours in related courses must be at the 3000 and 4000 levels.

The related fields course requirement may be met with completion of a minor in another discipline or a second major. However, students are required to meet with an advisor to verify and approve their selection in advance as most approved minors and second majors are in either the College of Arts and Letters or the College of Natural Sciences and Mathematics.

Student may not take P/NC for the minimum requirements for the major, but may opt for P/NC in related courses.

Below is a sample plan of study. Consult your degree audit for your program requirements.

**First Term**

<table>

Interpret and evaluate secondary sources, printed primary sources, or cultural artifacts (art, television, film, etc). Compose a clear historical argument supported by adequate evidence.
Write according to disciplinary standards. Use multiple perspectives, past and present, and of other cultures and peoples, in analyzing the historical past.

**Minor in History**

The minor of 21 hours in History must be distributed as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 2000</td>
<td>Methods Seminar</td>
<td>4</td>
</tr>
</tbody>
</table>

Of the remaining 17 hours, 9 hours must be at the 4000-level. 17

Total Hours 21

**Department of Music**

Accredited by National Association of Schools of Music (NASM)

Jason Stumbo, Interim Chair, Undergraduate Advisor, B.M., B.A., Music

Norm Damschroder, Undergraduate Advisor, jazz

Dr. Timothy D. Brakel, Undergraduate Advisor, instrumental music education

Dr. Pamela Stover, Undergraduate Advisor, choral/general music education

Dr. David Jex, Graduate Advisor, M.M. in Performance, M.M.E.

**Advanced Placement**

Please see Registrar’s website for information on Advanced Placement (http://www.utoledo.edu/offices/registrar/student_records/advan_credits.html).

**Audition**

In addition to acceptance into the university, students who wish to major in music or music education must pass an entrance audition. All applicants must meet appropriate minimum standards through this audition before being granted admission to the Department of Music. Music majors and minors are required to demonstrate proficiency in one or more of the following instruments: piano, symphonic instruments (strings, woodwinds, brass, percussion), guitar, voice, or harp. This audition is heard by a faculty jury and is closed to all except the area faculty concerned. Students are expected to be prepared to play or sing representative works of acceptable repertoire. A student may be accepted, accepted on provisional status, or denied admission to music degree work based on the entrance audition. Please visit our Web site https://www.utoledo.edu/al/svpa/music/degrees/audition.html or call the Department of Music office at 419.530.2448.

**Degrees Offered**

The Department of Music is a fully accredited member of the National Association of Schools of Music, and its degree requirements are in accordance with the latest published regulations of that association.

Following are the undergraduate degrees offered by the Department of Music:

- B.A. in Music (p. 96)
- Bachelor of Music (p. 97)

- Bachelor of Music Education (p. 112)
- Instrumental Minor (p. 112)
- Jazz Minor (p. 113)
- Keyboard Minor (p. 113)
- Music Business and Recording Arts Minor (p. 114)
- Music History and Literature Minor (p. 114)
- Music Technology Minor (p. 115)
- Music Theory Minor (p. 115)
- Vocal Minor (p. 115)

MUS 1000 Performance Laboratory

[0 credit hours]

Required of music majors and minors. Weekly departmental student recitals. Offered as P/NC only.

Term Offered: Spring, Fall

MUS 1010 Concert Attendance

[0 credit hours]

Required of music majors and minors. Attend 8 department concerts and 2 non-department concerts. Offered as P/NC only.

Term Offered: Spring, Fall

MUS 1100 Introduction To Music Technology

[1 credit hour]

This course introduces students to music applications for sound recording, music notation, and virtual sound design. Students also discover basic tools of the trade such as microphones, speaker monitors, portable recording devices, and current trends within social media relating to self-promotion in music.

Term Offered: Spring, Fall

MUS 1200 Group Guitar For The Non-Major

[2 credit hours]

Basic guitar skills: note reading, chords, accompaniment, variety of musical styles. Includes rhythmic and aural training, theory and ensemble playing. Each student must provide their own guitar.

Term Offered: Spring, Fall

MUS 1250 Group Piano For The Non-Major I

[2 credit hours]

Classical and popular literature in a variety of styles and period will be explored. May be repeated for credit. Students may take P/NC.

Term Offered: Spring, Fall

MUS 1280 Group Voice For The Non-Major

[2 credit hours]

Develops basic vocal techniques with attention to the principles of voice production, vowel formation, breathing, articulation and flexibility. May be repeated for credit. Open to all students regardless of major. Students may take P/NC.

Term Offered: Spring, Summer, Fall

MUS 1500 String Class

[2 credit hours]

Principles, concepts, difficulties typical of stringed instruments and pedagogy addressed through performance.

Corequisites: MED 1000

Term Offered: Spring, Fall
MUS 1510 Percussion Class  
[2 credit hours]  
Principles, concepts, difficulties typical of percussion instruments and pedagogy addressed through performance.  
Corequisites: MED 1000  
Term Offered: Spring, Fall  
MUS 1530 Brass Class  
[2 credit hours]  
Principles, concepts, difficulties typical of brass instruments and pedagogy addressed through performance.  
Corequisites: MED 1000  
Term Offered: Spring, Fall  
MUS 1550 Woodwinds Class  
[2 credit hours]  
Principles, concepts, difficulties typical of woodwind instruments and pedagogy addressed through performance.  
Corequisites: MED 1000  
Term Offered: Spring, Fall  
MUS 1560 Instrumental Class  
[3 credit hours]  
An overview of principles, concepts and difficulties typical of string, brass, woodwind and percussion instruments.  
Corequisites: MED 1000  
Term Offered: Spring, Summer, Fall  
MUS 1570 Piano Class For Music Majors I  
[1 credit hour]  
Progressive sequence of keyboard skills courses stressing technique, repertoire, sight reading, harmonization, improvisation and transposition. Includes keyboard technology.  
Term Offered: Spring, Summer, Fall  
MUS 1580 Piano Class For Music Majors II  
[1 credit hour]  
Provides instruction in keyboard skills required for the various degree programs. Progressive sequence of courses stressing technique, repertoire, sight reading, harmonization, transposition. Includes keyboard technology.  
Prerequisites: MUS 1570 with a minimum grade of C  
Term Offered: Spring  
MUS 1590 Jazz Piano Class  
[1 credit hour]  
Provides instruction in Jazz keyboard skills, including jazz techniques, voicings, repertoire, sight reading and harmonization.  
Prerequisites: MUS 1570 with a minimum grade of C  
Term Offered: Spring  
MUS 1610 Music Theory And Ear Training I  
[4 credit hours]  
Dictation, ear training and sight singing skills in rhythm, melody and harmony. Basic theoretical skills include key signatures, clefs, notation of scales, chords and rhythm patterns. Includes computer technology.  
Term Offered: Fall  
MUS 1620 Music Theory And Ear Training II  
[4 credit hours]  
Continuation of 1610. Emphasis on melody dictation and sight singing. Additional skill development in harmonizations, figured bass and study of basic forms. Includes computer technology.  
Prerequisites: MUS 1610 with a minimum grade of C  
Term Offered: Spring  
MUS 1700 Jazz Fundamentals  
[2 credit hours]  
Introduction to jazz performance practices, nomenclature, chord and music notation, analysis and improvisation.  
Prerequisites: MUS 1610 with a minimum grade of C  
Term Offered: Spring  
MUS 1800 Applied Music  
[1-4 credit hours]  
Private music lessons for first-year music majors and minors. Must be taken twice, and a grade of B or better is required in each semester.  
Term Offered: Spring, Summer, Fall  
MUS 1810 Applied Music For The Non-Major  
[1-2 credit hours]  
Private music lessons for provisional and non-music majors. May be repeated for credit. Limited by instructor availability.  
Term Offered: Spring, Summer, Fall  
MUS 2200 Music Theory For The Non-Major  
[3 credit hours]  
Introduction to the fundamentals of music, including notation, key, time signatures, rhythm, intervals, triads and chords, dominant 7th chords, cadences, and introduction to elementary aural skills. Students may take P/NC. Not for major credit.  
Term Offered: Spring, Summer, Fall  
MUS 2210 Introduction To Music  
[3 credit hours]  
The study of vocal and instrumental music from the standard repertoire primarily through listening. Previous music training is not required, but regular listening is part of the course. Not for major credit. Students may take P/NC.  
Term Offered: Spring, Summer, Fall  
MUS 2220 History Of Jazz  
[3 credit hours]  
A study of the development of jazz styles, including listening skills and historical perspectives. Because the major innovations and styles of jazz are a result of contributions from African Americans and other ethnicities, the course includes a study of how different time periods influenced the development of jazz and our culture. Students may take P/NC.  
Term Offered: Spring, Summer, Fall  
MUS 2240 History Of Rock And Roll  
[3 credit hours]  
A study of the styles, techniques and history of rock and roll. Students may take P/NC. Not for major credit.  
Term Offered: Summer, Fall  
Core Arts & Humanities
MUS 2250 Musical Diversity In The United States  
[3 credit hours]
The cultures of various ethnic groups (Native Americans, African-American, Mennonite, Moravian, Creole and others) are examined, especially as they relate to the development of folk, popular and art music styles in the United States. This course includes listening. Students may take P/NC. Not for major credit.  
Term Offered: Spring, Summer, Fall  
Core Arts & Humanities, Multicultural US Diversity, Trans Mod Arts and Humanities

MUS 2260 Electronic Music  
[2 credit hours]
Both lecture sessions and creative lab assignments. Students start with a basic introduction to the physics of music and sound, professional applications for sound design, MIDI, music-recording, and current personal music-publishing within the internet at large.  
Term Offered: Spring, Fall

MUS 2270 Recording Techniques  
[2 credit hours]
Both lecture sessions and creative lab assignments. Students examine the physical aspects of sound and hearing. Recording transducers from microphones to monitors, mixing consoles, MIDI and music technology in the contemporary recording studio are all examined. Current personal music-publishing within the internet at large are presented.

Term Offered: Spring, Fall

MUS 2280 Survey Of The Music Business  
[3 credit hours]
An indepth study of the music business nationally and internationally. Music making, publishing, copyright law, management, broadcast in radio and film, and business affairs are examined.

Term Offered: Summer, Fall

MUS 2410 Music History And Literature I: World Music And Jazz  
[3 credit hours]
A study of music from various world cultures and jazz. A special emphasis is placed on developing listening skills.

Term Offered: Spring

MUS 2420 Cultures And Music Of Non-Western Styles  
[3 credit hours]
An introduction to world music. The course provides overviews of the geography, the social and political environments, the religious practices and spiritual beliefs, and the cultural heritages of people and countries, such as Central Asia, South Asia, Africa, Caribbean, Korea, Japan, Latin America, Native American, Jazz in America, and American Pop, and American Country. Student may take P/NC

Term Offered: Spring, Summer, Fall

Core Arts & Humanities, Multicultural Non-US Diversity, Trans Mod Arts and Humanities

MUS 2520 Intro to Voice and Diction 1  
[2 credit hours]
Intro to Voice and Diction I: Voice for Freshman and Vocal Diction - a combined course designed to train the singer in how to function in voice lessons through skill building sets such as; develop a process to learn repertoire, learn and understand International Phonetic Alphabet sounds and demonstrate that knowledge through practical application to vocal technique and repertoire. This creates contextual learning, while building a foundation of experiential knowledge for future training.

Corequisites: MUS 1800

Term Offered: Fall

MUS 2530 Diction For Singers I  
[1 credit hour]
International Phonetic Alphabet mastery; pronunciation of English, German, Latin, Italian and French in relation to art song and aria form, emphasis on the sound of the language. Meets two hours per week.

Term Offered: Fall

MUS 2540 Diction For Singers II  
[1 credit hour]
Continuation of MUS 2530. IPA; pronunciation of German and English in relation to art song and aria form; emphasis on the sound of the language. Meets two hours per week.

Prerequisites: MUS 2530 with a minimum grade of C

Term Offered: Spring

MUS 2550 Voice Class For Music Majors  
[1 credit hour]
For instrumental and keyboard majors. Develops basic vocal techniques with attention to the principles of voice production, vowel formation, breathing, articulation and flexibility. May be repeated for credit.

Prerequisites: MUS 1620 with a minimum grade of C

MUS 2560 Introduction to Voice and Diction 2  
[2 credit hours]
Intro to Voice and Diction II: Voice for Freshman and Vocal Diction – The second class designed to build upon the skills discussed and demonstrated in Intro to Voice and Diction I. This class will concentrate on the continued skills required to learn more advanced vocal repertoire such as the operatic aria or Romantic song cycle. Advanced, International Phonetic Alphabet sounds and symbols will be part of tools used to aid in the pronunciation and recognition in German and French classical repertoire. More advanced concepts such as acoustical physics and resonation in the human instrument will also be introduced and discussed. This creates contextual learning, while building a foundation of experiential knowledge for future training.

Prerequisites: MUS 2520 with a minimum grade of D-

Corequisites: MUS 1800

Term Offered: Spring

MUS 2570 Piano Class For Music Majors III  
[1 credit hour]
Provides instruction in keyboard skills required for the various degree programs. Progressive sequence of courses stressing technique, repertoire, sight reading, harmonization, improvisation and transposition. Includes keyboard technology.

Prerequisites: MUS 1580 with a minimum grade of C

Term Offered: Fall
MUS 2580 Piano Class For Music Majors IV  
[1 credit hour]  
Provides instruction in keyboard skills required for the various degree programs. Progressive sequence stressing technique, repertoire, sight reading, harmonization, improvisation and transposition. Includes keyboard technology.  
Prerequisites: MUS 2570 with a minimum grade of C  
Term Offered: Spring

MUS 2590 Class Piano For Piano Majors  
[2 credit hours]  
MUS-2590 KEYBOARD FUNDAMENTALS for PIANO MAJORS, to be taken in conjunction with music theory. Fundamental keyboard skills including harmony, technique, transposition, improvisation, sight reading, score reading, and ensemble playing.  
Corequisites: MUS 1610, MUS 2610  
MUS 2610 Music Theory And Ear Training III  
[4 credit hours]  
Continuation of 1620. Students develop proficiency in all musical elements through analytical, written and aural studies. Primary materials are the common practice period literature and small formal units. Includes computer technology.  
Prerequisites: MUS 1620 with a minimum grade of C  
Term Offered: Fall

MUS 2620 Music Theory And Ear Training IV  
[4 credit hours]  
Continuation of 2610. Students are introduced to contemporary topics, styles and music through analysis and creative assignments. Dictation and sightsinging studies will also develop topics from MUS 2610. Includes computer technology.  
Prerequisites: MUS 2610 with a minimum grade of C  
Term Offered: Spring

MUS 2700 Jazz Improvisation I  
[2 credit hours]  
Practical application of beginning jazz improvisation techniques as applied to modal, blues and simple jazz scales. Basic chord-scale relationships, ear training, and style analysis is presented.  
Prerequisites: MUS 1700 with a minimum grade of C  
Term Offered: Fall

MUS 2710 Jazz Improvisation II  
[2 credit hours]  
Practical application of intermediate jazz improvisation techniques as applied to jazz standards and bebop playing.  
Prerequisites: MUS 2700 with a minimum grade of C  
Term Offered: Spring

MUS 2800 Applied Music  
[1-4 credit hours]  
Private music lessons for sophomore music majors.  
Prerequisites: MUS 1800 with a minimum grade of B  
Term Offered: Spring, Summer, Fall

MUS 2990 Special Projects  
[1-3 credit hours]  
Designed to meet the needs of individual students who wish to pursue projects in the area of music.  
Term Offered: Summer

MUS 3010 University Band  
[1 credit hour]  
Band ensembles include Wind Ensemble, Symphonic Band, Marching Band, and Varsity Pep Band. Ensembles open to all students. Contact the instructor for audition information.  
Term Offered: Spring, Fall

MUS 3020 Jazz Ensemble  
[1 credit hour]  
Students rehearse and perform a diverse repertoire for large jazz ensemble. Open to all students by audition in the first week of each semester and/or permission of instructor.  
Term Offered: Spring, Fall

MUS 3030 Brass Choir  
[1 credit hour]  
Open to a limited number of qualified students.  
Term Offered: Spring

MUS 3040 University Wind Ensemble  
[1 credit hour]  
Open to a limited number of qualified students.  
MUS 3050 Chamber Music Ensembles  
[1 credit hour]  
The study and performance of chamber music literature in classical or jazz Styles. By permission of instructor.  
Term Offered: Spring, Fall

MUS 3060 Symphonic Band  
[1 credit hour]  
Students rehearse and perform a diverse concert band repertoire. Open to all students through audition or permission of instructor.  
Term Offered: Spring, Fall

MUS 3070 Varsity Band  
[1 credit hour]  
Students rehearse and perform a diverse athletic band repertoire. Open to all students through audition or permission of instructor.  
Term Offered: Spring, Fall

MUS 3080 University Orchestra  
[1 credit hour]  
Performs a variety of symphonic repertoire. Open to all students through audition.  
Term Offered: Spring, Fall

MUS 3100 Introduction to Opera I  
[1 credit hour]  
Introducing young singers to the art form of opera through a blended model of lecture and skill building participation exercises.  
Term Offered: Spring, Fall

MUS 3120 Intro to Opera II  
[1 credit hour]  
Part II of the Intro to Opera classes that prepare singers in the art form of opera through a blended model of lecture and skill building participation exercises as well as participation in the staged production by helping with production aspects such as costumes, set building, marketing, make-up, and super-titles.  
Prerequisites: MUS 3100 with a minimum grade of D-  
Term Offered: Spring, Fall
MUS 3130 University Chorus
[1 credit hour]
This non-auditioned mixed (SATB) choral ensemble is open to any student. Performing music in a variety of styles, this ensemble places a primary focus on developing musicianship and basic vocal technique.
Term Offered: Spring, Summer, Fall

MUS 3140 Concert Chorale
[1 credit hour]
This large, auditioned, mixed (SATB) choral ensemble is made up of 40-60 singers. This group is primarily made up of non-music majors who excel in vocal technique and production and who display high-level musical ability. They perform regularly on and off campus. This ensemble requires an audition and instructor approval.
Term Offered: Spring, Fall

MUS 3150 Jazz Vocalstra
[1 credit hour]
Students rehearse and perform traditional vocal Jazz literature and Vocalese. Open to qualified students by audition at the beginning of each semester and/or permission of instructor.
Term Offered: Spring, Fall

MUS 3160 Rocket Choristers
[1 credit hour]
This non-auditioned treble voice (SSAA) choral ensemble is open to any student. Performing music in a variety of styles, this ensemble places a primary focus on developing musicianship and basic vocal technique.
Term Offered: Spring, Fall

MUS 3170 Chamber Singers
[1 credit hour]
This auditioned mixed (SATB) choral ensemble is the premiere choral ensemble at the University of Toledo. With a focus on advanced vocal techniques and performance, this ensemble requires an audition and instructor approval.
Term Offered: Spring, Summer, Fall

MUS 3180 Glee Club
[1 credit hour]
This non-auditioned Tenor/Bass voiced (TTBB) choral ensemble is open to any student. Performing music in a variety of styles, this ensemble places a primary focus on developing musicianship and basic vocal technique.
Term Offered: Spring, Fall

MUS 3190 Opera Workshop
[1 credit hour]
Performs both contemporary and classic Opera. Open to a limited number of qualified students.
Term Offered: Spring, Fall

MUS 3200 Opera Production
[1 credit hour]
Audition only ensemble, with pre-requisites required of Intro to Opera I and Intro to Opera II. This course is designed to provide students with a complete experience in developing the craft of opera from all aspects including marketing, backstage, on stage and the front of the house. This is an advanced performance course for upper division vocal performance students. Building on the skills and experience from (MUS 3100) Intro to Opera I and (MUS 3120) Intro to Opera II this course is designed to provide real-life professional experience in opera production.
Prerequisites: MUS 3100 with a minimum grade of D- and MUS 3120 with a minimum grade of D-
Term Offered: Spring, Fall

MUS 3260 Advanced Electronic Music
[3 credit hours]
Both lecture sessions and creative lab assignments. Pre-requisite is MUS 2260 or by permission of the instructor. In particular, the current computer application Reason is examined and put to test in fine detail. Students will use the application in both sound-recording and virtual, MIDI instrument production. Lab productions are published.
Prerequisites: MUS 2260 with a minimum grade of C
Term Offered: Spring, Fall

MUS 3270 Advanced Recording Techniques
[2 credit hours]
Both lecture sessions and creative lab assignments. Pre-requisite is MUS 2270 or by permission of the instructor. Material emphasizes music production in a professional recording studio. Students collaborate in the tracking, mixing, and mastering of complete song titles both originals and covers. Students will self-publish completed songs.
Prerequisites: MUS 2270 with a minimum grade of C
Term Offered: Spring, Fall

MUS 3280 Concert And Event Production
[3 credit hours]
The presentation of cultural and commercial entertainment in the form of concert events is examined from artistic, technical, and business viewpoints. The roles of the cultural impresario and concert promoter in contemporary society are examined.
Prerequisites: MUS 2280 with a minimum grade of D-

MUS 3290 Music Industry Practicum
[1 credit hour]
Provides a practical application of the skills acquired in MUS 3280, Concert and Event Production. Students gain experience working on various campus musical productions and events.
Prerequisites: MUS 3280 with a minimum grade of D-

MUS 3410 Music History And Literature II
[3 credit hours]
A study of the literature, composers, theorists, trends and musical style of Western Music from Plainchant through Early Classic.
Term Offered: Fall

MUS 3420 Music History And Literature III
[3 credit hours]
An intensive study of the music of the Late Classic period to the present day through the examination of major trends and styles.
Term Offered: Spring
MUS 3450 Jazz History And Literature  
[3 credit hours]  
An in-depth study of jazz styles, trends, performers and composers geared for music majors.  
**Term Offered:** Spring

MUS 3470 Theatre Sound  
[3 credit hours]  
Students study the methods and techniques of sound production and design used in the theatre. Tools and techniques of audio production are used in laboratory recording and mixdown. (Alternate years.)  
**Prerequisites:** MUS 2270 with a minimum grade of C or THR 1040 with a minimum grade of C

MUS 3500 Conducting  
[2 credit hours]  
Basic baton techniques and rehearsal routine applicable to both vocal and instrumental conducting. Preparation of scores and opportunity for conducting experience with student groups. Includes MUS 1000:002 and video recording technology.  
**Prerequisites:** MUS 1620 with a minimum grade of C  
**Term Offered:** Fall

MUS 3510 Choral Conducting  
[2 credit hours]  
Conducting techniques and rehearsal routine especially concerned with choral groups. Opportunities to direct choral groups. Includes MUS 1000:002 and video recording technology.  
**Term Offered:** Spring, Summer

MUS 3520 Instrumental Conducting  
[2 credit hours]  
Conducting techniques and rehearsal routine especially concerned with instrumental ensembles. Opportunities to direct student instrumental groups. Includes MUS 1000:002 and video recording technology.  
**Prerequisites:** MUS 3500 with a minimum grade of C  
**Term Offered:** Spring

MUS 3530 Marching Band Techniques  
[1 credit hour]  
The pedagogy and administration of marching bands in secondary schools. Includes practical laboratory experiences and use of relevant technology and software.  
**Term Offered:** Fall

MUS 3540 Jazz Synthesis  
[1 credit hour]  
Instruction in the art of improvisation in the jazz style. A study of jazz harmony, melodic construction, keyboard voicings and practice materials. Lab instruction in combo performance techniques and repertoire. May be repeated for credit.  
**Prerequisites:** MUS 2620 with a minimum grade of D-

MUS 3550 Vocal Pedagogy and Literature I  
[2 credit hours]  
This class will provide students with a twofold practical application of how to teach varied forms of vocal literature as it relates to pedagogical strategies and vocal technique. This class also includes a Vocal Literature review from the Renaissance period to the 18th century Classical repertoire. This review of Vocal Literature would apply to pedagogical techniques such as stylistic considerations, phrasing, range, language and vocal demands through breath and support..  
**Prerequisites:** MUS 2410 with a minimum grade of D-

MUS 3560 Jazz Pedagogy And Conducting  
[2 credit hours]  
An in-depth study of Jazz pedagogical materials and methods as well as rehearsal and conducting techniques.  
**Prerequisites:** MUS 2620 with a minimum grade of C

MUS 3570 Guitar Pedagogy  
[3 credit hours]  
Comprehensive study of techniques and materials for private and group guitar instruction.

MUS 3580 Functional Piano Techniques  
[2 credit hours]  
Designed for keyboard majors to develop functional skills and harmonization, improvisation, transposition, sight reading, score reading, etc. Successful completion of this course fulfills the piano requirement for student teaching and Licensure.  
**Prerequisites:** MUS 2590 with a minimum grade of C  
**Term Offered:** Spring

MUS 3590 Piano Pedagogy  
[2 credit hours]  
Exploration of techniques and materials for comprehensive, private and group instruction.  
**Term Offered:** Spring, Fall

MUS 3610 Form And Analysis  
[3 credit hours]  
The study of musical structures: the theme, the motive, the phrase and analysis of homophonic and polyphonic forms and procedures.  
**Prerequisites:** MUS 2620 with a minimum grade of C

MUS 3630 Instrumentation  
[3 credit hours]  
A study of wind, percussion and string instrumentation; scoring for small ensembles, band and orchestra. Opportunities for performances of student scores by university organizations. Includes computer technology.  
**Prerequisites:** MUS 2620 with a minimum grade of C  
**Term Offered:** Fall

MUS 3650 Jazz Arranging And Composition I  
[3 credit hours]  
Scoring for contemporary jazz ensembles. A study of jazz notations, voicing, orchestration and composition for small jazz groups and the rhythm section.  
**Prerequisites:** MUS 2620 with a minimum grade of C  
**Term Offered:** Fall
MUS 3660 Jazz Arranging And Composition II
[3 credit hours]
Advanced scoring for contemporary jazz ensembles. A study of notations, voicing, orchestration and composition for large jazz groups.
Prerequisites: MUS 3650 with a minimum grade of C
Term Offered: Spring

MUS 3700 Jazz Improvisation III
[2 credit hours]
Practical application of advanced jazz improvisation techniques as applied to post-bop, fusion and avant-garde playing.
Prerequisites: MUS 2710 with a minimum grade of C
Term Offered: Fall

MUS 3710 Jazz Improvisation IV
[2 credit hours]
Practical application of jazz improvisation techniques as applied to contemporary and chromatic jazz composition and performance.
Prerequisites: MUS 3700 with a minimum grade of C
Term Offered: Spring

MUS 3800 Applied Music
[1-4 credit hours]
Private music lessons for junior music majors.
Prerequisites: MUS 2800 with a minimum grade of B
Term Offered: Spring, Summer, Fall

MUS 3810 Recital
[1 credit hour]
A juried public performance of no more than 25-minutes of musical compositions selected from repertoire studied in MUS 3800 and in consultation with the student’s major applied professor.
Prerequisites: MUS 2800 with a minimum grade of C
Corequisites: MUS 3800
Term Offered: Spring, Fall

MUS 4290 Music Industry Internship
[2-6 credit hours]
Designed to provide students with professional experience in their area of interest within the music industry; students may enroll for variable credit internships up to 6 credits.
Prerequisites: MUS 3280 with a minimum grade of D- and MUS 3290 with a minimum grade of D- and MUS 2270 with a minimum grade of D-
Term Offered: Spring

MUS 4400 Instrumental Music Literature
[3 credit hours]
Course will examine the development of the orchestral and chamber repertoire, from their origins to the present day.
Prerequisites: (MUS 2410 with a minimum grade of C and MUS 2420 with a minimum grade of C)
Term Offered: Spring

MUS 4410 Vocal Pedagogy and Literature 2
[2 credit hours]
This course is the second class in a two-semester sequence. This class will continue to build upon the twofold practical applications of how to teach varied forms of vocal literature as it relates to pedagogical strategies and vocal technique.
Prerequisites: MUS 3550 with a minimum grade of D-
Term Offered: Spring, Fall

MUS 4420 Vocal Pedagogy and Literature 2
[2 credit hours]
This course is the second class in a two-semester sequence. This class will continue to build upon the twofold practical applications of how to teach varied forms of vocal literature as it relates to pedagogical strategies and vocal technique.
Prerequisites: MUS 3550 with a minimum grade of D-
Term Offered: Spring, Fall

MUS 4450 Keyboard Literature
[3 credit hours]
A survey of piano or organ/harpsichord literature from earliest publications to the present. Emphasis on a particular period or genre at the discretion of the instructor.
Term Offered: Spring, Fall

MUS 4460 Guitar History And Literature
[3 credit hours]
The history and literature of the guitar, including a study of the Renaissance and Baroque lute, vihuela and Baroque guitar, 19th and 20th century instruments.

MUS 4620 Counterpoint: Introduction
[3 credit hours]
The study of counterpoint in modal, tonal, and contemporary styles. Studies include contrapuntal techniques such as imitation, canon, invertible counterpoint, non-harmonics and the balance of consonance and dissonance. Formal constructions studied include motets, canons, inventions, and fugues.
Prerequisites: MUS 2620 with a minimum grade of C
Term Offered: Spring

MUS 4690 Seminar In Music Composition
[2 credit hours]
May be repeated, but maximum accumulated credit is six hours toward graduation. Beginning composition including writing in the smaller musical forms. Opportunity for performance of original student compositions.
Prerequisites: MUS 2620 with a minimum grade of C
Term Offered: Spring, Fall

MUS 4800 Applied Music
[1-4 credit hours]
Private music lessons for seniors.
Prerequisites: MUS 3800 with a minimum grade of B
Term Offered: Spring, Summer, Fall

MUS 4810 Recital
[1 credit hour]
A juried public performance of no more than 50-minutes of musical compositions selected from repertoire studied in MUS 4800 and in consultation with a student’s major applied professor.
Prerequisites: MUS 3800 with a minimum grade of B
Corequisites: MUS 4800
Term Offered: Spring, Summer, Fall

MUS 4850 Advanced Vocal Pedagogy
[3 credit hours]
An upper-division level course designed to more intricately address pedagogical strategies for vocal instruction, with an emphasis on surveying methods and research in singing voice specialization as it relates to vocal dysfunction and correction within the context of vocal instruction. This course aims to train future singer/vocal instructors to appropriately teach students of all ages and abilities, as well as diagnose and correct common vocal faults and dysphonias.
Prerequisites: MUS 3550 with a minimum grade of D- and MUS 4420 with a minimum grade of D-
Term Offered: Spring
MUS 4980 Seminar: Special Topics
[1-3 credit hours]
Critical inquiry into specific topics through lectures, class seminar reports and discussion. Seminar topics announced in semester schedule of classes.
Term Offered: Spring, Summer, Fall

MUS 4990 Special Projects
[1-3 credit hours]
Designed to meet the needs of individual students who wish to pursue projects in the area of music.
Term Offered: Spring, Summer, Fall

All music majors have an opportunity to qualify for a departmental honors citation in music if they maintain a minimum cumulative GPA of 3.0 through the junior year and at least a 3.5 average in 12 hours of work chosen from the following courses:

<table>

MUS 4980 Seminar: Special Topics (may be an “honors only” section) 1-3

Students interested in honors recognition should complete an intent (to qualify) form available in the music office at the beginning of their sophomore year. In the senior year, the faculty honors committee will invite qualified students to undertake a special three-hour project (MUS 4990) on a topic approved by the honors in music faculty. Each student will work with an assigned Advisor and present on oral defense of the completed project. Satisfactory work will be rewarded by an honors citation recorded in the student’s permanent file and in the proper graduation bulletin.

B.A. in Music

The major of 39 hours in music must be distributed as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUS 1000</td>
<td>Performance Laboratory (8 semesters) 1</td>
<td>0</td>
</tr>
<tr>

</tr>
<tr>
<td>MUS 1610</td>
<td>Music Theory And Ear Training I</td>
<td>4</td>
</tr>
</tbody>
</table>

MUS 1620 | Music Theory And Ear Training II           | 4     |
MUS 2610 | Music Theory And Ear Training III          | 4     |
MUS 2620 | Music Theory And Ear Training IV           | 4     |

Music History and Literature 2
MUS 2410 | Music History And Literature I: World Music And Jazz | 3 |
MUS 3410 | Music History And Literature II            | 3     |
MUS 3420 | Music History And Literature III           | 3     |

Class Piano 2
Select two hours of the following: 3
MUS 1570 | Piano Class For Music Majors I            | 2     |
MUS 1580 | Piano Class For Music Majors II           |       |
MUS 2570 | Piano Class For Music Majors III          |       |
MUS 2580 | Piano Class For Music Majors IV           |       |

Applied Vocal or Instrumental Instruction 4
MUS 1800 | Applied Music                             | 4     |
MUS 2800 | Applied Music                             | 4     |

Ensembles
Select one of the following ensembles on the major instrument: 5
MUS 3010 | University Band                          |       |
MUS 3020 | Jazz Ensemble                             |       |
MUS 3050 | Chamber Music Ensembles                   |       |
MUS 3090 | University Orchestra                      |       |
MUS 3140 | Concert Chorale                           |       |
MUS 3150 | Jazz Vocalstra                            |       |
MUS 3160 | Rocket Choristers                         |       |
MUS 3180 | Glee Club                                 |       |

Total Hours 39

1 Transfer students will be required to complete a number of semesters proportionate to credits transferred.
2 A grade of C or better is required in each course.
3 Classes assigned by diagnostic test.
4 Each course must be taken twice. A grade of B or better is required in each course.
5 Each music major must enroll in one of the ensembles on the major instrument each semester of enrollment for 8 hours or more until graduation. The minimum requirement is an accumulation of eight hours of ensemble credits, but only four hours may count toward the 120 hours required for the degree. BA music students whose principal instrument is the piano must enroll in MUS 3050.044 each semester unless they are directed to enroll in a different ensemble.

Students may elect an additional 11 hours of music courses beyond the required 39 hours of basic courses for a maximum of 50 hours of music within the 124 hours for the bachelor of arts degree. It is recommended that these additional courses include additional music history and literature courses and at least three additional semesters of applied music in the student’s major performing area.
The requirement of 18 hours in related courses must be chosen from major level courses in the other humanities. Students may elect to present a full or half recital in their senior year.

*Below is a sample plan of study. Consult your degree audit for your program requirements*

### Total Hours

| Hours | 120 |

1. Through performance, students will demonstrate a high level of competence in their major area of applied study.
2. Students will demonstrate the skills necessary for independent, self-directed preparation and performance.
3. Students will be able to demonstrate a knowledge of applicable performance and teaching literature.
4. Students will demonstrate the fundamentals of effective music pedagogy.
5. Students will demonstrate knowledge of Western musical theory - including tonal and chromatic harmonies, counterpoint and contemporary musical styles - through examination and explanation.

**Bachelor of Music**

The Bachelor of Music degree is designed to prepare the student for a professional career in performance. The student may pursue one of a
number of concentrations. Students may be admitted to this program only with the approval of the music faculty, usually determined by a special audition. The requirements for each of the bachelor of music degree concentrations include non-music courses (see General catalog section on the Core Curriculum (http://utoledo-public.courseleaf.com/general-section/university-undergraduate-core-curriculum/)), core music courses and concentration courses.

Concentrations:
- Voice (p. 98)
- Piano (p. 98)
- Strings (p. 99)
- Guitar (p. 99)
- Wind and Percussion (p. 100)
- Instrumental Jazz (p. 100)
- Vocal Jazz (p. 101)
- Instrumental and Vocal Jazz with an Emphasis in Music Business and Recording Arts (p. 101)

1. **Transfer students will be required to complete a number of semesters proportionate to credits transferred.**
2. A grade of C or better is required.
3. A grade of B or better is required in each course.
4. **Note:** MUS 3020 may only fulfill the requirement for one semester. Students must enroll in one of these courses each semester they are taking 12 or more hours. Four semesters of MUS 3050:071, MUS 3150, MUS 3170 or MUS 3190. The minimum requirement is an accumulation of 12 hours of ensemble credits, but only four hours may be counted toward the degree.
5. These hours also count to fulfill the Humanities requirement in the Core Curriculum.
6. **Note:** MUS 3020 may only fulfill the requirement for one semester. Two semesters of MUS 3050:041 or MUS 3050:043. Eight semesters of MUS 3050:044. The distribution of MUS 3050 ensembles indicated here is flexible and may be adjusted to individual needs with the approval of the applied music teacher. The minimum requirement is an accumulation of 14 hours of ensemble credits, but only four hours may be counted toward degree.
7. Students must enroll in MUS 3090 each semester they are taking 12 or more hours. Two semesters of MUS 3140, MUS 3160 or MUS 3180. Four semesters of any choice of small ensembles that includes the student’s major instrument. The minimum requirement is an accumulation of 14 hours of ensemble credits, but only four hours may be counted toward the degree. (4 hours)
8. **Note:** MUS 3020 may only be used to fulfill the ensemble requirement for one semester. Students must enroll in MUS 3050:036 or any large ensemble (MUS 3010, MUS 3020, or MUS 3090) each semester they are taking 12 or more hours. The minimum requirement is an accumulation of 12 hours of ensemble credits, but only four hours may be counted toward degree.
9. A minimum of 2 semesters of MUS 3010, and a minimum of 2 semesters of MUS 3090. (Note: MUS 3020 may only fulfill the requirement for one semester.) Students must enroll in one of these courses each semester they are taking 12 or more hours. Two semesters of MUS 3140, MUS 3160 or MUS 3180. Four semesters of any choice of small ensembles that includes the student’s major instrument. The minimum requirement is an accumulation of 14 hours of ensemble credits, but only four hours may be counted toward degree. (4 hours)
10. Eight hours of Applied Music (classical) and successful completion of two semesters with a grade of B or better in MUS 2800 (classical.)
11. Eighteen hours of Applied Music (jazz) on the student’s major instrument (or combination of instruments with the consent of the Advisor) and successful completion of two semesters with a grade of B or better in MUS 4800 (jazz.)
12. The minimum requirement is an accumulation of 13 hours of ensemble credits, but only four hours may be counted toward degree.
13. The minimum requirement is an accumulation of 12 hours of ensemble credits, but only four hours may be counted toward degree.
14. Sixteen hours of Applied Music (jazz) on the student’s major instrument (or combination of instruments with the consent of the Advisor) and successful completion of two semesters with a grade of B or better in MUS 4800 (jazz.)

Below is a sample plan of study. Consult your degree audit for your program requirements.

</tbody>
</table>

1. Through preparation and application of appropriate performance techniques, students will demonstrate a high level of competence in their major area of applied study.
2. Students will demonstrate comprehension of their major area of applied study by applying the skills necessary for independent, self-directed preparation and performance.
3. Students will be able to demonstrate a knowledge of applicable performance and teaching literature.
4. Students will demonstrate the fundamentals of effective music pedagogy.
5. Students will demonstrate knowledge of Western musical theory - including tonal and chromatic harmonies, counterpoint and contemporary musical styles - through examination and explanation.

Bachelor of Music Education

For details on the baccalaureate program in music education, see The Judith Herb College of Education (p. 539) catalog.

Instrumental Minor

Admission to the minor program requires the following:
1. approval of the Department of Music; and
2. an approved placement audition level on an acceptable instrument or voice (interview for music business and recording arts minor).

Students electing to pursue a minor in music choose one of the seven minors outlined below. It is the student’s responsibility, in consultation with the student’s major Advisor and the music Advisor, to see that the necessary course work is included in the total number of undergraduate courses taken. Students outside the College of Arts and Letters should ensure that the minor in music is an approved program within their college. Candidates for the minor in music must have their course work verified and approved by the Advisor for the Department of Music prior to making formal application for graduation. This can be done by presenting a transcript to the music Advisor and completing the verification form for the minor in music.

Students must maintain a minimum GPA of 2.0 for all course work completed in the minor.

Total Hours 22

1 Placement test required. Grade of C or better is required.
2 At least 6 hours must be in the same instrument or voice.

Music History and Literature Minor

Admission to the minor program requires the following:

1. approval of the Department of Music; and
2. an approved placement audition level on an acceptable instrument or voice (interview for music business and recording arts minor).

Students electing to pursue a minor in music choose one of the seven minors outlined below. It is the student's responsibility, in consultation with the student's major Advisor and the music Advisor, to see that the necessary course work is included in the total number of undergraduate courses taken. Students outside the College of Arts and Letters should ensure that the minor in music is an approved program within their college. Candidates for the minor in music must have their course work verified and approved by the Advisor for the Department of Music prior to making formal application for graduation. This can be done by presenting a transcript to the music Advisor and completing the verification form for the minor in music.

Students must maintain a minimum GPA of 2.0 for all course work completed in the minor.

Department of Philosophy and Religious Studies

John Sarnecki, Department Chair

Philosophy AT THE UNIVERSITY OF TOLEDO

Philosophy at the University of Toledo is historically oriented, pluralistic department with an outstanding faculty and vibrant graduate program. Our undergraduate program exposes students from all majors to the richness of philosophical thought and the importance of critical thinking, and it gives its majors a deep and broad education in diverse philosophical traditions.

Religious Studies at the University of Toledo

The Religious Studies Program at the University of Toledo offers undergraduates the opportunity to explore worldwide expressions of religion in an interdisciplinary, non-confessional context. Students will explore the robust traditions of religious practice, ethics, social institutions, sacred texts, rituals, material objects, and the lived experiences that accompany them. We offer both an undergraduate major and minor. Students can opt to focus their studies in the major in focal area such as Jewish Studies, Christian Studies, Islamic Studies, Interreligious Studies or other areas they design in conjunction with a faculty advisor. We work hard to see that all our majors and minors have a course of study that reflects their career goals and interests so they can flourish professionally and personally.

Degrees Offered

- B.A. in Philosophy (p. 121)
- B.A. in Religious Studies (p. 122)
- Minor in Philosophy (p. 130)
- Religious Studies Minor (p. 130)

PHIL 1010 Introduction To Logic
[0-3 credit hours]
(not for major credit) An introduction to the symbolic analysis of argument components and structures. Topics include definition, syllogistic reasoning, semantics, sentential logic and probability.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

PHIL 1020 Critical Thinking
[0-3 credit hours]
(not for major credit) A study of principles and patterns of good reasoning and writing, including the evaluation and construction of arguments and the identification and avoidance of fallacies.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

PHIL 2000 World Philosophies
[3 credit hours]
Introduction to comparative analysis and interpretation of major themes, methods, and figures in philosophical traditions of Africa, Asia, and the Americas. Topics may include knowledge and wisdom, the relationship between self and world, ethics and the good life, and politics.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Multicultural Non-US Diversity

PHIL 2200 Introduction To Philosophy
[3 credit hours]
An introduction to philosophical reflection on such issues as the existence of God, free will, knowledge and objectivity, social justice and moral responsibility. Humanities core course.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

PHIL 2400 Contemporary Moral Problems
[3 credit hours]
A study of topics such as abortion, euthanasia, environmental responsibility, famine relief, affirmative action and sexuality. Attention is paid to moral argument and the bases of moral decisions.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

[3 credit hours]
An overview of the history and literature of world music and jazz. An introduction to the major styles and figures of world music and jazz, with a focus on the development of the genre in different cultural contexts.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

PHIL 2420 Music History And Literature II: World Music And Jazz 2
[3 credit hours]
An overview of the history and literature of world music and jazz. An introduction to the major styles and figures of world music and jazz, with a focus on the development of the genre in different cultural contexts.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

PHIL 2430 Music History And Literature III: World Music And Jazz 2
[3 credit hours]
An overview of the history and literature of world music and jazz. An introduction to the major styles and figures of world music and jazz, with a focus on the development of the genre in different cultural contexts.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

PHIL 2440 Music History And Literature IV: World Music And Jazz 2
[3 credit hours]
An overview of the history and literature of world music and jazz. An introduction to the major styles and figures of world music and jazz, with a focus on the development of the genre in different cultural contexts.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities
PHIL 3000 Symbolic Logic
[3 credit hours]
A study of propositional and predicate logic, techniques used to evaluate deductive arguments. Topics may include computability, set theory, Bayesianism and other formal systems with philosophical and mathematical relevance.
Term Offered: Spring, Fall

PHIL 3060 Philosophy Of Language
[3 credit hours]
A historical and critical examination of topics in the philosophy of language such as truth, reference, representation, metaphor and interpretation.
Term Offered: Fall

PHIL 3120 Business Ethics
[3 credit hours]
An examination of the ethical dimensions of the relationships between a business and employees, consumers, other businesses, society, government, the law and the environment.
Term Offered: Spring, Summer, Fall

PHIL 3140 Computers And Culture
[3 credit hours]
A study of the philosophical issues computers raise which affect and reflect human values. Topics include censorship and privacy on the internet, virtual reality and the possibility of artificial intelligence.
Term Offered: Spring, Fall

PHIL 3160 Data Science Ethics
[3 credit hours]
A course which covers ethical and social implications of big data science and management. Topics include big data research ethics, privacy, identity, healthcare, and social justice.
Term Offered: Spring, Fall

PHIL 3180 Environmental Ethics
[3 credit hours]
An examination of our relation and responsibility to the natural environment. Topics include risk assessment, the value of non-human living things, resource use, economics, technology, environmental racism and ecology.
Term Offered: Spring, Summer

PHIL 3210 Ancient And Medieval Philosophy
[3 credit hours]
A study of ancient and medieval philosophy from the pre-Socratics to Aquinas.
Term Offered: Fall

PHIL 3230 Modern Philosophy
[3 credit hours]
A study of early modern philosophy from Descartes to Kant. Writing intensive course.
Term Offered: Spring

PHIL 3240 Existentialism
[3 credit hours]
An examination of existentialist philosophy from the 19th Century to the present as represented in the works of Kierkegaard, Nietzsche, Heidegger, Camus, Sartre, de Beauvoir, Fanon and others. Topics may include anxiety, meaning and meaninglessness, freedom, and community.
Term Offered: Spring, Fall

PHIL 3310 Science And Society
[3 credit hours]
A study of twentieth-century science and its relationships with government, industry, religion and medicine, including the emergence of Big Science and the future of science education and research.
Term Offered: Spring

PHIL 3370 Medical Ethics
[3 credit hours]
The application of ethics to the practice of medical professionals. Topics include authority, paternalism, truth-telling, informed consent, health care reform, genetic manipulation, abortion, infanticide and euthanasia.
Term Offered: Spring, Summer, Fall

PHIL 3400 Ethical Theory
[3 credit hours]
An examination of the assumptions, methods and content of major theories of ethics, with an emphasis on the nature of the good, moral obligations, rights and duties. Questions to be examined include: What is the best life for a human being? What is the foundation of the distinction between right and wrong? What motives do I have for acting morally?
Term Offered: Spring, Fall

PHIL 3500 Eastern Thought
[3 credit hours]
An examination of major philosophies of Asia and the Far East, their specific concerns and their relevance to contemporary problems.
Term Offered: Spring, Fall

PHIL 3540 Feminism And Philosophy: Love, Sex and Marriage
[3 credit hours]
This course examines a number of cross-cultural philosophical conceptions of love, sex, and marriage, comparing historical and contemporary beliefs and practices in relation to gender/feminist and ethical theory. A number of philosophical and ethical issues, such as monogamy, cultural and theological contexts, pornography, marriage rights, and consent, will be investigated through readings, videos, and discussion boards, which are meant to encourage students to explore diverse viewpoints, analyze arguments, and cultivate a deeper critical awareness of their own and others’ viewpoints.
Term Offered: Spring, Summer

PHIL 3560 Aesthetics
[3 credit hours]
An analysis and evaluation of aesthetic topics such as the definition of art, truth in the arts, the role of representation, the nature of aesthetic value and the character of aesthetic experience.
Term Offered: Spring, Fall

PHIL 3570 Philosophy Of Religion
[3 credit hours]
A critical, philosophical exploration of questions about the nature of religion, including the existence and nature of God, the problem of evil, and the relation between faith and knowledge. Other topics may include the relation of religion to science and morality, as well as the role of religious experience and miracles in religious belief.
Term Offered: Spring, Fall
PHIL 3630 Philosophy Of Psychology  
[3 credit hours]  
A philosophical examination of problems concerning the nature of mind such as the relation between mind and body, consciousness, free will and personal identity.  
**Term Offered:** Fall

PHIL 3750 Social And Political Philosophy  
[3 credit hours]  
A study of classic and contemporary treatments of justice, authority, the relations between individual and community, the meaning of freedom and equality, power and violence, and race and gender.  
**Term Offered:** Spring, Fall

PHIL 3760 Crime And Punishment  
[3 credit hours]  
A philosophical study of topics such as crime, responsibility, justice and punishment. Special attention is paid to current practices in the criminal justice system.  
**Term Offered:** Spring, Fall

PHIL 3900 Seminar  
[3 credit hours]  
Topics vary.  
**Term Offered:** Spring, Fall

PHIL 4010 Islamic Law and Society  
[3 credit hours]  
This course will survey Islamic law in historical and comparative modern contexts. This course will provide (a) basic introduction to the sources and methods of classical Islamic legal interpretation, (b) survey of the most pressing areas in which traditional Islamic norms remain relevant today—criminal law, family law, and commercial law, (c) the challenges and transformations introduced by colonialism, modernity, and the nation-state, and (d) comparison with the American law and the constitution, highlighting comparative interpretive methods such as originalism versus progressivism, and innovative dimensions of Islamic law such as legal pluralism, wide room for local custom, religious diversity, and restorative justice.  
**Term Offered:** Spring

PHIL 4210 Ancient Philosophy Seminar  
[3 credit hours]  
An intensive study of the texts and arguments of Presocratic philosophers, Plato, Aristotle, or Hellenistic philosophers. Course may be repeated as topics vary.  
**Term Offered:** Spring, Fall

PHIL 4230 Modern Philosophy Seminar  
[3 credit hours]  
An intensive study of one or more Continental or British philosophers from the sixteenth through eighteenth centuries. Course may be repeated as topics vary.  
**Term Offered:** Spring, Fall

PHIL 4240 19th Century European Philosophy  
[3 credit hours]  
An intensive study of European philosophy after Kant, including Hegel, Marx, Kierkegaard and Nietzsche.  
**Term Offered:** Spring, Fall

PHIL 4250 Phenomenology  
[3 credit hours]  
An intensive study of major works from phenomenological philosophers, such as Husserl, Heidegger, Sartre, or Merleau-Ponty. Course may be repeated as topics vary.  
**Term Offered:** Spring, Fall

PHIL 4260 Recent European Philosophy  
[3 credit hours]  
An examination of texts and problems in the Frankfurt school, post-structuralism, deconstruction and post-modernism, or of such thinkers as Habermas, Foucault, Derrida and Lyotard. Course may be repeated as topics vary.  
**Term Offered:** Spring, Fall

PHIL 4270 American Philosophy  
[3 credit hours]  
A study of the development of American Philosophy, or one or more of Pierce, James, Dewey, or Mead. Course may be repeated as topics vary.  
**Term Offered:** Fall

PHIL 4280 20th Century Analytic Philosophy  
[3 credit hours]  
Selected readings from Frege, Russell, Wittgenstein, the Vienna Circle, the Ordinary Language school, and American neo-pragmatists such as Quine, Rorty and Davidson. Course may be repeated as topics vary.  
**Term Offered:** Spring, Fall

PHIL 4300 Philosophy Of Natural Science  
[3 credit hours]  
A study of scientific inquiry including the structure of scientific explanations, relations of evidence and confirmation, the metaphysics of theoretical entities, and the nature of scientific change and progress.  
**Term Offered:** Spring, Fall

PHIL 4400 Ethics Seminar  
[3 credit hours]  
Selected topics or philosophers in ethical theory. Course may be repeated as topics vary.  
**Term Offered:** Spring

PHIL 4650 Philosophy Of Mind  
[3 credit hours]  
Advanced study of issues in the philosophy of mind such as: intentionality and misrepresentation, rationality and interpretation, supervenience and reductionism, folk psychology and eliminative materialism. Course may be repeated as topics vary.  
**Term Offered:** Spring

PHIL 4750 Political Philosophy Seminar  
[3 credit hours]  
Selected topics or philosophers in political philosophy. Course may be repeated as topics vary.  
**Term Offered:** Spring, Fall

PHIL 4900 Advanced Seminar  
[2-4 credit hours]  
Topics vary.  
**Term Offered:** Spring, Fall

PHIL 4920 Directed Readings  
[1-4 credit hours]  

PHIL 4990 Independent Study - Honors
[3 credit hours]

REL 1220 World Religions
[3 credit hours]
A study of the major religions of the world, with an emphasis on their histories, beliefs and practices
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Multicultural Non-US Diversity, Trans Mod Arts and Humanities

REL 2000 Introduction To Religion
[3 credit hours]
Critical and thematic study of the concepts, values, practices and worldviews intrinsic to the religious life.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

REL 2070 Early Judaism
[3 credit hours]
Institutions, culture and religion from the earliest times through the Biblical period to the Medieval period.

REL 2300 Understanding The Monotheistic Religions
[3 credit hours]
A critical examination of the similarities and differences between the three major manifestations of monotheistic religion in the Western Tradition, Islam, Judaism and Christianity.
Core Arts & Humanities, Multicultural Non-US Diversity, Trans Mod Arts and Humanities

REL 2310 Old Testament/Tanakh
[3 credit hours]
An examination of the history and ideas of the Jewish scriptures within the context of Judaism and their appropriation within Christian traditions.
Term Offered: Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

REL 2330 New Testament History And Ideas
[3 credit hours]
Examination of the history and ideas of the New Testament.
Term Offered: Spring
Core Arts & Humanities, Trans Mod Arts and Humanities

REL 2350 Bible And Church Authority
[3 credit hours]
This course will explore issues related to the sources and exercise of religious authority within Christianity, with an extended consideration given to a particular Christian tradition determined by the instructor.

REL 2380 Topics In Catholic Thought
[3 credit hours]
Critical examination of selected topics in contemporary Catholic thought and life.
Term Offered: Spring, Fall

REL 2410 Introduction To Christian Thought
[3 credit hours]
This course will introduce students to the fundamental creedal commitments of Christianity, with an extended consideration given to a particular Christian tradition determined by the instructor.
Term Offered: Fall

REL 2500 Introduction To Islam
[3 credit hours]
An introduction to the academic understanding of Islam. Topics may include: faith, rituals, law (Shari‘ah), jurisprudence (Fiqh), theology (Kalam), and stories from the Islamic heritage. Non-Western multicultural course.
Multicultural Non-US Diversity

REL 2610 Religious Studies Topics In The Humanities
[3 credit hours]
Cross-listings with 2000-level courses offered in the humanities departments. Specific topics vary, and course may be repeated for credit as topics vary. Check course schedules for specific subject and prerequisites.

REL 2980 Special Topics In Religious Studies
[3 credit hours]
Special topics courses. Course may be repeated for credit as topics vary.
Term Offered: Spring, Fall

REL 3000 Religious Studies Proseminar
[1 credit hour]
This course enhances students’ professional development in fields related to religious studies.

REL 3080 Jewish Biblical Studies
[3 credit hours]
An examination of the texts and methods of historical and contemporary Jewish scriptural studies.
Term Offered: Spring, Fall

REL 3100 Islam
[3 credit hours]
An overview of the central doctrines and the many cultural expressions of Islam, the role of the Qur’an and the Prophet Muhammad, Hadith as religious narrative, and tensions between law, modernity, and mysticism.
Multicultural Non-US Diversity

REL 3110 Ancient And Medieval Philosophy
[3 credit hours]
A study of ancient and medieval philosophy from the pre-Socratics to Aquinas.
Term Offered: Fall

REL 3350 The Qur’an And Hadith
[3 credit hours]
A study of the two main texts for Islamic belief and practice: Qur’an and the Hadith (the tradition of the Prophet Muhammad). Topics include their thematic structure, methods of interpretation, and their unique authority within Islam.

REL 3420 Christian Ethical Perspectives
[3 credit hours]
This course will study fundamental ethical concerns in Christian thought, with an extended consideration given to a particular Christian tradition determined by the instructor.
Term Offered: Spring

REL 3500 Eastern Thought
[3 credit hours]
An examination of major philosophies of Asia and the Far East, their specific concerns and their relevance to contemporary problems.
Term Offered: Spring, Fall
Multicultural Non-US Diversity
REL 3510 Comparative Religion: Living Non-Western Religions
[3 credit hours]
Study of the major attitudes toward life, human existence and the world embodied in such major religions of the world as Buddhism, Confucianism, Hinduism, Islam and Taoism. Non-U.S. Diversity

REL 3570 Philosophy Of Religion
[3 credit hours]
A critical, philosophical exploration of questions about the nature of religion, including the existence and nature of God, the problem of evil, and the relation between faith and knowledge. Other topics may include the relation of religion to science and morality, as well as the role of religious experience and miracles in religious belief.

Term Offered: Spring, Fall

REL 3580 Contemporary Issues In Islam
[3 credit hours]
An examination of key contemporary issues facing Islamic thought and culture, such as the changing and contested understandings of religious authority, jihad, role of women, courting, and family norms and the effects on all these of globalization and social media. Course may be repeated for credit as topics vary. Non-Western multicultural course.

Term Offered: Spring, Fall

REL 3610 Religious Studies Topics In The Humanities
[3 credit hours]
Cross listings with 3000-level courses offered in the humanities departments. Specific topics vary, and course may be repeated for credit as topics vary. Check course schedules for specific subject and prerequisites.

REL 3670 Christian Worship And Ritual
[3 credit hours]
This course will explore the history of both Christian ritual practice and the diverse theological understandings of that practice, with a focus on a particular Christian tradition determined by the instructor.

REL 3710 Literature Of The Old Testament
[3 credit hours]
A study of the Old Testament from the literary point of view, including ancient poetry, history, romance, short story, hymn, prophecy and wisdom writing. Recommended: ENGL 2700 or 2800.

Term Offered: Spring, Summer

REL 3720 Literature And Mythology
[3 credit hours]
Study of classical and biblical mythologies in modern Western literature, private mythologies and literary adaptations of patterns from legend and folklore. Recommended: ENGL 2700 or 2800.

Term Offered: Fall

REL 3900 Seminar-Contemporary Religious Thought
[3 credit hours]
A critical examination of selected topics in the area of religion.

Term Offered: Spring, Fall

REL 3980 Special Topics In Religious Studies
[3 credit hours]
Special topics courses. Course may be repeated for credit as topics vary.

Term Offered: Spring, Fall

REL 4010 Islamic Law and Society
[3 credit hours]
This course will survey Islamic law in historical and comparative modern contexts. This course will provide (a) basic introduction to the sources and methods of classical Islamic legal interpretation, (b) survey of the most pressing areas in which traditional Islamic norms remain relevant today—criminal law, family law, and commercial law, (c) the challenges and transformations introduced by colonialism, modernity, and the nation-state, and (d) comparison with the American law and the constitution, highlighting comparative interpretive methods such as originalism versus progressivism, and innovative dimensions of Islamic law such as legal pluralism, wide room for local custom, religious diversity, and restorative justice.

Term Offered: Spring

REL 4520 History Of The Middle East From 600 - 1500
[3 credit hours]
A survey of Middle East history from the emergence of Islam and the formation of Islamic states until the establishment of the Ottoman and Persian empires in the 15th-16th centuries.

REL 4600 Religious Studies Topics In The Arts
[3 credit hours]
Cross listings with 4000-level courses offered in the visual and performing arts departments. Specific topics vary, and course may be repeated for credit as topics vary. Check course schedules for specific subject and prerequisites.

Term Offered: Fall

REL 4610 Religious Studies Topics In The Humanities
[3 credit hours]
Cross listings with 4000-level courses offered in the humanities departments. Specific topics vary, and course may be repeated for credit as topics vary. Check course schedules for specific subject and prerequisites.

REL 4630 Religion, Violence and Peace
[3 credit hours]
This seminar is a sustained exploration of whether religion is related to the occurrence of violence, peace or community-building, and if so, when and how.

REL 4820 Anthropology Of Religion
[3 credit hours]
A cross-cultural approach to the description and analyses of magical and religious beliefs and practices in Asia, Africa, Latin America and Indigenous North America.

Prerequisites: ANTH 2800 with a minimum grade of D-

Term Offered: Spring, Fall

Multicultural Non-US Diversity

REL 4900 Seminar In Religious Studies
[3 credit hours]
Topics vary. Course may be repeated for credit as topics vary. See adviser for Seminar Request Form.

Term Offered: Spring, Summer, Fall

REL 4920 Directed Readings In Religious Studies
[1-4 credit hours]
Critical inquiry of selected works under the guidance of an instructor on a topic not offered as a regular course.

Term Offered: Fall
REL 4940 Internship In Religious Studies
[1-6 credit hours]
Student is placed in a campus or community setting approved by the instructor of record to work on issues pertaining to religion, and analyzes verbally and in writing how religion functioned in this setting.
Term Offered: Spring, Summer, Fall

REL 4960 Senior Thesis for Honors
[3 credit hours]
Prerequisite: Junior standing and consent of program director
Term Offered: Spring, Summer, Fall

REL 4980 Special Topics In Religious Studies
[3 credit hours]
Topics vary. Course may be repeated for credit as topics vary.
Term Offered: Spring, Fall

REL 4990 Independent Study In Religious Studies
[1-4 credit hours]
Directed study in religious studies under the supervision of a religious studies instructor.
Term Offered: Spring, Fall

Honors in Philosophy
1. Admission: Junior and senior majors with an overall minimum GPA of 3.3 may work for the citation "honors in philosophy."

2. Requirements
   Upon graduation, the student shall have a 3.6 GPA in philosophy courses. The student shall complete a substantial term paper in each of two courses with two different philosophy faculty members.
   a. One paper shall be work completed for a regular 4000-level seminar.
   b. One paper shall be an honors thesis completed while registered for PHIL 4990 under the direction of a second faculty member.

Upon the recommendation of the two respective instructors and with the approval of a majority of the philosophy faculty, the student shall be awarded the citation "honors in philosophy."

Historical Engagement: Students will explain and analyze a variety of figures, concepts, and traditions in the history of philosophy.
Analysis and Expression: Students will analyze and evaluate problems in accordance with disciplinary norms of clarity, interpretation, and argumentation; students will be able to present and explain both their own and others reasoning in written and oral formats.
Critical Engagement: Students will explain and evaluate positions in relation to historical and intellectual context and assumptions.
Formal Symbolic Systems: Students will recognize and apply relevant techniques of formal logic.
Creative/Imaginative Thinking: Students will develop creative, original response to philosophical problems.

B.A. in Religious Studies

Religious Studies (p. 122)
Religious Studies - Christian Studies (p. 123)
Religious Studies - Islamic Studies (p. 123)
Religious Studies - Interreligious Studies (p. 124)
Religious Studies - Philosophy of Religion (p. 125)
Related Courses
As part of the general College of Arts and Letters requirements, students must take 18 hours of related courses outside the Religious Studies program that have been approved by the student’s advisor. A minimum of 9 of these hours must be taken at the 3000 level of above. A minor or major in another department may be used to satisfy the related courses requirement.

Religious Studies - Christian Studies
All students majoring in Religious Studies must take a minimum of 31 hours in Religious Studies plus 18 hours of related courses. The course requirements for the major are as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>REL 2000</td>
<td>Introduction To Religion</td>
<td>3</td>
</tr>
<tr>
<td>REL 3570</td>
<td>Philosophy Of Religion</td>
<td>3</td>
</tr>
<tr>
<td>REL 3000</td>
<td>Religious Studies Proseminar</td>
<td>1</td>
</tr>
</tbody>
</table>

Distribution Requirements
At least one course must be taken in each of the three areas listed below. At least one course must be taken at the 3000-4000 level. The student may petition their advisor to have other courses substituted for the list below in fulfillment of the distribution requirement.

Group One
- REL 2310 Old Testament/Tanakh
- REL 2330 New Testament History And Ideas
- REL 2350 Bible And Church Authority
- REL 2410 Christianity
- REL 3420 Christian Ethical Perspectives
- REL 3080 Jewish Biblical Studies
- REL 3670 Christian Worship And Ritual

Group Two
- REL 2300 Understanding The Monotheistic Religions
- REL 2500 Introduction To Islam
- REL 3350 The Qur’an And Hadith
- REL 3580 Contemporary Issues In Islam

Group Three
- REL 3500 Eastern Thought

Electives
All majors take 15 hours of electives, i.e., any 2000-4000 level REL course not counted toward the above requirements. At least 6 hours of these 15 hours must be taken at the 4000 level. Students may consider directing some of these hours toward a concentration, toward a Religious Studies Internship REL 4940 taken concurrently or after the Proseminar, or toward a Senior Thesis for Honors REL 4960 if pursuing departmental honors.

Optional: Concentration Areas
Students may opt to dedicate 12 hours toward a concentration in one of the four sub-fields of religious studies below to receive a BA degree in religious studies with a concentration in this subfield. Students may also opt out of concentrating to receive a BA in religious studies per se. Distribution courses, elective courses, courses in related fields and independent students that align with the concentration in question can all count toward a concentration with prior approval of the Advisor.

Christian Studies
Select 12 hours related to the study of Christianity, selected from courses including but not limited to:
- REL 2300 Understanding The Monotheistic Religions
- REL 2310 Old Testament/Tanakh
- REL 2330 New Testament History And Ideas
- REL 2350 Bible And Church Authority
- REL 2380 Topics In Catholic Thought
- REL 2410 Christianity
- REL 3210 Ancient And Medieval Philosophy
- REL 3420 Christian Ethical Perspectives
- REL 3670 Christian Worship And Ritual

Total Hours 31

### Honors in Religious Studies

*Meet with the departmental major advisor to discuss the qualifications and to develop a plan to meet the honors requirements. May be combined with any concentration or not. Requires:*

1. A 3.0 cumulative GPA and junior or senior status in order to seek honors
2. A 3.4 minimum cumulative GPA in REL courses. Transfer courses are not included
3. Honors Thesis: REL 4960
4. Paper from 4000-level Honors seminar course.

**Methods:** Students will identify and apply various methods used in the academic study of religion.

**Breadth of Knowledge:** Students will explain the fundamental worldview, practices, and history of at least three major religious traditions, including but not limited to Hinduism, Buddhism, Judaism, Christianity, and Islam.
Depth of Knowledge: Students will develop competence in a recognized area of concentration within the academic study of religion (e.g., Islamic Studies; Philosophy of Religion; Religion in the Public Sphere).
Critical Engagement: Students will explain and evaluate theories, concepts, and materials in relation to historical and cultural context in a non-dogmatic manner.
Analysis and Expression: Students will analyze and evaluate concepts and problems in religious thought in accordance with disciplinary norms of clarity, interpretation, and argumentation.
Application: Students will apply resources and methods of the academic study of religion to other academic disciplines or matters of public interest

Minor in Philosophy

Specific predesigned programs of study are available in the following areas:

- Prelaw
- Philosophy and medicine
- Philosophy and education
- Philosophy of natural science
- Philosophy of social science

Also available is a philosophy minor with honors. Specific requirements are:

1. Requirements, list under the "Requirements" tab.
2. At least two courses at the 4000 level.
3. Either an honors section of a 3000-level course or a 3000-level course taken under an honors contract.
4. A minimum GPA of 3.3 in philosophy.

A minor in Philosophy complements a variety of University major programs in the humanities, the social and natural sciences, education and business. All minors in Philosophy must meet the following requirements:

1. 21 hours in philosophy with a minimum GPA of 2.0.
2. PHIL 3210 or PHIL 3230.
3. At least one course numbered 4000 or above.
4. No more than one independent study, PHIL 4920, will count toward the completion of the minor.
5. The program of study must be approved by the department undergraduate Adviser and verified before graduation.

Religious Studies Minor

The University of Toledo offers a Religious Studies Minor program. All students minoring in Religious must take a minimum of 18 hours in Religious Studies according to the following program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>REL 2000</td>
<td>Introduction To Religion</td>
<td>3</td>
</tr>
<tr>
<td>REL 3570</td>
<td>Philosophy Of Religion</td>
<td>3</td>
</tr>
</tbody>
</table>

Distribution Requirements

Select one course each of the three of the following distributions. See major for details.

Group One: Judaism and Christianity

Group Two: Islam

Group Three: Eastern (Asian) Religions

Elective Course

Select one course at the 4000 level. See major for details. 3

Total Hours 18
PSC 2300 Principles Of State And Local Government
[3 credit hours]
A study of the political processes and institutions of American state and local governments, with attention given to selected areas of public policy and intergovernmental relations.
Term Offered: Spring, Summer, Fall

PSC 2400 Topics in Political Science
[3 credit hours]
Examination of current topics in Political Science. Area and topic to be determined by instructor.
Term Offered: Spring, Fall

PSC 2600 Principles of Comparative Politics
[3 credit hours]
How can we explain the vast array of political systems around the world? This course examines the political systems of various countries and the internal and external factors shaping their political decisions. We will focus on institutional arrangements at the country level and the shaping forces behind their design, as well as on broad global topics affecting national politics.
Term Offered: Spring, Fall

PSC 2660 African Politics
[3 credit hours]
The character and development of African political institutions and processes with a special emphasis on patterns in the post-independence period and prospects for the future.
Term Offered: Spring, Summer, Fall
Multicultural Non-US Diversity

PSC 2700 Principles Of International Relations
[3 credit hours]
An examination of the theoretical and methodological foundations of the international system. Through case studies, students will analyze and predict issues of cooperation and competition among states. For example, why does war occur? Why does the international system have particular international institutions rather than others? What best explains a state's foreign policy?
Term Offered: Spring, Summer, Fall

PSC 2770 Great Decisions: America's Foreign Policy
[1 hour]
(1 hour) An examination of key U.S. foreign policy issues as decided by the Foreign Policy Association, which takes place both in a classroom setting and through a speaker series with public discussions.
Term Offered: Spring, Summer, Fall

PSC 2780 Political Science and Pop Culture
[3 credit hours]
(3 hours) This course critically examines the role that politics and pop culture play in creating and shaping each other and the roles that each play in our lives. This course also acts as an overview of some of the major issues in political science such as democratization, war, and human rights.
Term Offered: Fall

PSC 2780 Principles Of Political Theory
[3 credit hours]
This course investigates core concepts in the history of political theory such as justice, liberty, and equality. We discuss how and why the influence of certain authors and ideas persists. Contemporary issues are interpreted using these authors and ideas in order to strengthen critical thinking skills and broaden students' thinking about politics.
Term Offered: Spring, Fall

PSC 3150 Research and Writing in Political Science
[3 credit hours]
This course introduces the student to academic writing and research techniques in the political science discipline. Topics covered include: research ethics, scholarly literature review, peer-review process, research questions and research design, methodological approaches, and data analysis, among others.
Term Offered: Spring

PSC 3210 Political Parties
[3 credit hours]
Why are political parties central to organizing democracy? This course examines how they set the terms of public debate, mobilize citizens, inform voter preferences, and shape policy.
Term Offered: Spring, Fall

PSC 3240 African-American Politics
[3 credit hours]
A study of the many ways black people have involved themselves in American politics; examines African-American participation in the political and governmental process.
Term Offered: Spring, Summer, Fall
Multicultural US Diversity

PSC 3250 Public Opinion
[3 credit hours]
This course explores the role of public opinion in American politics. It also develops data analysis skills and familiarizes students with survey development.
Term Offered: Spring, Fall

PSC 3270 Campaign and Elections
[3 credit hours]
Campaigns and elections are vital components of democracy in the United States. In this course, we examine how candidates, parties, and citizens participate in the electoral process. Topics covered throughout the semester include candidate recruitment, voting behavior, advocacy groups, campaign finance, and the impact of new technology on voter mobilization.
Term Offered: Spring, Fall

PSC 3280 Race and American Politics
[3 credit hours]
This course examines the role that race plays in the development of American politics. The class investigates definitions of race, how they have evolved, and how they continue to influence policy debates. This seminar assesses the impact that different racial groups, and their struggles for equality, have had on American democracy. This course examines the leading theoretical frameworks and empirical findings to analyze the relationship between race and American political development.
Term Offered: Spring, Summer, Fall
Multicultural US Diversity
PSC 3410 Principles of Public Policy
[3 credit hours]
This course is an introduction to public policy. It is focused on the factors that affect policymaking in the United States.
Term Offered: Spring, Summer, Fall

PSC 3500 Principles Of Law
[3 credit hours]
An overview of the politics of law. We examine such questions as the sources and existence of law, the legal process in civil and criminal cases, the nature of rights and the search for justice through participation in the legal system. Addresses specific issues such as plea bargaining and jury trials, personal injury lawsuits, national security and police powers, and the nomination and confirmation of federal judges.
Term Offered: Spring, Summer, Fall

PSC 3510 Constitutional Law I
[3 credit hours]
Examines the political and institutional role of the U.S. Supreme Court in the development of the American legal system, the separation of powers between the executive, legislative, and judicial branches of the federal government, and the relationship between the federal government and the states. The course focuses on the analysis of Supreme Court cases as well as political science and legal scholarship.
Term Offered: Spring, Fall

PSC 3520 Constitutional Law and Politics II
[3 credit hours]
Examines the political and institutional role of the Supreme Court in the development of the U.S. system of civil liberties, the relationship between judicial decisions and state actions affecting rights such as free speech, religion, and privacy, and the underlying theories of civil liberty in a democratic society. The course focuses on the analysis of Supreme Court cases as well as political science and legal scholarship.
Term Offered: Spring

PSC 3600 Fascism and Populism in Comparative Perspective
[3 credit hours]
A comparative survey of historical fascist regimes and contemporary populist governance, mainly in Europe and Latin America. Contemporary populist rule is frequently equated with fascism but the differences are significant. In this course we will examine the differences and similarities between the two regime types.

PSC 3690 Peasant Politics
[3 credit hours]
The study of political science has become increasingly urban but peasant movements remain a significant political force around the world, particularly in less-developed regions. In this course we will study peasants and their politics worldwide from both a historical and contemporary perspective.

PSC 3730 American Foreign Policy
[3 credit hours]
An examination of the American foreign policy-making process as well as an analysis of the major problems facing the United States in its interaction with the international environment.
Prerequisites: (PSC 1200 with a minimum grade of D- or PSC 1300 with a minimum grade of D-) or (PSC 1400 with a minimum grade of D- or PSC 1710 with a minimum grade of D-) or PSC 2700 with a minimum grade of D-

PSC 3790 Model United Nations/Model European Union
[1 credit hour]
This is a faculty-advised, student-led simulation course. Students are exposed to the decision-making procedures of one of two major international organizations: The United Nations or The European Union. Through role-play, students will represent countries, delegates, prime ministers, foreign ministers, and government officials. Whenever possible, the organization represented in a given semester (UN or EU) will be chosen based on the opportunity to attend a conference where students will apply the concepts learned throughout the semester.
Term Offered: Spring, Summer, Fall

PSC 3800 Sexual Politics
[3 credit hours]
This course critically examines gender, sex and sexuality as identities, practices, and relationships. Through readings in feminist political theory and history, we study state practices, social norms, and historical movements for change to understand why and how various forms of gender, sex and sexuality become normal or are challenged in unexpected ways.
Term Offered: Spring, Fall

PSC 3820 Contemporary Political Ideas
[3 credit hours]
Surveys developments and themes in political theory since the early 20th century. Particular issues addressed include bureaucracy, mass society, state and civil violence, and identity politics.
Term Offered: Spring

PSC 3850 Sports, Politics and Policy
[3 credit hours]
This course explores the intersection of sports with politics and policymaking. Topics covered include sports and nationalism, sports and international diplomacy, globalization and sports, economic development and sport stadiums, baseball and antitrust law, Title IX and women's athletics, college athletics and race, and athletes and political advocacy.

PSC 3990 Independent Study For Honors Students
[3 credit hours]
Individual reading and research in selected topics for honors students.
Term Offered: Spring, Summer, Fall

PSC 4220 Advocacy Groups in US Politics
[3 credit hours]
This course investigates the role of advocacy groups in American politics. We examine such questions as the role of advocacy groups in campaigns and elections, grass roots mobilization, and agenda setting.
Term Offered: Spring, Fall

PSC 4230 Presidency
[3 credit hours]
Presidents enjoy special prominence in the American political system. However, they are strongly influenced by their interactions with other political institutions, such as Congress, courts, the bureaucracy, and political parties. This course examines the presidency's original design and how the office has developed over time. We also investigate contemporary cases and controversies in presidential power.
Term Offered: Spring
PSC 4280 U.S. Congress
[3 credit hours]
Despite its key role in our political system, the U.S. Congress is not well understood by the public. This course examines how it works: the committee system, parties, and arcane legislative procedures. We consider topics like the impact of party polarization on congressional gridlock, the impact of divided government on policymaking, and how to improve representation.

Term Offered: Spring, Summer, Fall

PSC 4300 Principles of Public Administration
[3 credit hours]
This course provides an overview of public administration. It addresses organization theory, decision making, budgeting, public policy, and the changing role of public institutions. It covers important democratic, professional, ethical and human values that are central to public administration.

PSC 4320 Urban Policy & Administration
[3 credit hours]
What does it take to govern a city and its environs? In this course, we examine the balance between the pressing needs of a city and the many economic and political constraints that citizens, leaders, and experts must navigate to achieve their goals.

Term Offered: Spring, Summer, Fall

PSC 4340 Environmental Policy
[3 credit hours]
Policy for air and water pollution control, hazardous wastes, nuclear wastes. Examination of EPA, Congressional committees, state and city agencies. Some international issues.

Term Offered: Fall

PSC 4360 Ethics In Public Policy And Administration
[3 credit hours]
Examination of values and principles which guide public policy formation and public administration. Applications of philosophical concepts to policy problems and the responsibilities of public administrators will be emphasized.

Term Offered: Spring, Summer, Fall

PSC 4380 Fundraising
[3 credit hours]
This course examines the theoretical, practical and ethical issues related to public and nonprofit organizations fundraising. This course will prepare students who plan to work in public and nonprofit agencies to win and manage grants as well as philanthropic donations from multiple sources.

Term Offered: Spring, Summer, Fall

PSC 4410 Public and Nonprofit Management
[3 credit hours]
This course examines management techniques, organizational design, strategic planning and the theoretical and practical behavioral skills that are necessary for effective public and nonprofit management. These skills include communication, organizational, and leadership skills within public and nonprofit organizations.

Term Offered: Spring, Summer, Fall

PSC 4420 Political Determinants of Health
[3 credit hours]
An examination of the political determinants of health, that is, the upstream political forces and policy decisions that are the causal sources of the social conditions that lead to health inequities. This course introduces the importance of power, politics, advocacy, and policy in public health. Students will learn models of health equity and the political determinants of health and apply these to contemporary case studies with particular attention to the health effects of racism.

Term Offered: Spring, Fall

Multicultural US Diversity

PSC 4430 Human Resources Management in Public and Nonprofit Organizations
[3 credit hours]
This course is a study of human resource management in public and nonprofit organizations. The course explores broad themes within public personnel administration such as recruitment, retention, motivation, and diversity to provide students with the opportunity to develop technical skills necessary for effectively managing human resources in contemporary public agencies, including government and nonprofit organizations.

Term Offered: Spring, Summer, Fall

PSC 4440 Budgeting And Financial Administration
[3 credit hours]
An examination of the institutions and techniques of financial administration, including government accounting, budgeting, financial management and government choice.

Term Offered: Spring, Summer, Fall

PSC 4480 Introduction to Nonprofits
[3 credit hours]
This course provides an overview of the voluntary sector with an emphasis on the historical, philosophical, and theoretical justifications of the nonprofit sector, voluntary action, and philanthropy. The course will examine the administration and management of nonprofit organizations as well as the impact nonprofit organizations have on public policy.

Term Offered: Spring, Summer, Fall

PSC 4520 The Politics of Development and Underdevelopment
[3 credit hours]
This course examines political and economic development through a comparative lens. We focus on developing regions of the world to explore successes, possibilities, outcomes, and setbacks in their path towards achieving "developed" status.

PSC 4530 Civil Rights
[3 credit hours]
Examines the role of the US Supreme Court, judicial policy-making, and administrative implementation in the development of policies involving race, gender, sexual orientation, and the family. Issues covered include equal protection, voting rights, and affirmative action.

Term Offered: Summer, Fall

PSC 4550 CONTEMPORARY ISSUES IN LAW AND POLITICS
[3 credit hours]
Examines current controversies in US law and politics drawing on recent research in political theory, constitutional history, and legal doctrine. Includes issues such as freedom of speech, presidential war powers, and religious freedom.

Term Offered: Spring, Fall
PSC 4560 Law And Public Administration
[3 credit hours]
Survey of law topics that are relevant for managers of public and nonprofit organizations.
Term Offered: Spring, Summer, Fall

PSC 4580 International Law
[3 credit hours]
A course focusing on the foundations of international law and the current use of international law in cases covering a wide range of issues such as war, weapons, diplomacy, the environment, economics, and human rights.

PSC 4590 Law, Policy And The Politics of Sexuality
[3 credit hours]
This course explores the public policies that affect the lesbian, gay, bisexual and transgender communities in the United States and in other countries. It examines the factors that affect policymaking in this area.
Term Offered: Spring, Fall

PSC 4640 The European Union
[3 credit hours]
An analysis of the evolution, institutional structure, and operation of the European Union. Issue areas include human rights, trade, migration and refugees, international and domestic law, and foreign policy.
Term Offered: Spring, Fall

PSC 4660 Politics of Africa
[3 credit hours]
There are multiple political systems, ethnic identities and external interests among the countries in Sub-Saharan Africa. Applying a comparative lens, we will survey Africa's pre-colonial and colonial heritage; and economic, cultural, social and environmental characteristics that help define Africa. We will delve deeper into a few countries as case studies as well as examine the international and regional influences, thereby gaining a broad understanding of the political, social and economic implications surrounding Africa today.
Term Offered: Fall

PSC 4680 Politics of Latin America
[3 credit hours]
This course provides a survey of the Latin American region, its political transformation, and place in international politics. It covers an array of issues that have shaped and continue to shape the region: its history, its people, its culture, institutions and politics, and social and economic issues. Themes are approached both from a regional and country-level perspective.
Multicultural Non-US Diversity

PSC 4720 International Organization
[3 credit hours]
A study of the background, general concepts and problems of international organizations including the United Nations, regional organizations and non-governmental organizations. Issues covered include war, security, human rights, trade, international law, and global health.
Term Offered: Fall

PSC 4740 Politics of the Middle East
[3 credit hours]
An advanced examination of international relations theory applied to the Middle East and a survey of modern Middle Eastern governments, cultures, and institutions with case studies on key issues facing the region.
Multicultural Non-US Diversity

PSC 4750 Terrorism in International Relations
[3 credit hours]
This course will give students a comparative historical, empirical, and theoretical overview of the causes, strategies, and goals of terrorist and counter-terrorism. The primary focus of the course is on the comparative and international nature of terrorism. Global and regional case studies will be used to better understand issues related to terrorism.

PSC 4770 Human Rights
[3 credit hours]
What are human rights? How are human rights created? Why do states protect or repress human rights? This class answers these questions by examining both the theoretical and empirical contributions to the study of human rights from the social sciences and law. In addition, human rights best (and worst) practices are considered.
Term Offered: Spring

PSC 4810 Environmental Justice
[3 credit hours]
Environmental Justice examines the unequal distribution of environmental benefits and burdens among vulnerable communities. This course will examine the challenges and solutions associated with environmental justice, both as a social movement and as a public policy initiative. We will discuss several different policy areas like health, pollution, hazardous waste siting, climate change, food, and natural disasters; and strategies applied by NGOs and interest groups, to understand the patterns of environmental inequality and injustice.

PSC 4840 Applied Politics Internship
[3 credit hours]
A study of electoral politics, public decision-making or policy implementation through internships with candidates, political parties, public officials or governmental or nonprofit agencies.
Term Offered: Spring, Summer, Fall

PSC 4900 Politics of Asia
[3 credit hours]
Asia is the largest of all continents and hosts more than half the world's population. This course will apply a comparative framework to explore the historical, cultural, and social forces shaping the politics of Asia. We will explore the similarities and variations across countries, regional influences of countries on one another, and the role of the international community, with special focus on U.S. - Asia relations (such as North-South Korea, Japan, India, China).
Multicultural Non-US Diversity

PSC 4940 Applied Politics Internship
[3 credit hours]
A study of electoral politics, public decision-making or policy implementation through internships with candidates, political parties, public officials or governmental or nonprofit agencies.
Term Offered: Spring, Summer, Fall

PSC 4950 Capstone in Political Science
[1 credit hour]
This course provides the opportunity to integrate and reflect on knowledge and experiences gained during completion of the political science major with an eye towards post-graduation endeavors such as graduate or professional study, or employment. Topics include how to construct a portfolio and write cover letters, resumes, and CVs.
Term Offered: Spring, Fall
PSC 4960 Senior Honors Thesis
[3 credit hours]
Supervised research and writing for honors students only.
**Term Offered:** Spring, Summer, Fall

PSC 4980 Current Topics In Political Science
[3 credit hours]
Timely examination of emerging issues within the various segments of the discipline of political science.
**Term Offered:** Spring, Fall

PSC 4990 Independent Study In Political Science
[1-3 credit hours]
Individual study and research in a selected political science topic under mentorship of a faculty member.
**Term Offered:** Spring, Summer, Fall

Departmental Honors prepares majors for post-graduate study, for law school, for advanced work in policy research, and for other professional pursuits. It emphasizes intellectual organization and concept formation through the processes of research and writing. Honors work fosters intellectual growth through independent study, involves students in research, prepares students for the intellectual rigor of graduate study, and makes students more competitive for the best employment opportunities upon graduation.

These are the skills you will need in many professional positions—whether in governmental service, non-profit organizations, or the private sector. Departmental Honors offers the opportunity to specialize in one of the sub-disciplines of Political Science and to work closely with faculty in the Student’s areas of interest.

If you aspire to do the kind of work required for Departmental Honors, we encourage you to contact the Honors Adviser (Dr. Heberle). Judge for yourself whether this individualized, intensive program is right for you.

Departmental Honors work is distinct from the University Honors Program, but works closely with it. You must have an overall UT GPA of at least 3.0 and a GPA of 3.3 or higher in the major and be in your third year of study to sign up for honors work. You must also complete PSC 4960 Senior Honors Thesis. PSC 3150 Research and Writing in Political Science is strongly recommended no later than Spring semester of your junior year.

### Optional Legal Studies Concentration
This program is designed to allow students to focus their studies on law, legal processes, and legal institutions for careers in the legal profession, for leadership in public affairs, as well as for an interesting major. This solid liberal arts specialization provides excellent preparation for law school and a subsequent career as a lawyer or judge.

In addition, students must take three of the following:

- PSC 2600 Principles of Comparative Politics
- PSC 2700 Principles Of International Relations
- PSC 2800 Principles Of Political Theory
- PSC 3410 Principles of Public Policy
- PSC 4950 Capstone in Political Science

Complete additional courses in the department to satisfy the 31-hour requirement. PSC 3150 Research and Writing in Political Science is highly recommended.

| Total Hours | 31 |

### Total Hours
33

**1** While only two additional electives within political science are required for the Legal Studies specialization, students may elect to complete additional classes in the discipline.

Below is a sample plan of study. Consult your degree audit for your program requirements.

**Final Statement**: Recognize political phenomena and political lacuna worthy of investigation using the methods of political science.
describe and critique the essential concepts in four of five subfields of political science: American politics, comparative politics, international relations, political theory, and public administration develop descriptive inferences about political phenomena by applying the foundational concepts of political science and known facts interpret and evaluate the significance and dynamics of political events and governmental processes that affect citizens lives analyze political, administrative, and policy issues using empirical methods including formulating hypotheses and organizing information to test those hypotheses normatively evaluate political, administrative, and policy issues and justify students normative conclusions

Minor in Political Science

Students seeking a minor in political science must complete at least 18 hours of course work at the 2000 level or above in the discipline, chosen in consultation with a departmental adviser. It is recommended that minors include in their undergraduate program the introductory course in American Government (PSC 1200) and three of the four gateway subfields. At least 9 of the 18-credit hour minimum must be at the 3000-4000 levels.

To increase knowledge of the political science discipline; its principal theoretical frameworks and applications, conceptual vocabulary, and methods of inquiry; its major subfields of study; and its interrelationships with the other social science fields.

Minor in Public Administration

The minor in public administration is comprised of 18 hours of course work of which at least 15 hours shall be taken at the 3000 or 4000 level. Political science majors wishing to minor in public administration are advised to consider the Early Admission program for the MPA. Political science students minoring in public administration may not utilize 3000-4000 level public administration identified courses to fulfill their political science major requirements.

Total Hours 18

Other related courses approved by the Chair of Political Science & Public Administration

At the end of the program, students will be able to:
• lead and manage in public governance;
• participate in and contribute to the policy process;
• analyze, synthesize, think critically, solve problems and make decisions;
• articulate and apply a public service perspective;
• communicate and interact productively with a diverse and changing workforce and citizenry.

Department of Psychology

Kim L. Gratz, Ph.D., Chair
Peter Mezo, PhD., Associate Chair and Undergraduate Coordinator
Alexandria Harris, Undergraduate Advising

Ms. Harris can answer basic questions about degree requirements, help you tailor your course selections to meet your goals, and fill out graduation progress evaluations. She is available on a walk-in basis. Students may also make an appointment by calling her office as 419.530.2235, or emailing her at Alexandria.harris@utoledo.edu.

Advanced Placement Program

Refer to the University of Toledo's Registrar page at https://www.utoledo.edu/offices/registrar/student_records/advan_credits.html for specific information on minimum scores and credits awarded for Advanced Placement examinations administered by the College Board Advanced Placement Program.

Degrees Offered
• B.A. in Psychology (p. 138)
• Minor in Psychology (p. 139)

Requirements for Admission

Psychology majors are encouraged to earn the graduation citation “Honors in Psychology” through the Department of Psychology honors program. A student can be admitted at any time but no later than the end of the first semester of their junior year. The following criteria must be met for admission to the program:

1. An overall GPA of 3.8 or higher - or - Good standing in the College Honors program
2. A grade of B or higher in PSY 2100
3. A GPA in Psychology courses of 3.4 or higher
4. Recommendation by two Department faculty members

Check with your advisor about your suitability for honors. If interested, contact the Department Honors Advisor for application materials.

Requirements for Graduation with Honors in Psychology

Once admitted, Honors students must meet all Requirements for the Undergraduate Major with the addition of:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSY 3800</td>
<td>Honors Proposal (Review a topic under the guidance of a faculty member and design and write a proposal for an empirical research project)</td>
<td>3</td>
</tr>
<tr>
<td>PSY 3910</td>
<td>Honors Research (Carry out the proposed research project)</td>
<td>3</td>
</tr>
<tr>
<td>PSY 4960</td>
<td>Honors Thesis (Analyze the data from the research project, write the results for a research publication in APA style, and present it formally to department faculty)</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Hours: 9

The final GPA in all Psychology courses must be 3.4 or higher.

B.A. in Psychology

The major in Psychology requires a minimum of 34 semester hours of Psychology courses, with at least 22 of these hours taken at the University of Toledo, plus 18 hours of related courses. Courses for the major in Psychology cannot be taken as P/NC except for PSY 4100.

The B.A. Curriculum

The B.A. degree in psychology is designed to provide a liberal arts education and to prepare students for a wide variety of careers, graduate training in a specialized area of psychology (e.g., Experimental or Clinical psychology graduate programs), or graduate work in related disciplines. Students will be exposed to all of the major fields of psychology. Related courses come from a list pre-approved by faculty in the department and available on the Psychology Department website. These courses are taught by other departments, but are relevant to various areas of psychology. Fundamentals of Biology or Biodiversity (BIOL 2150 or EEES 2150) with lab (BIOL 2160 or EEES 2160) is on the list and is the only related course required of all majors. Students who wish to do so can use these BIOL or EEES hours toward their natural science requirement. Students are free to choose any other courses from the related list, but should do so in consultation with their advisers.

The core psychology curriculum is as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

Total Hours: 55-61

1. Must earn a C- or higher in MATH 1320 or higher before taking PSY 2100.
2. Must earn a grade of C- or higher before taking PSY 3110.
3. An Advanced Research Course is not required of all majors but students planning to pursue graduate work in psychology are strongly advised to take an advanced research course from the list.
4. This category includes all Psychology courses at the 3000- or 4000-level that are not taken to meet requirements A and B. At least 12 hours of electives must be taken at a 3000-level or higher.
5. The 18 hours of related courses are taken outside the Department of Psychology, and must be on the related list and/or approved by the student's Department advisor. At least 9 hours must be courses numbered 3000 or higher. Fundamentals of Biology (BIOL 2150) or Biodiversity (EEES 2150), with lab (BIOL 2160 or EEES 2160), must be included in the Related Courses category (or taken as part of the natural science requirement).

A minor in another department or a second major may be used to complete the remaining Related Courses requirement, with the advisor's approval.
### Knowledge base in Psychology:
- Apply fundamental knowledge and comprehension of the major concepts, theoretical perspectives, historical trends, and empirical findings to discuss how psychological principles apply to behavioral problems.
- Use scientific reasoning to interpret psychological phenomena; interpret, design, and conduct basic psychological research.
- Apply ethical standards to evaluate psychological science and practice; build and enhance interpersonal relationships.
- Demonstrate effective oral presentation and writing to interact effectively with others.
- Apply psychological content and skills to career goals to develop meaningful professional direction for life after graduation.

### Minor in Psychology

Students electing to minor in psychology at the University of Toledo must complete a minimum of 21 semester hours of course work: 12 hours of basic courses in Psychology and an additional 9 hours of advanced Psychology courses. Each program of study must be approved by a department adviser. A minimum GPA of 2.0 must be achieved in courses within the minor. Courses in the minor may NOT be taken as P/NC. The curriculum is as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basic Psychology Courses</td>
<td>Select 4 of the following: 1</td>
<td>12</td>

</tbody>
</table>

- Select 9 hours of Psychology courses numbered 3000-4990

Total Hours: 21
With the approval of a Department advisor.

With the approval of a Department advisor, the student must select 9 hours of Psychology courses 3000-4990. It should be noted that no more than a total of 4 hours of PSY 4100 Research Practicum, PSY 4990 Independent Study, and/or PSY 4910 Independent Research may be included.

Department of Sociology and Anthropology

Dwight Haase, Chair

Sociology is the study of people in the context of the groups in which they live.

• This social science equips a student to better understand human relationships within families, organizations and societies.
• In these times of pandemic, economic upheaval, polemic politics and rising inequality, a degree in sociology can promote unification, social justice and a deeper understanding of how people relate to each other.
• A degree in this discipline can prepare a student for a career in different fields including public service, non-profit work and medical-related fields.

Anthropology is the study of people around the world, over time and in different settings. It looks at the nature of human societies from the beginning of our existence to our present day and toward our future.

This discipline focuses on the past and present record of human societies and investigates human existence from several subfields, including:

• Archaeology
• Biological (or Physical) Anthropology
• Linguistic Anthropology
• Cultural Anthropology
• Medical Anthropology
• Cultural Ecology

An Anthropology degree prepares a student for the evolving international job market and other cultural shifts in today’s world. Additionally, students are exposed to investigative learning to look for solutions to issues facing humankind including environmental sustainability and public health.

Degrees Offered

• B.A. in Anthropology (p. 145)
• B.A. in Sociology (p. 147)
• Minor in Anthropology (p. 148)
• Minor in Sociology (p. 148)

ANTH 1020 Introduction To Anthropology
[3 credit hours]
A survey of the varied aspects of anthropology, including cultural anthropology, prehistory, physical anthropology and linguistics. (not for major credit)
Term Offered: Spring, Summer, Fall
Core Social Sciences, Trans Mod Social Science

ANTH 2000 Proseminar In Anthropology I
[1 credit hour]
Students are introduced to the academic and professional nature of Anthropology. Topics covered include professional socialization, honor theses, portfolio construction, preparation for graduate studies, and career development.
Term Offered: Spring, Fall
Core Social Sciences, Trans Mod Social Science

ANTH 2100 Human Society Through Film
[3 credit hours]
An introduction through the use of ethnographic film to various aspects of non-western culture and the development of the use of film in anthropology.
Term Offered: Spring, Summer, Fall
Core Social Sciences, Multicultural Non-US Diversity

ANTH 2700 Human Evolution
[3 credit hours]
A survey of the human species in time, place and culture and the investigation of the factors underlying human biological variation.
Term Offered: Summer, Fall
Core Social Sciences

ANTH 2750 World Prehistory
[3 credit hours]
A survey of the processes of cultural development from the lower Pleistocene to development of writing.
Term Offered: Spring, Summer
Core Social Sciences, Trans Mod Social Science

ANTH 2800 Cultural Anthropology
[3 credit hours]
Introduction to culture patterns and processes and their relationship to human society and language.
Term Offered: Spring, Summer, Fall
Core Social Sciences, Multicultural Non-US Diversity, Trans Mod Social Science

ANTH 2900 African American Culture
[3 credit hours]
A survey of the socio-historical and cultural factors of African Americans in the U.S.
Term Offered: Spring, Summer, Fall
Core Social Sciences, Multicultural US Diversity, Trans Mod Social Science
ANTH 2980 Topics in Anthropology
[3 credit hours]
Examination of Special Topics in Anthropology. May be repeated on different topics.
Term Offered: Spring, Summer, Fall

ANTH 3000 Environmental Anthropology
[3 credit hours]
A study of the functional interrelationships of humans and their biophysical environment in cross-cultural perspective, with special emphasis on non-western cultures.
Prerequisites: ANTH 2800 with a minimum grade of D-
Term Offered: Spring, Fall

ANTH 3020 Ohio Prehistory
[3 credit hours]
A study of the prehistoric peoples in Ohio from the end of the Ice Age to the arrival of the Europeans.

ANTH 3330 Food, Health, Society
[3 credit hours]
This course deals with multi-cultural dietary patterns through time and space, as well as cross-cultural influences on health and disease.
Term Offered: Spring, Fall

ANTH 3800 Ecotourism: Studies of the Africana World
[3 credit hours]
Introduce students to the field of ecotourism studies and specific challenges of community development and sustainability. The course covers ecotourism in the Africana world of Africa, the Caribbean, and Latin America.
Term Offered: Spring, Fall

ANTH 3850 Peoples Of World: An Evolutionary Approach
[3 credit hours]
An introduction to the socioeconomic activities in societies of varying sociocultural complexity.
Term Offered: Spring, Fall
Multicultural Non-US Diversity

ANTH 3900 North American Archaeology
[3 credit hours]
This course focuses on the history of North America as known from the archaeological record; from the peopling of North America through early historical contexts.
Term Offered: Spring, Fall
Multicultural US Diversity

ANTH 3920 Indians Of North America
[3 credit hours]
A survey of North America Indians from prehistoric times to the present.
Prerequisites: ANTH 2800 with a minimum grade of D-
Term Offered: Spring, Fall
Multicultural US Diversity

ANTH 3940 Peoples Of Subsaharan Africa
[3 credit hours]
The cultures and societies of the Subsaharan peoples of Africa.
Prerequisites: ANTH 2800 with a minimum grade of D-
Term Offered: Spring
Multicultural Non-US Diversity

ANTH 4000 Proseminar In Anthropology II
[2 credit hours]
Discussion among faculty and students devoted to the study of Anthropology with a special focus on the development of a professional portfolio for graduate work or career.
Prerequisites: ANTH 2000 with a minimum grade of D-
Term Offered: Spring, Fall

ANTH 4200 History and Theory in Anthropology-WAC
[3 credit hours]
This course acquaints students with various schools of anthropological theory, stressing the influence of traditional approaches on contemporary thought and the impact of historical context on the development of theory.
Prerequisites: ANTH 2800 with a minimum grade of D-
Term Offered: Spring, Fall

ANTH 4300 Cultural Resource Management - WAC
[3 credit hours]
Course explores the history, theory, and contemporary issues behind the historic preservation movement and emergence of Cultural Resource Management in the United States; topics engaged include legislation, federal and state programs, the national register, regional planning, and research orientations.
Prerequisites: ANTH 2020 with a minimum grade of D- and ANTH 2800 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

ANTH 4450 Exploring the City
[3 credit hours]
This course takes an interdisciplinary approach to life in cities around the world, with emphasis on the ethnographic exploration of how power, cultural difference, and social inequality in cities are produced and experienced.
Term Offered: Spring, Fall

ANTH 4510 Field Methods in Archaeology
[6 credit hours]
Methods of excavation and recovery of archaeological data. Field school conducted during excavation of a prehistoric site in the Toledo area.

ANTH 4520 Laboratory Methods In Archaeology
[3 credit hours]
Instruction in the methods and techniques employed by the archaeologist to analyze cultural material recovered in the field.
Term Offered: Fall

ANTH 4530 Qualitative Approaches in Social Science Research
[3 credit hours]
This course examines qualitative methods used in social science research. Focusing on ethnographic and qualitative methods, the course provides students the skills necessary to design and conduct qualitative research studies.

ANTH 4560 Ethnographic Fieldwork
[6 credit hours]
Consists of field work involving the student in meaningful research problems at the community level. Introduces the student to the methods and problems of participant research.
Term Offered: Summer, Fall
ANTH 4760 Medical Anthropology  
[3 credit hours]  
An examination of the biocultural nature of health and illness, with special emphasis on changing patterns of disease in non-western societies.  
Term Offered: Spring, Fall  
Multicultural Non-US Diversity  

ANTH 4790 Human Osteology  
[3 credit hours]  
This course focuses on human skeletal anatomy and bone morphology using an evolutionary and biocultural perspective. Students are introduced to skeletal elements, their major landmarks, and methods for analyzing materials and assessing variation.  
Prerequisites: ANTH 2700 with a minimum grade of D-  
Term Offered: Spring  

ANTH 4820 Anthropology Of Religion  
[3 credit hours]  
A cross-cultural approach to the description and analyses of magical and religious beliefs and practices in Asia, Africa, Latin America and Indigenous North America.  
Prerequisites: ANTH 2800 with a minimum grade of D-  
Term Offered: Spring, Fall  
Multicultural Non-US Diversity  

ANTH 4860 The Irish-American Experience  
[3 credit hours]  
A survey of the sociohistorical and cultural factors related to the immigration and adaptation of the Irish in America.  
Term Offered: Spring  
Multicultural US Diversity  

ANTH 4870 Independent Research In Anthropology  
[1-3 credit hours]  
Supervised independent research in anthropology.  
Term Offered: Spring, Summer, Fall  

ANTH 4920 Directed Readings In Anthropology  
[1-3 credit hours]  
Designed for those wishing to continue course work in greater depth or seeking contact with unlisted subject areas. Written proposal and consent required.  
Term Offered: Spring, Summer, Fall  

ANTH 4940 Internship in Anthropology  
[1-6 credit hours]  
This course provides students supervised field placement related to the field of anthropology. Qualified students will work in approved organizations, such as museums, parks, research libraries, government agencies, community organizations, businesses, schools, etc.  
Term Offered: Spring, Summer, Fall  

ANTH 4950 Senior Research Project  
[3-6 credit hours]  
Supervised opportunity for senior majors to apply the anthropological approach to a theoretical or applied cultural historical/biocultural problem through individual research, an internship, professional participation or a public education experience.  
Term Offered: Summer  

ANTH 4960 Honors Thesis  
[3-6 credit hours]  
The student completes a thesis under the direction and guidance of their faculty adviser.  
Term Offered: Spring, Summer, Fall  

ANTH 4980 Problems In Anthropology  
[3 credit hours]  
Courses on varied anthropological specialties. May be repeated in different specialty areas such as religion, ethnohistory, ethnic conflict and area courses.  
Term Offered: Spring, Summer, Fall  

SOC 1010 Introduction To Sociology  
[3 credit hours]  
Sociological topics regarding social behavior, institutional dynamics and social change are examined, and the principles and basic concepts used by sociologists are taught.  
Term Offered: Spring, Summer, Fall  
Core Social Sciences, Trans Mod Social Science  

SOC 1020 Social Problems  
[3 credit hours]  
Introduces students to the sociological perspective through the analysis of various social problems including inequality, population, environment, workplace and deviant behavior.  
Term Offered: Spring, Summer, Fall  
Core Social Sciences, Trans Mod Social Science  

SOC 2000 Proseminar In Sociology I  
[1 credit hour]  
Students are introduced to the academic and professional nature of Sociology. Topics covered include professional socialization, honor theses, portfolio construction, preparation for graduate studies, and career development.  
Term Offered: Spring, Fall  

SOC 2150 The Family and Society  
[3 credit hours]  
Examines evolving family structures, focusing on the impact that cultural, political, and social factors have on private personal relationships and the public social institution of the family.  
Term Offered: Spring, Fall  

SOC 2410 Communities - Writing Across the Curriculum  
[3 credit hours]  
Examines evolving family structures, focusing on the impact that cultural, political, and social factors have on private personal relationships and the public social institution of the family.  
Term Offered: Spring, Fall  
Core Social Sciences  

SOC 2500 Women's Roles: A Global Perspective  
[3 credit hours]  
The course focuses on the current and evolving social, economic and political status of women in the United States and selected non-Western societies. For both men and women students.  
Core Social Sciences, Multicultural Non-US Diversity, Trans Mod Social Science
SOC 2640 Race, Class, And Gender  
[3 credit hours]
Introduction to the study of race, class and gender as factors in American stratification.  
Term Offered: Spring, Summer, Fall  
Core Social Sciences, Multicultural US Diversity, Trans Mod Social Science  

SOC 2660 Racial and Ethnic Minorities in the United States  
[3 credit hours]
This course is a sociological exploration of American racial and ethnic groups. Emphasis is placed on the social construction of race and ethnicity and patterns of intergroup interactions. The historical experiences of selected groups are examined with emphasis on structural inequalities.  
Term Offered: Spring, Summer, Fall  
Core Social Sciences, Multicultural US Diversity  

SOC 2750 Sociology Of Sport  
[3 credit hours]
This course examines sport as a microcosm of our society, exploring many sociological issues (socialization, social institutions, and inequality) within the framework of sport that exist in society as whole.  
Term Offered: Spring, Summer, Fall  
Core Social Sciences  

SOC 2900 African American Culture  
[3 credit hours]
A survey of the sociohistorical and cultural factors related to the African American experience in the United States.  
Term Offered: Spring, Summer, Fall  
Core Social Sciences, Multicultural US Diversity, Trans Mod Social Science  

SOC 2980 Special Topics  
[3 credit hours]
Examination of a special topical area in sociology. May be repeated on different topics.  
Term Offered: Spring, Fall  

SOC 2980 Special Topics  
[3 credit hours]
Examination of a special topical area in sociology. May be repeated on different topics.  
Term Offered: Spring, Fall  

SOC 2980 Special Topics  
[3 credit hours]
Examination of a special topical area in sociology. May be repeated on different topics.  
Term Offered: Spring, Fall  

SOC 3270 Social Research Methods  
[3 credit hours]
Introduction to procedures used in the various phases of sociological research.  
Term Offered: Spring, Fall  

SOC 3290 Social Statistics  
[3 credit hours]
Study of major statistical procedures and techniques in sociology.  
Prerequisites: MATH 1180 with a minimum grade of D- or MATH 1200 with a minimum grade of D- or MATH 1210 with a minimum grade of D- or MATH 1320 with a minimum grade of D- or MATH 1330 with a minimum grade of D- or MATH 1340 with a minimum grade of D- or MATH 1730 with a minimum grade of D- or MATH 1750 with a minimum grade of D- or MATH 1830 with a minimum grade of D- or MATH 1850 with a minimum grade of D- or MATH 2450 with a minimum grade of D- or MATH 2600 with a minimum grade of D-  
Term Offered: Spring, Fall  

SOC 3640 Social Inequality  
[3 credit hours]
This course examines the bases, varieties and consequences of systems of inequality, including the development of and changes in inequality patterns in the US and other societies.  
Term Offered: Spring, Summer, Fall  

SOC 3700 Social Psychology  
[3 credit hours]
An introduction to theory and research concerning social influences on the experience and behavior of individuals. Includes interaction patterns, interpersonal and intergroup relations.  
Term Offered: Spring, Summer, Fall  

SOC 3800 Ecotourism: Studies of the Africana World  
[3 credit hours]
Introduce students to the field of ecotourism studies and specific challenges of community development and sustainability. The course covers ecotourism in the Africana world of Africa, the Caribbean, and Latin America.  
Term Offered: Spring, Fall  

SOC 4000 Proseminar In Sociology II  
[2 credit hours]
Discussion among faculty and students devoted to the study of Sociology with a special focus on the development of a professional portfolio for graduate work or career.  
Prerequisites: SOC 2000 with a minimum grade of D-  
Term Offered: Spring, Fall  

SOC 4040 Classical Theory  
[3 credit hours]
Foundations of social theory including works by Marx, Weber, Durkheim and Simmel as well as other classical theorists.  
Term Offered: Spring, Fall  

SOC 4100 Community Organizing and Development  
[3 credit hours]
This course focuses on attempt of communities to regain power and wealth lost through urban disinvestment occurring since World War II. The course will involve numerous practical workshops to learn how to do community organizing and community development and will include information on Toledo case studies.  
Term Offered: Spring, Fall  

SOC 4110 Political Sociology  
[3 credit hours]
Examination of political institutions, organizations and behavior with special attention to participation, power, ideology, decision making and conflict.  

SOC 4160 Health And Gender  
[3 credit hours]
An examination of sex and gender as a predisposing factor of health status, health behavior, health care delivery, and the structure and posture of health care professionals.  
Term Offered: Spring, Summer, Fall  

SOC 4170 Law And Society  
[3 credit hours]
Dynamics of law and legal institutions; the relationship of sociocultural changes in substantive and procedural aspects of law to the concept of justice, and to the social control of deviance.
SOC 4180 Medical Sociology
[3 credit hours]
An analysis of the sociocultural factors in health and illness, and in medical and paramedical services, and in the field of health practice as a social institution.
**Term Offered:** Spring, Fall

SOC 4190 Social Gerontology
[3 credit hours]
A study of the changing proportions of older people in the population, their changing roles and statuses, and the problems and processes of adjustment.

SOC 4340 Population And Society
[3 credit hours]
Examination of the interaction among variables of population (fertility, mortality and migration) and other aspects of societal organization.
**Term Offered:** Fall

SOC 4440 Methods Of Population Analysis
[3 credit hours]
Methods of population analysis, including examination and evaluation of data sources.

SOC 4450 Exploring the City
[3 credit hours]
Examination of how cities are organized with special attention to economic, political, racial/ethnic, and sex/gender dynamics.
**Term Offered:** Spring, Summer, Fall

SOC 4530 Qualitative Approaches in Social Science Research
[3 credit hours]
This course examines qualitative methods used in social science research. Focusing on ethnographic and qualitative methods, the course provides students the skills necessary to design and conduct qualitative research studies.

SOC 4560 Fieldwork in the Community
[6 credit hours]
This course involves the student in meaningful social research at the community level. The student is introduced to methods in fieldwork in the social sciences.
**Term Offered:** Spring, Summer, Fall

SOC 4580 Science, Technology, And Social Change
[3 credit hours]
The impact of rapidly changing science and technology on North American society; social change in a technological age; the emergence of post industrial society.

SOC 4610 Sociology Of Organizations
[3 credit hours]
Study of the structures, functions, and processes of various types of organizations. Topics include bureaucracy, organizational leadership and management, and organizational culture.
**Term Offered:** Spring

SOC 4650 SOCIOLOGY OF LATIN AMERICA AND CARIBBEAN
[3 credit hours]
An overview of sociological literature on Latin American and the Caribbean. Topics include economic development, political change, gender and ethnicity, disability, culture and international migration.
**Prerequisites:** SOC 1010 with a minimum grade of D-

SOC 4710 Criminology
[3 credit hours]
Crime and criminal behavior: nature, types and extent of crime, societal reactions; problems in research and theory, prevention, control and treatment.
**Term Offered:** Summer

SOC 4720 Deviant Behavior
[3 credit hours]
Study and analysis of the nature, meaning and process of deviant behavior in terms of social norms, control and societal reaction.
**Term Offered:** Summer

SOC 4740 Issues In Crime
[3 credit hours]
Topics may include legalizing drugs, police violence, plea bargaining, death sentence and mandatory sentencing. Emphasizes liberal/conservative ideology.

SOC 4750 Legal Issues
[3 credit hours]
Topics may include abortion, three strike sentencing, homosexual rights, hate speech and decriminalizing narcotics. Emphasizes liberal/conservative ideology.

SOC 4760 Juvenile Delinquency
[3 credit hours]
Delinquency and delinquent behavior, including definitions, extent, process, types and causes; methods of prevention, protective control and treatment; institutional and non-institutional facilities and services.

SOC 4800 Social Change in Developing Nations
[3 credit hours]
The new emerging ideological, political, social and economic patterns which repeat themselves in and determine the Third World transition from a traditional to a new society.
**Term Offered:** Fall

SOC 4810 Gender In Cross-Cultural Perspective
[3 credit hours]
Analysis of gender stratification and its impact on culture in various nations and across ethnic groups in the United States.

SOC 4830 Social Movements
[3 credit hours]
This course analyzes how and why social protest movements form, and how and why they succeed or fail. Attention will be given to post-World War II social movements, including current examples.
**Term Offered:** Spring, Fall

SOC 4840 Globalization
[3 credit hours]
This course takes an interdisciplinary approach to studying globalization – increased integration and interdependence between nations. We will start by looking at the historical context of globalization, showing this process is not necessarily something new. From there we will focus on four dimensions of globalization: economic, political, demographic, and cultural. We also will stress the interconnectedness of these dimensions. We conclude by looking at reactions and resistance to globalization, including terrorism and nationalism.
**Term Offered:** Spring
SOC 4910 Directed Research In Sociology
[1-3 credit hours]
Student-selected research topic under the supervision of a sociology faculty member. Permission to enroll is contingent on the instructor's acceptance of the student's research proposal.
Prerequisites: SOC 3270 with a minimum grade of D-

SOC 4920 Directed Readings In Sociology
[1-3 credit hours]
Written proposal required. May be repeated for additional credit. For majors wishing to continue course work in greater depth or seeking contact with unlisted subject areas.
Term Offered: Spring, Fall

SOC 4940 Internship in Sociology
[3 credit hours]

SOC 4960 Honors Thesis
[3-6 credit hours]

SOC 4980 Special Topics In Sociology
[3 credit hours]
Sociological examination of a developing and/or important social issue or sociological topic. May be repeated for different specialized topics.
Term Offered: Spring, Summer, Fall

SOC 4990 Independent Study-Sociology
[1-3 credit hours]

Honors in Anthropology
Qualified juniors and seniors may apply to work for honors in anthropology. The following are requirements for entrance into the Honors Program in anthropology.

1. Admission
   a. 3.3 minimum GPA in anthropology courses
   b. 3.0 minimum cumulative GPA
   c. 12 hours completed work in anthropology
   d. Qualification as an anthropology major
2. Requirements
   a. A student must complete 9 hours of independent work in anthropology. During the final quarter before graduation, the student must pass a comprehensive examination or submit a completed honors thesis. Students should discuss their special interests with faculty members or with the honors adviser, who will help identify an appropriate faculty member to guide the honors work.

Honors in Sociology
Qualified juniors and seniors may apply to work for honors in sociology. The following are requirements for entrance into the Honors Program in sociology.

1. Admission
   a. 3.3 minimum GPA in sociology courses
   b. Minimum cumulative GPA of 3.0
   c. Completion of 12 hours of sociology courses; and
   d. Qualification as a sociology major
2. Requirements

B.A. in Anthropology
A major in anthropology consists of a minimum of 33 hours of coursework: 21 hours of core courses in anthropology and an additional 12 hours of elective courses at the 2900 level or above in anthropology. Also required are 18 hours of course work in a related field, at least 9 credits of which are at the 3/4000 level.

The undergraduate major of 33 hours must include the following:

<table>

**Total Hours** 120

**Anthropological Knowledge:** Students will be able to summarize and compare key terms, ideas, and concepts in Anthropology; students will demonstrate an ability to summarize the various subfields of Anthropology and discuss how they each contribute to our understanding of what it means to be human.

**Theoretical Knowledge:** Students will be able to theorize the development of human culture, behavior, and biology and how they are integrated based on the major theoretical perspectives in Anthropology; students will be able to describe the historical development of the discipline and compare/contrast it with current anthropological approaches.

**Methodological Knowledge:** Students will be able to describe methodological techniques in the four areas of anthropology and be able to indicate which methods are appropriate for different research questions; students also will practice these methods in field and lab settings.

**Critical Thinking:** Students will employ critical and analytical skills to critique, debate, and share opinions about scholarly works. They will apply problem solving skills and propose ways to address contemporary issues based on anthropological knowledge, theory, and methods.

**Personal and Social Responsibility:** Students will be able to convey an understanding of personal and social responsibility.

**Communication:** Students will demonstrate information literacy and communication skills.
B.A. in Sociology

The undergraduate major of 33 hours must include the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC 2000</td>
<td>Proseminar In Sociology I</td>
<td>1</td>

<td>Classical Theory</td>
<td>3</td>
</tr>
</tbody>
</table>

**Elective Courses**

Select 21 hours 1

**Related Hours**

Select 18 related hours 2

**Total Hours** 33

1. 21 additional elective hours of sociology courses, at least 15 of which must be at the 3000 or 4000 level. Students should discuss their personal and professional interests with the undergraduate adviser before selecting elective courses to complete the major.

2. The requirement of 18 related hours is met with electives taken from at least four of the following disciplines: Africana Studies, Anthropology, Communications, Economics, Geography, History, Political Science, Psychology and Women’s and Gender Studies. Fifteen of these hours must be taken at the 3000 or 4000 level. Students may not take P/NC in major or related courses.

Below is a sample plan of study. Consult your degree audit for your program requirements.

**Total Hours** 120

Critical Thinking: Students will demonstrate critical thinking skills.

Sociological Knowledge: Students will discuss, analyze and apply key concepts in sociology; express, defend, support and/or evaluate sociological ideas clearly and coherently.

Communication: Students will demonstrate information literacy and communication skills.

Theoretical Knowledge: Students will apply, critique, debate, and share opinions on multiple theoretical perspectives.

Methodological Knowledge: Students will describe and employ various methodologies used to collect, analyze, and interpret empirical evidence in sociological research. They also will be able to appraise the rigor of other scholars’ methods and design their own research projects.
Minor in Anthropology

To complete a minor in Anthropology, students must complete a minimum of 21 hours of course work—15 hours of core courses in Anthropology and an additional 6 hours of advanced course work at the 3000 to 4000 levels in Anthropology.

**Required Courses**

<table>

**Department of Theatre and Film**

**ACCREDITING BODY: National Association of Schools of Theatre (NAST)**

Holly Monsos, Chair  
Dr. Matt Foss, Theatre Advisor  
Daniel Thobias, Theatre Advisor  
Steven Sakowski, Theatre Advisor  
Holly Hey, Film Advisor  
Tammy Kinsey, Film Advisor  
Dr. Matt Yockey, Film Advisor

The Department of Theatre and Film at the University of Toledo, an undergraduate liberal arts department, actively engages students in creative practice, critical thinking and cross cultural/global exchange through the study and practice of live productions and cinema.

**Degrees Offered**

- B.A. in Film/Video (p. 154)
- B.A. in Theatre (p. 156)
- Minor in Cinema Studies (p. 161)
- Minor in Film/Video (p. 161)
- Minor in Stage and Screen Performance (p. 161)
- Minor in Theatre Arts (p. 161)
- Minor in Theatre Design and Technology (p. 162)

Student may also be interested in these minor options:

- Interdisciplinary Minors (p. 207)
  - Minor in Digital Arts and Visual Communication (p. 207)
  - Minor in Documentary Production and Practice (p. 208)
  - Minor in Sound Production and Design (p. 208)
  - Minor in Visual Effects and Animation (p. 208)

The Bachelor of Arts programs in theatre and film/video are designed to prepare the student for a wide range of career options and/or postgraduate study through a strong liberal arts curriculum. Students may choose a bachelor of arts major in either theatre or film.

The BA in Theatre includes a total of 45 hours. Theatre majors take 33 required hours as well as an additional 12 hours in the concentration of their choice, either Stage and Screen Acting or Theater Design and...
FILM 1310 Introduction To Film
[3 credit hours]
Introduction to the history and interpretation of cinema as art form, with emphasis on discovering how meaning is encoded in film at the levels of shot, sequence and narrative construction. (Not recommended or required for majors.)
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

FILM 2230 Creative Approaches to Cinema
[3 credit hours]
An introductory course focused on visual storytelling through the examination and construction of the still image. Emphasis on interpreting photography, paintings and stories designed within the construct of the single image. This course uses lectures, readings and in-class exercises to produce creative narratives through photo-romans. Students must have taken or be co-enrolled in Critical Approaches to Cinema, Film 2340.
Term Offered: Spring, Fall
Corequisites: FILM 2340

FILM 2310 Film I
[3 credit hours]
An intensive production/seminar course for creative film making utilizing 16mm celluloid film. Individual and group production exercises. Students must purchase supplies.
Prerequisites: FILM 2340 with a minimum grade of C or FILM 2330 with a minimum grade of C
Term Offered: Spring

FILM 2320 Digital Cinema Production I - WAC
[3 credit hours]
An intensive production/seminar course exploring digital media as means for creative expression. Students purchase supplies. For majors and minors only, or by permission of instructor. Prerequisites: Grade of C or better in FILM 2330 or FILM 2340. May not take simultaneously with FILM 2310. Writing Intensive (WAC) course. Non-majors seek instructor consent for permit.
Prerequisites: FILM 2340 with a minimum grade of C or FILM 2330 with a minimum grade of C
Term Offered: Spring

FILM 2330 Critical Approaches to Cinema
[3 credit hours]
A critical approach to the development of cinema as an industrial, artistic and ideological practice. Emphasis on theories of film construction and interpretation and the development of analytical skills for cinema studies. Screenings included in class.
Term Offered: Spring, Fall

FILM 2340 Creative Approaches to Cinema - WAC
[3 credit hours]
An introduction to the history and interpretation of cinema as art form, with emphasis on discovering how meaning is encoded in film at the levels of shot, sequence and narrative construction. (Not recommended or required for majors.)
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

FILM 2990 Special Projects
[1-3 credit hours]
Individual study provides the student an opportunity to work independently on a problem of special interest in Film/Video under the direction of the faculty. For Freshman and Sophomore students.

FILM 3100 Film II
[3 credit hours]
An intermediate production/seminar course for 16mm filmmaking. Emphasis on sync-sound and narrative film, advanced lighting and exposure techniques, and camera movement. Individual and group projects. Students are required to purchase supplies. Majors and minors only. Interested non-majors should seek instructor permission to enroll.
Prerequisites: FILM 2310 with a minimum grade of C and FILM 2320 with a minimum grade of C
Term Offered: Spring, Fall

FILM 3100 Film II - WAC
[3 credit hours]
An intermediate production/seminar course for 16mm filmmaking. Emphasis on sync-sound and narrative film, advanced lighting and exposure techniques, and camera movement. Individual and group projects. Students are required to purchase supplies. Majors and minors only. Interested non-majors should seek instructor permission to enroll.
Prerequisites: FILM 2310 with a minimum grade of C and FILM 2320 with a minimum grade of C
Term Offered: Spring

FILM 3300 Critical Approaches to Cinema II
[3 credit hours]
Intermediate critical analysis of film, concentrating on a specific style, genre, national cinema of the West, or filmmaker. Emphasis on theories of film construction and interpretation. Screenings included in class. Topics vary, may be repeated to 9 hours.
Prerequisites: FILM 2340 with a minimum grade of D-
Term Offered: Spring, Fall

FILM 3310 Film II - WAC
[3 credit hours]
An intermediate production/seminar course for digital cinema production. Conceptual frameworks rotate; emphasis on personal and political storytelling and exploring methods of the auteur. Individual and group projects. Students are required to purchase supplies. Majors and minors only. Interested non-majors should seek instructor permission to enroll.
Prerequisites: FILM 2320 with a minimum grade of C and FILM 2310 with a minimum grade of C
Term Offered: Spring

FILM 3320 Video II
[3 credit hours]
A production/seminar course for digital cinema production. Conceptual frameworks rotate; emphasis on personal and political storytelling and exploring methods of the auteur. Individual and group projects. Students are required to purchase supplies. Majors and minors only. Interested non-majors should seek instructor permission to enroll.
Prerequisites: FILM 2320 with a minimum grade of C and FILM 2310 with a minimum grade of C
Term Offered: Spring

FILM 3330 Critical Approaches to Cinema II
[3 credit hours]
Intermediate critical analysis of film, concentrating on a specific style, genre, national cinema of the West, or filmmaker. Emphasis on theories of film construction and interpretation. Screenings included in class. Topics vary, may be repeated to 9 hours.
Prerequisites: FILM 2340 with a minimum grade of D-
Term Offered: Spring, Fall

FILM 3340 Media Storycraft
[3 credit hours]
This course focuses on narrative storytelling thru film and addresses these questions through the practice of screenwriting. Emphasis is placed on telling a story in terms of action and characters. Students will learn the fundamentals of screenwriting by developing their own original screenplay that follows a traditional dramatic structure. This process will include in-class workshops, analysis of films, and peer-reviews.
Term Offered: Spring, Fall
FILM 3350 Screenwriting - WAC
[3 credit hours]
This course involves practical analysis of screenplays, emphasizing story structure and characterization. Students plan, write and refine story lines before writing actual scripts.
Prerequisites: ENGL 1130 with a minimum grade of D- or ENGL 1140 with a minimum grade of D- or ENGL 1150 with a minimum grade of D- or ENGL 2950 with a minimum grade of D- or ENGL 2960 with a minimum grade of D- or HON 1010 with a minimum grade of D- or HON 1020 with a minimum grade of D- or ENGL 1180 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

FILM 3360 Production Topic
[3 credit hours]
Topics in production including Animation, Sound, Lighting, Editing, etc. Individual and group projects. Students must purchase supplies. Majors and minors only. Interested non-majors should seek instructor permission to enroll.
Prerequisites: FILM 2310 with a minimum grade of C or FILM 2320 with a minimum grade of C
Term Offered: Spring, Fall

FILM 3370 Documentary Film
[3 credit hours]
A study of the major movements and authors of Documentary Film. Screenings included in class.
Prerequisites: (ENGL 1130 with a minimum grade of D- or ENGL 1140 with a minimum grade of D- or ENGL 1150 with a minimum grade of D- or ENGL 2950 with a minimum grade of D- or ENGL 2960 with a minimum grade of D-) and FILM 2350 with a minimum grade of C
Term Offered: Spring, Summer, Fall

FILM 3380 Experimental Film
[3 credit hours]
A study of the major movements and authors of Experimental Film. Screenings included in class.
Prerequisites: (ENGL 1130 with a minimum grade of D- or ENGL 1140 with a minimum grade of D- or ENGL 1150 with a minimum grade of D- or ENGL 2950 with a minimum grade of D- or ENGL 2960 with a minimum grade of D-) and FILM 2350 with a minimum grade of C
Term Offered: Spring, Fall

FILM 3390 History of Video Art
[3 credit hours]
A study of the major movements of the History of Video Art and Installation. Screenings included in class.
Prerequisites: ENGL 1130 with a minimum grade of D- or ENGL 1140 with a minimum grade of D- or ENGL 1150 with a minimum grade of D- or ENGL 2950 with a minimum grade of D- or ENGL 2960 with a minimum grade of D- or FILM 2350 with a minimum grade of C
Term Offered: Spring, Fall

FILM 3430 Global Cinema
[3 credit hours]
A study of the major movements and authors of non-US cinema. Screenings included in class. Topics vary, may be repeated to 9 hours.
Prerequisites: FILM 2340 with a minimum grade of D- and ENGL 1130 with a minimum grade of D-
Term Offered: Spring, Fall

FILM 3430 Global Cinema
[3 credit hours]
A study of the major movements and authors of non-US cinema. Screenings included in class. Topics vary, may be repeated to 9 hours.
Prerequisites: FILM 2340 with a minimum grade of D- and ENGL 1130 with a minimum grade of D-
Term Offered: Spring, Fall

FILM 3450 Animation and Optical Printing
[3 credit hours]
Intensive production/seminar course in the creation of animation and special effects for film and digital work. Hand-drawn, cut-out, stop-motion, pixilation and various optical effects are explored through in-class exercises and individual productions. Majors and minors only. Interested non-majors should seek instructor permission to enroll.
Prerequisites: FILM 2310 with a minimum grade of D-
Term Offered: Spring, Fall

FILM 3450 Animation and Optical Printing
[3 credit hours]
Intensive production/seminar course in the creation of animation and special effects for film and digital work. Hand-drawn, cut-out, stop-motion, pixilation and various optical effects are explored through in-class exercises and individual productions. Majors and minors only. Interested non-majors should seek instructor permission to enroll.
Prerequisites: FILM 2310 with a minimum grade of D-
Term Offered: Spring, Fall

FILM 3500 Cinematography and Color Grading
[3 credit hours]
A production/seminar course concentrating on how the language of the image is influenced by camera format fundamentals and color. In-class demonstrations and exercises, as well as outside of class workshops and individual production(s). Majors and minors only.
Prerequisites: FILM 2310 with a minimum grade of C and FILM 2320 with a minimum grade of C
Term Offered: Spring, Fall

FILM 3510 Producing and Production Management
[3 credit hours]
Inquiry into the financial, logistical, and organizational aspects of film and video production, focusing on the roles of the line producer, production manager, assistant director and their teams. No prerequisite.
Term Offered: Spring

FILM 3550 Directing for Camera
[3 credit hours]
A production/seminar course focusing on directing dramatic scenes for video production, focusing on the roles of the line producer, production manager, assistant director and their teams. No prerequisite.
Term Offered: Spring

FILM 3560 Methods for the Professional Editor
[3 credit hours]
A production/seminar course that prepares students for professional practice in digital post-production methods and concepts. In-class exercises and individual production work done outside of class are required for the course. Majors and minors only. Interested non-majors should seek instructor permission to enroll.
Prerequisites: FILM 2320 with a minimum grade of C
Term Offered: Spring, Fall

FILM 3730 Documentary Field Production
[3 credit hours]
Advanced production class focusing on the unique challenges of field production. Various types of documentary work are explored through field assignments relating to social and scientific subjects. This course includes local and regional production work as well as study abroad options.
Prerequisites: FILM 2310 with a minimum grade of D- and FILM 2320 with a minimum grade of D-
Term Offered: Spring

FILM 3820 Documentary Field Production
[3 credit hours]
Advanced production class focusing on the unique challenges of field production. Various types of documentary work are explored through field assignments relating to social and scientific subjects. This course includes local and regional production work as well as study abroad options.
Prerequisites: FILM 2310 with a minimum grade of D- and FILM 2320 with a minimum grade of D-
Term Offered: Spring
FILM 4210 Film Censorship
[3 credit hours]
Advanced cinema studies course focusing on the social, cultural, and political history of film censorship from early cinema through today. Covering early censorship questions, the Production Code Era, the Hollywood Ten, the shift toward the movie ratings system and the MPAA, and present-day concerns about film content.
Prerequisites: FILM 2340 with a minimum grade of D-
Term Offered: Spring

FILM 4220 Media Studies
[3 credit hours]
Covering issues concerned with film and media history, theory, and criticism and the interrelationship of film to television, radio, print, and/or the Internet. Particular focus of the course can change. Repeatable for credit.
Prerequisites: FILM 2340 with a minimum grade of C
Term Offered: Spring, Summer, Fall

FILM 4310 Advanced Production
[3 credit hours]
A production/seminar course focused on advanced production techniques. Emphasis on double system/sync-sound recording skills, advanced lighting instrument use, and the creative relationships between camera and editing language. Individual and group project work is required as is students purchasing supplies for their final projects. Interested non-majors should seek instructor permission to enroll.
Prerequisites: FILM 3510 with a minimum grade of D- and FILM 3560 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

FILM 4320 Film/Video Workshop
[3 credit hours]
A production/seminar course for advanced independent production projects, including screenwriting. Regular critiques of work in progress. Requires proposal for admission. Larger projects may be completed over successive semesters. May be repeated up to 6 hours. Majors and minors only. Interested non-majors should seek instructor permission to enroll.
Prerequisites: FILM 3310 with a minimum grade of D- or FILM 3320 with a minimum grade of D- or FILM 3350 with a minimum grade of D- or FILM 3360 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

FILM 4330 Critical Approaches to Cinema III
[3 credit hours]
Advanced critical analysis of film, concentrating on a specific style, genre, national cinema of the West, or filmmaker. Emphasis on theories of film construction and interpretation. Screenings included in class. Topics vary, may be repeated up to 9 hours.
Prerequisites: FILM 3340 with a minimum grade of D-
Term Offered: Spring, Fall

FILM 4340 Topics In Feminist Cinema Studies
[3 credit hours]
Crosslistings of film classes with the Department of Women's and Gender Studies. Specific topics vary. Check Course Schedule for specific subject and prerequisites.
Term Offered: Fall

FILM 4350 Le Cinema Francais
[3 credit hours]
A study of the development of French film and its place in world cinema.
Term Offered: Spring, Fall

FILM 4370 Cinema Studies Seminar
[3 credit hours]
A research oriented seminar concerning a specific topic of cinema studies, emphasizing original research culminating in individual research and/or writing project.
Prerequisites: (ENGL 1130 with a minimum grade of D- or ENGL 1140 with a minimum grade of D- or ENGL 1150 with a minimum grade of D- or ENGL 2950 with a minimum grade of D- or ENGL 2960 with a minimum grade of D-) and FILM 2350 with a minimum grade of C
Term Offered: Fall

FILM 4940 Internship
[1-6 credit hours]
Internship with an approved program, company, or agency in Film. Video or television. (repeatable for 6 credit hours)
Term Offered: Spring, Summer, Fall

FILM 4950 Honors Thesis
[3 credit hours]
Research or a creative project on a topic in Film or Video. Required of all BA candidates seeking department honors. (Repeatable for 6 credit hours.)
Term Offered: Spring, Summer, Fall

FILM 4990 Special Projects
[1-3 credit hours]
A research oriented seminar concerning a specific topic of cinema studies, emphasizing original research culminating in individual research and/or writing project.
Term Offered: Spring, Summer, Fall

THR 1010 Acting for Non Majors
[3 credit hours]
Learn the fundamentals of acting through exercises, devised playmaking and scene study. Through active class participation, the student discovers an understanding of the basic artistic process of the performer and how that process may lead to self-realization and heightened awareness.
Term Offered: Spring, Summer, Fall

THR 1030 Stagecraft and Theatre Technology
[3 credit hours]
Introduction to theatre technology using the tools and practices utilized in set construction, properties scene painting and scene design. Lectures, readings and projects with practical laboratory experience.
Term Offered: Spring, Fall

THR 1040 Stage Lighting and Sound Technology
[3 credit hours]
Introduction to theory and practice in stage lighting and sound. Students will use lighting and sound tools and equipment in production crews on department productions.
Term Offered: Spring, Fall
THR 1050 Costume Technology
[3 credit hours]
Introduction to the theory and practice of stage costuming. Lectures, readings and projects offer practical laboratory experiences. Students will use tools and equipment of the costume shop on production crews.
Term Offered: Spring, Fall

THR 1100 Introduction To Theatre
[3 credit hours]
Introductory survey of the development of theatre and drama from the ancient world to the present day; discussion of representative plays; slides and films complement lectures. (Not recommended or required for majors.)
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Trans Mod Arts and Humanities

THR 2000 Theatre Production Practicum
[0 credit hours]
Students will be assigned a crew position for one of the department productions.
Term Offered: Spring, Fall

THR 2050 Theatre Shop Practicum
[0 credit hours]
Lab course introducing students to the departmental production program through participation as a performer.
Term Offered: Spring, Summer, Fall

THR 2100 Departmental Ensemble
[0 credit hours]
A collaborative colloquium course in support of departmental production and academic programming. This course is credit/no credit.

THR 2200 Script Analysis
[3 credit hours]
A survey of various playwriting and performance text composition structures from ancient to contemporary periods. Students will focus on the most prevalent and ground-breaking dramaturgical methods in the historical practice of dramatic composition.
Term Offered: Spring, Fall

THR 2400 Fundamentals of Design
[3 credit hours]
Fundamentals of Design is an introduction to visual communications, styles and techniques. It also includes a thorough exploration of basic aesthetic theory as it applies to all elements of visual design. Fundamentals of Design will develop skills of script analysis, as well as explore designing for the stage and screen as a means of communication, artistic expression and the organization of design information.
Prerequisites: THR 2200 with a minimum grade of D-
Term Offered: Fall

THR 2420 Stage Makeup
[3 credit hours]
[2 hours] Introduction to principles and techniques of makeup for the stage. Students explore practical executions of stage makeup problems. Topics may include special effects, old age techniques, creature design, period specific makeup and makeup design Students are required to purchase supplies.
Term Offered: Spring, Fall

THR 2600 Acting I
[3 credit hours]
An introduction to the art and craft of acting. Through scene work and improvisation, students learn to use acting terminology, identify dramatic beats, develop character objectives and play actions. Students who are not theatre majors or minors must get permission of instructor.
Term Offered: Spring, Fall

THR 2640 Voice And Movement
[3 credit hours]
Theory and practice of vocal and physical techniques for the actor. Repeatable for up to 8 hours of credit.
Prerequisites: THR 2610 with a minimum grade of D- or THR 1010 with a minimum grade of D-
Term Offered: Spring, Fall

THR 2660 Acting for the Camera I
[3 credit hours]
Performing dramatic material for camera with an emphasis on the differences between stage and screen performing.
Prerequisites: THR 2610 with a minimum grade of D- or THR 2600 with a minimum grade of D-

THR 2990 Special Projects
[1-3 credit hours]
Individual study provides a student an opportunity to work independently on a problem of special interest in theatre under the direction of the faculty. (Seminar forms available in the department office.)
Term Offered: Spring, Fall

THR 3150 Theatre History - Ancient to Contemporary - WAC
[3 credit hours]
This course explores major developments and trends in theatrical production, theory, and playwriting from ancient times to the Present. The study of theatre history in this course is applied to the development of design and directorial approaches for plays by theatre artists. In addition, students will use performance techniques in class to explore historical production methods and theatrical theories through practice.
Prerequisites: ENGL 1110 with a minimum grade of D-
Term Offered: Spring, Fall

THR 3210 Playwriting
[3 credit hours]
Creative writing for the theatre analyzing traditional and contemporary structure and style.
Prerequisites: ENGL 2720 with a minimum grade of D- or THR 2200 with a minimum grade of D-
Term Offered: Spring, Fall
THR 3250 Theatre and Stage Management
[3 credit hours]
Theatre & Stage Management will provide students with a general overview of the administrative and management functions of an arts organization as well as an introductory look at the responsibilities and process of stage management. Through readings and videos, interactive discussion forums, research projects, and practical assignments, the student will develop an understanding of the structure and business of the performing arts and its various management positions, translating traditional business practices into the language of the arts.
Term Offered: Spring, Summer, Fall

THR 3340 Acting for the Camera II
[3 credit hours]
This course is directed toward third and fourth year acting students at University of Toledo's Department of Theatre and Film who have completed Acting for the Camera I. It is designed to reinforce and build upon the principles explored in Acting for the Camera I.
Prerequisites: THR 3610 with a minimum grade of D- or THR 2660 with a minimum grade of D-
Term Offered: Spring

THR 3410 Stage Lighting Design
[3 credit hours]
Principles and theories of lighting design for theatrical productions are explored. Develop skills of script analysis, light study, light plot and related graphics for conceptualization and communication of design ideas.
Prerequisites: THR 1040 with a minimum grade of D- and THR 2400 with a minimum grade of D-
Term Offered: Spring

THR 3430 Advanced Stagecraft and Technical Production
[3 credit hours]
This course is designed to expand upon the foundation of scenic construction techniques formed in basic theatre practices: Stagecraft. Topics include welding/metalworking, advanced woodworking, scenic automation, theatrical rigging, and technical direction/project management/shop management.
Prerequisites: THR 1030 with a minimum grade of D-

THR 3440 Stage Scenic Design
[3 credit hours]
Theory and principles of scenic design for stage are the focus. Conceptualization and communication of design ideas are explored through renderings, models, ground plans and elevations. Students are required to purchase supplies.
Prerequisites: THR 2400 with a minimum grade of D-
Term Offered: Fall

THR 3450 Scene Painting
[3 credit hours]
Students learn the fundamental skills of the scenic artist in large scale painting: preparing and sizing the surfaces, gridding and other layout, and painting techniques and tools used by the scenic artist.

THR 3460 Advanced Costume Construction
[3 credit hours]
This course builds upon the skills developed in THR 1050 Costuming. Advanced techniques will be explored such as pattern development, construction of several garments from pattern to finishing, as well as development of additional advanced hand sewing techniques.
Prerequisites: THR 1050 with a minimum grade of D-
Term Offered: Spring

THR 3470 Stage Sound Design
[3 credit hours]
Students study the methods and techniques of sound production and design used in the theatre. Tools and techniques of audio production are used in laboratory recording and mixdown.
Prerequisites: THR 1040 with a minimum grade of D- or MUS 2270 with a minimum grade of D-

THR 3480 Stage Costume Design
[3 credit hours]
Principles and theories of costume design for theatrical productions are explored. Develop skills of script analysis, sketching, fabric study and rendering for conceptualization and communication of design ideas.
Prerequisites: THR 1050 with a minimum grade of D-

THR 3600 Acting II
[3 credit hours]
Students are exposed to a range of techniques explicated by primary acting theorists/practitioners, including diagnosis of individual skills, work in voice, movement, textual analysis and scene preparation.
Prerequisites: THR 2610 with a minimum grade of D- or THR 2600 with a minimum grade of D-

THR 3610 Directing I
[3 credit hours]
The director’s approach to analyzing a script, formulating a production concept and realizing that concept on stage. Discussions and exercises progress to directing scenes or short plays in class.
Prerequisites: THR 2400 with a minimum grade of D- and THR 2610 with a minimum grade of D-

THR 3650 Scene Reading and Production
[3-1 credit hours]
A lab course in support of preparation and participation in preprofessional experiences, conferences and/or festivals. There is a lab fee in support of student travel and expenses.
Term Offered: Spring, Summer, Fall

THR 3710 Directing I
[3 credit hours]
The director’s approach to analyzing a script, formulating a production concept and realizing that concept on stage. Discussions and exercises progress to directing scenes or short plays in class.
Prerequisites: THR 2400 with a minimum grade of D- and THR 2610 with a minimum grade of D-

THR 3750 Scene Reading and Production
[3-1 credit hours]
A lab course in support of preparation and participation in preprofessional experiences, conferences and/or festivals. There is a lab fee in support of student travel and expenses.
Term Offered: Spring, Summer, Fall

THR 3800 Production
[1-3 credit hours]
Through study and practice the student contributes significantly to department productions. This course is for students who have auditioned for roles or applied for design/tech positions in department productions.
Term Offered: Spring, Fall

THR 3990 Professional Conference-Festival Practicum
[0 credit hours]
A lab course in support of preparation and participation in preprofessional experiences, conferences and/or festivals. There is a lab fee in support of student travel and expenses.
Term Offered: Spring, Fall

THR 4100 Theatre Studies
[3 credit hours]
Application of the methods of theatre history, theory, and criticism to the exploration of a specific theatrical theme, style, historical period, or practice.
THR 4250 Administration and Management of the Arts
[3 credit hours]
Administration and Management of the Arts will provide undergraduate and graduate students with an advanced look at the managerial, structural, and operational functions of visual and performing arts organizations, translating traditional business practices into the language of the arts.
Term Offered: Spring, Summer, Fall

THR 4260 Promoting the Visual and Performing Arts
[3 credit hours]
Promoting the Visual and Performing Arts will provide undergraduate and graduate students with an advanced look at the theoretical and functional practice of publicizing and advancing visual and performing arts organizations, ranging from consumer behaviors and analysis to campaign communications and strategies.
Term Offered: Spring, Summer, Fall

THR 4310 Acting for the Camera III
[3 credit hours]
This course is directed toward fourth year and Capstone acting students at University of Toledo's Department of Theatre and Film who have completed Acting for the Stage I and Acting for the Camera I and II. It is designed to reinforce and build upon the principles explored in Acting for the Camera II. The course will consist of developing characters from dialogue, improvisation and writing, while creating a story with advanced filmmakers from the Film Department.
Prerequisites: THR 2660 with a minimum grade of D-
Term Offered: Spring

THR 4400 Seminar Topics In Design
[3 credit hours]
Individual and group investigations of particular topics in all phases of design and technology, i.e. scene painting, advanced design and rendering technique, new technology.
Term Offered: Spring, Fall

THR 4440 Theatre Design
[3 credit hours]
Principles and theories for theatrical design are explored through real world implementation on departmental productions.
Term Offered: Spring, Fall

THR 4600 Acting III
[3 credit hours]
Advanced acting course with a focus on text analysis and the technique and craft of performance.
Prerequisites: (THR 2600 with a minimum grade of D- or THR 2610 with a minimum grade of D-) and (THR 2620 with a minimum grade of D- or THR 3600 with a minimum grade of D-)
Term Offered: Spring, Fall

THR 4940 Internship
[1-6 credit hours]
Internship with an approved program, company, or agency in theatre. Students must submit proposal for approval of instructor. (Repeatable for 6 hours credit.)
Term Offered: Spring, Summer, Fall

THR 4950 Honors Thesis
[3 credit hours]
Research or a creative project on a topic in theatre. Required of all candidates seeking department honors. (Repeatable for 6 hours credit.)
Term Offered: Spring, Fall

THR 4990 Special Projects
[1-3 credit hours]
Individual study provides a student an opportunity to work independently on a problem of special interest in theatre under the direction of the faculty.
Term Offered: Spring, Fall

B.A. in Film/Video

General Guidelines for the Bachelor of Arts
No more than 50 hours in the major courses are allowed for the Bachelor of Arts major. Any hours over 50 will not count toward the degree.

A student majoring in theatre or film may petition to substitute a comparable course or courses for one or more of the required courses in the major. Such requests should be made in writing to the department Chair and are subject to approval by the department faculty.

The requirement of 18 hours in related courses must be met with courses chosen from a list of approved courses in the student's Degree Audit. Choose these courses in consultation with the departmental adviser. Related courses must be chosen from courses acceptable for major credit, not courses that were approved for general or distributive requirements at university or college level.

The P/NC option is available to theatre and film majors in the areas of the major.

When a FILM course is a prerequisite for another FILM course, a grade of C or better must have been earned in the prerequisite course.

A minimum of 48 hours in film/video to include the following:

Total Hours 124

1  Department recommends students consider THR 1040; THR 2400; THR 2420 THR 2600; THR 3410 as options.

HONORS IN FILM/VIDEO
Qualified juniors and seniors may apply to work for honors in film/video. The following are requirements for entrance into the Honors Program in film/video:

1. Admission:
   a. Minimum GPA of 3.3 in film/video courses;
   b. Minimum cumulative GPA of 3.0; and
   c. Completion of 12 hours in film/video

2. Requirements: A student must have completed nine hours of honors course work in film/video before beginning the thesis project. The honors topic and project are to be developed in close conjunction
with an honors faculty adviser. A student may enroll for the thesis paper/project in FILM 4950 Honors Thesis for a maximum of six hours of credit. The designation "honors" on the diploma will be given to students who receive a grade of A on the honors thesis and maintain a 3.3 GPA in film/video.

1. Students will identify, evaluate, and critique the aesthetic, thematic, ideological, and philosophical elements of various film and media texts.
2. Students will synthesize theoretical writings on film and media with their own critical perspective.
3. Through written presentation, students will construct and apply critical perspectives regarding the aesthetics and theories of film and media.
4. Students will demonstrate proficiencies in the fundamentals of filmmaking.
5. Students will examine a variety of aesthetic expressions of the moving image to expand their social and cultural awareness.
6. Students will create a variety of aesthetic expressions using moving images to develop artistic and professional methods.

B.A. in Theatre

The BA in Theatre degree offers concentration:
- Stage and Screen Acting
- Theatre Arts
- Theatre Design & Technology

General Guidelines for the Bachelor of Arts

No more than 50 hours in the major courses are allowed for the Bachelor of Arts major. Any hours over 50 will not count toward the degree.

A student majoring in theatre or film may petition to substitute a comparable course or courses for one or more of the required courses in the major. Such requests should be made in writing to the department Chair and are subject to approval by the department faculty.

The requirement of 18 hours in related courses must be met with courses chosen from a list of approved courses in the student's Degree Audit. Choose these courses in consultation with the departmental adviser. Related courses must be chosen from courses acceptable for major credit, not courses that were approved for general or distributive requirements at university or college level.

The P/NC option is available to theatre and film majors in the areas of the major.

The BA in Theatre consists of 33 required hours, plus one 12 hour concentration, in either "Stage and Screen Acting (p. 156)", "Theatre Arts (p. 156)" or "Theatre Design & Technology (p. 157)", for a total of 45 hours:

### HONORS IN THEATRE

Qualified juniors and seniors may apply to work for honors in theatre. The following are requirements for entrance into the Honors program in theatre:

1. Admission
   
   a. Minimum GPA of 3.3 in theatre courses;
   
   b. Minimum cumulative GPA of 3.0; and
   
   c. Completion of 12 hours in theatre.

2. Requirements: A student must have completed a minimum of nine hours of honors course work in theatre before beginning the thesis project. The honors topic and paper are to be developed in close conjunction with an honors faculty adviser. A student may enroll for the thesis paper/project in THR 4950 Honors Thesis for a maximum of six hours of credit. The designation "honors" on the diploma will be given to students who receive a grade of A on the honors thesis and maintain a 3.3 GPA in theatre.

   1. Students will be able to evaluate a diverse selection of theatrical voices, traditions and practices.
   
   2. Students will be able to evaluate theatrical work critically using appropriate terminology.
   
   3. Students will be able to professionally collaborate in theatre making.
   
   4. Students will be able to integrate theatrical storytelling skills.
   
   5. Students will be able to articulate their individual creative voice utilizing theatre theory practices.
   
   6. Students will meet appropriate professional expectations in the theatre arts.
Minor in Cinema Studies

A minimum of 21 hours is required for minors in theatre and film, as follows for each minor:

<table>
<thead>
<tr>
<th>Code</th>

5. Students will be able to articulate their individual creative voice utilizing theatre theory practices.
6. Students will meet appropriate professional expectations in the theatre arts.

Department of Women's and Gender Studies

Interdisciplinary Major
Sharon Barnes, Chair and Advisor

The Department of Women's and Gender Studies (WGST) prepares successful graduates who enter their chosen professions with cutting edge interdisciplinary analytical skills and intersectional knowledge that situates them well to succeed graduate school, professional degree programs, and the rapidly changing workplace. Our alum pursue engaging careers in both the public and private sectors, following their passion to work as medical doctors, social workers, teachers, domestic violence advocates, rape crisis center directors, prosecutors, lawyers, ministers, entrepreneurs, and policy advisors at the highest levels of government.

WGST and the health professions

An increasing number of students interested in health-related careers choose WGST as their major, double major or minor because they find a wealth of opportunity after graduation when they bring gender expertise to their chosen fields. Students in the Pre-Med program may major in WGST, while nursing and other health majors may choose to double major or minor. Students with a particular interest in women's health and topics related to gender and healthcare may take courses such as: WGST 4810 Women's Health Care, WGST 4160 Health And Gender, and WGST 3980 Topics In Women's Studies in partial fulfillment of the Women's and Gender Studies major electives. In addition, WGST students pursuing the Pre-Med option will be assigned a mentor from the medical profession to provide guidance and advice as they develop their career goals. Students who would like to pursue the WGST and Pre-Med option should speak with the department advisor and a Pre-Health advisor.

WGST and Pre-Law

Students interested in attending law school also find a major in WGST impactful preparation for a career in private practice or public service. Since students cannot major in Pre-Law is not a specific major at the University of Toledo, those who would like to prepare themselves
for law school may choose any academic major. The American Bar Association recommends gaining skills such as analytic/problem solving skills, critical reading and writing skills, oral communication/listening abilities, task management skills and research. The WGST degree provides students with the opportunity to gain all of these skills, including abundant opportunities to share them in a variety of public forums. In addition, undergraduates in Women's and Gender Studies who wish to study legal ideas, institutions, and procedures from the perspective of gender may pursue a concentration in Law and Social Thought by taking the following: LST 2100, LST 2500 (2 hours), and LST 4900 in partial fulfillment of the women's and gender studies major electives, and LST 4940 (3 to 6 hours) to satisfy the women's and gender studies internship requirement. Students should meet with the department advisor to discuss their specific academic plan.

WGST and helping professions

Students interested in working on women's gender, and sexuality-related issues in social work or any of the helping professions are invited to add WGST as a second major, minor, or concentration. Our specialized courses on adolescent girls (WGST 2020 and WGST 3030), intersectional oppressions, sexuality, and women and the body have been especially helpful for social work, early education students, and those who hope to work on anti-oppression issues. Critical feminist engagement of eating disorders, the social construction of beauty, heteronormativity, and the role of media will vitalize individual practice, help formulate stronger, more inclusive education strategies, and facilitate more effective activism to create more socially just institutions.

Concentrations

WGST has formal concentrations in Sexualities Studies and Law and Social Thought. Both concentrations address the critical need for gender and sexuality expertise in fields as diverse as medicine or law and social work and teaching, and most occupations in between. Please speak to the department advisor for more information on these programs.

Degrees Offered

- B.A. in Women's and Gender Studies (p. 166)
- Minor in Sexualities Studies (p. 167)
- Minor in Women's and Gender Studies (p. 167)

WGST 2010 Introduction To Gender Studies: Gender, Sex And Difference

[3 credit hours]
Interdisciplinary introduction to gender studies. Critically examines competing theories of gender and sex identification, construction, and biological determinism. Considers ethical and intersectional issues regarding differences of gender, sex and sexuality.

Term Offered: Spring, Summer, Fall
Core Social Sciences, Multicultural US Diversity

WGST 2020 Girlhood and Adolescence

[3 credit hours]
This class examines the adolescent experience of the American teenage girl using historical documents, current films, magazines, and popular teen fiction. This class looks at the complexities that race, socioeconomic status, ethnicity and sexual orientation have on the experience of the teenage girl. Students will have several opportunities to share their own adolescent experiences as they relate to assigned readings.

Prerequisites: WGST 2010 with a minimum grade of D-
Multicultural US Diversity

WGST 2150 Proseminar In Women's & Gender Studies

[3 credit hours]
Designed for majors and minors only. Students will acquire professional skills and documents and reflect on the academic, professional, and community activist dimensions of Women's and Gender Studies. Special emphasis will be dedicated to the creation of a professional portfolio for future career, community activism and graduate studies.

WGST 2400 Women's Roles: A Global Perspective

[3 credit hours]
The course focuses on the current and evolving social, economic and political status of women in the United States and selected non-Western societies.

Term Offered: Fall
Core Social Sciences, Multicultural Non-US Diversity, Trans Mod Social Science

WGST 2610 Women In American Politics

[3 credit hours]
An examination of the role of women in the American political system with special attention to the socializing experiences, political power bases and legal status.

Prerequisites: PSC 1200 with a minimum grade of D-
Multicultural US Diversity

WGST 2640 Race, Class, And Gender

[3 credit hours]
Introduction to the study of race, class and gender as factors in American stratification.

Term Offered: Spring, Summer, Fall
Core Social Sciences, Multicultural US Diversity, Trans Mod Social Science

WGST 2680 Contemporary U.S. Queer Cultures

[3 credit hours]
An interdisciplinary, multicultural examination of diverse lesbian, gay, bisexual, transgender, and other queer cultural productions, this course examines continuities and conflicts in aesthetics, issues, materials, and motivations for queer culture.

Term Offered: Spring, Fall
Multicultural US Diversity

WGST 2980 Special Topics In Women's And Gender Studies

[3 credit hours]
Study of selected topics relevant to Women's and Gender Studies. May be repeated for major or minor credit when topic varies.

Term Offered: Spring, Summer, Fall
WGST 3010 Global Issues in Women's Studies
[3 credit hours]
Required for the major. An interdisciplinary introduction to basic works of feminist thought, feminist methodologies and current issues in the field world-wide. Writing Intensive (WAC) course.
Prerequisites: ENGL 1130 with a minimum grade of D- or ENGL 2950 with a minimum grade of D- or ENGL 2960 with a minimum grade of D-
Term Offered: Spring, Summer, Fall
Multicultural Non-US Diversity

WGST 3020 Visual Construction of Gender
[3 credit hours]
Writing intensive (WAC) course. This non-studio course focuses on the ways images reflect and shape our understanding of gender. Students will learn to analyze visual material in order to identify and articulate their cultural significance in relation to gender.
Term Offered: Spring, Summer
Multicultural US Diversity

WGST 3030 Women and the Body
[3 credit hours]
This class will look at the complexities of women's relationships to their bodies and how the intersectionalities of race, gender identity, sexuality and societal pressures shape the ways women feel about themselves. Using popular culture, feminist theory, and other mediums, this class expects students to participate in self-reflection, critical analysis, and the application of various feminist theories to their work.
Prerequisites: WGST 2010 with a minimum grade of D-
Multicultural US Diversity

WGST 3080 Women in Poverty
[3 credit hours]
Provides an understanding of women's poverty and its perpetuation through marriage and divorce, women's work and wages, welfare, children, child support and the economics of the unpaid women's labor.
Term Offered: Spring, Summer, Fall

WGST 3100 Globally Queer
[3 credit hours]
This course will survey the experiences of queer individuals and communities around the globe from a human rights perspective.
Term Offered: Spring
Multicultural Non-US Diversity

WGST 3200 Issues in Lesbian, Transgender, Bisexual and Gay Communities
[3 credit hours]
This course will explore current issues facing diverse LTBGQ communities including historical, socio-cultural and political perspectives.
Term Offered: Fall

WGST 3400 Feminist Approaches to Social Problems
[3 credit hours]
This course will examine current social problems from a feminist perspective. The course will examine such issues as the feminization of poverty, violence against women, homelessness, prostitution, teen pregnancy, HIV/AIDS and addictions.
Term Offered: Spring

WGST 3510 Interpersonal Practice with Lesbian, Gay, Bisexual, Transgender and Queer Individuals
[3 credit hours]
This course will provide an introduction and overview of sexual orientation and gender identity and expand understanding of how to implement affirmative models of practice with LGBTQ individuals, families and communities. Course content will include: perspectives on gender, identity formation, impact of homophobia, biphobia, and transphobia, affirming interventions with lesbian, gay, bisexual and transgendered persons, families, youth, communities and aging; and specific challenges facing the LGBT communities such as homelessness, domestic violence, bullying, and policy.
Term Offered: Spring, Summer, Fall

WGST 3550 Feminism and Philosophy: Love, Sex and Marriage
[3 credit hours]
This course examines a number of cross-cultural philosophical conceptions of love, sex, and marriage, comparing historical and contemporary beliefs and practices in relation to gender/feminist and ethical theory. A number of philosophical and ethical issues, such as monogamy, cultural and theological contexts, pornography, marriage rights, and consent, will be investigated through readings, videos, and discussion boards, which are meant to encourage students to explore diverse viewpoints, analyze arguments, and cultivate a deeper critical awareness of their own and others' viewpoints.
Term Offered: Spring, Summer
Multicultural US Diversity

WGST 3600 Feminist Health Humanities
[3 credit hours]
This 15-week course will be taught from intersectional, feminist, health humanities perspectives. We will use the arts and culture in combination with humanistic social theory, to examine the following: gendered and racialized health disparities; gendered and racial constructions in the history of science/medicine; illness and disability life writing; biomedical ethics; the feminist health movement; grassroots community health organizing and feminist conceptualizations of wellbeing and radical self-care. Throughout the semester, there will be a sustained emphasis on health justice and the experiences of marginalized communities (women, people of color, the LGBTQ community, people with disabilities, etc.). Participants will leave the course more aware of important discussions in the health humanities and more fully prepared to apply inclusive knowledge practices within majors and career paths involving “health” – broadly defined. The course fulfills core curriculum requirements for Multicultural U.S. Diversity & Writing Across the Curriculum (WAC).
Term Offered: Spring, Summer, Fall
Multicultural US Diversity

WGST 3650 Economics of Gender
[3 credit hours]
Analysis of labor market outcomes and income distribution characteristics resulting from gender differences; gender-related economic outcomes: the "feminization of poverty," persistent male-female wage differential, expanding proportions of female-headed and same sex households.
Term Offered: Spring, Summer, Fall
Multicultural US Diversity
WGST 3700 Women's Studies Topics In Literature
[3 credit hours]
Specific topics vary. Check schedule of classes for specific subject.
Term Offered: Spring, Fall

WGST 3750 Women And Literature - Writing Across the Curriculum
[3 credit hours]
Examines literary works in light of major issues raised by feminist criticism. Specific emphasis varies. Recommended ENGL 2700 or 3790
Term Offered: Spring, Summer

Multicultural US Diversity

WGST 3800 Sexual Politics
[3 credit hours]
This course examines sexual politics through studying canonical literature of Western political theory, feminism and postmodern theory.
Term Offered: Spring, Fall

WGST 3980 Topics In Women's Studies
[3 credit hours]
Specific topics vary. Check schedule of courses for specific subject.
Term Offered: Spring, Summer, Fall

WGST 4010 Women's Studies Topics In Film
[3 credit hours]
Specific topics vary. Check schedule of courses for specific subject and prerequisites.
Term Offered: Spring, Summer, Fall

WGST 4010 Health And Gender
[3 credit hours]
An examination of gender as a predisposing factor of health status, health behavior, health care delivery, and the structure and posture of health care professionals. Writing intensive (WAC) course.

WGST 4110 Disability and Sexuality
[3 credit hours]
Utilizing a cultural studies approach, this course investigates complex questions of how someone becomes understood as abnormal in contemporary culture. The course looks at the disability justice and LGBTQ+ justice; trans studies and disability studies; public health and private rights. The course uses interdisciplinary texts including memoir and life writing, philosophy, history, public health and sexuality studies to address questions central to disability justice and lived experience.
Term Offered: Spring, Fall

WGST 4160 Health And Gender
[3 credit hours]
An examination of gender as a predisposing factor of health status, health behavior, health care delivery, and the structure and posture of health care professionals. Writing intensive (WAC) course.

WGST 4190 Gender In Cross-Cultural Perspective
[3 credit hours]
Analysis of gender stratification and its impact on culture in various nations and across ethnic groups in the United States. Multicultural Non-US Diversity

WGST 4200 Women's Studies Topics In Science
[3 credit hours]
Cross-listings of 4000-level courses with biology, chemistry, geology, math, natural sciences, physics and pre-med. Specific topics vary. Check schedule of courses for specific subject and prerequisites.

WGST 4350 Women's Studies Topics In Communication
[3 credit hours]
Cross-listings of 4000-level courses with the communication department. Specific topics vary. Check schedule of courses for specific subject and prerequisites determined by the department of communication.
Term Offered: Spring, Summer, Fall

WGST 4500 Women's Studies Topics In History
[3 credit hours]
Crosslistings of 4000 level courses with the history department. Specific topics vary. Check schedule of courses for specific subject and prerequisites.
Term Offered: Spring, Fall

WGST 4510 Women In American History
[3 credit hours]
This course presents American history from early settlement to the present by examining the contributions of women, in interaction with men, to the immensely complex fabric of American life.
Term Offered: Spring, Fall

Multicultural US Diversity

WGST 4540 Witchcraft And Magic In Medieval And Early Modern Europe
[3 credit hours]
Witchcraft, religion and magic in western Europe from the 12th through 17th centuries, focusing on the origins of witchcraft belief, diabolical magic, the witchcraft and its decline.
Term Offered: Spring

WGST 4590 Law, Policy And The Politics of Sexuality
[3 credit hours]
This course explores the public policies that affect the lesbian, gay, bisexual and transgender communities in the United States and in other countries. It examines the factors that affect policymaking in this area.
Term Offered: Spring, Fall

WGST 4610 Feminist Political Theory
[3 credit hours]
Readings in and interpretation of feminist political theories about the state, power, citizenship, and identity.
Prerequisites: PSC 2800 with a minimum grade of D-

WGST 4700 Women's Studies Topics In Literature
[3 credit hours]
Specific topics vary. Check Course Schedules for specific subject.
Term Offered: Spring

WGST 4760 Feminist Readings Of Literature
[3 credit hours]
Classic works by diverse American and English men and women considered in light of significant recent feminist scholarship and how such perspectives enhance classroom teaching and academic production.

WGST 4770 American Women Writers
[3 credit hours]
Author/authors vary with each offering. Consult schedule of courses for specific subject. Recommended ENGL 2700, 2800 or 3790.

WGST 4810 Women's Health Care
[3 credit hours]
The course is designed to consider personal health topics of special interest and applicability to women. The focus is upon the role of self-understanding and self-help in promotion of health and well-being.
Term Offered: Spring, Summer, Fall

WGST 4870 Feminisms
[3 credit hours]
This introduction to global feminist thought familiarizes students with feminist terminology and a variety of feminist theoretical frameworks.
Term Offered: Spring, Fall
WGST 4880 Queer Theory WAC
[3 credit hours]
This course explores the theoretical concepts/texts of Queer Theory and its locations in communities and identities, focusing principally on the theories that have emerged since the late 1990s.
Prerequisites: WGST 3010 with a minimum grade of D- or WGST 2010 with a minimum grade of D-
Term Offered: Spring
Multicultural US Diversity
WGST 4890 Research and Methods in Women’s and Gender Studies
[3 credit hours]
This course will present an overview of the ways in which women’s/gender/feminist studies have informed and complicated traditional theories of research and methodologies. Students will examine and use various research methods and tools to prepare a final research project.
Term Offered: Fall
WGST 4900 Seminar In Women's Studies
[3 credit hours]
Seminar focused on timely topics in Women's Studies chosen by rotating faculty.
Term Offered: Spring, Summer
WGST 4910 Honors Thesis In Women's And Gender Studies
[1-3 credit hours]
Supervised research and writing for honors students only.
Term Offered: Spring, Summer, Fall
WGST 4940 Internship In Women's Studies
[1-3 credit hours]
Practical field experience applying Women's Studies theories, arranged in conjunction with the department of women's and gender studies. Students must have pre-approval based on detailed written proposal.
Term Offered: Spring, Summer, Fall
WGST 4980 Advanced Topics In Women's Studies
[3 credit hours]
A course on a special topic in Women's Studies. Consult schedule of courses for topic to be studied and semester offered. Recommended WGST 3010.
Term Offered: Spring, Fall

B.A. in Women’s and Gender Studies
Major, B. A. 33 hours (30 hours if double-major)

**Department of World Languages and Cultures**

**CONTACTS**

Linda Rouillard, Chair
Friederike Emonds, Undergraduate Advisor, German
Kasumi Yarnazaki, Undergraduate Advisor for Minors, Japanese
Juan Martin, Undergraduate Advisor for Majors and Minors, Spanish (A-H)
Linda Rouillard, Undergraduate Advisor for Majors and Minors, French
Gaby Semaan, Undergraduate Advisor for Minors, Arabic
Kathleen Thompson-Casado, Undergraduate Advisor for Majors and Minors, Spanish (I-Z)

**Degrees Offered:** The Department of World Languages and Cultures offers bachelor of arts degrees in French, German, Middle East Studies, and Spanish.

**The Department of World Languages and Cultures offers instruction in the following languages:**

- Arabic
- Chinese
- French
- German
- Japanese
- Latin
- Spanish

A major can be earned in the areas of French, German, Middle East Studies, and Spanish; Departmental Honors can be pursued in these same areas. A Minor can be earned in any of the major fields as well as Arabic and Japanese.

**Advanced Placement Program**

Refer to the University of Toledo’s Registrar page at https://www.utoledo.edu/offices/registrar/student_records/advan_credits.html for specific information on minimum scores and credits awarded for Advanced Placement examinations administered by the College Board Advanced Placement Program.

**Study Abroad**

Credit for foreign language study abroad will be given only for those accredited courses or programs approved in advance. Students should apply for approval at the Department of World Languages and Cultures at least one month prior to the anticipated date of departure. Credit will be granted only upon presentation of a formal certificate indicating the hours completed and examinations passed.

**Degrees Offered**

- B.A. in French (p. 177)
- B.A. in German (p. 179)
- B.A. in Spanish (p. 180)
- Certificate in Intercultural Competency (p. 181)
- Certificate in Issues in Second Language Teaching (p. 182)
- Certificate in Spanish Translation and Interpretation (p. 182)
- Certificate in World Language Proficiency (p. 182)
- Minor in Applied German (p. 182)
- Minor in Arabic (p. 183)
- Minor in French (p. 183)
- Minor in General German (p. 183)
- Minor in Japanese (p. 184)
- Minor in Spanish (p. 185)
- Minor in World Cultures (p. 186)

ARBC 1080 Culture and Commerce in the Arabic-Speaking World
[3 credit hours]
A study of the culture and society of the Arabic-speaking world with emphasis on business and economics. Taught in English.

**Term Offered:** Spring
Core Arts & Humanities, Multicultural Non-US Diversity

ARBC 1090 Culture of the Arabic-Speaking World
[3 credit hours]
An introduction to principal social, artistic, and literary aspect of modern culture in the Arabic-speaking worlds. Taught in English.

**Term Offered:** Fall
Core Arts & Humanities, Multicultural Non-US Diversity

ARBC 1110 Elementary Arabic I
[4 credit hours]
An introduction to Arabic Language and culture through listening, speaking, reading and writing. Laboratory practice required.

**Term Offered:** Fall

ARBC 1120 Elementary Arabic II
[4 credit hours]
An introduction to Arabic language and culture through listening, speaking, reading and writing. Laboratory practice required.

**Prerequisites:** ARBC 1110 with a minimum grade of D-

**Term Offered:** Spring
Core Arts & Humanities
ARBC 2140 Intermediate Arabic I
[3 credit hours]
Further practice of the four language skills with grammar building and readings of a literary-cultural nature.
Prerequisites: ARBC 1120 with a minimum grade of D-
Term Offered: Spring, Fall
Core Arts & Humanities

ARBC 2150 Intermediate Arabic II
[3 credit hours]
Further practice of the four language skills with grammar building and readings of a literary-cultural nature.
Prerequisites: ARBC 2140 with a minimum grade of D-
Term Offered: Spring
Core Arts & Humanities

ARBC 3010 Conversation and Composition I
[3 credit hours]
Work on advanced listening, speaking, reading, and writing skills through intensive work with authentic texts that deal contemporary issues relating to the Arabic-speaking world.
Prerequisites: ARBC 2150 with a minimum grade of D-
Term Offered: Fall

ARBC 3020 Conversation and Composition II
[3 credit hours]
Work on advanced listening, speaking, reading, and writing skills through intensive work with authentic texts that deal contemporary issues relating to the Arabic-speaking world.
Prerequisites: ARBC 3010 with a minimum grade of D-
Term Offered: Spring

ARBC 3410 Survey of Arabic Civilization I
[3 credit hours]
The course examines the Arabic culture and civilization from Arabic authors' literature published in English as well as in Arabic and compares that to Western thought and expression.
Prerequisites: ARBC 3020 with a minimum grade of D-
Term Offered: Fall

ARBC 3420 Survey of Arabic Civilization II
[3 credit hours]
This course further the students' knowledge of the Arabic civilization through examining the ways of thinking and social contexts as expected in literary works and poetry from different eras.
Prerequisites: ARBC 3020 with a minimum grade of D-
Term Offered: Spring

ARBC 3430 Survey of Arabic Civilization III
[3 credit hours]
This course further the students' knowledge of the Arabic civilization through examining the ways of thinking and social contexts as expressed in literary works and poetry from different eras.
Prerequisites: ARBC 3410 with a minimum grade of D- and ARBC 3420 with a minimum grade of D-

ARBC 3980 Special Topics in Arabic
[1-3 credit hours]
Study of a selected topic in Arabic language, literature or culture. May be repeated when topic varies.
Prerequisites: ARBC 3010 with a minimum grade of D- and ARBC 3020 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

ARBC 4010 Arabic Syntax and Stylistics I
[3 credit hours]
It provides thorough intensive work with authentic texts that allows further study of syntax, morphology and complex grammatical structure of Arabic and the relationship between aural/oral aspects of the language.
Prerequisites: ARBC 3020 with a minimum grade of D-
Term Offered: Spring

ARBC 4020 Arabic Syntax and Stylistics II
[3 credit hours]
It provides thorough intensive work with authentic texts that allows further study of syntax, morphology and complex grammatical structure of Arabic and the relationship between aural/oral aspects of the language.
Prerequisites: ARBC 4010 with a minimum grade of D-
Term Offered: Spring

ARBC 4850 Media in the Arab World
[3 credit hours]
The course provides an in-depth study and analysis of media and news sources in the Arab world and surveys major press and alternative publishing outlets produced in Arabic.

ARBC 4980 Special Topics in Arabic
[1-3 credit hours]
Study of a selected topic in Arabic language, literature or culture. May be repeated when topic varies.
Prerequisites: ARBC 3010 with a minimum grade of D- and ARBC 3020 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

CHIN 1090 Chinese Culture
[3 credit hours]
Through a systematic study of Chinese values and patterns of behaviors, this course builds students' proficiency in cultural competence of Chinese. This course is taught in English.
Term Offered: Spring, Fall
Core Arts & Humanities, Multicultural Non-US Diversity

CHIN 1110 Elementary Chinese I
[4 credit hours]
An introduction to Chinese language and culture through listening, speaking, reading and writing. Laboratory practice required.
Term Offered: Fall

CHIN 1120 Elementary Chinese II
[4 credit hours]
An introduction to Chinese language and culture through listening, speaking, reading and writing. Laboratory practice required. Prerequisite: CHIN 1110 or satisfactory score on placement test.
Prerequisites: CHIN 1110 with a minimum grade of D-
Term Offered: Spring, Fall
Core Arts & Humanities

CHIN 2140 Intermediate Chinese I
[3 credit hours]

CHIN 2150 Intermediate Chinese II
[3 credit hours]
CHIN 3980 Special topics in Chinese  
[0-6 credit hours]  
Study of a selected topic in Chinese language, literature or culture. May be repeated when topic varies.

FLAN 1970 Special Topics  
[4 credit hours]  
Special topics which vary semester to semester. Course may be repeated when topic varies.  
Term Offered: Spring, Fall

FLAN 1980 Special Topics  
[4 credit hours]  
Special topics which vary semester to semester. Course may be repeated when topic varies.  
Term Offered: Spring, Fall

FLAN 2700 World Cultures through Literature and Cinema in Translation  
[3 credit hours]  
This course introduces students to World Cultures through selected translated texts and films from various European, Latin American, African, Asian, and Middle East cultures. Among the themes considered are race, gender, class, immigration, and colonialism. Taught in English. 3 credit hours.  
Term Offered: Spring, Summer, Fall  
Core Arts & Humanities, Multicultural Non-US Diversity

FLAN 2970 Special Topics  
[3 credit hours]  
Special topics which vary semester to semester. Course may be repeated when topic varies.  
Term Offered: Spring, Fall

FLAN 2980 Special Topics  
[3 credit hours]  
Special topics which vary semester to semester. Course may be repeated when topic varies.  
Term Offered: Spring, Fall

FLAN 3440 Intercultural Communication: Principles And Practice  
[4 credit hours]  
This course offers a survey of major concepts in intercultural communication. It emphasizes a balance between theoretical and practical learning opportunities and seeks to promote intercultural understanding.  
Term Offered: Spring, Summer, Fall  
Core Arts & Humanities, Multicultural Non-US Diversity

FLAN 3980 Special Topics in Foreign Languages  
[0-6 credit hours]  
Study of a selected topic in foreign languages. May be repeated when topic varies.  
Term Offered: Spring, Summer, Fall

FLAN 4160 Teaching Colloquia

Normally, a petition for admission to the program should be made near the end of the sophomore year. Formal acceptance is based on the following:

1. Junior or senior standing;
2. A GPA of 3.3 overall in the major; and
3. Approval by the language Honors adviser and the Chairperson of the Department of World Languages and Cultures.

To graduate with the degree designation of “Departmental Honors,” the student must:

1. Satisfy the standards requirements listed above for the major;
2. Maintain a GPA of 3.3 overall and in the major;
3. Satisfactorily complete a minimum of 12 hours of departmental honors course work at the 3000- or 4000 level; and
4. include among the 12 hours the Honors Research course (FREN 4910, GERM 4910, or SPAN 4910) that normally leads to the completion of an Honors thesis.

B.A. in French
Requirements for the Major in French, German, and Spanish
A minimum of 34 hours is required for the undergraduate majors in German and Spanish. A minimum of 30 hours is required for the major in French. French, German, and Spanish offer two tracks for majors, the general and the applied language or business track.

A minimum of 30 credit hours is required for both French majors.
Below is a sample plan of study. Consult your degree audit for your program requirements.

1. Speaking outcomes. French majors and minors are able to initiate, sustain, and bring to closure a variety of communicative tasks including those required in university classes taught entirely in the target language. They are able to narrate events and to describe people, places, and things using paragraph-length connected discourse. They also possess the ability to express personal ideas and feelings and to discuss social and cultural matters relevant to their lives. They both understand and are understood by interlocutors, including native speakers of the target language not accustomed to dealing with foreign speakers.

2. Writing outcomes. Majors and minors are able to write compositions that demonstrate mechanical and grammatical correctness and that show a precise and correct use of vocabulary. Their compositions are also well organized, clear, and have some intellectual or artistic interest. Students are able to write down everything they are able to say aloud, using an appropriate register in description, narratives, personal expression, etc. They are also able to write longer analytical texts on a variety of topics.

3. Grammar outcomes. Majors and minors are able to communicate clearly and correctly in the target language. Clear communication is based on the accurate use and understanding of correct forms and structures. Majors are able to identify forms and structures that they have mastered.
4. Critical reading. Majors are able to respond coherently and react critically to texts they have read, formulate relevant questions and problems, and show how these concerns may be clarified. They are able to identify, understand, and analyze the texts they have read.

5. Culture Outcomes. Majors can identify a number of texts, artifacts, monuments, terms, names, places, concepts, behavior, dates, and other cultural facts from periods of the target culture’s history, geography, and institutions. Majors can establish these concepts within relevant contexts and explain in the target language their meaning or importance.

advice on a variety of familiar and some concrete topics that they have researched, using connected sentences that may combine to form paragraphs and asking a variety of questions, often across various time frames. In both interpersonal and presentational communications, they should both demonstrate the ability to understand and be understood by interlocutors, including native speakers of Spanish who are accustomed to dealing with foreign speakers.

2. Writing objectives. Majors can write compositions and simple summaries and express their thoughts about familiar topics, using sentences and series of connected sentences often across various time frames. They are able to write compositions that demonstrate mechanical and grammatical correctness and that show a precise and correct use of vocabulary. Their compositions are also well organized, clear, and have some intellectual or artistic interest. Students are able to write down everything they are able to say aloud, using an appropriate register in description, narratives, personal expressions, etc. They are also able to write longer analytical texts on a variety of topics.

3. Grammar objectives. Majors are able to communicate clearly and correctly in the target language. Clear communication is based on the accurate use and understanding of correct forms and structures. Majors are able to identify forms and structures that they have mastered and to apply them appropriately within the contexts.

4. Literature Objectives. Majors should be familiar with a range of texts by various authors from different historical periods and several Hispanic areas and be able both to place them in relevant contexts and to discuss them in the target language using critical concepts derived from philosophical, stylistic, aesthetic and hermeneutical approaches, among others. The literary knowledge objective has two components: knowledge of literary history and critical reading skills.

a) Literary history. Majors are able to situate literary texts into their literary, political and social-historical contexts and to classify literary texts according to historical genres (essay, novel, lyric poetry, drama etc.) and style periods (Renaissance, Classicism, Romanticism, etc.), as well as to evaluate their current relevance and the ongoing contributions to the tradition to which they belong. They should also be able to indicate which texts do not easily fit into given generic or stylistic categories and why. Majors should be able to use the library as well as electronic sources to gain access to relevant materials in and about literature in the target language.

b) Critical reading. Majors are able to understand the main idea and some pieces of information on familiar topics from sentences and series of connected sentences within a text and they can understand flow of events expressed in various time frames. They are able to understand fully and with ease short, non-complex texts that convey basic information and deal with personal and social topics to which the reader brings personal interest or knowledge. They can respond coherently and react critically to texts they have read, formulate relevant questions and problems, and show how these concerns may be clarified. They are able to identify, understand, and analyze the texts they have read.

5. Linguistic objectives. Students not only demonstrate the correct usage of the target language but also its structure, history, and varieties (dialectal, sociolectal, etc.). Students gain knowledge of the main branches of linguistics as they apply to Spanish (phonetics, phonology, morphology, syntax, semantics, and pragmatics) and apply this knowledge to their own use of the target language through the study of stylistics.

6. Culture Objectives. Majors can make comparisons between products and practices to help them understand perspectives in their own and other cultures. They can identify a number of texts, artifacts, monuments, terms, names, places, concepts, behavior, dates, and other cultural facts from periods of the target culture's history, geography, and institutions. Majors can establish these concepts within relevant contexts and explain in the target language their meaning or importance. They can recognize that significant differences in behaviors exist among cultures, use appropriate learned behaviors and avoid major social blunders. They can converse with peers from Spanish-speaking countries in familiar situations at school, work, or play, and show interest in basic cultural similarities and differences. Majors can use the library and electronic sources to gain access to relevant materials on the target civilization.

Certificate in World Language Proficiency

The certificate in World Language Proficiency is issued based on language proficiency level on the ACTFL (American Council on the Teaching of Foreign Languages) proficiency scale, rather than exclusively on the course credit hours. Students may apply for the Certificate in World Language Proficiency after completing the second year courses in a world language. Students earn the certificate when they demonstrate a minimum of “Intermediate Low” level in French, German, and Spanish, or “Novice High” in Arabic, Chinese, and Japanese on the ACTFL proficiency scale, using the Assessment of the Performance toward Proficiency in Languages (AAPPL) test or the Avant Standards-based Measurement of Proficiency (STAMP) test in reading, writing, listening, and speaking.

Minor in Applied German

Minor in World Languages and Cultures

A minimum of 22 hours is required for the minor in German and Japanese. A minor in Spanish requires 21 hours. All course work must be in the same language and at the 2000 level or higher for Arabic, French, Japanese, and Spanish; at the 3000 level or higher for German. A minimum of 18 hours is required for the minors in Arabic, General French, and Applied French.

Students wishing to receive a minor in World Languages and Cultures have the responsibility, in consultation with the advisor in their major, to see that the necessary course work is included in the total number of undergraduate courses taken. Students outside the College of Arts and Letters should make sure that the minor in World Languages and Cultures is an approved program within their college.

Candidates for the minor in World Languages and Cultures must have their course work verified and approved by a World Languages and Cultures Department advisor or that department’s chairperson at the time they make formal application for graduation. A form for this verification can be obtained from the college or department office.
Courses required for either the major or minor may not be taken P/NC; however, up to 12 hours of P/NC course work may be included in the related area.

1. German minors are able to initiate, sustain, and bring to closure a variety of communicative tasks including those required in university classes taught entirely in the target language.
2. German minors are able to write compositions that demonstrate mechanical and grammatical correctness and that show a precise and correct use of vocabulary. Their compositions are also well organized, clear, and have some intellectual or artistic interest.
3. German minors are able to communicate clearly and correctly in the target language. Clear communication is based on the accurate use and understanding of correct forms and structures.
4. German minors are familiar with a range of texts and are able both to place them in relevant contexts and to discuss them in the target language using critical concepts.
5. German minors are able to identify a number of texts, artifacts, monuments, terms, names, places, concepts, behavior, dates, and other cultural facts from periods of the target culture's history, geography, and institutions.

1. Students can use the Japanese language in interpersonal communicative exchanges.
2. Students are able to present informative in the target language and written and oral forms.
3. Students are able to interpret spoken and written Japanese in the context of daily life activities.
4. They demonstrate cultural understanding and sensitivity in daily life communicative tasks in the target language.

Note:
The students will be proficient enough in Japanese language and cultural context that they should be able to use the language in practical settings. Japanese Minor students are encouraged to participate in Study Abroad program either for one semester or full year at one of two universities with exchange agreement. Through the Study Abroad experience, students will be able to handle vocabulary and syntax analysis, read short authentic texts and discuss Japanese customs and tradition. They are proficient in conversation and reading in practical settings, familiar with cultural innuendo and terminology different from Western norms.

Select 2 elective courses at the 2/3/4000 level. SPAN 2140 and SPAN 2150 are approved for the minor program. 6

1. Speaking objectives. Spanish minors are able to converse with ease and confidence when dealing with the routine tasks and social situations of the Intermediate level. They are able to handle successfully uncomplicated tasks and social situations requiring an exchange of basic information related to their work, school, recreation, particular interests, and areas of competence. They can handle a substantial number of complicated, but they are unable to sustain performance of all of these tasks all of the time. They can narrate and describe in all major time frames using connected discourse of paragraph length, but not all the time. They can generally be understood by native speakers unaccustomed to dealing with non-natives, although interference from another language may be evident (e.g., use of code-switching, false cognates, literal translations), and a pattern of gaps in communication may occur.

2. Writing objectives. Minors are able to meet all practical writing needs, such as simple messages and letters, requests for information, and notes. Additionally, they can write compositions and simple summaries related to work and/or school experiences. They can narrate and describe in different time frames when writing about everyday events and situations. The writing is generally comprehensible to natives not used to the writing of non-natives.

3. Grammar objectives. Minors are able to communicate clearly and correctly in the target language. Clear communication is based on the accurate use and understanding of correct forms and structures. Minors are able to identify forms and structures that they have mastered and to apply them appropriately within the contexts.

4. Literature Objectives. Minors should be familiar with a range of texts by various authors from different historical periods and several Hispanic areas and be able both to place them in relevant contexts and to discuss them in the target language. The literary knowledge objective has two components: recognition of genres and critical reading skills.

a) Literary history. Minors are able to situate literary texts into their literary, political and social-historical contexts and to classify literary texts according to historical genres (essay, novel, lyric poetry, drama etc.) as well as to evaluate their current relevance and the ongoing contributions to the tradition to which they belong. They should also be able to indicate which texts do not easily fit into given generic or stylistic categories and why. Minors should be able to use the library as well as electronic sources to gain access to relevant materials in and about literature in the target language.

b) Critical reading. Minors are able to understand fully and with ease short, non-complex texts that convey basic information and deal with personal and social topics to which the reader brings personal interest or knowledge. They are able to understand main ideas and some supporting details on familiar topics from a variety of texts. Students are also able to understand some connected texts featuring description and narration although there will be occasional gaps in understanding due to a limited knowledge of the vocabulary, structures, and writing conventions of the language. Students can comprehend information rich texts with highly predictable order. They can respond coherently and react critically to texts they have read, formulate relevant questions and problems, and show how these concerns may be clarified. They are able to identify, understand, and analyze the texts they have read.

5. Linguistic objectives. Students not only demonstrate the correct usage of the target language but also its structure, history, and varieties (dialectal, sociolectal, etc.). Students gain knowledge of the main branches of linguistics as they apply to Spanish (phonetics, phonology, morphology, syntax, semantics, and pragmatics) and apply this knowledge to their own use of the target language through the study of stylistics.

6. Culture Objectives. Minors can make comparisons between products and practices related to everyday life and personal interests or studies in student’s own and Hispanic cultures. Students are able to converse with peers from the Hispanic culture in familiar situations at school, work, or play and show interest in basic cultural similarities and difference. They can recognize that significant differences in behaviors exist among

AFST 1100 Introduction To Africana Studies
[3 credit hours]
Introductory survey of basic theoretical concepts to analyze the Black experience, with special focus on the general historical process common to the African Diaspora (Africa, Caribbean and the Americas - South, Central and North, especially the USA.)
Term Offered: Spring, Summer, Fall
Multicultural US Diversity

AFST 1110 African Civilization
[3 credit hours]
General cultural and historical survey of Africa south of the Sahara from earliest times to the 20th century. Includes topics on art, literature, philosophy, religion and society.
Core Arts & Humanities, Multicultural Non-US Diversity

Minor in World Cultures

1. Students will be able to explain key concepts (values, ideas, belief systems, customs, social organization, etc.) related to selected ethnic and national cultures.
2. Students will be able to identify cultural products (i.e., art, music, film, literature) related to selected ethnic and national cultures.
3. Students will compare and contrast diverse views, perspectives, practices, and traditions across different cultures.
4. Students will demonstrate professional communication skills both orally and in writing.
AFST 1200 Introduction To The African Experience
[3 credit hours]
Introduction to the African experience through case studies of critical
historical experiences: origin of humanity, origin of civilization, empire
and traditional society.
Term Offered: Spring, Summer, Fall
Multicultural Non-US Diversity

AFST 2100 Foundations Of Black Intellectual History
[3 credit hours]
An examination of slavery and colonialism in the intellectual history
of the African Diaspora, especially in the work of W.E.B. Du Bois, C.L.R.
James and Kwame Nkrumah.
Prerequisites: AFST 1100 with a minimum grade of D- or AFST 1200 with
a minimum grade of D-
Term Offered: Spring
Multicultural US Diversity

AFST 2200 Foundation Of Culture In The African Diaspora
[3 credit hours]
Examination of culture in the African Diaspora by focusing on continuities
and discontinuities in music and dance, material culture, language and
folklore and the cultural practices of everyday life.
Prerequisites: AFST 1100 with a minimum grade of D- or AFST 1200 with
a minimum grade of D-
Multicultural Non-US Diversity

AFST 2220 History Of Jazz
[3 credit hours]
A study of the development of jazz styles including listening skills and
historical perspectives. Because the major innovations and stylistic
interpretations of jazz are a result of African Americans, the course
includes a study of how their culture influenced the development of jazz.
Students may take P/NC.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Multicultural US Diversity, Trans Mod Arts and
Humanities

AFST 2300 Black Community Research Methods
[3 credit hours]
Survey of basic social research methods and studies focusing on the
Black community. Class conducts research on Black community of
Toledo. Offered as companion to AFST 2400. Topics change each year.
Course can be taken twice.
Prerequisites: AFST 1100 with a minimum grade of D-
Term Offered: Fall

AFST 2660 African Politics
[3 credit hours]
The character and development of African political institutions and
processes with a special emphasis on patterns in the post-independence
period and prospects for the future.
Term Offered: Spring, Summer, Fall
Multicultural Non-US Diversity

AFST 3240 African-American Politics
[3 credit hours]
A study of the many ways black people have involved themselves in
American politics; examines African-American participation in the
political and governmental process.
Term Offered: Spring, Summer, Fall
Multicultural US Diversity

AFST 3250 African-American History To 1865
[3 credit hours]
An examination of the historical experiences of African-Americans in the
United States from 1619 to 1865.
Term Offered: Fall
Multicultural US Diversity

AFST 3260 African-American History From 1865
[3 credit hours]
An examination of the historical experiences of African-Americans in the
United States since 1865.
Term Offered: Spring
Multicultural US Diversity

AFST 3500 Environmental Inequalities & Opportunities
[3 credit hours]
Explores environmental inequality along racial, ethnic, class and national
lines. Applies diverse perspectives on the environment to explain, predict
and correct environmental inequality in America and throughout the
world.
Term Offered: Spring

AFST 3600 Entrepreneurship and the Black Community
[3 credit hours]
Explores the gap between entrepreneurial aspirations and the actual
entrepreneurial enterprises in the black community. Examines the
subject in a socio/historical context. Diverse sociological perspectives,
methodologies and analyses are employed. Student would need 3 hours
of Soci-Science or 3 hours of AFST.
Term Offered: Spring, Fall
Multicultural US Diversity

AFST 3700 African Women & the Environment
[3 credit hours]
Overview of empirical evidence and interpretive models of African women
with reference to environment. Specific topics: African women managing
natural resources; implications of climate change in Africa; ecology and
feminism. Student will need 3 hours of Soci-Science or 3 hours of AFST.
Term Offered: Spring, Fall

AFST 3800 Ecotourism: Studies of the Africana World
[3 credit hours]
Introduce students to the field of ecotourism studies and specific
challenges of community development and sustainability. The course
covers ecotourism in the Africana world of Africa, the Caribbean, and
Latin America.
Term Offered: Spring, Fall

AFST 3850 Political Institutions and Grassroots Politics
[3 credit hours]
Using a hybrid of professional experience and relevant literature, the
instructor will educate students about macro and micro levels of
political engagement. The course is taught by a seasoned politician,
professional policy formulator, and/or experienced grassroots organizer
who synergizes grassroots politics with mainstream political institutions
to effect positive social change.
AFST 3900 Perspectives on African American Education
[3 credit hours]
Covers the history and cultural heritage of African Americans and an in-depth knowledge of experiences of African American student populations in preparation for a variety of career fields, including education, social work, criminal justice, business, nursing, and other professions. Examines key debates and policy proposals to better understand current issues impacting African American student populations. U.S. Diversity
Term Offered: Spring, Fall
Multicultural US Diversity

AFST 4650 African American Writers Before The 20th Century
[3 credit hours]
A survey of African-American prose, poetry, drama and fiction from 1760 to 1915. Recommended: ENGL 2700, 2800, or 3790.
Term Offered: Fall
Multicultural US Diversity

AFST 4660 African American Literature In The 20th and 21st Century
[3 credit hours]
A course focused on 20th and 21st century African American poetry, fiction, nonfiction, and drama.
Term Offered: Spring, Summer, Fall
Multicultural US Diversity

AFST 4800 Social Change in Developing Nations
[3 credit hours]
The new emerging ideological, political, social and economic patterns which repeat themselves in and determine the Third World transition from a traditional to a new society.
Term Offered: Fall
Multicultural Non-US Diversity

AFST 4900 Senior Seminar
[3 credit hours]
General theoretical synthesis of the field focusing on a close reading of a recent biographical work of intellectual history, a recent work of cultural criticism and a recent work of social analysis.
Term Offered: Spring, Summer, Fall

AFST 4910 Directed Research
[1-4 credit hours]
Directed research on a specific topic in African Studies. The topic may vary depending on the instructor and the interest of student in the field.
Term Offered: Spring, Summer, Fall

AFST 4920 Directed Readings
[1-4 credit hours]
Directed readings in African Studies of various natures or special topics in African Studies. The topic may vary depending on the areas of the instructor and the academic interest of the students.
Term Offered: Spring, Summer, Fall

AFST 4980 Special Topics In Africana Studies
[3 credit hours]
Discussion of a substantial issue in scholarly research or public discourse relative to the African Diaspora. May be repeated for different issues. Maximum number of hours for AFST 4980 should not exceed 9 semester hours.
Term Offered: Spring, Summer, Fall

ASST 2100 Introduction to Asian Studies
[3 credit hours]
Introduction to Asian studies will introduce students to important facet of Asian countries including their culture, historical and modern, social and economic systems. Students will learn the cultural bases of Asian countries or regions. The course will be an integral part of the education of those majoring or minoring in Asian Studies.
Term Offered: Spring, Fall
Multicultural Non-US Diversity

ASST 3010 Issues in Asian Studies
[3 credit hours]
The course covers various topics in Asian Studies, from some specific topics such as Buddhism to the general area of Asian culture. The particular topic may vary depending on the areas of the instructor and the academic interest of the students. It can also serve various topics offered in the study-abroad program.
Term Offered: Spring, Summer, Fall
Multicultural Non-US Diversity

ASST 4910 Directed Research
[1-4 credit hours]
Directed research on a specific topic in Asian Studies. The topic will vary on the instructor and the interest of student in the field.
Term Offered: Spring, Summer, Fall

ASST 4920 Directed Readings
[1-4 credit hours]
Directed readings in Asian Studies of various natures or special topics in Asian Studies. The topic may vary depending on the areas of the instructor and the academic interest of the students.

ASST 4980 Selected Topics in Asian Studies
[3 credit hours]
This course examines various fields with the focus on selected academic topics and substantial Asian Studies. Topics may vary depending on the instructor. May be repeated for different topics.
Term Offered: Spring

DST 2020 Introduction to Disability Studies
[3 credit hours]
An overview of the emergence of disability rights in the U.S. with an emphasis on the independent living movement, disability history, culture and representation in mass media.
Term Offered: Spring, Summer, Fall
Core Social Sciences, Multicultural US Diversity

DST 2410 Introduction to Deaf Studies
[3 credit hours]
Introduces students to Deaf culture and history, varieties within deaf experiences, and contemporary issues shaping the lives of those with hearing impairments. Recommended: DST 2020.

DST 2980 SPECIAL TOPICS IN DISABILITY STUDIES
[3 credit hours]
Special topics in Disability Studies. Topics vary by instructor; may be repeated for credit.
Term Offered: Fall
DST 3030 Disability Culture
[3 credit hours]
An interdisciplinary exploration of the history and culture of disability, including the issues of stigmatizing and stereotyping, communication barriers and breakthroughs, educational segregation and mainstreaming and the experience of "passing."
Term Offered: Spring, Summer, Fall

DST 3040 Disability, Technology, and Society
[3 credit hours]
Interdisciplinary investigation of the relationship between disability and technology, focusing on the social and political dimensions of designing and using technology with, for, and by disabled people.
Term Offered: Spring, Summer, Fall

DST 3060 U.S. Disability History
[3 credit hours]
This course provides a historical overview of the lived experiences of people defined as disabled and changing historical definitions of disability in the region that became the United States of America. We will consider how major historical forces such as capitalism, industrialization, colonialism, and democratic ideals have impacted and been shaped by people with disabilities.
Term Offered: Spring, Fall

DST 3090 Disability in American Literature
[3 credit hours]
Disability In American Literature addresses a wide range of contemporary literary productions, including novels, graphic novels, plays, short stories, poetry, memoir, and personal essays, connecting these productions to an American literary genealogy and recognizing the deployment and resistance to ableism in American Literature. At the course's conclusion, students will be able to understand how literature interacts with cultural stereotypes, ultimately understanding how literature can be utilized for disability justice and social change.
Term Offered: Spring, Summer, Fall

DST 3100 Disability and Chronic Illness
[3 credit hours]
This course investigates the relationship between chronic illness and disability, asking questions such as: Is chronic illness itself a disability? Does chronic illness cause disability? How do the social and medical models of disability affect our understanding of chronic illness? The course uses interdisciplinary texts (investigative journalism, memoir and literary nonfiction, philosophy, history, political science) to interrogate causes, treatments, cures and non-cures for people living with chronic illness.
Term Offered: Spring

DST 3250 Disability and Life Narratives
[3 credit hours]
This course will examine a diverse selection of disability life narratives and consider what they reveal about disability and the dominant culture.
Term Offered: Fall

DST 3600 Feminist Health Humanities
[3 credit hours]
This 15-week course will be taught from intersectional, feminist, health humanities perspectives. We will use the arts and culture in combination with humanistic social theory, to examine the following: gendered and racialized health disparities; gendered and racial constructions in the history of science/medicine; illness and disability life writing; biomedical ethics; the feminist health movement; grassroots community health organizing and feminist conceptualizations of wellbeing and radical self-care. Throughout the semester, there will be a sustained emphasis on health justice and the experiences of marginalized communities (women, people of color, the LGBTQ community, people with disabilities, etc.). Participants will leave the course more aware of important discussions in the health humanities and more fully prepared to apply inclusive knowledge practices within majors and career paths involving "health" – broadly defined. The course fulfills core curriculum requirements for Multicultural U.S. Diversity & Writing Across the Curriculum (WAC).
Term Offered: Spring, Summer, Fall

DST 3700 Disability and Communication
[3 credit hours]
In this course we will explore several key communication aspects of disability in society. We will examine the rhetoric of disability, including the ways disability is conceptualized and talked about as well as the growth of disability movements; communication technology and disability; mass media and disability, including the ways the media portray people with disabilities and disability-related issues; and a number of other topics, including interpersonal communication issues around disability.
Term Offered: Spring, Fall

DST 3980 Special Topics in Disability Studies
[3 credit hours]
Special topics in Disability Studies. Topics vary by instructor, may be repeated for credit.
Term Offered: Spring, Summer, Fall

DST 4000 Global Issues in Disability Studies
[3 credit hours]
Special focus will be on global and contemporary issues as they arise in changing political and social environments. Geopolitical area of focus may vary based instructor expertise.
Term Offered: Fall

DST 4100 Disability and Sexuality
[3 credit hours]
Utilizing a cultural studies approach, this course investigates complex questions of how someone becomes understood as abnormal in contemporary culture. The course looks at the disability justice and LGBTQ+ justice; trans studies and disability studies; public health and private rights. The course uses interdisciplinary texts including memoir and life writing, philosophy, history, public health and sexuality studies to address questions central to disability justice and lived experience.
Term Offered: Spring, Fall

DST 4200 Crip Arts, Crip Culture
[3 credit hours]
This course explores disability art across media and considers its relationships both with disability culture and with the culture-at-large.
Term Offered: Spring
DST 4300 Disability and Children's Literature - WAC
[3 credit hours]
Disabled characters and disability themes abound in texts presented to young readers. This course explores the use of disabled characters in a variety of nonfiction and fiction for young through young-adult readers.
Term Offered: Spring, Fall

DST 4400 Gender and Disability
[3 credit hours]
This course examines gender and disability from both theoretical and lived perspectives, particularly as intersecting with other structures of power such as race, nationality, sexuality, and rights. Recommended: DST 2020, DST 3020.
Term Offered: Spring

DST 4500 Asylums, Prisons and Total Institutions
[3 credit hours]
Institutionalization has been a major factor in the daily experiences and understandings of disability in U.S. culture. This course will reevaluate all assumptions about institutions by analyzing when and why these spaces of containment and enclosure, such as prisons and institutions, arise. We will explore how disability and madness are defined, by whom, and for what purposes. The course concludes by analyzing how some ways activists and scholars combat traditional notions of crime, punishment, disability and incarceration.
Term Offered: Fall

DST 4640 Disability Law and Human Right
[3 credit hours]
Explores the intersections between disability rights and human rights by examining the development, the ideological framework, and the legal contexts of disability law in the U.S. and global contexts. Recommended: DST 2020, 3020, 3030, or 3060.
Term Offered: Spring, Fall

DST 4640 Internship In Disability Studies
[3 credit hours]
This course is a service learning model internship with on-campus and/or community agencies addressing disability studies issues. Sites must be approved by the instructor.
Prerequisites: DST 2020 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

DST 4800 Autism and Culture
[3 credit hours]
This course examines the ongoing construction of autism and the autism spectrum, exploring the many controversies around this remarkable range of human conditions.
Term Offered: Spring, Summer, Fall

DST 4940 Special Topics in Disability Studies
[3 credit hours]
This course allows Disability Studies minors to take disability studies-related courses for DST credit.
Term Offered: Spring, Fall

DST 4990 Capstone in Disability Studies
[3 credit hours]
Provides students with an opportunity to engage with professionals and professors in a seminar format for the intensive study of a topic related to Disability Studies. The focus of the seminar will change from year to year.
Prerequisites: DST 2020 with a minimum grade of D-
Term Offered: Spring, Fall

GLST 2000 Principles Of Global Studies
[3 credit hours]
A multidisciplinary exploration of the world. Global processes will be examined using many viewpoints, such as culture, politics, economics, geography and philosophy.
Term Offered: Spring, Summer, Fall
Multicultural Non-US Diversity

GLST 2980 Topics In Global Studies
[3 credit hours]
An exploration of a specific global issue. Approaches will be explicitly multidisciplinary and will make use of a variety of perspectives. May be repeated for credit.
Term Offered: Spring, Fall

GLST 4900 Senior Seminar In Global Studies
[3 credit hours]
Theories and research methods in global studies will be examined. A major component of the course will be a research project on some aspect of global studies.
Prerequisites: GLST 2000 with a minimum grade of D-
Term Offered: Spring, Summer

GLST 4960 Honors Thesis In Global Studies
[3 credit hours]
Supervised research and writing for honors students only. May be taken twice for credit.
Prerequisites: GLST 2000 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

GLST 4980 Advanced Topics In Global Studies
[3 credit hours]
An advanced multidisciplinary exploration of a specific issue in global studies. May be repeated for credit.
Term Offered: Fall

LST 2010 Law And Social Thought
[3 credit hours]
This course examines the function and force of law in society in an interdisciplinary context. Students are given the opportunity to think about law in relationship to society, morality, politics, language, history and power. Readings may include perspectives from philosophy, literature, psychology, sociology, history, anthropology and opinions of the court.
Term Offered: Spring, Fall
### LST 2030 Cultural Geography
[3 credit hours]
A learning-through-writing course. Systematic applications of the concept of cultural to geographic themes: culture areas, cultural landscapes, culture history, cultural ecology and cultural diversity.

**Term Offered:** Spring
Multicultural Non-US Diversity

### LST 2500 Proseminar I
[1 credit hour]
For sophomore and junior majors in LST: discussion among faculty and students of the interdisciplinary study of law and LST program development. Topics vary, may be repeated for credit.

**Prerequisites:** LST 2010 with a minimum grade of D-
**Term Offered:** Spring, Fall

### LST 2640 Race, Class, And Gender
[3 credit hours]
Introduction to the study of race, class and gender as factors in American satisfaction.

**Term Offered:** Spring, Summer, Fall
Core Social Sciences, Multicultural US Diversity, Trans Mod Social Science

### LST 2700 Principles of Political Theory - WAC
[3 credit hours]
This course investigates core concepts in the history of political theory such as justice, liberty, and equality. We discuss how and why the influence of certain authors and ideas persists. Contemporary issues are interpreted using these authors and ideas in order to strengthen critical thinking skills and broaden students’ thinking about politics.

**Prerequisites:** LST 2010 with a minimum grade of D-
**Term Offered:** Spring, Fall

### LST 2800 Cultural Anthropology
[3 credit hours]
Introduction to culture patterns and processes and their relationship to human society and language.

**Term Offered:** Fall
Core Social Sciences, Multicultural Non-US Diversity, Trans Mod Social Science

### LST 2980 Special Topics
[3 credit hours]
Special topics in Law and Social Thought. Topics vary by instructor, may be repeated for credit.

**Prerequisites:** LST 2010 with a minimum grade of D-
**Term Offered:** Spring, Summer, Fall

### LST 3050 Economics Of Gender
[3 credit hours]
Analysis of labor market outcomes and income distribution characteristics resulting from gender differences; gender-related economic outcomes: the "feminization of poverty," persistent male-female wage differential, expanding proportions of female-headed and same sex households.

**Term Offered:** Spring, Summer, Fall
Multicultural US Diversity

### LST 3060 U.S. Disability History
[3 credit hours]
This course provides a historical overview of the lived experiences of people defined as disabled and changing historical definitions of disability in the region that became the United States of America. We will consider how major historical forces such as capitalism, industrialization, colonialism, and democratic ideals have impacted and been shaped by people with disabilities.

**Prerequisites:** LST 2010 with a minimum grade of D-

### LST 3070 Economics And Law
[3 credit hours]
Methodologies of Law and Economics; Legal institutions; Economic Theory of Property; Property Rights; Contract Theory; Economic Theory of Torts and Tort Law, Common Law Process; Economics of Crime and Punishment.

### LST 3080 Economics Of Crime
[3 credit hours]
Study of crime as an economic activity; costs of crime to the community; economic approach to crime reduction.

**Term Offered:** Spring, Fall

### LST 3180 Mass Communication Law
[3 credit hours]
Case studies and readings in libel, privacy, access and other legal issues arising from constitutional, judicial and administrative laws that affect mass communication.

**Prerequisites:** COMM 2000 with a minimum grade of D-
**Term Offered:** Spring, Fall

### LST 3270 Campaign and Elections
[3 credit hours]
In this course, we examine how citizens participate in electoral politics. Topics covered throughout the semester include candidate recruitment, voting behavior, interest groups, campaign finance, and the impact of how technologies on party mobilization.

### LST 3500 Proseminar II
[1 credit hour]
For Junior and Senior majors in LST: discussion among faculty and students of the interdisciplinary study of law and LST program development. Topics vary, may be repeated for credit.

**Prerequisites:** LST 2010 with a minimum grade of D-
**Term Offered:** Spring

### LST 3510 Constitutional Law I
[3 credit hours]
Examines the political and institutional role of the U.S. Supreme Court in the development of the American legal system, the separation of powers between the executive, legislative, and judicial branches of the federal government, and the relationship between the federal government and the states. The course focuses on the analysis of Supreme Court cases as well as political science and legal scholarship.

**Term Offered:** Spring, Fall

### LST 3520 Constitutional Law II
[3 credit hours]
The development of the American legal system and the implications of judicial decisions affecting the institutions and powers of government, the federal system and the relationship of the individual to government.

**Prerequisites:** PSC 1200 with a minimum grade of D-
**Term Offered:** Spring, Fall
LST 3550 Principles Of Law
[3 credit hours]
An overview of the politics of law. We examine such questions as the sources and existence of law, the legal process in civil and criminal cases, the nature of rights and the search for justice through participation in the legal system. Addresses specific issues such as plea bargaining and jury trials, personal injury lawsuits, national security and police powers, and the nomination and confirmation of federal judges.
Term Offered: Spring, Summer, Fall

LST 3710 Psychology And The Law
[3 credit hours]
Emphasizes the utilization of theoretical and empirical notions of psychological science as they apply to both civil and criminal law.

LST 3720 Philosophy Of Law
[3 credit hours]
A study of philosophical issues raised by law such as the relation of law to morality, obligation to obey the law, paternalism, censorship and free speech.

LST 3750 Social And Political Philosophy
[3 credit hours]
A study of classic and contemporary treatments of justice, authority, the relations between individual and community, the meaning of freedom and equality, power and violence, and race and gender.
Term Offered: Fall

LST 3760 Crime And Punishment
[3 credit hours]
A philosophical study of topics such as crime, responsibility, justice and punishment. Special attention is paid to current practices in the criminal justice system.
Term Offered: Fall

LST 3770 Art and Disease - WAC
[3 credit hours]
This WAC course considers how objects of material culture (film, photography, painting, sculpture, etc.) have intersected with disease while studying disease-related texts and histories of contagion (e.g., AIDS). Web-assisted course.
Prerequisites: LST 2010 with a minimum grade of D-

LST 3800 Sexual Politics
[3 credit hours]
This course examines sexual politics through studying canonical literature of Western political theory, feminism and postmodern theory.
Term Offered: Spring, Fall

LST 3810 Political Geography
[3 credit hours]
An examination of geopolitical and geostrategic issues at the nation-state and international level.
Term Offered: Spring, Fall

LST 3820 Contemporary Political Ideas
[3 credit hours]
Surveys trends in 20th century political and social thought, including critical theory, post-structuralist theory, feminism and anti-racist politics. Particular issues addressed include bureaucracy, mass society, state and civil violence, and identity politics.
Term Offered: Spring

LST 3840 Visual Construction of Gender - WAC
[3 credit hours]
This WAC course focuses on the ways in which images reflect and shape our understanding of gender. Students learn to analyze visual material to identify and articulate their cultural significance in relation to gender. Web-assisted course.
Prerequisites: LST 2010 with a minimum grade of D-

LST 3860 Gender And Geography
[3 credit hours]
Traces the development and institutionalization of gender roles and how these influence spatial decisions and the formation of perceptual landscapes.

LST 3980 Special Topics
[3 credit hours]
Special topics relating to issues in Law and Social Thought. Topics vary by instructor, may be repeated for credit.
Prerequisites: LST 2010 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

LST 4000 Global Issues in Disability Studies
[3 credit hours]
Special focus will be on global and contemporary issues as they arise in changing political and social environments. Geopolitical area of focus may vary based on instructor expertise.
Prerequisites: LST 2010 with a minimum grade of D-

LST 4010 Islamic Law and Society
[3 credit hours]
This course will survey Islamic law in historical and comparative modern contexts. This course will provide (a) basic introduction to the sources and methods of classical Islamic legal interpretation, (b) survey of the most pressing areas in which traditional Islamic norms remain relevant today—criminal law, family law, and commercial law, (c) the challenges and transformations introduced by colonialism, modernity, and the nation-state, and (d) comparison with the American law and the constitution, highlighting comparative interpretive methods such as originalism versus progressivism, and innovative dimensions of Islamic law such as legal pluralism, wide room for local custom, religious diversity, and restorative justice.
Term Offered: Spring

LST 4170 Law And Society
[3 credit hours]
Dynamics of law and legal institutions; the relationship of sociocultural changes in substantive and procedural aspects of law to the concept of justice, and to the social control of deviance.

LST 4490 Witchcraft And Magic In Medieval And Early Modern Europe
[3 credit hours]
Witchcraft, religion and magic in western Europe from the 12th through 17th centuries, focusing on the origins of witchcraft belief, diabolical magic, the witch craze and its decline.

LST 4530 Civil Rights
[3 credit hours]
A study of judicial policy-making and administrative implementation of decisions affecting racial issues, freedom of expressions, national security and criminal procedures.
LST 4550 Issues In Contemporary Law
[3 credit hours]
Examination of contemporary approaches to the analyses of law and the judicial system with special focus on current issues facing the courts.
Term Offered: Spring, Fall

LST 4570 Legal Issues
[3 credit hours]
Topics may include abortion, three strikes sentencing, homosexual rights, hate speech and decriminalizing narcotics. Emphasizes liberal/conservative ideology.

LST 4580 International Law
[3 credit hours]
An examination of the legal status of nation states and dependencies and the rules concerning international diplomacy, treatment of persons and peaceful settlement of disputes.

LST 4590 Law, Policy And The Politics of Sexuality
[3 credit hours]
This course explores the public policies that affect the lesbian, gay, bisexual and transgender communities in the United States and in other countries. It examines the factors that affect policymaking in this area.
Term Offered: Spring, Fall

LST 4640 Disability Law and Human Right
[3 credit hours]
Explores the intersections between disability rights and human rights by examining the development, the ideological framework, and the legal contexts of disability law in the U.S. and global contexts.
Prerequisites: LST 2010 with a minimum grade of D-

LST 4710 Criminology
[3 credit hours]
Crime and criminal behavior: nature, types and extent of crime, societal reactions; problems in research and theory, prevention, control and treatment.
Term Offered: Summer

LST 4740 Issues In Crime
[3 credit hours]
Topics may include legalizing drugs, police violence, please bargaining, death sentence and mandatory sentencing. Emphasizes liberal/conservative ideology.

LST 4770 Human Rights
[3 credit hours]
What are human rights? How are human rights created? Why do states protect or repress human rights? This class answers these questions by examining both the theoretical and empirical contributions to the study of human rights from the social sciences and law. In addition, human rights best (and worst) practices are considered.

LST 4820 Anthropology Of Religion
[3 credit hours]
A cross-cultural approach to the description and analyses of magical and religious beliefs and practices in Asia, Africa, Latin America and Indigenous North America.
Prerequisites: ANTH 2800 with a minimum grade of D-
Term Offered: Spring, Fall

LST 4830 Theory Of Public History
[3 credit hours]
The definition, philosophy and evolution of public history as well as the current literature and debates within the field. Public history is the application of historical knowledge and methodology beyond academe.

LST 4840 Ecotourism: Studies of the Africana World
[3 credit hours]
Introduce students to the field of ecotourism studies and specific challenges of community development and sustainability. The course covers ecotourism in the Africana world of Africa, the Caribbean, and Latin America.
Prerequisites: LST 2010 with a minimum grade of D-

Africana Studies Program
Interdisciplinary Major
Angela M. Siner, Director and Advisor
The program seeks to promote greater understanding of the historical, cultural, and socio-economic developments in the black community, nationally and globally. Africana studies undergraduates take classes across disciplines. This is an excellent program for students who are intellectually curious and passionate about social justice and community activism.

Degrees Offered
• B.A. in Africana Studies (p. 195)
• Minor in Africana Studies (p. 196)
AFST 1100 Introduction To Africana Studies
[3 credit hours]
Introductory survey of basic theoretical concepts to analyze the Black experience, with special focus on the general historical process common to the African Diaspora (Africa, Caribbean and the Americas - South, Central and North, especially the USA.)
Term Offered: Spring, Summer, Fall
Multicultural US Diversity

AFST 1110 African Civilization
[3 credit hours]
General cultural and historical survey of Africa south of the Sahara from earliest times to the 20th century. Includes topics on art, literature, philosophy, religion and society.
Core Arts & Humanities, Multicultural Non-US Diversity

AFST 1200 Introduction To The African Experience
[3 credit hours]
Introduction to the African experience through case studies of critical historical experiences: origin of humanity, origin of civilization, empire and traditional society.
Term Offered: Spring, Summer, Fall
Multicultural Non-US Diversity

AFST 2100 Foundations Of Black Intellectual History
[3 credit hours]
Prerequisites: AFST 1180 with a minimum grade of D- or AFST 1200 with a minimum grade of D-
Term Offered: Spring
Multicultural US Diversity

AFST 2200 Foundation Of Culture In The African Diaspora
[3 credit hours]
Examination of culture in the African Diaspora by focusing on continuities and discontinuities in music and dance, material culture, language and folklore and the cultural practices of everyday life.
Prerequisites: AFST 1100 with a minimum grade of D- or AFST 1200 with a minimum grade of D-
Multicultural Non-US Diversity

AFST 2220 History Of Jazz
[3 credit hours]
A study of the development of jazz styles including listening skills and historical perspectives. Because the major innovations and stylistic interpretations of jazz are a result of African Americans, the course includes a study of how their culture influenced the development of jazz. Students may take P/NC.
Term Offered: Spring, Summer, Fall
Core Arts & Humanities, Multicultural US Diversity, Trans Mod Arts and Humanities

AFST 2300 Black Community Research Methods
[3 credit hours]
Survey of basic social research methods and studies focusing on the Black community. Class conducts research on Black community of Toledo. Offered as companion to AFST 2400. Topics change each year. Course can be taken twice.
Prerequisites: AFST 1100 with a minimum grade of D-
Term Offered: Fall

AFST 2400 Ecotourism: Studies of the Africana World
[3 credit hours]
Introduce students to the field of ecotourism studies and specific challenges of community development and sustainability. The course covers ecotourism in the Africana world of Africa, the Caribbean, and Latin America.
Term Offered: Spring, Fall
AFST 3850 Political Institutions and Grassroots Politics
[3 credit hours]
Using a hybrid of professional experience and relevant literature, the instructor will educate students about macro and micro levels of political engagement. The course is taught by a seasoned politician, professional policy formulator, and/or experienced grassroots organizer who synergizes grassroots politics with mainstream political institutions to effect positive social change.

AFST 3900 Perspectives on African American Education
[3 credit hours]
Covers the history and cultural heritage of African Americans and an in-depth knowledge of experiences of African American student populations in preparation for a variety of career fields, including education, social work, criminal justice, business, nursing, and other professions. Examines key debates and policy proposals to better understand current issues impacting African American student populations. U.S. Diversity
Term Offered: Spring, Fall
Multicultural US Diversity

AFST 4650 African American Writers Before The 20th Century
[3 credit hours]
A survey of African-American prose, poetry, drama and fiction from 1760 to 1915. Recommended: ENGL 2700, 2800, or 3790.
Term Offered: Fall
Multicultural US Diversity

AFST 4660 African American Literature In The 20th and 21st Century
[3 credit hours]
A course focused on 20th and 21st century African American poetry, fiction, nonfiction, and drama.
Term Offered: Spring, Summer, Fall
Multicultural US Diversity

AFST 4800 Social Change in Developing Nations
[3 credit hours]
The new emerging ideological, political, social and economic patterns which repeat themselves in and determine the Third World transition from a traditional to a new society.
Term Offered: Fall
Multicultural Non-US Diversity

AFST 4900 Senior Seminar
[3 credit hours]
General theoretical synthesis of the field focusing on a close reading of a recent biographical work of intellectual history, a recent work of cultural criticism and a recent work of social analysis.
Term Offered: Spring, Summer, Fall

AFST 4910 Directed Research
[1-6 credit hours]
Student selected research topic under the supervision of faculty member and the Director of Africana Studies. Permission to enroll is contingent on a written proposal by the student being accepted by the two sponsoring faculty.
Term Offered: Spring, Summer

AFST 4920 Directed Readings
[1-6 credit hours]
For advanced students wishing to read a specialized literature in the field. Requires a written proposal approved by faculty and Director of the Program.
Prerequisites: AFST 1100 with a minimum grade of D- or AFST 1200 with a minimum grade of D-

AFST 4980 Special Topics In Africana Studies
[3 credit hours]
Discussion of a substantial issue in scholarly research or public discourse relative to the African Diaspora. May be repeated for different issues. Maximum number of hours for AFST 4980 should not exceed 9 semester hours.
Term Offered: Spring, Summer, Fall

Honors in Africana Studies

Majors in Africana Studies are strongly encouraged to pursue program honors. In order to earn program honors, the student must:

1. Have a minimum AFST GPA of 3.3 and a minimum cumulative GPA of 3.0.
2. Submit two papers from different, advanced AFST courses to Program Director. These courses will also satisfy the AFST elective or upper division seminar requirements.
3. Write a thesis or complete a service-learning project under the direction of an AFST-affiliated faculty member. Students must enroll in Honors Thesis in AFST. Participation in the University Honors College is not required for those seeking program honors.
4. Honors Thesis AFST (3 hours) will count as an elective course in the required courses for the major.

B.A. in Africana Studies

A major in Africana Studies consists of a minimum of 33 hours of coursework, 15 required hours of Africana Studies and an additional 18 elective hours, at least 15 of which must be at the 3000/4000 level. Students can choose from the following subjects to fulfill the 15 required hours of the Africana Studies major.

**AFST 3000-AFST 4000** Major Elective

(1) Demonstrate the ability to organize knowledge at a level of sophistication as well as persuasively communicate the value of a strong liberal arts education. (Broad Integrative Knowledge)

(2) Explain the distinctive intellectual tradition as well as the core ideas and approaches of Africana Studies; Write clearly and critically about complex concepts and competing theories. (Intellectual Skills)

**Minor in Africana Studies**

To earn a minor in African studies, students must complete a total of 21 hours of course work in African studies: 9 hours of required courses in African Studies, and an additional 12 hours of advanced courses at the 3000/4000 level in African Studies.

**Code** | **Title**                                                                 | **Hours** |

**Advance Courses**

With the approval of the program adviser, select a minimum of 12 hours of coursework at the 3000/4000 level in African Studies.

**Total Hours** | **21**

**Asian Studies Program**

**Interdisciplinary Major**

An Chung Cheng, Director and Adviser

**Degrees Offered**

- B.A. in Asian Studies (p. 197)
- Minor in Asian Studies (p. 198)
ASST 2100 Introduction to Asian Studies
[3 credit hours]
Introduction to Asian studies will introduce students to important facet of Asian countries including their culture, historical and modern, social and economic systems. Students will learn the cultural bases of Asian countries or regions. The course will be an integral part of the education of those majoring or minoring in Asian Studies.
Term Offered: Spring, Fall
Multicultural Non-US Diversity

ASST 3010 Issues in Asian Studies
[3 credit hours]
The course covers various topics in Asian Studies, from some specific topics such as Buddhism to the general area of Asian culture. The particular topic may vary depending on the areas of the instructor and the academic interest of the students. It can also serve various topics offered in the study-abroad program.
Term Offered: Spring, Summer, Fall
Multicultural Non-US Diversity

ASST 4910 Directed Research
[1-4 credit hours]
Directed research on a specific topic in Asian Studies. The topic will vary on the instructor and the interest of student in the field.
Term Offered: Spring, Summer, Fall

ASST 4920 Directed Readings
[1-4 credit hours]
Directed readings in Asian Studies of various natures or special topics in Asian Studies. The topic may vary depending on the areas of the instructor and the academic interest of the students.

ASST 4980 Selected Topics in Asian Studies
[3 credit hours]
This course examines various fields with the focus on selected academic topics and substantial Asian Studies. Topics may vary depending on the instructor. May be repeated for different topics.
Term Offered: Spring

B.A. in Asian Studies
An Chung Cheng – Program Advisor

This program is designed to provide the student with a comprehensive and systematic training in Asian affairs for a liberal education and career preparation. Emphasis is placed on political science, economics, history, geography, Asian languages, etc. In addition to academic courses, activities in the Institute for Asian Studies conducted through the Center for International Studies and Programs include lectures, seminars, and study abroad programs in Asia as well as selected exchanges in the region.

In addition to the general education requirements of the University of Toledo and the College of Arts and Letters, students will take 30 hours in Asian Studies selected from (but not limited to) the list of courses below. Students must select courses from a minimum of three different departments; no more than 15 hours of course work from one department will count toward the Asian Studies major.

Total Hours 30

With the approval of the adviser, a maximum of six elective hours may be chosen from independent study courses offered by various departments (other than ASST 4910 and ASST 4920). This general distributive pattern is designed to encourage the student to examine the various aspects of Asian Studies. Asian Studies majors are encouraged to take Japanese, (or Chinese or other Asian languages, if offered) for their foreign language requirement.

In addition to the 30 hours in the major, students are required to take 18 hours in related courses in humanities, social sciences, natural sciences, business, law and other areas chosen in consultation with the adviser. Under special circumstances, certain courses in other colleges may be used to satisfy the related requirement.

Below is a sample plan of study. Consult your degree audit for your program requirements.

---

1. Communication objectives: Students can interpret oral and written texts, present information, and participate in spontaneous spoken and writing exchanges on relevant topics in one of the major languages in Asia, including Chinese, Japanese. In their own and Asian cultures, students can compare and explain some diversity among products and practices and how it relates to perspectives.

2. Content objectives: Students can demonstrate their knowledge of the history, culture, economies, societies, and political systems of Asia and main Asian countries. Students can investigate underlying assumptions, describe inequalities and power dynamics, and critically assess how power dynamics affect the voice, influence, access to resources, decision-making, and governance.

3. Global community objectives: Students can investigate, explain, and reflect on culture exchanges between selected Asian countries and the U.S. Students can initiate investigations of Asia by framing questions, analyzing and synthesizing relevant evidence, and drawing reasonable conclusions about Asian and global issues.

### Minor in Asian Studies

Note: If a student enters UT with enough prior proficiency in an Asian language beyond the 2000 level, then to complete the minor, the student will need to enroll in 6 hours of 3000-level or above language courses or 6 hours of i courses in a different Asian language, based on the placement test.

framework of social and cognitive behaviors and population trends. work with big data sets, and make sense of analytical results within the quantitative and methodological skills to employ analytical techniques, given this, the college of arts and letters is able to provide a unique interpret data in relation to that human element.

analysts need to understand how people think and behave, and who can effectively develop and utilize the data that they are able to access.

the analysis of big data requires people trained in the social sciences who can effectively develop and utilize the data that they are able to access.

Given this, the college of arts and letters is able to provide a unique undergraduate program in data analytics through our social science curriculum and faculty strengths.

Given this, the college of arts and letters is able to provide a unique undergraduate program in data analytics through our social science curriculum and faculty strengths.

Within that category for DAAN majors, an area of concentration is required in one of the following subjects: Economics, Geography and Planning, Political Science and Public Administration, Psychology, Sociology or Anthropology. Alternatively, this requirement can also be satisfied through earning a minor in an approved social science. Consult with the program advisor when selecting courses to fulfill this requirement.

1. Communication objectives: Students are able to interpret oral and written texts, present information and participate in spontaneous spoken and writing exchange on relevant topics in one of the major languages in Asia (e.g., Arabic, Chinese, Japanese). In their own and Asian cultures, students can compare and explain diverse cultural products and practices and how they relate to perspectives at a basic level.

2. Content objectives: Students are able to demonstrate their knowledge of the arts, history, culture, religion, philosophy, economies, society, and politics of a selected country or a region in Asia. Students can investigate underlying assumptions, describe inequalities and power dynamics, and critically assess the ways in which power dynamics affect voice, influence, access to resources, decision-making, and governance.

3. Global community objectives: Students are able to investigate, explain, and reflection on culture exchanges between selected Asian countries and the U.S. Student can initiate investigations of the Asia by framing questions, analyzing and synthesizing relevant evidence, and drawing reasonable conclusions about Asian and global issues.

Data Analytics Programs

Faculty Advisor, major in Data Analytics: Dr. Kevin Egan, Department of Economics

Faculty Advisor, minor in Data Analytics: Dr. Dan Hammel, Department of Geography and Planning

The analysis of big data requires people trained in the social sciences who can effectively develop and utilize the data that they are able to access. Analysts need to understand how people think and behave, and interpret data in relation to that human element.

Given this, the college of arts and letters is able to provide a unique undergraduate program in data analytics through our social science curriculum and faculty strengths.

This major calls for specific courses to be taken to fulfill the 18 credit related category. Within that category for DAAN majors, an area of concentration is required in one of the following subjects: Economics, Geography and Planning, Political Science and Public Administration, Psychology, Sociology or Anthropology. Alternatively, this requirement can also be satisfied through earning a minor in an approved social science. Consult with the program advisor when selecting courses to fulfill this requirement.

Ally Day, Advisor

BA to MBA program

Students interested in completing both the BA in Disability Studies and an MBA in 5 years should meet with the Director of Disability Studies in their first year. Students admitted into this program complete their BA in Disability Studies with a minor in Business by the end of their 7th semester, and complete the MBA in three additional semesters.

Degrees Offered

- B.A. in Disability Studies (p. 203)
- Disability Studies Minor (p. 204)

DST 2020 Introduction to Disability Studies
[3 credit hours]
An overview of the emergence of disability rights in the U.S. with an emphasis on the independent living movement, disability history, culture and representation in mass media.
Term Offered: Spring, Summer, Fall
Core Social Sciences, Multicultural US Diversity

DST 2410 Introduction to Deaf Studies
[3 credit hours]
Introduces students to Deaf culture and history, varieties within deaf experiences, and contemporary issues shaping the lives of those with hearing impairments. Recommended: DST 2020.

DST 2980 SPECIAL TOPICS IN DISABILITY STUDIES
[3 credit hours]
Special topics in Disability Studies. Topics vary by instructor; may be repeated for credit.
Term Offered: Fall

DST 3030 Disability Culture
[3 credit hours]
An interdisciplinary exploration of the history and culture of disability, including the issues of stigmatization and stereotyping, communication barriers and breakthroughs, educational segregation and mainstreaming and the experience of "passing."
Term Offered: Spring, Summer, Fall

DST 3040 Disability, Technology, and Society
[3 credit hours]
Interdisciplinary investigation of the relationship between disability and technology, focusing on the social and political dimensions of designing and using technology with, for, and by disabled people.
Term Offered: Spring, Summer, Fall

DST 3060 U.S. Disability History
[3 credit hours]
This course provides a historical overview of the lived experiences of people defined as disabled and changing historical definitions of disability in the region that became the United States of America. We will consider how major historical forces such as capitalism, industrialization, colonialism, and democratic ideals have impacted and been shaped by people with disabilities.
Term Offered: Spring, Fall

DST 3090 Disability in American Literature
[3 credit hours]
Disability In American Literature addresses a wide range of contemporary literary productions, including novels, graphic novels, plays, short stories, poetry, memoir, and personal essays, connecting these productions to an American literary genealogy and recognizing the deployment and resistance to ableism in American Literature. At the course's conclusion, students will be able to understand how literature interacts with cultural stereotypes, ultimately understanding how literature can be utilized for disability justice and social change.
Term Offered: Spring, Summer, Fall

DST 3100 Disability and Chronic Illness
[3 credit hours]
This course investigates the relationship between chronic illness and disability, asking questions such as: Is chronic illness itself a disability? Does chronic illness cause disability? How do the social and medical models of disability affect our understanding of chronic illness? The course uses interdisciplinary texts (investigative journalism, memoir and literary nonfiction, philosophy, history, political science) to interrogate causes, treatments, cures and non-cures for people living with chronic illness.
Term Offered: Spring

DST 3250 Disability and Life Narratives
[3 credit hours]
This course will examine a diverse selection of disability life narratives and consider what they reveal about disability and the dominant culture.
Term Offered: Fall
DST 3600 Feminist Health Humanities  
[3 credit hours]  
This 15-week course will be taught from intersectional, feminist, health humanities perspectives. We will use the arts and culture in combination with humanistic social theory, to examine the following: gendered and racialized health disparities; gendered and racial constructions in the history of science/medicine; illness and disability life writing; biomedical ethics; the feminist health movement; grassroots community health organizing and feminist conceptualizations of wellbeing and radical self-care. Throughout the semester, there will be a sustained emphasis on health justice and the experiences of marginalized communities (women, people of color, the LGBTQ community, people with disabilities, etc.). Participants will leave the course more aware of important discussions in the health humanities and more fully prepared to apply inclusive knowledge practices within majors and career paths involving "health" – broadly defined. The course fulfills core curriculum requirements for Multicultural U.S. Diversity & Writing Across the Curriculum (WAC).  
Term Offered: Spring, Summer, Fall  
Multicultural US Diversity

DST 3700 Disability and Communication  
[3 credit hours]  
In this course we will explore several key communication aspects of disability in society. We will examine the rhetoric of disability, including the ways disability is conceptualized and talked about as well as the growth of disability movements; communication technology and disability; mass media and disability, including the ways the media portray people with disabilities and disability-related issues; and a number of other topics, including interpersonal communication issues around disability.  
Term Offered: Spring, Fall

DST 3980 Special Topics in Disability Studies  
[3 credit hours]  
Special topics in Disability Studies. Topics vary by instructor, may be repeated for credit.  
Term Offered: Spring, Summer, Fall

DST 4000 Global Issues in Disability Studies  
[3 credit hours]  
Special focus will be on global and contemporary issues as they arise in changing political and social environments. Geopolitical area of focus may vary based instructor expertise.  
Term Offered: Fall

DST 4100 Disability and Sexuality  
[3 credit hours]  
Utilizing a cultural studies approach, this course investigates complex questions of how someone becomes understood as abnormal in contemporary culture. The course looks at the disability justice and LGBTQA+ justice; trans studies and disability studies; public health and private rights. The course uses interdisciplinary texts including memoir and life writing, philosophy, history, public health and sexuality studies to address questions central to disability justice and lived experience.  
Term Offered: Spring, Fall

DST 4200 Crip Arts, Crip Culture  
[3 credit hours]  
This course explores disability art across media and considers its relationships both with disability culture and with the culture-at-large.  
Term Offered: Spring

DST 4300 Disability and Children's Literature - WAC  
[3 credit hours]  
Disabled characters and disability themes abound in texts presented to young readers. This course explores the use of disabled characters in a variety of nonfiction and fiction for young through young-adult readers.  
Term Offered: Spring, Fall

DST 4400 Gender and Disability  
[3 credit hours]  
This course examines gender and disability from both theoretical and lived perspectives, particularly as intersecting with other structures of power such as race, nationality, sexuality, and rights. Recommended: DST 2020, DST 3020.  
Term Offered: Spring

DST 4500 Asylums, Prisons and Total Institutions  
[3 credit hours]  
Institutionalization has been a major factor in the daily experiences and understandings of disability in U.S. culture. This course will reevaluate all assumptions about institutions by analyzing when and why these spaces of containment and enclosure, such as prisons and institutions, arise. We will explore how disability and madness are defined, by whom, and for what purposes. The course concludes by analyzing how some ways activists and scholars combat traditional notions of crime, punishment, disability and incarceration.  
Term Offered: Fall

DST 4640 Disability Law and Human Right  
[3 credit hours]  
Explores the intersections between disability rights and human rights by examining the development, the ideological framework, and the legal contexts of disability law in the U.S. and global contexts. Recommended: DST 2020, 3020, 3030, or 3060.  
Term Offered: Spring, Fall

DST 4700 Disability and the Arts  
[3 credit hours]  
Explores the role of the arts in the construction and representation of disability. Includes works by and about people with disabilities, emphasizing interdisciplinary perspectives.  
Term Offered: Spring, Fall

DST 4800 Autism and Culture  
[3 credit hours]  
This course examines the ongoing construction of autism and the autism spectrum, exploring the many controversies around this remarkable range of human conditions.  
Term Offered: Spring, Summer, Fall

DST 4940 Internship In Disability Studies  
[3 credit hours]  
This course is a service learning model internship with on-campus and/or community agencies addressing disability studies issues. Sites must be approved by the instructor.  
Prerequisites: DST 2020 with a minimum grade of D-  
Term Offered: Spring, Summer, Fall

DST 4950 Independent Study  
[1-4 credit hours]  
Students engage in independent research projects with the supervision of a faculty member.  
Term Offered: Spring, Summer, Fall

DST 4960 Honors Thesis and Capstone Project  
[1-4 credit hours]  
Independent study projects for students seeking departmental honors.  
Term Offered: Spring, Summer, Fall
DST 4980 Special Topics in Disability Studies
[3 credit hours]
This course allows Disability Studies minors to take disability studies-related courses for DST credit.
Term Offered: Spring, Fall

DST 4990 Capstone in Disability Studies
[3 credit hours]
Provides students with an opportunity to engage with professionals and professors in a seminar format for the intensive study of a topic related to Disability Studies. The focus of the seminar will change from year to year.
Prerequisites: DST 2020 with a minimum grade of D-
Term Offered: Spring, Fall

Qualified juniors and seniors are invited to work for the citation “honors in Disability Studies.”

1. Admission: The Honors Program is open to all undergraduate Disability Studies majors whether or not they are enrolled in College Honors. Students who have shown superior ability in their freshman and sophomore years and who show promise of continuing good performance in the major should apply to the Disability Studies Program for enrollment in the DST Honors Program. Ordinarily, the student must have a minimum cumulative GPA of 3.0.

2. Requirements: To be awarded honors in Disability Studies, the student must complete a senior thesis and must take nine of the 33-hour major requirements in the honors and honors recognition courses offered by the department. Every regularly scheduled 3000- or 4000-level course can be given honors recognition by assigning readings and research in addition to the normal requirements of the course. To remain in the program, the student ordinarily must maintain a minimum GPA of 3.3 in the major.

B.A. in Disability Studies

The major in Disability Studies (DST) consists of a minimum of 33 credit hours.

Total Hours: 18

Total hours will vary based on electives selected but must be at least 120. Note that remedial courses or repeated courses will delay graduation beyond 8 semesters.

Explain the contributions, experiences, history, and culture of people with disabilities regionally, nationally, and internationally.

Explain disability as a sociocultural phenomenon and apply that analysis to historical and contemporary contexts.

Critique representations of disability in media.

Analyze the intersections among disability and sex/gender, race, nationality, religion, and sexuality in contemporary and historical discourse and policies.

Develop and defend their own positions on issues regarding accessibility, disability, and contemporary social ideals.

Evaluate social policies and programs regarding effects on people with disabilities, and design alternative policies/programs as necessary.

Demonstrate effective writing and other communication skills.
e) To ensure that all undergraduate majors acquire and be able to demonstrate adequate writing and communication skills, demonstrated in writing intensive courses, a capstone course or senior thesis, and oral class presentations.

f) To prepare students to apply knowledge of disability to their selected professional and civic lives, and explain those applications in course assignments.

**General Studies - B.A.**

**DEGREE REQUIREMENTS**

The General Studies program has been established in recognition of the fact that existing majors may not satisfy the needs of all students desiring a liberal education. General Studies is an interdisciplinary program that allows students to select a core area of concentration and cognate coursework not offered in traditional majors. Students who plan to pursue graduate or professional degree programs or enter certain employment areas that require established curricular backgrounds may find it to their advantage to consider existing majors offered within the college rather than the General Studies option. The standard majors have wider acceptance and more readily identify the nature and quality of an individual’s academic background. Students should not declare this major before they have completed 80 credit hours. Students seeking admission to this program will be interviewed by an advisor in the college Student Services Office and must have sound reasons for their choice. Once accepted into the program, students must have their courses approved by the General Studies advisor for use in the core area of concentration and the cognate requirement.

Under this program, the University General Education and College of Arts and Letters Skills curriculum requirements specified in the Degree Requirements section of this catalog must be fulfilled, and an area of concentration in the natural sciences, social sciences or humanities must be identified for the purpose of determining education requirements. Students must take at least 64 hours of courses at the 2000 level or higher and at least 32 hours of courses at the 3000/4000 level and have earned a minimum of 120 hours to be eligible for graduation. In lieu of a major, students must take at least 15 but not more than 34 hours of course work in a single department to serve as the core area and 16-35 hours of course work to serve as the cognate for a total of 50 hours. Students must meet a minimum GPA average of 2.0 in a GPA calculation of the core area as well as a secondary GPA calculation of the core area and the cognate.

Courses used for the core concentration must be courses that would count in the major in those departments.

Upon completion of the program, students will be able to:
1. write clearly and effectively for a variety of audiences and purposes
2. use quantitative reasoning to analyze problems and identify solutions
3. locate, interpret, determine the credibility of, and use information effectively, ethically, and legally
4. analyze and evaluate alternative points of view
5. demonstrate critical thinking skills in the processes they use to identify and solve problems

Global Studies
Jetsabe Caceres, Director

Students focus on what interests them and take courses across academic disciplines. They can specialize in one geographic area and/or an international topic, such as the environment, security and peace, multicultural communication and many others.

Degrees Offered
- B.A. in Global Studies (p. 206)
- Global Studies Minor (p. 207)

GLST 2000 Principles Of Global Studies
[3 credit hours]
A multidisciplinary exploration of the world. Global processes will be examined using many viewpoints, such as culture, politics, economics, geography and philosophy.
Term Offered: Spring, Summer, Fall
Multicultural Non-US Diversity

GLST 2980 Topics In Global Studies
[3 credit hours]
An exploration of a specific global issue. Approaches will be explicitly multidisciplinary and will make use of a variety of perspectives. May be repeated for credit.
Term Offered: Spring, Fall

GLST 4900 Senior Seminar In Global Studies
[3 credit hours]
Theories and research methods in global studies will be examined. A major component of the course will be a research project on some aspect of global studies.
Prerequisites: GLST 2000 with a minimum grade of D-
Term Offered: Spring, Summer

GLST 4960 Honors Thesis In Global Studies
[3 credit hours]
Supervised research and writing for honors students only. May be taken twice for credit.
Prerequisites: GLST 2000 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

GLST 4980 Advanced Topics In Global Studies
[3 credit hours]
An advanced multidisciplinary exploration of a specific issue in global studies. May be repeated for credit.
Term Offered: Fall

B.A. in Global Studies
Global Studies - Interdisciplinary Major
Jetsabe Caceres, Director

Global studies is a major that allows students to study a variety of international processes in a comprehensive and multidisciplinary program of study. The curriculum is planned so that it offers students a background in global affairs in the broadest sense, as well as an opportunity to focus on one geographic area of the world and one international interest area.

Degrees Offered:
- B.A., Global Studies

Global Studies is a major that allows students to study a variety of international processes in a comprehensive and multidisciplinary program of study. The curriculum is planned so that it offers students a background in global affairs in the broadest sense, as well as an opportunity to focus on one geographic area of the world and one international interest area.

Global Studies requires a minimum of 33 credit hours.

To earn a Global Studies degree, students must complete the requirements in all sections with a minimum of a 2.0 cumulative GPA. In addition, students must complete 18 hours of related fields courses. This may be achieved with a minor chosen in consultation with the Global Studies Advisor.

Below is a sample plan of study for a general Global Studies Degree. Consult your degree audit for your program requirements.

GLST 4900  Senior Seminar In Global Studies  3  
Elective  3  
Elective - GLST Major: Global or Regional focus course  3

| Hours                  | 15                                                                      |

Related Fields or Minor Course  6

Total Hours  120

Students will demonstrate a broad understanding of the development and current functioning of the international system. Students will exhibit critical thinking and well-developed writing skills. Students will have an appreciation for diversity in a global context. Students will gain an acquaintance with the breadth of the field of Global Studies and its related disciplines. Students will exhibit an ability to be an active and responsible participant in global processes.

Global Studies Minor

The minor in global studies is designed as an adjunct course of study for any major in the University. It is especially appropriate for students who want to develop through their course work a broader understanding of global process and conditions. It will help all students to be ready for contributing to an interdependent world.

Interdisciplinary Minors

Because of the interdisciplinary nature of these minors, and because they are not associated with a major degree program, students must work with their advisor in selecting which courses to take. Courses required/counted in the major may not also be taken for minor credit. Whenever possible, courses should be chosen from outside a student’s major.

Degrees Offered

• Minor in Digital Arts and Visual Communication (p. 207)
• Minor in Documentary Production and Practice (p. 208)
• Minor in Sound Production and Design (p. 208)
• Minor in Visual Effects and Animation (p. 208)

Minor in Digital Arts and Visual Communication

Description: A broad range of communication design and creative problem-solving skills will prepare students to apply, and demonstrate an understanding of the visual communication design process using both traditional design skills and the latest computer software.

Minor in Documentary Production and Practice

**Description:** The interdisciplinary minor in Documentary Production and Practice aims to teach students about the history and application of documentary practice so that they may have an understanding of the specific tools and techniques used in the creation of still and moving images that convey factual, scientific and personal histories.

*The College recommends that non-Art majors also take ART 1070 before beginning this minor.*

Latin American and LatinX Studies
Charles Beatty-Medina, Advisor

This minor focuses upon the culture, language, politics, literature, and history of Latin American and US Latinx communities through a wide range of courses in the humanities and social sciences. It provides students with foundational knowledge about the Latin diaspora that supports careers in multiple fields, including but not limited to public service and non-profit work, business, law, and health care.

- Minor in Latin American and LatinX Studies (p. 209)

Minor in Latin American and LatinX Studies

Students electing to pursue a minor in Latin American and Latinx studies must complete:

<table>

<td>15</td>
</tr>
</tbody>
</table>

Total Hours 18

1. Students will demonstrate interdisciplinary knowledge that embraces diverse aspects of the Latin American and Latinx experience including artistic, cultural, political, economic, social, and historical factors.

2. Students will develop an understanding of concepts, theories, and methodologies utilized by diverse disciplines that contribute to the fields of Latin American and Latinx Studies.

3. Students will develop substantive knowledge of Latin American and Latinx peoples and cultures that lead them to develop cross-cultural and international understanding to better act as informed and engaged global citizens.

Law and Social Thought

Interdisciplinary Major

Renee Heberle, Co-Director, Advisor
Jerry Van Hoy, Co-Director, Advisor
Sam Nelson, Pre-Law Advisor

Degrees Offered: Law and Social Thought (LST) offers a program for a bachelor of arts.

LST’s curriculum is strictly interdisciplinary. It provides students with tools for the appraisal of U.S. and other legal systems and the policies, practices and philosophies that underlie them. It encourages reflection on the values that shape citizenship in contemporary democracy. It also focuses on issues of law in relation to morality, politics, language and the arts of critical and creative thinking. LST students are given the responsibility of determining their path through LST, with hands-on advising from the co-directors, and are consulted on questions of program direction and course selection. Upper Division Seminars are selected by students in collaboration with faculty.

Degrees Offered

- B.A. in Law and Social Thought (p. 212)
- Minor in Law and Social Thought (p. 215)

LST 2010 Law And Social Thought
[3 credit hours]
This course examines the function and force of law in society in an interdisciplinary context. Students are given the opportunity to think about law in relationship to society, morality, politics, language, history and power. Readings may include perspectives from philosophy, literature, psychology, sociology, history, anthropology and opinions of the court.

Term Offered: Spring, Fall

LST 2030 Cultural Geography
[3 credit hours]
A learning-through-writing course. Systematic applications of the concept of cultural to geographic themes: culture areas, cultural landscapes, culture history, cultural ecology and cultural diversity.

Term Offered: Spring

Multicultural Non-US Diversity

LST 2500 Proseminar I
[1 credit hour]
For sophomore and junior majors in LST: discussion among faculty and students of the interdisciplinary study of law and LST program development. Topics vary, may be repeated for credit. 

Prerequisites: LST 2010 with a minimum grade of D-

Term Offered: Spring, Fall

LST 2640 Race, Class, And Gender
[3 credit hours]
Introduction to the study of race, class and gender as factors in American satisfaction.

Term Offered: Spring, Summer, Fall

Core Social Sciences, Multicultural US Diversity, Trans Mod Social Science
LST 2700 Principles of Political Theory - WAC
[3 credit hours]
This course investigates core concepts in the history of political theory such as justice, liberty, and equality. We discuss how and why the influence of certain authors and ideas persists. Contemporary issues are interpreted using these authors and ideas in order to strengthen critical thinking skills and broaden students’ thinking about politics.
Prerequisites: LST 2010 with a minimum grade of D-
Term Offered: Spring, Fall

LST 2800 Cultural Anthropology
[3 credit hours]
Introduction to culture patterns and processes and their relationship to human society and language.
Term Offered: Fall
Core Social Sciences, Multicultural Non-US Diversity, Trans Mod Social Science

LST 2980 Special Topics
[3 credit hours]
Special topics in Law and Social Thought. Topics vary by instructor, may be repeated for credit.
Prerequisites: LST 2010 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

LST 3050 Economics Of Gender
[3 credit hours]
Analysis of labor market outcomes and income distribution characteristics resulting from gender differences; gender-related economic outcomes: the "feminization of poverty," persistent male-female wage differential, expanding proportions of female-headed and same sex households.
Term Offered: Spring, Summer, Fall
Multicultural US Diversity

LST 3060 U.S. Disability History
[3 credit hours]
This course provides a historical overview of the lived experiences of people defined as disabled and changing historical definitions of disability in the region that became the United States of America. We will consider how major historical forces such as capitalism, industrialization, colonialism, and democratic ideals have impacted and been shaped by people with disabilities.
Prerequisites: LST 2010 with a minimum grade of D-

LST 3070 Economics And Law
[3 credit hours]
Methodologies of Law and Economics; Legal institutions; Economic Theory of Property; Property Rights; Contract Theory; Economic Theory of Torts and Tort Law, Common Law Process; Economics of Crime and Punishment.

LST 3080 Economics Of Crime
[3 credit hours]
Study of crime as an economic activity; costs of crime to the community; economic approach to crime reduction.
Term Offered: Spring, Fall

LST 3180 Mass Communication Law
[3 credit hours]
Case studies and readings in libel, privacy, access and other legal issues arising from constitutional, judicial and administrative laws that affect mass communication.
Prerequisites: COMM 2000 with a minimum grade of D-
Term Offered: Spring, Fall

LST 3270 Campaign and Elections
[3 credit hours]
In this course, we examine how citizens participate in electoral politics. Topics covered throughout the semester include candidate recruitment, voting behavior, interest groups, campaign finance, and the impact of how technologies on party mobilization.

LST 3500 Proseminar II
[1 credit hour]
For Junior and Senior majors in LST: discussion among faculty and students of the interdisciplinary study of law and LST program development. Topics vary, may be repeated for credit.
Prerequisites: LST 2010 with a minimum grade of D-
Term Offered: Spring

LST 3510 Constitutional Law I
[3 credit hours]
Examines the political and institutional role of the U.S. Supreme Court in the development of the American legal system, the separation of powers between the executive, legislative, and judicial branches of the federal government, and the relationship between the federal government and the states. The course focuses on the analysis of Supreme Court cases as well as political science and legal scholarship.
Term Offered: Spring, Fall

LST 3520 Constitutional Law II
[3 credit hours]
The development of the American legal system and the implications of judicial decisions affecting the institutions and powers of government, the federal system and the relationship of the individual to government.
Prerequisites: PSC 1200 with a minimum grade of D-
Term Offered: Spring, Fall

LST 3550 Principles Of Law
[3 credit hours]
An overview of the politics of law. We examine such questions as the sources and existence of law, the legal process in civil and criminal cases, the nature of rights and the search for justice through participation in the legal system. Addresses specific issues such as plea bargaining and jury trials, personal injury lawsuits, national security and police powers, and the nomination and confirmation of federal judges.
Term Offered: Spring, Summer, Fall

LST 3710 Psychology And The Law
[3 credit hours]
Emphasizes the utilization of theoretical and empirical notions of psychological science as they apply to both civil and criminal law.

LST 3720 Philosophy Of Law
[3 credit hours]
A study of philosophical issues raised by law such as the relation of law to morality, obligation to obey the law, paternalism, censorship and free speech.
LST 3750 Social And Political Philosophy  
[3 credit hours]  
A study of classic and contemporary treatments of justice, authority, the relations between individual and community, the meaning of freedom and equality, power and violence, and race and gender.  
**Term Offered:** Fall

LST 3760 Crime And Punishment  
[3 credit hours]  
A philosophical study of topics such as crime, responsibility, justice and punishment. Special attention is paid to current practices in the criminal justice system.  
**Term Offered:** Fall

LST 3770 Art and Disease - WAC  
[3 credit hours]  
This WAC course considers how objects of material culture (film, photography, painting, sculpture, etc.) have intersected with disease while studying disease-related texts and histories of contagion (e.g., AIDS). Web-assisted course.  
**Prerequisites:** LST 2010 with a minimum grade of D-

LST 3800 Sexual Politics  
[3 credit hours]  
This course examines sexual politics through studying canonical literature of Western political theory, feminism and postmodern theory.  
**Term Offered:** Spring, Fall

LST 3810 Political Geography  
[3 credit hours]  
An examination of geopolitical and geostrategic issues at the nation-state and international level.  
**Term Offered:** Spring, Fall

LST 3820 Contemporary Political Ideas  
[3 credit hours]  
Surveys trends in 20th century political and social thought, including critical theory, post-structuralist theory, feminism and anti-racist politics. Particular issues addressed include bureaucracy, mass society, state and civil violence, and identity politics.  
**Term Offered:** Spring

LST 3840 Visual Construction of Gender - WAC  
[3 credit hours]  
This WAC course focuses on the ways in which images reflect and shape our understanding of gender. Students learn to analyze visual material to identify and articulate their cultural significance in relation to gender. Web-assisted course.  
**Prerequisites:** LST 2010 with a minimum grade of D-

LST 3860 Gender And Geography  
[3 credit hours]  
Traces the development and institutionalization of gender roles and how these influence spatial decisions and the formation of perceptual landscapes.

LST 3980 Special Topics  
[3 credit hours]  
Special topics relating to issues in Law and Social Thought. Topics vary by instructor, may be repeated for credit.  
**Prerequisites:** LST 2010 with a minimum grade of D-

LST 4000 Global Issues in Disability Studies  
[3 credit hours]  
Special focus will be on global and contemporary issues as they arise in changing political and social environments. Geopolitical area of focus may vary based on instructor expertise.  
**Prerequisites:** LST 2010 with a minimum grade of D-

LST 4010 Islamic Law and Society  
[3 credit hours]  
This course will survey Islamic law in historical and comparative modern contexts. This course will provide (a) basic introduction to the sources and methods of classical Islamic legal interpretation, (b) survey of the most pressing areas in which traditional Islamic norms remain relevant today—criminal law, family law, and commercial law, (c) the challenges and transformations introduced by colonialism, modernity, and the nation-state, and (d) comparison with the American law and the constitution, highlighting comparative interpretive methods such as originalism versus progressivism, and innovative dimensions of Islamic law such as legal pluralism, wide room for local custom, religious diversity, and restorative justice.  
**Term Offered:** Spring

LST 4030 Social And Political Philosophy  
[3 credit hours]  
A philosophical study of topics such as crime, responsibility, justice and punishment. Special attention is paid to current practices in the criminal justice system.  
**Term Offered:** Fall

LST 4170 Law And Society  
[3 credit hours]  
Dynamics of law and legal institutions; the relationship of sociocultural changes in substantive and procedural aspects of law to the concept of justice, and to the social control of deviance.

LST 4490 Witchcraft And Magic In Medieval And Early Modern Europe  
[3 credit hours]  
Witchcraft, religion and magic in western Europe from the 12th through 17th centuries, focusing on the origins of witchcraft belief, diabolical magic, the witch craze and its decline.

LST 4530 Civil Rights  
[3 credit hours]  
A study of judicial policy-making and administrative implementation of decisions affecting racial issues, freedom of expressions, national security and criminal procedures.

LST 4550 Issues In Contemporary Law  
[3 credit hours]  
Examination of contemporary approaches to the analyses of law and the judicial system with special focus on current issues facing the courts.  
**Term Offered:** Spring, Fall

LST 4570 Legal Issues  
[3 credit hours]  
Topics may include abortion, three strikes sentencing, homosexual rights, hate speech and decriminalizing narcotics. Emphasizes liberal/conservative ideology.

LST 4580 International Law  
[3 credit hours]  
An examination of the legal status of nation states and dependencies and the rules concerning international diplomacy, treatment of persons and peaceful settlement of disputes.
LST 4590 Law, Policy And The Politics of Sexuality
[3 credit hours]
This course explores the public policies that affect the lesbian, gay, bisexual and transgender communities in the United States and in other countries. It examines the factors that affect policymaking in this area.
Term Offered: Spring, Fall

LST 4640 Disability Law and Human Right
[3 credit hours]
Explores the intersections between disability rights and human rights by examining the development, the ideological framework, and the legal contexts of disability law in the U.S. and global contexts.
Prerequisites: LST 2010 with a minimum grade of D-

LST 4710 Criminology
[3 credit hours]
Crime and criminal behavior: nature, types and extent of crime, societal reactions; problems in research and theory, prevention, control and treatment.
Term Offered: Summer

LST 4740 Issues In Crime
[3 credit hours]
Topics may include legalizing drugs, police violence, plea bargaining, death sentence and mandatory sentencing. Emphasizes liberal/conservative ideology.

LST 4770 Human Rights
[3 credit hours]
What are human rights? How are human rights created? Why do states protect or repress human rights? This class answers these questions by examining both the theoretical and empirical contributions to the study of human rights from the social sciences and law. In addition, human rights best (and worst) practices are considered.

LST 4800 Anthropology Of Religion
[3 credit hours]
A cross-cultural approach to the description and analyses of magical and religious beliefs and practices in Asia, Africa, Latin America and Indigenous North America.
Prerequisites: ANTH 2800 with a minimum grade of D-
Term Offered: Summer

LST 4900 Seminar In Law And Social Thought
[3 credit hours]
Advanced seminar for the interdisciplinary study of law in society. Topics vary by instructor, may be repeated for credit. Required of LST majors.
Prerequisites: LST 2010 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

LST 4940 Field Experience
[1-6 credit hours]
Community work, internship, or field study relating to law and society. May be repeated for credit.
Prerequisites: LST 2010 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

LST 4990 Capstone in Law and Social Thought
[3 credit hours]
The Capstone course in Law and Social Thought is an interdisciplinary, collaboratively taught seminar thematically organized around a topic in the study of law.
Prerequisites: LST 2010 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

Majors in Law and Social Thought are strongly encouraged to pursue program honors. In order to earn program honors, the student must:

1. Have a minimum LST GPA of 3.4 and a minimum cumulative GPA of 3.3.
2. Submit two papers from different, advanced LST courses to the Program Directors. These courses will also satisfy the LST elective or upper division seminar requirements.
3. Write a thesis under the direction of an LST-affiliated faculty member. Students must enroll in Honors Thesis in Law and Social Thought. Participation in the University Honors College is not required for those seeking program honors.
4. Honors Thesis in Law and Social Thought (3 hours) will count as an elective course in the required courses for the major.

B.A. in Law and Social Thought

| Hours                                       | 16    |

| Minor in Law and Social Thought             |       |

Courses taken in the minor must come from a discipline other than the student's major discipline to ensure that the minor will provide intellectual breadth complementary to a specialized curriculum in a traditional discipline.

| Hours                                       | 16    |

1. Students will demonstrate an ability to interpret current law related issues in the context of broad cultural, historical, and intellectual traditions.
2. Students will be able to critically assess the assumptions and traditions that guide distinct interpretations of the law and of legal institutions and understandings of justice and fairness.
3. Students will demonstrate awareness of and ability to evaluate social effects of legal decisions, legal institutions and the deployment of force by legal authorities.
4. Students will demonstrate knowledge of and evaluate the status of cultural and economic differences vis-à-vis the law.
5. Students will demonstrate awareness of the legal status and meaning of class, race, gender, and disability.
6. Students will write clearly, critically, and effectively.
7. Students will read and analyze complex arguments.
8. Students will make well-reasoned judgments about relations among courses in different disciplines and demonstrate sensitivity to difference between interdisciplinary and discipline specific approaches.
9. Students will demonstrate awareness of professional options and an awareness of the contribution of the study of law and society to legal practices.

| Minor in Law and Social Thought             |       |

No more than one independent study will count toward completion of the minor.

| Hours                                       | 16    |

| Independent Study                           |       |

No more than one independent study will count toward completion of the minor.
Program of Study
The student’s program of study must be approved by a program advisor and verified before graduation.

Field Experience
Students working toward a minor in Law and Social Thought will be invited to participate in field experience, and elective credit will be offered depending on the student's level of involvement.

\(^1\) At least one elective must be a law and social thought upper division seminar (LST 4900) compatible with the chosen path.

Students will interpret current law related issues in the context of broad cultural, historical, and intellectual traditions.

Students will critically assess the assumptions and traditions that guide distinct interpretations of the law and of legal institutions and understandings of justice and fairness.

Students will demonstrate awareness of and ability to evaluate social effects of legal decisions, legal institutions, and the deployment of force by legal authorities.

Students will demonstrate knowledge of and evaluate the status of cultural and economic differences vis-a-vis the law.

Students will demonstrate awareness of the legal status and meaning of class, race, sexuality, gender and disability.

Middle East Studies
Gaby Semaan, Advisor

Middle East Studies offers a bachelor of arts degree or a minor. Its offerings are designed to provide students an appropriate exposure to the history, religions, cultures and socioeconomic systems of the Middle East, and in turn, that region's relations with the rest of the world, as well as to create balanced perceptions of the various factors and phenomena in the Middle East in historical and contemporary contexts.

Degrees Offered
Middle East Studies (p. 216)
Middle East Studies Minor (p. 218)

MES 2400 Introduction to the Contemporary Cultures of the Middle East through Movies and Arts
[3 credit hours]
The objective of this course is to introduce students to the contemporary cultures of the Middle East and North Africa in both theoretical terms and details of daily life. The course will provide a general overview of the geography and demography of the Middle East, and will engage in a discussion of the different aspects of the life of the people in the different countries using movies. The course will focus on the different constituents of the Middle Eastern cultures as they are reflected in movies, music, artwork, paintings, video clips, literary works and other creative expressions.

Term Offered: Spring, Fall

MES 3200 The Contemporary Middle East a Historical and Modern In-Depth Overview
[3 credit hours]
The objective of this course is to introduce students to the contemporary Middle East, and provide an in-depth overview of its historical context and modern era. The course introduces you to the geography and demography of the Middle East and will engage in a discussion of the different aspects of the life of the people in the different countries. The course will focus on the languages, religious identity and the impact of colonialism/imperialism.

Term Offered: Spring, Fall

MES 3800 The Governments and Legal Systems of the Contemporary Middle East
[3 credit hours]
The objective of this course is to introduce students to the contemporary governments and legal systems of the Middle East and North Africa. The course will provide a comprehensive view of the domestic and foreign policies of the region by taking a comparative and thematic approach addressing the political, legal, economic and social structures. The course will also address the aftermath of the so called Arab Spring, the ongoing violence and war in different countries in the region.

Term Offered: Spring, Fall

MES 4200 Current Issues in the Middle East
[3 credit hours]
The objective of this course is to introduce students to the current issues in the Middle East and North Africa. The course will provide an overview of the different issues facing the Middle East and its people. In addition, the class will provide daily follow up on current issues in the region especially those related to the interests to the students in the class.

Term Offered: Spring

B.A. in Middle East Studies
Gaby Semaan, Advisor

Middle East Studies offers a bachelor of arts degree or a minor. Its offerings are designed to provide students an appropriate exposure to the history, religions, cultures, and socioeconomic systems of the Middle East, and in turn, that region's relations with the rest of the world, as well as to create balanced perceptions of the various factors and phenomena in the Middle East in historical and contemporary contexts.
The Middle East Studies program requires a total of 31 semester hours in the major including 16 hours of required courses and 15 of electives chosen in consultation with MES adviser.

Select 6 additional credits from:
- FLAN 3440 Intercultural Communication: Principles And Practice
- HIST 2040 Ancient Near East
- GEPL 4810 Political Geography
- PHIL 3500 Eastern Thought
- REL 2310 Old Testament/Tanakh
- or any courses approved by program advisor

Urban Studies

The goal of the urban studies program at The University of Toledo is to provide students with a broad understanding of urban issues in a global world. Students study all aspects of cities, including economic development and urban planning. The program is interdisciplinary. Undergraduates take classes in economics, geography, history, political science and sociology.

Interdisciplinary major: Degree Offered
- B.A. in Urban Studies (p. 218)

B.A. in Urban Studies

The Urban Studies program, totaling 45 credit hours, is an interdepartmental major with emphasis on urban-oriented courses in anthropology, Africana studies, economics, geography, history, political science, and sociology. Its purpose is to provide a broadly based educational foundation for understanding the impact and scope of urbanization so that students will be suitably educated to pursue graduate or professional academic programs or to assume positions in urban-related employment.

**Pre-Law**

Sam Nelson, Advisor
Jerry Van Hoy, Advisor

Unlike some pre-professional programs, there is no fixed pre-law curriculum. Critical reading, writing and speaking dominate legal practice and legal education; thus, the central theme of any pre-law course of study should be the development of these skills in the context of areas of substantive interest to the student. Clearly, a course of study designated “pre-law” may extend across a broad range of different disciplines and interests and contain a wide variety of courses. Each student’s course of study will be different and should reflect, in consultation with advisors, the specific interests of the student and attention to the development of the critical and analytical skills necessary for success in law school and the legal profession.
Faculty

Department of Art

Brian Carpenter, 2014, Assistant Professor, A.A., B.A., University of Toledo; M.F.A., Cranbrook Academy of Art

Jason Cox, 2015, Assistant Professor, B.F.A., M.A.T., The Maryland Institute College of Art; Ph.D., The Ohio State University

Debra Davis, 2000, Professor, B.A., M.S. Ed., Northern Illinois University; M.F.A., University of Colorado

Daniel Hernandez, 2012, Associate Professor, B.F.A, Northwest Missouri State University; M. F. A., American University

Thomas Lingeman, 1979, Professor, B.S., Ball State University; M.F.A., Southern Illinois University at Carbondale

Thor J. Mednick, 2013, Professor, B.F.A., M.A., University of Southern California; Ph.D., Indiana University

Barbara W. F. Miner, 2000, Professor and Chair, B.F.A., State University of New York - New Palz; M.F.A., Eastern Michigan University

Deborah Orloff, 1994, Professor and Associate Chair, B.F.A., Clark University; M.F.A., Syracuse University

Mysoon Rizk, 2000, Professor, B.A., Oberlin College; B.S., M.A., Ph.D., University of Illinois at Urbana - Champaign

Karen Roderick-Lingeman, 2002, Senior Lecturer, B. Ed., The University of Toledo; M.F.A, University of North Dakota

Arturo Rodriguez, 2001, Associate Professor, B.F.A., Kansas City Art Institute; M.F.A., Indiana University – Bloomington

Barry Whittaker, 2011, Associate Professor, B.F.A., University of Texas; M.F.A., University of Colorado

Eric Zeigler, 2014, Assistant Professor, B.F.A., Bowling Green State University; M. F. A., San Francisco Art Institute

Department of Communication

Amy Capwell-Burns, 2003, Senior Lecturer, B.A., Baldwin-Wallace College; M.A., Cleveland State University; Ph.D., Bowling Green State University

Dee Drummond, 2007, Senior Lecturer, B.A., The University of Toledo; M.A., Michigan State University

Tasha Dunn, 2019, Associate Professor, BA, Concordia College; MA, Eastern Illinois University; PhD, University of South Florida

Jason Hibbs, 2020, Assistant Lecturer, B.S., Western Kentucky University; M.S., Montana State University-Billings

Paulette D. Kilmer, 1997, Professor, B.A., M.A., University of Wisconsin; M.A., University of Kansas; Ph.D., University of Illinois

Eleanor Kostecki, 2013, Associate Lecturer, B.S., Eastern Michigan University; M.A., Western Michigan University

Gigi McNamara, 2016, Assistant Professor, B.A., The Pennsylvania State University; M.A., Duquesne University; Ph.D., The Pennsylvania State University

W. Benjamin Myers, 2019, Associate Professor and Chair, BA, Bluffton University; MA, Bowling Green State University; PhD, Southern Illinois University at Carbondale

Fatima A. Shousher Simon, 2004, Senior Lecturer, B.A., University of Toledo; M.A., Bowling Green State University

Sumitra Srinivasan, 2006, Associate Professor, B.Sc., M.A., The University of Madras; M.S., Syracuse University; Ph.D., Georgia State University

Disability Studies Program

Allyson Day, 2014, Associate Professor, B.A., B.F.A., University of Maine at Framington; M.A., Simmons College; Ph.D., Ohio State University

James Ferris, 2008, Professor and Ability Center of Greater Toledo Endowed Chair in Disability Studies, B.A., Marquette University; M.A., University of Texas at Austin; Ph.D., Southern Illinois University at Carbondale.

Rebecca Monteleone, 2020, Assistant Professor, B.A., The Ohio State University; M.A., University of Kent; Ph.D., Arizona State University

Kim E. Nielsen, 2012, Professor and Program Director; B.A., Macalester College; M.A., Ph.D., University of Iowa

Department of Economics

Abiye Alamina, 2018, Assistant Lecturer, B.Sc University of Lagos; M.Sc., University of Bristol; M.A., ABD, The Ohio State University.

Aliaksandr Amialchuk, 2007, Professor, B.A., Hrodno State University; M.A., National University Kyiv-Mohyla Academy; Ph.D., University of Houston

David C. Black, 1990, Associate Professor and Interim Chair, B.A., M.A., Ph.D., State University of New York - Buffalo

James Bland, 2016, Assistant Professor, B.S., M.A., The University of Melbourne; M.S., Ph.D., Purdue University

Larry Cook, 2006, Senior Lecturer, B.A., M.A., The University of Toledo

Michael R. Dowd, 1989, Associate Professor, B.A., M.A., Ph.D., State University of New York – Buffalo

Monita Mungo, 2014, Assistant Professor, B.A., Pepperdine University; M.A., Ph.D., Wayne State University

Karie Peralta, 2015, Associate Professor, B.A., Saint Xavier University Chicago; M.A., Loyola University Chicago; Ph.D., University of Miami

Angela Siner, 1989, Director of Africana Studies, B.A., Grambling State University; M.A., University of Southwest Louisiana

Jenny Van Hoy, 2000, Associate Professor, Co-Director of Law and Social Thought, Director of Master of Liberal Studies, B.A., University of California - Santa Cruz; M.A., Ph.D., Northwestern University
Thomas Zych, 2015, Lecturer, B.A., University of Illinois at Urbana-Champaign; M.S., University of Wisconsin-Milwaukee.

Department of Theatre and Film
Matt Foss, 2018 Associate Professor, B.A., Northwestern College; M.F.A., The Theatre Conservatory of the Chicago College of Performing Arts at Roosevelt University; Ph.D., Wayne State University
Holly Hey, 2006, Professor, B.F.A., Ohio University; M.F.A., School of the Art Institute of Chicago
Quincy Joyner, 2018, Assistant Lecturer, B.A., Columbia College Chicago; M.S. DePaul University; M.F.A., Vermont College of Fine Arts
Edmund Lingan, 2007, Professor, B.F.A., Texas State University; Ph.D., City University of New York
Kelly McBane, 2016, Associate Lecturer, B.A., Slippery Rock University; M.F.A. Ohio University
Holly Monsos, 1992, Professor and Chair, B.A., Michigan State University; M.F.A., University of Montana
Christopher M. Montpetit, 2014, Associate Lecturer, B.A., Niagara University; M.F.A., Columbia University
Stephen Sakowski, 2015, Associate Professor, B.F.A., Otterbein College; M.F.A., University of California San Diego
Daniel Thobias, 2012, Associate Professor, B.F.A., University of California, Berkeley; M.F.A., North Carolina School of Arts
Nathaniel White, 2016, Associate Lecturer, B.A., University of Nebraska-Kearney; M.A., The University of Alabama
Matt Yockey, 2010, Professor, B.A., Indiana University; M.A., Ohio University; Ph.D., Indiana University

Department of World Languages and Cultures
An Chung Cheng, 1998, Professor, B.A., Fu Jen Catholic University; M.A., Ohio University; Ph.D., University of Illinois at Urbana-Champaign
Walter Denk, 1990, Senior Lecturer, B.S., Northwestern University; ABD, Michigan State
Warren Dick, 2003, Senior Lecturer, B.A., M.A., George Washington University; Ph.D., Ohio State University
Friederike Emonds, 1994, Associate Professor of German, M.A., Washington University; Ph.D., University of California – Davis
Mary L. Hoak, 2011, Lecturer, B.A., Mercer University; M.A. (German), University of Georgia; M.A. (French), Middlebury College; Ph.D., University of Tennessee
Michael A. Kistner, 1994, Senior Lecturer, B.A., M.A., Bowling Green State University
Juan Martin, 1994, Associate Professor of Spanish, B.A., Complutense University of Madrid; M.A., Ph.D., University of Southern California
Manuel R. Montes, 2018, Assistant Professor of Spanish, B.A., Universidad Autónoma Zacatecas (Mexico); M.A. Benemérita Universidad de Puebla (Mexico); Ph.D. University of Cincinnati
Mirta Parodi, 2007, Senior Lecturer, B.A., Universidad de la Republica (Montevideo); M.A., The University of Toledo
Laurie Puschczewicz, 2005, Senior Lecturer, B.A., M.A., The University of Toledo
Linda Rouillard, 2001, Professor of French and Chair, B.A., M.A.T., University of Vermont; Ph.D., University of Pittsburgh
Gaby Semaan, 2007, Associate Professor of Arabic, B.A., Lebanese University; M.A., The University of Toledo; Ph.D., Bowling Green State University
Kathleen Thompson-Casado, 1993, Associate Professor of Spanish, B.A., M.A., Ph.D., The Ohio State University
Cheryl Wessel, 2003, Senior Lecturer, B.A., Luther College; M.A., The University of Toledo
Kasumi Yamazaki, 2016, Associate Professor of Japanese, B.A., M.A., Ph.D., the University of Toledo

Department of Women’s and Gender Studies
Asma M. Abdel Halim, 2004, Professor, LL.B., LL.M., University of Khartoum; MAIA, Ph.D., Ohio University
Sharon Barnes, 2001, Associate Professor and Chair, B.A., Sienna Heights College; M.A., Ph.D., The University of Toledo
Rachel Dudley, 2019, Assistant Professor, B.A., Grand Valley State University; M.A., The Ohio State University; Ph.D., Emory University
Shara Crookston, 2009, Associate Professor, B.A., Arizona State University; M.A., University of Alabama; Ph.D., University of Mississippi
Jeanne Kusina, 2011, Distinguished University Lecturer, B.A., Lourdes College; M.B.A., Tiffin University; M.A., University of Toledo; Ph.D., Bowling Green State University
Mission Statement
We provide a diverse, equitable, and inclusive learning environment and workplace, where students obtain a transformative engineering or engineering technology education, and where educators, industry partners and students discover and transfer new knowledge to improve the human condition in the community and throughout the world.

Degrees Offered

Undergraduate Degree Programs

The College of Engineering offers the following ABET-accredited Bachelor of Science in Engineering degree programs:

- BS in Bioengineering (p. 234)
- BS in Chemical Engineering (p. 237)
- BS in Civil Engineering (p. 242)
- BS in Environmental Engineering (p. 243)
- BS in Computer Science and Engineering (p. 251)
- BS in Electrical Engineering (p. 253)
- BS in Mechanical Engineering (p. 270)

The College of Engineering also offers the following ABET-accredited Bachelor of Science in Engineering Technology degree programs:

- BS in Computer Science and Engineering Technology (p. 256)
- BS in Construction Engineering Technology (p. 257)
- BS in Electrical Engineering Technology (p. 258)
- BS in Information Technology (p. 260)
- BS in Mechanical Engineering Technology (p. 262)

The College of Engineering also offers a Minor in Surveying (p. 245), a Minor in Computer Science (p. 254), a Minor in Mechatronics (p. 272), a Materials Science and Engineering Certificate (p. 272), Minor in Cyber Security (p. 263), and Minor in Software Engineering (p. 264).

Students may wish to consider a dual degree plan within the College of Engineering. Depending on which two curricula are involved, careful planning from the beginning may permit the completion of both degrees with less than a full year of additional study. In any dual degree plan, the student must be accepted by both major departments and have an advisor from each of the two degree programs. With any combination, the curricular requirements of each individual degree must be met.

Graduate Programs

The College of Engineering also offers a full range of graduate programs. Refer to the Graduate School (http://utoledo-public.courseleaf.com/graduate/engineering/) section for information on programs and policies specifically related to graduate students.

Cooperative (Co-op) Education Program

Students in the Engineering Science degree programs must complete a cooperative (co-op) educational requirement. The purpose of the co-op program is to provide students with career-related experiences. The program also helps students defray the cost of their education and enhances employment opportunities after graduation. The curriculum in each of the Bachelor of Science in Engineering degree programs is set up to accommodate four, and in some cases five, co-op assignments. To satisfy the requirement, a student must successfully complete a minimum of three registered, semester-long work experiences, alternating with semesters of coursework. The student pays a $475 fee when registered for each of the required co-op experiences. Successful completion of each registered work experience appears on the student’s
transcript. A student with a registered work experience is considered a full time student for that term.

The College will assist students in finding co-op positions, but does not guarantee placement. Elaborations on implementation policies are available in the College's Career Development Center. For students in the Engineering Technology degree programs, participation in the co-op program is optional. Students who wish to participate in this program should contact the Career Development Center in the College of Engineering at 419.530.8050.

SPECIAL PROGRAMS FOR UNDERGRADUATES

- Early Admission to Master of Science in Engineering (p. 272)
- Joint B.S. in Engineering or Engineering Technology/M.B.A. Program (p. 273)
- Minor in Business Administration (p. 273)
- Presumptive Admission Program to the University of Toledo College of Law (p. 273)

Accreditation

The College of Engineering's Bachelor of Science programs in Bioengineering, Chemical Engineering, Civil Engineering, Computer Science and Engineering, Electrical Engineering and Mechanical Engineering are accredited by the Engineering Accreditation Commission (EAC) of ABET. www.abet.org/ The program in Computer Science and Engineering is also accredited by the Computing Accreditation Commission (CAC) of ABET.

The Bachelor of Science programs in Computer Science and Engineering Technology, Construction Engineering Technology, Mechanical Engineering Technology and Electrical Engineering Technology are accredited by the Engineering Technology Accreditation Commission (ETAC) of ABET. In addition, the Bachelor of Science programs in Computer Science and Engineering Technology and Information Technology are accredited by the Computing Accreditation Commission (CAC) of ABET.

Admission Requirements

First Time Freshmen

To be considered for admission to any Bachelor of Science program in Engineering, first time freshman students need a minimum cumulative high school GPA of 3.0 or GED average standard score of 510 in the 2002 format or 730 in the 2014 format with a Mathematical Reasoning sub-score of 190. A minimum ACT composite score of 22 or SAT combined score of 1110 and a minimum ACT math score of 22 or SAT math score of 550 are also required. Students also must successfully complete a minimum of four years of high school mathematics with fourth year emphasis on trigonometry or pre-calculus and high school chemistry. High school physics also is strongly recommended. Students who do not meet the minimum requirements will be considered for admission to an Engineering Technology program or they may choose another University program.

To be considered for admission to one of the Bachelor of Science in Engineering Technology programs or information technology program, first time freshman students need a minimum cumulative high school GPA of 2.5 or GED average standard score of 480 in the 2002 format or 700 in the 2014 format with a Mathematical Reasoning sub-score of 180. A minimum ACT composite score of 21 or SAT combined score of 1070 and a minimum ACT math score of 20 or SAT math score of 510 are also required. Students who do not meet the minimum requirements will be considered for admission to the University College Exploratory Studies program or may choose another University program.

Transfer Students

Transfer students seeking admission to the Bachelor of Science programs in Bioengineering, Chemical Engineering, Civil Engineering, Computer Science and Engineering, Electrical Engineering, Environmental Engineering or Mechanical Engineering must have a minimum GPA of 2.75 from all previous college or university work and have college credit equivalent to MATH 1850 and CHEM 1230, with grades of at least a C or higher.

Students transferring into the College of Engineering Bachelor of Science in Engineering Technology programs in Computer Science and Engineering Technology, Construction Engineering Technology, Electrical Engineering Technology, Information Technology and Mechanical Engineering Technology must have obtained a minimum cumulative GPA of 2.25 from all previous college or university work. Equivalent credit for MATH 1330 or MATH 1340 with a grade of C or higher is also required for Construction Engineering Technology and Mechanical Engineering Technology. Equivalent credit for MATH 1850 or MATH 2450 with a grade of C or higher is also required for Computer Science and Engineering Technology and Electrical Engineering Technology.

Students not admitted to an engineering program may not take engineering courses unless those courses are required for a degree program outside of engineering.

Students transferring from other institutions must earn at least 32 hours of undergraduate credit in residence at The University of Toledo. At least 14 of these must be in the major area. The remaining credit hours are to be in engineering topics or in other areas that satisfy degree requirements.

Full-time students must take their last semester in residence and part-time students must take their last 14 hours in residence unless exceptional arrangements have been made in advance with the Associate Dean of Undergraduate Studies in the College of Engineering.

Academic Policies

Students in the College of Engineering are subject to the general regulations that apply to all students enrolled in The University of Toledo. Refer to the UTpolicy website (http://www.utpolicy.edu/policies/academic/undergraduate/) for academic policies that apply to all undergraduate students. The following policies apply to undergraduate students enrolled in the College of Engineering.

Bachelor of Science Degree Requirements

A total of 128 hours of course credit is required for all Bachelor of Science degree programs offered by the College of Engineering, not including co-op hours. To obtain a degree in an undergraduate program, students must have the proper number of credit hours in courses required for the curriculum, a minimum overall cumulative GPA of 2.0, and a minimum
GPA of 2.0 in the student's major. When a course is repeated, only the grade the last time a course was taken is used in the calculation of the major GPA.

All Bachelor of Science degree programs offered by the College of Engineering have a common structure of mathematics, basic sciences, humanities/fine arts, social sciences, multicultural studies and engineering topics. A minimum of three semesters of co-operative education are required for all seven Engineering Science degree programs, and are optional for all five Engineering Technology degree programs. Engineering Technology students that opt to pursue the co-op program must complete a minimum of three semesters of co-op.

The required curriculum and recommended course sequence for each program is presented on the website of the department offering that program. These curricula permit the student to complete the Engineering Science degree requirements with co-op in five years and the Engineering Technology degree requirements without co-op in four years.

After 100 hours have been attempted, students should obtain a degree audit from the myUT portal to formulate plans for completion of the program and to receive degree approval of the Associate Dean of Undergraduate Studies. Preparation of the final semester schedules should be completed to ensure that all degree requirements will be met. Application for graduation should be made to the via the myUT portal before the published deadline, in accordance with the procedures noted on the Registrar's website (http://www.utoledo.edu/offices/registrar/graduation.html).

DEGREE AUDIT REQUIREMENT (DARS)
The Degree Audit Reporting System is an automated record that contains all of a student's graduation requirements and tracks that student's progress toward meeting those requirements. Degree audits are available to students upon request from the Office of Student Retention and Academic Success and online through the myUT portal Student Self-Service. Students are encouraged to keep current degree audits for their personal use and to discuss their degree audits with their academic advisers.

Class Rank
Class rank is determined as follows:

- Freshman: 0-29 earned hours
- Sophomore: 30-59 earned hours
- Junior: 60-89 earned hours
- Senior: 90+ earned hours

DEGREE AUDIT REQUIREMENT (DARS)
The Degree Audit Reporting System is an automated record that contains all of a student's graduation requirements and tracks that student's progress toward meeting those requirements. Degree audits are available to students upon request from the Office of Student Retention and Academic Success and online through the myUT portal Student Self-Service. Students are encouraged to keep current degree audits for their personal use and to discuss their degree audits with their academic advisers.

EVALUATION OF TRANSFER COURSES
The College of Engineering Office of Undergraduate Studies assists in the evaluation of engineering coursework based on course equivalencies determined by the appropriate academic unit as coordinated through the Registrar's Office. In many cases, courses from other universities/colleges have been pre-approved for equivalency and will transfer with confirmation. The evaluation of non-engineering coursework is coordinated by the Registrar's Office and completed by the appropriate corresponding college.

Pass/No Credit Option
Engineering students do not have the option to take any coursework on a pass/no credit basis.

Repeated Courses AND GPA Recalculation
Students may repeat a previously attempted course. If the grade in the repeated course is higher, the student may petition the college in which the course is taught to have the initial grade excluded from the overall GPA calculation. There is a limit of 18 total credit hours eligible for GPA recalculation; please see the GPA Recalculation policy (http://www.utoledo.edu/policies/academic/undergraduate/pdfs/3364-71-07%20Repeating%20a%20course%20and%20recalculation%20of%20GPA.pdf) for details. Note that all grades, including those for repeated courses, will be included in the determination of eligibility for graduation honors, fellowships, or other distinctions awarded on the basis of GPA. However, when a course in the major is repeated, only the grade the last time the course is taken is used in the major GPA calculation as described in the Bachelor of Science Degree Requirements section above.

Required Academic Performance
All students are expected to maintain a minimum cumulative GPA of 2.0. A student who achieves a cumulative GPA below 2.0 will be placed on probation and is expected to achieve a term GPA above 2.0 during subsequent semesters in order to achieve a cumulative GPA above 2.0. A term GPA below 2.0 while on probation could lead to suspension or dismissal as described in the Academic Standing (http://www.utoledo.edu/policies/academic/undergraduate/pdfs/3364-71-01%20Academic%20standing.pdf) policy.

Readmission from suspension or dismissal
Suspended or dismissed students must submit a written petition to the Associate Dean of Undergraduate Studies in order to gain readmission after the term of suspension or dismissal has been completed. Readmission decisions will be made by the Associate Dean of Undergraduate Studies in conjunction with the Undergraduate Program Director of the degree program to which the student is requesting readmission. Readmission petitions must be received before 5 pm on July 15th for Fall readmission, before 5 pm on November 15th for Spring readmission, and before 5 pm on April 1st for Summer readmission.

Note that there are no appeals to receive an early readmission to the College of Engineering following a suspension or dismissal. Readmission petitions will only be considered after the full suspension or dismissal term has been served.
Student Services

Undergraduate Academic Advising

Undergraduate academic advising is provided by each department in the College of Engineering for students who are currently in one of the department’s majors. Engineering undergraduate students have a support structure that includes their assistant/associate director of student services (staff member) and their undergraduate program director (faculty member). The individuals below are the assistant/associate directors of student services who manage the academic advising for engineering students.

If you are not in the College of Engineering or in the engineering major you wish to pursue, please contact the Associate Director of Engineering Transfer Programs. The information is listed below.

Office of Undergraduate Studies - Undecided engineering, transfers, and change of majors:
Honors Program

The Honors Program in the College of Engineering provides opportunities for challenging and individual study to undergraduate students of unusually high ability, motivation and initiative. Students with a minimum high school GPA of 3.5 and a minimum ACT composite of 25 are encouraged to apply. Current University of Toledo students and transfer students may apply for admission to the Honors Program if they have completed at least 15, but not more than 60, graded semester hours with a minimum UT GPA of at least 3.5, and have been interviewed by an honors advisor. All admissions to the Honors Program are granted on a space-available basis.

To receive the College Honors citation upon graduation from an engineering bachelor's degree program, the following criteria must be met:

1. A minimum GPA of 3.3 for all college coursework;
2. A minimum of 27 semester hours in honors courses;
3. Completion of HON 1010, HON 2010 and HON 3010;
4. A minimum of 10 semester hours of honors courses offered by the College of Engineering;
5. An honors thesis or honors project.

Professional Registration

Registration by the State of Ohio as a Professional Engineer is important for professional practice and requires four to eight years of engineering experience after graduation. The first step is applying for and passing the Fundamentals of Engineering (FE) examination, a computer-based exam given during four two-month windows each year at testing centers around the state. Application deadlines for these examinations are several months before testing dates.

All engineering graduates are strongly encouraged to take the FE near their date of graduation and are permitted to sit for the exam during their final semester of enrollment prior to graduation. After four years of acceptable engineering experience, the State Board of Registration will permit the engineering graduate to take the Professional Engineers (PE) examination. Engineering technology graduates must pass the FE exam and need a minimum of eight years of acceptable engineering experience before taking the PE exam.

Applications should be filed to meet published deadlines of the National Council of Examiners for Engineering and Surveying and the State Board of Registration in Columbus. Additional information is available in the Ohio Board of Professional Engineers and Surveyors at http://www.peps.ohio.gov/ or from the National Council of Examiners for Engineering and Surveying at http://ncees.org.

The undergraduate engineering degree programs are intended to prepare students with no prior experience for Professional Engineer Licensure. Successful completion of the UT engineering programs satisfies the academic requirements for professional engineering credentialing set forth by the Ohio Board of Professional Engineers and Surveyors of the State of Ohio. As licensure requirements may vary by state, if you intend to practice in a state outside of Ohio, please review this website for eligibility for licensure in that state at utoledo.edu/offices/internalaudit/institutional-compliance/state-authorization/pld-stateengineerandsurveyorboards.html.

Learning Outcomes

Undergraduate Degree Programs of Study

The Bachelor of Science in Engineering degree programs accredited by the Engineering Accreditation Commission (EAC) of ABET must demonstrate that their graduates attain the following outcomes:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

The Bachelor of Science in Engineering Technology degree programs accredited by the Engineering Technology Accreditation Commission (ETAC) of ABET must demonstrate that their graduates attain the following outcomes:

1. An ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline;
2. An ability to design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the discipline;
3. An ability to apply written, oral, and graphical communication in broadly-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature;
4. An ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes; and
5. An ability to function effectively as a member as well as a leader on technical teams.

The Bachelor of Science in Engineering and Engineering Technology degree programs accredited by the Computing Accreditation Commission (CAC) of ABET must demonstrate that their graduates will have the ability to:

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline
3. Communicate effectively in a variety of professional contexts
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline

The Department of Bioengineering offers an ABET-accredited Bachelor of Science in Bioengineering degree program that features more than 45 hours of Bioengineering courses taught by award-winning faculty, an integrated co-operative education experience and a combined Bacc2MD Pathway program offered in conjunction with the University of Toledo College of Medicine.

Degrees Offered

- BS in Bioengineering (p. 234)

BIOE 1000 Orientation and Introduction to Bioengineering Computing

[0-2 credit hours]
Application of graphical design and numerical analysis software required for the solution of bioengineering problems. This course also provides a one-semester overview of key engineering principles and concepts.
Term Offered: Fall

BIOE 1010 Professional Development

[1 credit hour]
Preparation for co-op and full-time employment in industry. Topics include resume writing, interviewing skills, compensation and benefits, social protocol and corporate ethics, biomedical ethics, design and quality control processes and governmental regulation.
Prerequisites: BIOE 1200 with a minimum grade of D- and ENGL 1110 with a minimum grade of D
Term Offered: Spring

BIOE 1200 Introduction to Bioengineering Applications

[0-2 credit hours]
Application of graphical design and numerical analysis software required for the solution of bioengineering problems. This course also provides a one-semester overview of key engineering principles and concepts.
Prerequisites: BIOE 1000 with a minimum grade of D-
Term Offered: Spring

BIOE 1410 Freshman Design Innovation I

[1 credit hour]
Basic concepts for biomedical device design and development and incorporating innovation and entrepreneurial mindset in freshman bioengineering students using team- and project-based learning experiences.
Term Offered: Fall

BIOE 1420 Freshman Design Innovation II

[1 credit hour]
Basic concepts for biomedical device design and development and incorporating entrepreneurial mindset in freshman bioengineering students using team- and project-based learning experiences.
Prerequisites: BIOE 1410 with a minimum grade of D-
Term Offered: Spring

BIOE 2100 Bioengineering Thermodynamics

[0-3 credit hours]
Principles of thermodynamics and conservation of mass applied to living systems, biomedical devices and bioprocesses.
Prerequisites: PHYS 2130 with a minimum grade of D- and CHEM 1240 with a minimum grade of D- or MATH 2850 with a minimum grade of D- or MATH 2950 with a minimum grade of D-
Term Offered: Spring, Fall

BIOE 2200 Biomaterials

[3 credit hours]
Physical and chemical properties of materials commonly used in medicine. Topics include inflammatory, immunogenic, carcinogenic and toxicologic responses within host tissues as well as testing and evaluation strategies for effective use of materials in medicine and biology.
Prerequisites: PHYS 2130 with a minimum grade of D- and (MATH 1860 with a minimum grade of D- or MATH 1930 with a minimum grade of D-) and CHEM 1240 with a minimum grade of D-
Term Offered: Spring, Fall
BIOE 2300 Biomedical Quality Control
[3 credit hours]
Statistical methods for the design, testing and manufacturing of medical devices; the application of statistical methods to quality systems and process validation.
Prerequisites: (MATH 1860 with a minimum grade of D- or MATH 1930 with a minimum grade of D-)
Term Offered: Spring

BIOE 3110 Introduction To Biomechanics
[3 credit hours]
Mechanics of the human musculoskeletal system and its joints. Basic concepts for deformable body mechanics, including stress and strain analysis, viscoelasticity, and applications to common problems in orthopedic biomechanics.
Prerequisites: (CIVE 1150 with a minimum grade of D- and BIOL 2170 with a minimum grade of D-)
Term Offered: Spring

BIOE 3300 Biomedical Electronics
[3 credit hours]
Measurement circuits, signal analysis, and computer design in biological systems and medicine. Electronic devices, digital devices, amplifier design and instrumentation safety.
Prerequisites: (EECS 2300 with a minimum grade of D- and BIOE 1200 with a minimum grade of D-)
Term Offered: Spring, Fall

BIOE 3400 Biotransport Phenomena
[3 credit hours]
The quantitative description of momentum transport (viscous flow) and mass transport (convection and diffusion) in living systems. Application of engineering methods to model and quantify aspects of bioengineering systems.
Prerequisites: BIOE 2100 with a minimum grade of D- and MATH 2860 with a minimum grade of D- or MATH 3820 with a minimum grade of D-
Term Offered: Spring, Fall

BIOE 3500 Bioprocessing Laboratory
[0-3 credit hours]
Introduction to processing techniques used in biotechnology and pharmaceutical industries. The process from concept to product is covered, including the creation and culture of recombinant organisms to synthesize a protein product and the extraction, purification, and assay of the final product.
Prerequisites: (BIOL 2170 with a minimum grade of D- and BIOL 2180 with a minimum grade of D- or BIOL 2180 with a minimum grade of D- or CHEM 1240 with a minimum grade of D- or MATH 1860 with a minimum grade of D- or MATH 1930 with a minimum grade of D-)
Term Offered: Spring, Fall

BIOE 3940 Co-Op Experience
[1 credit hour]
Approved co-op work experience beyond third required co-op experience. Course may be repeated.
Prerequisites: BIOE 3940 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

BIOE 3950 Co-Op Experience
[1 credit hour]
Approved co-op work experience beyond third required co-op experience. Course may be repeated.
Prerequisites: BIOE 3940 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

BIOE 4100 Physiology And Anatomy For Bioengineers
[3 credit hours]
Review and study of general physiological principles and bioengineering perspectives of the human circulatory, respiratory, digestive, immune, nervous, muscular and excretory systems.
Term Offered: Fall

BIOE 4110 Advanced Biomechanics
[3 credit hours]
The goal of this course is for students to be able to describe motions of the human body. Three-dimensional analysis and measurements of human body movements including kinematics, kinetics and energetics of human gait, anthropometry and application to bioengineering and orthopedics will be presented. Euler angles and the screw axis method will be used to describe three-dimensional motions.
Prerequisites: BIOE 3110 with a minimum grade of D-
Term Offered: Spring, Fall

BIOE 4120 Biosignal Processing
[3 credit hours]
Design and application of analog and digital signal processors to biomedical signals. Covered topics include the Laplace transform, analog filter design, continuous and discrete Fourier transform, and FIR/IIR digital filter design.
Prerequisites: BIOE 1000 with a minimum grade of D- and EECS 2300 with a minimum grade of D- and MATH 2860 with a minimum grade of D-
Term Offered: Spring, Fall

BIOE 4140 Biomedical Instrumentation Laboratory
[0-2 credit hours]
Design and construction of medical instrumentation, including aspects of signal and image processing, computer integration, and software development. Written skills are emphasized through laboratory report organization, documentation of results, error analysis and interpretation of findings.
Prerequisites: BIOE 3300 (may be taken concurrently) with a minimum grade of D-
Term Offered: Spring, Fall

BIOE 4320 Advanced Biomedical Quality Control
[3 credit hours]
Advanced statistical methods for the design, testing and manufacturing of medical devices; the application of advanced statistical methods to quality systems and process validation.
Prerequisites: BIOE 4300 with a minimum grade of D-
Term Offered: Spring, Fall
BIOE 4410 Bioengineering Design Project I
[3 credit hours]
This course integrates the engineering and life science backgrounds of senior bioengineering students through the presentation of design principles for problems in biomechanical, bioelectrical, biochemical and biological systems. Oral and written communication, engineering economics and business plans are reviewed.

Prerequisites: MATH 2860 with a minimum grade of D- and EECS 2300 with a minimum grade of D- and CIVE 1150 with a minimum grade of D- and BIOE 3940 with a minimum grade of D- and BIOE 2100 with a minimum grade of D- and (BIOE 2300 with a minimum grade of D- or BIOE 4300 with a minimum grade of D-) and BIOE 3500 with a minimum grade of D- and BIOE 2200 with a minimum grade of D- and BIOE 1200 with a minimum grade of D-

Term Offered: Spring, Fall

BIOE 4420 Bioengineering Design Project II
[3 credit hours]
A continuation of BIOE 4410. Teams of senior bioengineering students solve problems in biomechanical, bioelectrical, biochemical and biological systems through a design project. Ethics discussions, testing and evaluation of designs, progress reports, oral presentations and a written final report are required.

Prerequisites: BIOE 3110 with a minimum grade of D- and BIOE 3400 with a minimum grade of D- and BIOE 3300 with a minimum grade of D- and BIOE 4140 with a minimum grade of D- and BIOE 4100 with a minimum grade of D-

Term Offered: Spring, Fall

BIOE 4610 Applications of Biotransport
[3 credit hours]
The application of engineering principles to the design and analysis of artificial organs, drug delivery systems, and tissue engineering and their clinical application.

Prerequisites: BIOE 3400 with a minimum grade of D-

Term Offered: Spring, Fall

BIOE 4620 Biochemical Engineering
[3 credit hours]
The application of engineering principles to the design and analysis of biological processes that employ living organisms for the production of biochemicals.

Prerequisites: BIOE 3500 with a minimum grade of D- and BIOE 3400 with a minimum grade of D-

Term Offered: Spring, Fall

BIOE 4630 Bioseparations
[3 credit hours]
Introduction to, analysis and industrial design of processes required to separate and purify proteins and other biological compounds for the downstream processing of bioreactor products. The separations techniques will include filtration, chromatography and crystallization.

Prerequisites: BIOE 3400 with a minimum grade of D- or CHEE 3120 with a minimum grade of D-

Term Offered: Fall

BIOE 4640 Medical Imaging
[3 credit hours]
Mathematics and physics underlying major medical imaging modalities including X-ray radiography and computerized tomography (CT), magnetic resonance imaging (MRI), nuclear medicine imaging, and ultrasound imaging.

Prerequisites: BIOE 2300 with a minimum grade of D- or MATH 2860 with a minimum grade of D- and PHYS 2140 with a minimum grade of D-

Term Offered: Spring, Fall

BIOE 4710 Biomechanics Of Soft And Hard Tissues
[3 credit hours]
Composite and hierarchical models bones; models of bone remodeling. Soft tissues models: linear and nonlinear viscoelasticity, Fung’s quasilinear viscoelasticity theory. Biphasic and triphasic models and mechano-ionic interactions.

Prerequisites: BIOE 3110 with a minimum grade of D-

Term Offered: Fall

BIOE 4720 Cellular Electrophysiology
[3 credit hours]
The physiology of electrically excitable tissues, including nerve, muscle and secretory tissues. Action potential generation, neurotransmission and modulatory mechanisms. Methods for constructing and using computational models of excitable membranes.

Prerequisites: (EECS 2300 with a minimum grade of D- and BIOE 4100 with a minimum grade of D-) and (MATH 2860 with a minimum grade of D- or MATH 3820 with a minimum grade of D- or MATH 3860 with a minimum grade of D-)

Term Offered: Spring

BIOE 4730 Computational Bioengineering
[3 credit hours]
Introduction to and utilization of computational packages for bioengineering applications. Introduction to finite element analysis and applications in biochemical, biofluidics, bioheat transfer, optimization.

Prerequisites: (BIOE 3110 with a minimum grade of D- and BIOE 1200 with a minimum grade of D-

Term Offered: Spring

BIOE 4740 Tissue Engineering
[3 credit hours]
Application of principles from engineering and the life sciences toward the development of biological substitutes that restore, maintain or improve tissue function.

Prerequisites: (BIOE 2200 with a minimum grade of D- and BIOE 4100 with a minimum grade of D-

Term Offered: Spring, Fall
BIOE 4750 Experimental Methods In Orthopedic Biomechanics  
[3 credit hours]
This course provides students with experience in experimental techniques used in orthopaedics and in the study of the musculoskeletal system including mechanical testing of different materials, experimental and analytical methods for stress analysis, strain gages, methods used in human motion analysis to include motion capture, force pressure plates and electromyography. Students will learn to analyze human motion by capturing movements of their choice and will then conduct a biomechanical analysis to quantitatively describe their capture movements.
Prerequisites: BIOE 3110 with a minimum grade of D- or CIVE 1160 with a minimum grade of D-
Term Offered: Spring, Fall

BIOE 4830 Additive Manufacturing  
[3 credit hours]
Additive manufacturing (AM) is a method of manufacturing that has been growing rapidly. In this course the students will learn about various AM technologies. They will also work with the required design software packages to create 3D models and 3D-print objects from the designed models.
Prerequisites: MIME 2650 (may be taken concurrently) with a minimum grade of D- or BIOE 1000 with a minimum grade of D-
Term Offered: Spring, Fall

BIOE 4980 Bioengineering Special Topics  
[1-3 credit hours]
Selected subjects in the field of bioengineering with intensive investigation of the recent literature in a few areas of special interest to the class and the professor.
Term Offered: Spring, Fall

BIOE 4990 Bioengineering Independent Study  
[1-3 credit hours]
The student, under the guidance of their research adviser, explores in-depth specific areas or topics related to their research.
Term Offered: Spring, Summer, Fall

**BS in Bioengineering**

</table>

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Degrees Offered
- BS in Chemical Engineering (p. 237)

CHEE 1000 Orientation And Computing For Chemical and Environmental Engineers
[0-3 credit hours]
An introduction to the UToledo campus, campus resources, the College of Engineering, and Chemical and Environmental Engineering. Primary emphasis is on engineering computing, data analysis, and basic chemical engineering calculations.
Term Offered: Fall

CHEE 1010 Professional Development
[1 credit hour]
Social protocol and ethics in industry. Resume writing and interview skills are presented in preparation for the Co-op experience. Review of resource materials for technical and non-technical individual learning. Oral and written presentation techniques are emphasized.
Prerequisites: CHEE 1000 with a minimum grade of D-
Term Offered: Spring

CHEE 2010 Mass And Energy Balances
[3 credit hours]
Introduction to the principles and techniques used in chemical engineering. Basic concepts of mathematics, physics and chemistry are applied to solving problems involving stoichiometry, material balances and energy balances.
Prerequisites: CHEE 1000 with a minimum grade of D- and (MATH 1850 (may be taken concurrently) with a minimum grade of D- and CHEM 1230 (may be taken concurrently) with a minimum grade of D-)
Term Offered: Spring

CHEE 2110 Process Fluid Mechanics
[3 credit hours]
A comprehensive introduction to process fluid mechanics. Topics include: hydrostatics, characteristics of laminar and turbulent flow, mechanical energy balance, flow through packed beds and fluidization of solids, design of pumping systems and piping networks and metering of fluids.
Prerequisites: CHEE 2010 with a minimum grade of D- and MATH 1860 with a minimum grade of D-
Term Offered: Spring

CHEE 2230 Chemical Engineering Thermodynamics I
[3 credit hours]
The principles of thermodynamics and their application to chemical engineering. Topics include states and properties of matter, the first and second law of thermodynamics and thermo-chemical effects.
Prerequisites: CHEE 2010 with a minimum grade of D- and MATH 1850 with a minimum grade of D- and MATH 1860 (may be taken concurrently) with a minimum grade of D- and CHEM 1240 (may be taken concurrently) with a minimum grade of D-
Term Offered: Fall

CHEE 2330 Chemical Engineering Thermodynamics II
[3 credit hours]
Topics include properties of fluid mixtures, phase equilibria, chemical equilibria, power generation and refrigeration processes.
Prerequisites: CHEE 2230 with a minimum grade of D- and MATH 1860 with a minimum grade of D- and CHEE 2010 with a minimum grade of D- and CHEM 1240 with a minimum grade of D-
Term Offered: Spring, Summer
CHEE 3030 Separation Processes  
[3 credit hours]  
An introduction to equilibrium-based separation processes. Topics include distillation, extraction, leaching, drying and membrane separations. Preliminary equipment design calculations.  
**Prerequisites:** CHEE 2330 with a minimum grade of D-
**Term Offered:** Spring, Fall

CHEE 3110 Process Heat Transfer  
[3 credit hours]  
**Prerequisites:** CHEE 2110 (may be taken concurrently) with a minimum grade of D- and CHEE 2230 with a minimum grade of D-
**Corequisites:** CHEE 2110  
**Term Offered:** Spring

CHEE 3120 Mass Transfer  
[3 credit hours]  
Mass transfer and its application in chemical engineering separations. Diffusivity, mass transfer coefficients and Fick's Law. Applications in continuous and stagewise processes, including absorption, extraction and distillation.  
**Prerequisites:** (CHEE 2110 with a minimum grade of D- and CHEE 3030 (may be taken concurrently) with a minimum grade of D-) and MATH 2850 (may be taken concurrently) with a minimum grade of D-
**Term Offered:** Fall

CHEE 3300 Reactor Engineering And Design  
[3 credit hours]  
**Prerequisites:** CHEE 2230 with a minimum grade of D- and CHEM 2410 with a minimum grade of D- and MATH 2850 (may be taken concurrently) with a minimum grade of D-
**Term Offered:** Fall

CHEE 3400 Process Dynamics And Control  
[3 credit hours]  
An introduction to designing control systems for chemical engineering processes. Process stability and controller design and selection. Application of LaPlace transforms, frequency response techniques and simulation software for open-loop and closed-loop analysis.  
**Prerequisites:** CHEE 3300 with a minimum grade of D- and MATH 2860 with a minimum grade of D- or MATH 3860 with a minimum grade of D- or MATH 3820 with a minimum grade of D- and CHEE 2110 with a minimum grade of D-
**Term Offered:** Fall

CHEE 3940 Co-Op Work Experience  
[1 credit hour]  
Approved co-op work experience. Course may be repeated.  
**Prerequisites:** CHEE 1010 with a minimum grade of D- and CHEE 2010 with a minimum grade of D-
**Term Offered:** Spring, Summer, Fall

CHEE 3950 Co-Op Experience  
[1 credit hour]  
Approved co-op work experience beyond third required co-op experience. Course may be repeated.  
**Prerequisites:** CHEE 3940 with a minimum grade of D-
**Term Offered:** Spring, Summer, Fall

CHEE 4010 Green Engineering Principles  
[3 credit hours]  
The principles of chemical process analysis and design are introduced for the development of the green engineering processes. Common components of chemical processes are reviewed and quantitative analyses of process performance and economics developed. The impact of design variables on material and energy usage is demonstrated.  
**Prerequisites:** CHEM 1240 with a minimum grade of D-
**Term Offered:** Spring, Fall

CHEE 4110 Green Engineering Applications  
[3 credit hours]  
Applications of green engineering principles in the chemical industry are discussed. Metrics for comparing process options are introduced along with common techniques for improving process performance.  
**Prerequisites:** CHEE 4010 with a minimum grade of D-
**Corequisites:** CHEE 4520  
**Term Offered:** Spring, Fall

CHEE 4120 Biofuels  
[3 credit hours]  
The technical, economic, social, and political issues associated with energy consumption are discussed. The potential for biofuels to replace current energy sources is examined based on the historical evolution of the industry and current research activity.  
**Prerequisites:** CHEM 1230 with a minimum grade of D-
**Term Offered:** Spring

CHEE 4410 Bioseparations  
[3 credit hours]  
Introduction to, analysis and industrial design of processes required to separate and purify proteins and other biological compounds for the downstream processing of bioreactor products. The separations techniques will include filtration, chromatography and crystallization.  
**Prerequisites:** BIOE 3400 with a minimum grade of D- or CHEE 3120 with a minimum grade of D-
**Term Offered:** Fall

CHEE 4500 Chemical Engineering Laboratory I  
[3 credit hours]  
An experimental study of the design and performance of selected chemical engineering processes and equipment. Analysis of data, design of experiments and laboratory reports are emphasized.  
**Prerequisites:** (CHEE 2110 with a minimum grade of D- and CHEE 3030 with a minimum grade of D- and CHEE 3110 with a minimum grade of D-)
**Term Offered:** Spring, Fall
CHEE 4520 Chemical Process Economics And Design  
[3 credit hours]  
Chemical equipment and process design. Introduction to simulation and flow-sheeting techniques and software. Topics include plant safety and pollution prevention, market analysis, cost estimating, decision making and cash flow analysis.  
**Prerequisites:** CHEE 2110 with a minimum grade of D- and CHEE 2330 with a minimum grade of D- and CHEE 3110 with a minimum grade of D- and CHEE 3940 with a minimum grade of PS  
**Term Offered:** Spring, Summer  

CHEE 4540 Chemical Process Simulation And Design  
[3 credit hours]  
Application of chemical engineering fundamentals and the use of process simulators in the synthesis of chemical processes. Use of cost factors and environmental considerations in process decisions. The solution of a comprehensive case study and the preparation of a formal report are required.  
**Prerequisites:** CHEE 3120 with a minimum grade of D- and CHEE 4520 with a minimum grade of D- and CHEE 3300 with a minimum grade of D-  
**Term Offered:** Fall  

CHEE 4550 Chemical Engineering Laboratory II  
[3 credit hours]  
An experimental study of the design and performance of selected chemical engineering process equipment, focusing on heat and mass transfer and process control. Design of experiments, analysis of data and presentation techniques are emphasized.  
**Prerequisites:** (CHEE 3300 (may be taken concurrently) with a minimum grade of D- and CHEE 3120 (may be taken concurrently) with a minimum grade of D- and CHEE 3400 (may be taken concurrently) with a minimum grade of D- and CHEE 4500 (may be taken concurrently) with a minimum grade of D-)  
**Term Offered:** Fall  

CHEE 4800 Polymer Science And Engineering  
[3 credit hours]  
Polymerization processes, characterization, structure and properties of polymers, processing and engineering applications of the major polymer types.  
**Term Offered:** Fall  

CHEE 4960 Senior Honors Thesis  
[3 credit hours]  
Independent research under the guidance of a faculty member, requiring an oral report and a written thesis upon completion of work.  
**Term Offered:** Spring, Summer, Fall  

CHEE 4980 Special Topics In Chemical Engineering  
[1-4 credit hours]  
Special topics of interest to chemical engineers - upper division.  
**Term Offered:** Spring, Summer, Fall  

CHEE 4990 Independent Studies In Chemical Engineering  
[1-4 credit hours]  
Independent studies in chemical engineering - upper division.  
**Term Offered:** Spring, Summer, Fall  

---  

## BS in Chemical Engineering  
Below is a sample plan of study. Consult your degree audit for your program requirements.  

### Bachelor of Science in Chemical Engineering

Total Hours: 131

Students will demonstrate an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

Students will demonstrate an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, economic, and environmental factors.

Students will demonstrate an ability to communicate effectively with a range of audiences.

Students will demonstrate an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

Students will demonstrate an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

Students will demonstrate an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

Students will demonstrate an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**Department of Civil Engineering and Environmental Engineering**

Defne Apul, Professor and Chair
Nitschke Hall Room 3006
Phone: 419.530.8115
Fax: 419.530.8116
defne.apul@utoledo.edu

Kyle D. Sawyer, Assistant Director of Dept. Student Services
kyle.sawyer@utoledo.edu

Douglas Nims, Undergraduate Program Director
douglas.nims@utoledo.edu

**Degrees Offered**

- BS in Civil Engineering (p. 242)
- BS in Environmental Engineering (p. 243)
- Minor in Surveying (p. 245)

**CIVE 1000 Freshman Civil Engineering Experience**
0-1 credit hours
Computer literacy, report writing, word processing, table creation, equation, equation writing, data manipulation, data graphical plotting. Introduction to various disciplines in Civil Engineering, Structural, Geotechnical, Transportation, Environmental. Practice in engineering problem solving process.

**Term Offered:** Fall

**CIVE 1100 Civil Engineering Measurements**
3 credit hours

**Corequisites:** CIVE 1110

**Term Offered:** Spring, Fall

**CIVE 1110 Computer Aided Drafting for Civil Engineers**
1 credit hour
Study of graphical representation of engineering structures and systems and application by hand-drawing and computer aided techniques.

**Corequisites:** CIVE 1100

**Term Offered:** Spring, Fall

**CIVE 1150 Engineering Mechanics: Statics**
3 credit hours
Study of coplanar statics of particles, vector addition, resultant components, equilibrium, free body diagrams, equivalent force systems, vector products, scalar products, 2 & 3 dimensional equilibrium of rigid bodies, analysis of machines, pulleys, trusses. Centroids, moments of inertia, shear and bending moment diagrams.

**Prerequisites:** (MATH 1850 with a minimum grade of D- and PHYS 2130 with a minimum grade of D-) or (MATH 1920 with a minimum grade of D- and PHYS 2130 with a minimum grade of D-)

**Term Offered:** Spring, Summer, Fall
CIVE 1160 Engineering Mechanics: Strength Of Materials
[3 credit hours]
Prerequisites: CIVE 1150 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

CIVE 1170 Fluid Mechanics For Civil Engineers
[3 credit hours]
Fundamental concepts of fluid mechanics. Use of hydrostatics, continuity, momentum and energy equations to solve fluid problems applied to pipe flow, open channel flow and boundary layer flow. Introduction to turbo machinery.
Prerequisites: PHYS 2130 with a minimum grade of D-
Term Offered: Spring

CIVE 2000 Professional Development
[1 credit hour]
Basic concepts of career planning, co-op performance expectations, necessary skills for maximizing learning from experiences and realities of the professional community.
Prerequisites: CIVE 1000 with a minimum grade of D-
Term Offered: Spring

CIVE 2110 Civil Engineering Materials With Laboratory
[3 credit hours]
Introduction to properties of aggregates, Portland cement, concrete, steel, glass and bituminous mixtures. Mix designs of cement and asphalt concrete and standard test procedures for strength, workability, serviceability and durability.
Prerequisites: CIVE 1160 with a minimum grade of D-
Term Offered: Spring, Fall

CIVE 2550 Sustainability Problem Solving
[3 credit hours]
Teams of students work as part of an enterprise to address real-world engineering design projects or problems. Develops group problem-solving skills. Stresses interpersonal, project management, and action planning skills. Frames the problem from a systems and sustainability perspective including the technical, social, economic, and environmental dimensions and solutions of the problem.
Term Offered: Spring, Summer, Fall

CIVE 2990 Individual Study In Civil Engineering
[1-3 credit hours]
An opportunity for qualified underclassmen to pursue a relevant area of Civil Engineering of particular personal interest under the supervision of a faculty member.
Term Offered: Summer, Fall

CIVE 3120 Civil Engineering Systems Analysis
[3 credit hours]
Systems Approach, optimization by differential calculus techniques, linear programming, transportation and assignment problems, management of construction projects, critical path method, PERT and decision analysis.
Prerequisites: MATH 3860 with a minimum grade of D- or MATH 2860 with a minimum grade of D-
Term Offered: Spring, Fall

CIVE 3210 Soil Mechanics
[0-3 credit hours]
A study of soil as an engineering material. Geologic origins, physical properties, movement of water through soil, soil stresses, consolidation, shear strength. Engineering properties testing of soils in laboratory.
Prerequisites: (CIVE 1160 with a minimum grade of D- and CIVE 1170 with a minimum grade of D-)
Term Offered: Spring, Fall

CIVE 3220 Foundation Engineering
[3 credit hours]
Application of soil mechanics principles to design for problems encountered in excavations, embankments, foundations, retaining structures, abutments, slope stability. Evaluation of the ability of soil to function in various capacities.
Prerequisites: CIVE 3210 with a minimum grade of D-
Term Offered: Summer

CIVE 3310 Structural Analysis
[3 credit hours]
Analysis of statically determinate structures; analysis of simple and compound trusses, beams and frames; introduction to indeterminate structures; slope deflection and moment distribution. Introduction to computer applications.
Prerequisites: (CIVE 1160 with a minimum grade of D- and MATH 1890 with a minimum grade of D- or MATH 2890 with a minimum grade of D-)
Term Offered: Spring, Fall

CIVE 3410 Steel Design I
[3 credit hours]
An introduction to the principles underlying design of axial tension members, axial compression members, beams, columns and base plates. Also includes welded and bolted connections.
Prerequisites: CIVE 3310 with a minimum grade of D- and CIVE 2110 with a minimum grade of D-
Term Offered: Spring, Fall

CIVE 3420 Reinforced Concrete Design I
[3 credit hours]
Introduction to principles and underlying design of basic structural beams, columns, one-way slabs in reinforced concrete. Shear reinforcement.
Prerequisites: CIVE 3310 with a minimum grade of D-
Term Offered: Spring, Fall
CIVE 3510 Transportation Engineering I
[3 credit hours]
To provide an overview of transportation systems and operating characteristics of various highway modes. Concept of land use/transportation interaction. Considerations of vehicle and human characteristics in design of highway elements. Introduction to highway capacity and traffic control devices. Transportation planning process leading to local area traffic management with introduction to transportation system management and intelligent transportation systems.
Prerequisites: (CIVE 1100 with a minimum grade of D- and MIME 2300 with a minimum grade of D-)
Term Offered: Fall

CIVE 3520 Transportation Engineering II
[3 credit hours]
Survey of various modes of transport with emphasis on service provided by each and facilities required. Introduction to physical and practical aspects of design of transport facilities including drainage, pavements, railroads, ports and harbors, pipelines and transportation terminals.
Prerequisites: (CIVE 3510 with a minimum grade of D- and CIVE 3210 with a minimum grade of D- and CIVE 2110 with a minimum grade of D-)
Term Offered: Summer

CIVE 3610 Water Supply And Treatment
[0-3 credit hours]
This course includes lecture, laboratory exercises and a team-based design project. The topics covered will include water quality, water supply, design of the physical and chemical treatment processes, water distribution systems and contemporary issues related to drinking water.
Prerequisites: CIVE 1170 with a minimum grade of D-
Term Offered: Fall

CIVE 3620 Air Pollution Engineering I
[3 credit hours]
Introduction to sources of air pollution, basic meteorological processes, air quality modeling, technology for air pollution control, odor control and noise pollution. Introduction to health effects of air pollutants, risk assessment and global atmospheric change. The students are required to use the USEPA programs for stack design and computations for ground level concentrations.
Prerequisites: CIVE 1170 with a minimum grade of D-
Term Offered: Spring

CIVE 3630 Wastewater Engineering
[3 credit hours]
This course is focused on wastewater engineering processes. The class format may include lectures, laboratory and field exercises, problem sessions, and team-based design work. The topics covered will include wastewater characterization, collection, treatment process design, discharge, as well as stormwater management and modeling.
Prerequisites: CIVE 1170 with a minimum grade of D-
Term Offered: Spring, Fall

CIVE 3720 Boundary Surveying
[3 credit hours]
Analysis of evidence and procedures for boundary location, Researching local survey records, and Platting and Subdivision Design. Basic legal principles for boundary surveying. Evaluation, use, and admissibility of boundary evidence in courts of law. Discussion of surveyor’s liability and role in courts of law.
Prerequisites: CIVE 1100 with a minimum grade of D- and CIVE 1110 with a minimum grade of D-
Term Offered: Spring

CIVE 3730 Geodetic and Control Surveying
[0-3 credit hours]
Introduction to Geodesy and Control Surveying including State Plane Coordinates, Azimuths from Celestial Observations, Development of Control Networks for Surveys, Introduction of Global Positioning Systems and Aerial Mapping, high accuracy measurements which account for the curvature of the Earth, and definitions of geodetic data for survey control.
Prerequisites: (CIVE 1100 or CET 1210) AND (CIVE 1110 or CET 2030)
Prerequisites: (CIVE 1100 with a minimum grade of D- or CET 1210 with a minimum grade of D-) and (CIVE 1110 with a minimum grade of D- or CET 2030 with a minimum grade of D-)
Term Offered: Summer

CIVE 3760 Route and Construction Surveying
[0-3 credit hours]
Route Surveying and Geometric Design including Horizontal, Vertical and Spiral Curves, Topographic Surveying and Mapping, Earthwork Volumes, and Construction Layout and Staking. Prerequisites: (CIVE 1100 or CET 1210) AND (CIVE 1110 or CET 2030)
Prerequisites: (CIVE 1100 with a minimum grade of D- or CET 1210 with a minimum grade of D-) and (CIVE 1110 with a minimum grade of D- or CET 2030 with a minimum grade of D-)
Term Offered: Summer

CIVE 3770 Cadastral Surveys and Ohio Land Systems
[3 credit hours]
Prerequisites: (CIVE 1100 with a minimum grade of D- or CET 1210 with a minimum grade of D-) and (CIVE 1110 with a minimum grade of D- or CET 2030 with a minimum grade of D-)
Term Offered: Summer

CIVE 3940 Co-Op Experience
[1 credit hour]
Approved co-op work experience. Course may be repeated.
Prerequisites: CIVE 2000 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

CIVE 3950 Co-op Experience
[1 credit hour]
Approved co-op work experience beyond third required co-op experience. Course may be repeated.
Prerequisites: CIVE 3940 with a minimum grade of D-
Term Offered: Spring, Summer, Fall
CIVE 4210 Advanced Soil Mechanics  
[3 credit hours]  
A study of soil behavior including stress distributions, deformation, consolidation and shear strength. The course focuses upon the development and use of well accepted solutions and practical applications.  
Prerequisites: CIVE 3210 with a minimum grade of D-

CIVE 4240 Design With Geosynthetics  
[3 credit hours]  
Use of geosynthetic materials in engineering design for reinforcement, barrier, separation and/or drainage functions. Design applications for geotechnical, transportation and environmental uses.  
Prerequisites: (CIVE 3210 with a minimum grade of D- and CIVE 3220 with a minimum grade of D-)  

CIVE 4300 Advanced Mechanics Of Materials  
[3 credit hours]  
Introduction to theory of elasticity, plane-stress and plane-strain problems, yield criteria and failure theories, bending of beams, energy methods, curved flexural members, unsymmetrical bending, torsion, shear center and axisymmetrically loaded members.  
Prerequisites: CIVE 1160 with a minimum grade of D- and (MATH 2860 with a minimum grade of D- or MATH 3860 with a minimum grade of D- or MATH 3820 with a minimum grade of D-)  
Term Offered: Fall

CIVE 4320 Computer-Aided Analysis of Structures  
[3 credit hours]  
Matrix analysis of continuous beams, trusses and frames by force method and displacement method. Methods of consistent deformation and slope deflection will be discussed to complement the matrix analysis. Computer applications.  
Prerequisites: CIVE 3310 with a minimum grade of D-

CIVE 4340 Experimental Mechanics  
[3 credit hours]  
Prerequisites: CIVE 2110 with a minimum grade of D-
Term Offered: Spring

CIVE 4430 Structural Steel Design II  
[3 credit hours]  
Study of local failure in beams, biaxial bending, plate girders, composite beams, semi-rigid composite connections and beam columns.  
Prerequisites: CIVE 3410 with a minimum grade of D-
Term Offered: Spring

CIVE 4440 Reinforced Concrete Design II  
[3 credit hours]  
Prerequisites: CIVE 3420 with a minimum grade of D-

CIVE 4480 Reinforced Masonry Design  
[3 credit hours]  
Study of the design of reinforced and unreinforced masonry design, beams and walls and columns. Working stress design, strength design and empirical design are studied.  
Prerequisites: CIVE 3420 with a minimum grade of D-
Term Offered: Spring, Fall

CIVE 4550 Traffic Control  
[3 credit hours]  
To provide a detailed understanding of the basic concepts of traffic engineering together with driver-roadway-vehicle system characteristics. Capacity analysis of freeways, rural highways, multilane and two lane highways. Traffic control devices and traffic signal design and capacity. Traffic studies and data collections; volume, speed and travel time, accident and parking studies. Introduction to other tools to mitigate traffic congestion.  
Prerequisites: CIVE 3510 with a minimum grade of D-
Term Offered: Fall

CIVE 4610 Hydrology And Water Resources  
[3 credit hours]  
This course is directed to application of fluid mechanics, hydrology, and hydraulics to the discipline of water resources engineering. Topics covered include flow in closed conduits, flow in open channels, pump systems, surface water hydrology, and computational modeling for hydraulic systems. At the successful completion of this course, the student will learn to apply the fundamental principles to the practical solution of both analysis and design problems in closed and open conduit flows.  
Prerequisites: (CIVE 3610 with a minimum grade of D- and MIME 4000 with a minimum grade of D-)  
Term Offered: Spring, Fall

CIVE 4630 Indoor Air Quality  
[3 credit hours]  
Characterization of indoor air pollutants, predictions of indoor air quality levels and indoor air quality control. Four to five design problems involving indoor air quality will be discussed/solved in the class. Special emphasis on the indoor radon and asbestos problems in the United States. Use of USEPA program.  
Term Offered: Fall

CIVE 4680 Environmental Law  
[3 credit hours]  
An overview of the major federal environmental statutes: Clean Air Act, Clean Water Act, RCRA, CERCLA, etc. and legal perspective of why they were developed. Exposure to some basic legal principles which will be integrated into the overall study of environmental law. Provides a practical perspective on how the law can be applied to situations encountered by environmental engineers and scientists in the real world.  
Term Offered: Fall

CIVE 4690 Sustainability Engineering  
[3 credit hours]  
Course develops students' abilities to apply the principles of sustainability to engineered systems. Course topics include sustainability definition and data, life cycle assessment based design, planetary boundaries, greenhouse gas emissions, green construction.  
Term Offered: Spring, Fall
CIVE 4710 Advanced Engineering Systems Modeling
[3 credit hours]
A systematic approach to the analysis of complicated engineering system involving uncertain and probabilistic phenomena. Decision-making with multiple objectives, monte carlo simulation, reliability based design, and Markov process are studied. **Prerequisites:** (CIVE 3120 with a minimum grade of D- and MIME 4000 with a minimum grade of D-) **Term Offered:** Fall

CIVE 4720 Boundary Control and Legal Principles
[3 credit hours]
Establishment and Re-establishment of Land Boundaries, Locating Points and Line for Boundaries, Historical Development of Boundaries, Introduction of Rectangular System of Public Land Surveys, Systems to Describe Properties, Application of Legal Principles to Boundary Analysis. **Prerequisites:** (CIVE 1100 or CET 1210) AND (CIVE 1110 or CET 2030). **Prerequisites:** (CIVE 1100 with a minimum grade of D- or CET 1210 with a minimum grade of D-) and (CIVE 1110 with a minimum grade of D- or CET 2030 with a minimum grade of D-) **Term Offered:** Fall

CIVE 4750 Senior Design Projects
[0-3 credit hours]
To provide real world civil engineering design experience through a design problem as would be developed in an actual civil engineering consultant’s office. **Term Offered:** Spring, Fall

CIVE 4770 Legal and Ethical Aspects of Surveying
[3 credit hours]
Study of Statute and Common Law pertaining to Surveying and Property Rights, Interpretations and Methods to Describe Real Property, Minimum Standards for Surveys, Ethics for Professional Surveyors. **Prerequisites:** (CIVE 1100 or CET 1210) AND (CIVE 1110 or CET 2030) **Prerequisites:** (CIVE 1100 with a minimum grade of D- or CET 1210 with a minimum grade of D-) and (CIVE 1110 with a minimum grade of D- or CET 2030 with a minimum grade of D-) **Term Offered:** Fall

CIVE 4900 Seminars In Civil Engineering
[1-3 credit hours]
An opportunity for qualified upperclassmen to pursue a relevant area of Civil Engineering of particular personal interest under the supervision of a faculty member. **Term Offered:** Spring, Summer, Fall

CIVE 4980 Special Topics
[1-3 credit hours]
A special topic at the undergraduate level in Civil or Environmental Engineering to be offered as a course during a term by a faculty member. This is intended for students nearing graduation. Credits will correspond to regular class meeting of one lecture hour per week per credit hour. **Term Offered:** Spring, Summer, Fall

CIVE 4990 Independent Study
[1-3 credit hours]
An opportunity for a qualified upper class person to pursue a relevant area of Civil Engineering under the supervision of a faculty member. **Term Offered:** Spring, Summer, Fall

and at least one additional area of science. The graduates are also able to apply probability and statistics to address uncertainty. (Application) Outcome B: The graduates can analyze and solve problems in a minimum of four (4) recognized major CE areas. (Analysis) Outcome C: The graduates have the ability to conduct laboratory experiments and to critically analyze and interpret data in at least two technical areas of CE. (Analysis) Outcome D: The graduates have the ability to perform CE design in at least two civil engineering contexts by means of design experiences integrated throughout the professional component of the curriculum. The graduates have the ability to include principles of sustainability in design. (Synthesis) Outcome E: The graduates have an understanding of professional practice issues such as: procurement of work; bidding versus quality-based selection processes; how the design professionals and the construction professions interact to construct a project; the importance of professional licensure and continuing education; and/or other professional practice issues. (Analysis) Outcome F: The graduates have an understanding of the basic concepts in project management, business, public policy, and leadership through discussion in different courses. (Comprehension)
ENVE Technical Elective – 4 courses

Hours 15

Second Term

CHEM 1240 General Chemistry II 4
CHEM 1290 General Chemistry Lab II 1
MATH 1860 Single Variable Calculus II 4
CHEE 2010 Mass And Energy Balances 3
CIVE 2000 Professional Development 1
EEES Elective 3
CIVE 1110 Computer Aided Drafting for Civil Engineers 1

Hours 17

Third Term

PHYS 2130 Physics For Science And Engineering Majors I 5
MATH 2850 Elementary Multivariable Calculus 4
CHEE 2230 Chemical Engineering Thermodynamics I 3
ENGL 1110 College Composition I 3
CIVE 2550 Sustainability Problem Solving 3

Hours 18

Fourth Term

CIVE 3940 Co-Op Experience 1

Hours 1

Fifth Term

Arts/Humanities/Social Science Core 3
Arts/Humanities/Social Science Core 3
MATH 2860 Elementary Differential Equations 3
CIVE 1150 Engineering Mechanics: Statics 3
MIME 4000 Engineering Statistics I 3

Hours 15

Sixth Term

CIVE 3940 Co-Op Experience 1

Hours 1

Seventh Term

CIVE 1170 Fluid Mechanics For Civil Engineers 3
EEES 3050 General Ecology 3
ENGL 2950 Science And Technical Report Writing 3
CIVE 1160 Engineering Mechanics: Strength Of Materials 3
CIVE 3120 Civil Engineering Systems Analysis 3

Hours 15

Eighth Term

CIVE 3940 Co-Op Experience 1

Hours 1

Ninth Term

CIVE 4680 Environmental Law 3
CIVE 3210 Soil Mechanics 3
CIVE 3610 Water Supply And Treatment 3
CIVE 4610 Hydrology And Water Resources 3
EEES 4450 Hazardous Waste Management 3

Hours 15

Tenth Term

CIVE 3620 Air Pollution Engineering I 3

Hours 3

Eleventh Term

ECON 3240 Environmental Economics 3
ENVE Technical Elective 3
Arts/Humanities/Social Science Core 3
Arts/Humanities/Social Science Core 3
Arts/Humanities/Social Science Core 3

Hours 15

Twelfth Term

ENVE Technical Elective 3
ENVE Technical Elective 3
ENVE Technical Elective 3
CIVE 3630 Wastewater Engineering 3
CIVE 4750 Senior Design Projects 3

Hours 15

Total Hours 131

Per ABET accreditation requirements, engineering programs must demonstrate that their students attain the following outcomes:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. (Analysis)
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. (Synthesis)
3. An ability to communicate effectively with a range of audiences. (Application)
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. (Application)
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. (Application)
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions (Analysis)
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies. (Application)

The educational category based on Bloom’s taxonomy are given in parentheses for each outcome.

**Minor in Surveying**

The College of Engineering offers several minors for students at The University of Toledo. These minors are recommended for students who want to enhance their academic programs with engineering-related course work and are intended to allow students to develop expertise in a discipline outside their majors. Students taking courses in theses minors must meet course prerequisite requirements. Students should contact advisors in the College of Engineering for additional details about the course requirements of minors and contact advisors in their home college to determine how the minors will fit into their degree curriculum. Note that per University of Toledo policy, minors cannot be declared by students in the same major as a given minor since at least 12 hours of the minor must be distinct from any credit hours used to fulfill any major the student is pursuing.

**Department of Electrical Engineering and Computer Science**

**Liang Cheng**, Professor, Chair  
Nitschke Hall Room 2008  
Phone: 419.530.8140  
Fax: 419.530.8146  
lvcheng@utoledo.edu (mansoor.alam2@utoledo.edu)

**Daniel Georgiev**, Graduate Program Director  
daniel.georgiev@utoledo.edu

**Joseph Hobbs**, Undergraduate Program Director  
joseph.hobbs@utoledo.edu

**Christie Hennen**, Associate Director of Dept. Student Services  
christina.hennen@utoledo.edu

The mission of the EECS Department is to educate future engineers and scientists in the fields of electrical engineering and computer science; to contribute to the body of knowledge in the fields of electrical engineering and computer science; and to conduct research and contribute to the development of innovative solutions to address diverse technological and societal needs.

**Degrees Offered**

- BS in Computer Science and Engineering (p. 251)
- BS in Electrical Engineering (p. 253)
- Minor in Computer Science (p. 254)

**EECS 1000 Introduction to Electrical Engineering**  
[3 credit hours]  
Orientation to the University, college and departmental facilities, procedures and methodologies available to the student for their academic journey. Introduction to fundamental topics in electrical engineering, engineering design and problem solving.  
**Term Offered**: Fall

**EECS 1030 Introduction to Computer Science and Engineering**  
[3 credit hours]  
Orientation to the University, college and departmental facilities, procedures and methodologies available to the student for their academic journey. Introduction to Computer Science and Engineering, with an emphasis on the fundamentals of computer programming and problem solving.  
**Term Offered**: Spring, Summer, Fall

**EECS 1100 Digital Logic Design**  
[4 credit hours]  
**Term Offered**: Spring, Fall

**EECS 1500 Introduction to Programming**  
[0-3 credit hours]  
Covers the concept and properties of an algorithm, analysis and decomposition of computational problems, use of modern programming practices. Introduction to arrays and classes. Uses the C++ language.  
**Term Offered**: Spring, Fall

**EECS 1510 Introduction To Object Oriented Programming**  
[4 credit hours]  
Introduces the basics of programming using the Java language. Covers number types, objects, methods, control structures, vectors, files, and inheritance. Utilizes the Java platform to develop GUI interfaces.  
**Prerequisites**: EECS 1030 with a minimum grade of C-  
**Term Offered**: Spring, Fall

**EECS 2000 EECS Professional Development**  
[1 credit hour]  
Preparation for entry to the professions of Electrical Engineering and Computer Science and Engineering, including ethics and social responsibilities, employment practices, continuing education and professional registration.  
**Term Offered**: Spring
EECS 2110 Computer Architecture and Organization
[3 credit hours]
Fundamentals of computer architecture, computer arithmetic, memory systems, interfacing and communication, device subsystems, processor design, cpu organization, assembly programming, performance, distributed models and multiprocessing.
Prerequisites: EECS 1100 with a minimum grade of D- and (EECS 1500 with a minimum grade of D- or EECS 1510 with a minimum grade of D-)
Term Offered: Spring, Summer

EECS 2300 Electric Circuits
[0-4 credit hours]
An introduction to electrical circuit components and laws, including ideal op-amps, DC circuit analysis, AC circuit analysis, transient analysis of RL and RC circuits and computer-aided circuit analysis.
Prerequisites: PHYS 2140 (may be taken concurrently) with a minimum grade of D-
Term Offered: Spring, Summer, Fall

EECS 2340 Electric Circuits For Nonmajors
[3 credit hours]
For students not majoring in EECS. An introduction to electrical circuit components and laws, resistive circuit analysis, AC circuit analysis, phasors, three-phase circuits and computer-aided circuit analysis.
Prerequisites: PHYS 2140 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

EECS 2500 Linear Data Structures
[4 credit hours]
This course looks at stacks, queues, and lists as well as the order of algorithms used to access and modify these structures. In addition recursion, hashing, sorting, and set representation are examined in depth.
Prerequisites: EECS 1510 with a minimum grade of C-
Term Offered: Fall

EECS 2510 Non-Linear Data Structures
[4 credit hours]
The data structures introduced in EECS 2500 are extended to include trees (binary, balanced, and n-ary), graphs, and advanced sorting techniques. In addition, the C++ language is used as the main vehicle and is introduced in the course. Students are expected to have a strong background in Java prior to this course.
Prerequisites: EECS 2500 with a minimum grade of C- and EECS 2520 (may be taken concurrently) with a minimum grade of C-
Term Offered: Spring, Fall

EECS 2520 Discrete Structures
[3 credit hours]
An introduction to the discrete structures used in computer science to develop software including proof techniques, Boolean logic, graphs, trees, recurrence relations, functions, combinatorics, and number theory.
Prerequisites: PHIL 1010 with a minimum grade of D- and EECS 1510 with a minimum grade of C-
Term Offered: Spring, Summer

EECS 3100 Embedded Systems
[4 credit hours]
Microcontroller interfacing, assembly and C language programming for embedded systems, timer, input/output synchronization; analog to digital conversion, digital to analog conversion, interrupts, and embedded system debugging techniques.
Prerequisites: EECS 2110 with a minimum grade of D- and EECS 3210 with a minimum grade of D- and EECS 3400 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

EECS 3150 Data Communications
[3 credit hours]
Analog and digital data transmission, transmission media, Modulation techniques. Data encoding, asynchronous and synchronous transmissions, USART, RS232-C, RS-449 standards. Data link configuration and control, error control, multiplexing and demultiplexing.
Prerequisites: (EECS 1100 with a minimum grade of D- and EECS 3210 with a minimum grade of D-)
Term Offered: Summer, Fall

EECS 3210 Signals and Systems
[3 credit hours]
Prerequisites: EECS 2300 with a minimum grade of D- and (EECS 1500 with a minimum grade of D- or EECS 1510 with a minimum grade of D-) and MATH 2890 with a minimum grade of D- and (MATH 3860 with a minimum grade of D- or MATH 3820 with a minimum grade of D-)
Term Offered: Spring, Fall

EECS 3220 Electric Circuits II
[3 credit hours]
Advanced topics including three-phase systems, magnetically-coupled systems, resonance and second-order systems, Laplace transform circuit analysis, Fourier series for periodic waveforms and applications to electric circuits, ideal filters, system modeling and two-port networks.
Prerequisites: EECS 2300 with a minimum grade of D-
Corequisites: EECS 3210
Term Offered: Spring, Fall

EECS 3300 Probabilistic Methods In Engineering
[3 credit hours]
Techniques for modeling and analysis of random phenomena in EECS, including communication, control and computer systems. Distribution, density and characteristic functions. Computer generation. Functions of random variables.
Prerequisites: EECS 3210 with a minimum grade of D-
Term Offered: Spring

EECS 3400 Electronics I
[0-4 credit hours]
Large-signal and incremental characteristics of the pn diode, BJT, MOSFET and JFET. Large- signal analysis and computer simulation of devices and digital circuits. Logic gate implementation. Laboratory experiments and projects.
Prerequisites: EECS 2300 with a minimum grade of D-
Term Offered: Spring, Fall
EECS 3420 Electronics II
[3 credit hours]
Analog transistor, diode and integrated circuit analysis and design. Incremental analysis techniques, frequency response and feedback techniques.
Prerequisites: EECS 3210 with a minimum grade of D- and EECS 3400 with a minimum grade of D-
Term Offered: Summer, Fall

EECS 3440 Electronics Laboratory
[1 credit hour]
Laboratory experiments and projects in the testing and design of analog and mixed-signal electronic circuits.
Prerequisites: EECS 3420 with a minimum grade of D-
Term Offered: Spring, Fall

EECS 3460 Electrical Energy Conversion
[3 credit hours]
Traditional and renewable electrical energy sources, principles of electromechanical energy conversion, magnetic circuits and transformers, steady state performance of synchronous machines, dc machines, single phase and three phase induction motors.
Prerequisites: EECS 3710 (may be taken concurrently) with a minimum grade of D-
Term Offered: Summer, Fall

EECS 3480 Energy Conversion Laboratory
[1 credit hour]
Laboratory studies of power transformers, synchronous machines, DC machines, single and three phase induction motors.
Prerequisites: EECS 3460 with a minimum grade of D-
Term Offered: Spring, Fall

EECS 3540 Systems And Systems Programming
[3 credit hours]
Examines the external and internal characteristics of computer operating systems and related software. Details of at least one operating system and comparison with other operating systems. An introduction to systems level programming.
Prerequisites: EECS 2110 with a minimum grade of D- and EECS 2510 with a minimum grade of D-
Term Offered: Spring

EECS 3550 Software Engineering
[3 credit hours]
An introduction to the Software Engineering process. Includes: the software lifecycle, user requirements, human-computer interaction, functional specification, software design, software tools, testing and modification. A major term project is assigned.
Prerequisites: EECS 2510 with a minimum grade of D- and (ENGL 2950 with a minimum grade of D- or HON 1020 with a minimum grade of D-)
Term Offered: Spring

EECS 3560 Programming Languages and Paradigms
[3 credit hours]
Primary constructs of contemporary programming languages, four major programming paradigms (imperative, functional, logical, and object-oriented), representative programming languages of these paradigms and their usages.
Prerequisites: EECS 2510 with a minimum grade of C-
Term Offered: Spring, Fall

EECS 3710 Electromagnetics I
[3 credit hours]
The nature of electromagnetism, Complex numbers, Transmission lines, Smith chart, Impedance matching, Vector analysis, Coordinate transformations, Electrostatics, Electrical properties of materials, Boundary conditions, Magnetostatics, Magnetic properties of materials, Boundary conditions.
Prerequisites: EECS 2300 with a minimum grade of D- and PHYS 2140 with a minimum grade of D- or MATH 2860 with a minimum grade of D- or MATH 3860 with a minimum grade of D- or MATH 3820 with a minimum grade of D-
Term Offered: Spring, Fall

EECS 3720 Electromagnetics II
[3 credit hours]
Maxwell's equations, Boundary conditions for electromagnetics, Plane-wave propagation in lossless and lossy media, Reflection, Transmission, Waveguides, Cavity resonators, Radiation, Antenna radiation characteristics, Antennas, Satellite communication systems, Introduction to CAD tools.
Prerequisites: EECS 3710 with a minimum grade of D-
Term Offered: Spring

EECS 3940 Co-Op Experience
[1 credit hour]
Approved co-op work experience. Course may be repeated.
Prerequisites: EECS 2000 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

EECS 3950 Co-Op Experience
[1 credit hour]
Approved co-op work experience beyond third required co-op experience. Course may be repeated.
Prerequisites: EECS 3940 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

EECS 4000 Senior Design Project
[4 credit hours]
Student teams select and research a design project and propose a design which is implemented, tested and evaluated. Progress reports, a written final report and an oral presentation are required.
Prerequisites: EECS 3100 with a minimum grade of D- or EECS 3420 with a minimum grade of D-
Term Offered: Spring, Fall

EECS 4010 Senior Design Project I
[1 credit hour]
Student teams select and research a design project and propose a design. Topics covered include entrepreneurship, business plan, technical communications, design process, design teams, standards, ethics, safety and environment, and intellectual property. A fully developed senior design project proposal is required.
Prerequisites: EECS 3100 with a minimum grade of D- or EECS 3420 with a minimum grade of D-
Term Offered: Spring, Fall
EECS 4020 Senior Design Project II
[3 credit hours]
Student teams implement, test and evaluate a design previously proposed in EECS 4010. Written reports on progress and final project are required. Preliminary design and critical design reviews may be performed. Oral presentation and senior design exposition participation are needed.
Prerequisites: EECS 4010 with a minimum grade of D-
Term Offered: Spring, Fall

EECS 4050 VLSI and FPGA System Design & Applications
[3 credit hours]
This course will cover the basic fundamentals of Very Large Scale Integrated (VLSI) systems and Field Programmable Gate Arrays (FPGAs). Topics include: VHDL, CAD Tools, CMOS VLSI Design including design of Adders and Multipliers, FPGA Architecture, Interconnect Delay, Memory Structures, Timing and Clocking, Design for Performance, Custom IC Design including ASICs, Floor Planning, Placement and Routing, and Testing of VLSI circuits and FPGAs.
Prerequisites: EECS 2110 with a minimum grade of C-
Term Offered: Fall

EECS 4100 Theory of Computation
[3 credit hours]
Examines formal models of automata and languages. Finite-state automata, regular languages, pushdown automata, context-free languages, Turing machines, decidability, reducibility, and P vs NP complexity classes.
Prerequisites: EECS 2510 with a minimum grade of D- and EECS 2520 with a minimum grade of D-
Term Offered: Spring

EECS 4120 Introduction to Fuzzy Systems and Applications
[3 credit hours]
Prerequisites: EECS 2110 with a minimum grade of D-

EECS 4130 Digital Design
[4 credit hours]
The design of digital systems, design methodologies, hardware description language such as VHDL: behavioral-, data flow- and structural-level description of digital systems. Implementation technologies including PLDs and FPGAs.
Prerequisites: EECS 2110 with a minimum grade of D-
Term Offered: Spring

EECS 4170 Real-Time Embedded Systems Design
[3 credit hours]
Programming applications in a real-time environment. C language is used to program various microcontroller functions, including timers, A/D and D/A converters, RS-232 communication and CAN networking.
Prerequisites: EECS 3100 with a minimum grade of D-

EECS 4180 Computer Networks
[4 credit hours]
Prerequisites: EECS 3150 with a minimum grade of D- or EECS 2100 with a minimum grade of D-
Term Offered: Fall

EECS 4200 Feedback Control Systems
[3 credit hours]
Feedback methods for the control of dynamic systems. Topics include characteristics and performance of feedback systems, state variable analysis, stability, root locus and frequency response methods and computer simulation.
Prerequisites: EECS 3220 with a minimum grade of D-
Term Offered: Spring

EECS 4220 Programmable Logic Controllers
[3 credit hours]
An introduction to programmable logic controllers (PLCs), process control algorithms, interfacing of sensors and other I/O devices, simulation and networking.
Prerequisites: (EECS 1100 with a minimum grade of D- and EECS 3210 with a minimum grade of D-)
Term Offered: Spring, Fall

EECS 4240 Power Systems Operation
[3 credit hours]
Single line diagrams and per unit calculations, network matrices and Y-bus, load flow techniques, large system loss formula, real and reactive power dispatch, power system relays and protection.
Prerequisites: EECS 3460 with a minimum grade of D-
Term Offered: Spring, Fall

EECS 4260 Control Systems Design
[3 credit hours]
A general study of computer-aided design of control systems. Topics include: stability, compensation, pole placement, nonlinear systems and digital systems.
Prerequisites: EECS 4200 with a minimum grade of D-
Term Offered: Fall

EECS 4330 Image Analysis And Computer Vision
[3 credit hours]
Imaging geometry, image filtering, segmentation techniques, image representation and description, stereo vision and depth measurements, texture analysis, dynamic vision and motion analysis, matching and recognition.
Prerequisites: EECS 3300 with a minimum grade of D-
Term Offered: Fall

EECS 4360 Communication Systems
[3 credit hours]
Fourier transform applications in signal analysis and communication. Signals spectra, filtering, AM and FM modulation, noise and optimum receiver, sampling theorem, multiplexing, PCM, introduction to digital modulators and demodulators.
Prerequisites: EECS 3300 with a minimum grade of D-
Term Offered: Spring, Fall
EECS 4370 Information Theory And Coding
[3 credit hours]
Coding concepts, Huffman code, entropy analysis, channel and mutual information, channel capacity and Shannon's theorem, algebraic coding theory and application to blockcode and cyclic code, introduction to convolutional code.
Prerequisites: EECS 3300 with a minimum grade of D-
Term Offered: Spring, Fall

EECS 4380 Digital Signal Processing
[3 credit hours]
Discrete Fourier Transform (DFT), discrete convolution and correlation, Fast Fourier Transform (FFT) and its applications, design of IIR and FIR digital filters, multirate/channel digital systems, decimation and interpolation.
Prerequisites: EECS 3210 with a minimum grade of D-
Term Offered: Spring

EECS 4390 Wireless And Mobile Networks
[3 credit hours]
Mobile radio propagation; the cellular concept; multiple radio access; multiple division techniques; channel allocation; mobile communication systems; existing wireless systems; network protocols; AD HOC and sensor networks; wireless LANS and PANS; recent advances.
Prerequisites: (EECS 3210 with a minimum grade of D- and EECS 3300 with a minimum grade of D-) or (EECS 3210 with a minimum grade of D- and MIME 4000 with a minimum grade of D-)
Term Offered: Spring, Fall

EECS 4400 Solid State Electronics
[3 credit hours]
A comprehensive treatment of the theory and operation of physical electronic devices emphasizing electrical transport in metals and semiconductors and various models of BJT’s and FET’s.
Prerequisites: (EECS 3400 with a minimum grade of D-) and PHYS 3070 with a minimum grade of D-
Term Offered: Spring, Fall

EECS 4410 Electro-Optics
[3 credit hours]
Introduction to laser physics, optics, optical waveguides, optical communication systems and electro-optics. Design of light processing and communication systems will be considered with emphasis on optics and optical communication.
Prerequisites: EECS 3710 with a minimum grade of D-
Term Offered: Spring, Fall

EECS 4460 Power Systems Management
[3 credit hours]
An advanced study of the management and operation of today's power system. Included are historical developments, utility and operational costs and economics, power generation alternatives, fuel alternatives, renewable applications, transmission and distribution practices, and a discussion of current power system issues, both in the U.S. and abroad.
Prerequisites: EECS 3220 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

EECS 4470 Electronic Design
[3 credit hours]
Principles and techniques of analog active circuit design. Selected design problems are given and circuits using standard parts are designed and laboratory tested. A design notebook is kept.
Prerequisites: EECS 3210 with a minimum grade of D- and EECS 3420 with a minimum grade of D-
Term Offered: Spring

EECS 4480 Power Electronics
[3 credit hours]
Prerequisites: EECS 3420 with a minimum grade of D-
Term Offered: Spring, Fall

EECS 4500 Programming for the World Wide Web
[3 credit hours]
Fundamental concepts and programming languages for constructing contemporary websites. Differences and similarities between procedural, object-oriented, and scripting languages. Topics include HTML, Javascript, CSS, XML, Ajax, PHP, ASP.net, Three.js, and related technologies, as well as their impact on the programming process.
Prerequisites: EECS 2510 with a minimum grade of D- and EECS 4100 with a minimum grade of D-
Term Offered: Spring

EECS 4520 Advanced Systems Programming
[4 credit hours]
This course examines pertinent concepts of systems programming. Topics covered include: synchronization, distributed programming models, kernel design, peripheral handling, file systems and security history and methods.
Term Offered: Spring

EECS 4530 Computer Graphics I
[4 credit hours]
An introduction to typical computer graphics systems and their operation. Interactive techniques will be introduced as well as representations and projections of three-dimensional images. Exercises using graphics equipment are assigned.
Term Offered: Fall

EECS 4540 Computer Graphics II
[4 credit hours]
Examines current topics related to realistic and representative 3D computer graphics. Topics include curve and surface geometry, solid modeling, ray tracing, radiosity and real-time computer graphics.
Prerequisites: EECS 2510 with a minimum grade of D- and EECS 4530 with a minimum grade of D-

EECS 4560 Database Management Systems
[3 credit hours]
Introduction to Database Systems, Data Modeling, Entity-Relationship Diagrams, The Relational Model, SQL, Relational Algebra, Relational Calculus, Normal Forms (1NF, 2NF, 3NF, BCNF, 4NF, P.JNF/5NF), Candidate keys, superkeys, schema decomposition, Functional dependency, Entity and Referential Integrity.
Prerequisites: EECS 2510 with a minimum grade of D-
Term Offered: Spring, Fall
EECS 4580 Human Computer Interface Design
[3 credit hours]
[3 hours] The design of human-computer interfaces and their importance to human-computer interaction. Human engineering, implementation techniques, prototyping, and current and future research areas.
Prerequisite: EECS 3550
Prerequisites: EECS 3350 with a minimum grade of D-
Term Offered: Spring

EECS 4590 Algorithms
[3 credit hours]
Techniques for devising efficient computer algorithms. Topics include: divide-and-conquer techniques, dynamic programming, linear programming, graph algorithms, greedy algorithms, NP and P complexity classes, and approximation algorithms for NP complete problems.
Prerequisites: EECS 2510 with a minimum grade of D and EECS 4100 with a minimum grade of D-

EECS 4600 Solid State Devices
[0-4 credit hours]
Theory and operation of physical electronic devices. Electrical transport in metals, semiconductors and models of BJT’s and FET’s. Optoelectronic devices and integrated circuits. Laboratory includes hands-on experimentation with basic semiconductor fabrication processes.
Prerequisites: EECS 3400 with a minimum grade of D-
Term Offered: Fall

EECS 4610 Digital VLSI Design I: Basic Subsystems
[4 credit hours]
CMOS process technologies, CMOS logic families, custom and semi-custom design. Subsystem design of adders, counters and multipliers. System design methods and VLSI design tools.
Prerequisites: EECS 3400 with a minimum grade of D-

EECS 4640 Inside Cryptography
[3 credit hours]
Examines the inner workings of several cryptographic algorithms, including the discrete math behind them. Introduces operations in a Galois Field, and covers some Prime Number Theory. Symmetric algorithms include Feistel (DES) and non-Feistel (AES) designs; Asymmetric algorithms include Merkle-Hellman and RSA. Block and stream modes are explored, as are cryptographic hash functions, and ECB and Chained modes of encryption.
Prerequisites: EECS 2520 with a minimum grade of D- and EECS 3100 with a minimum grade of D-
Term Offered: Spring, Fall

EECS 4720 Fundamentals of Cyber Security
[3 credit hours]
Introduces to cyber security, its interdisciplinarity, relation to nation, businesses, society, and people. Discusses cyber security terminologies, technologies, protocols, threat analysis, security principles, security mechanisms, policies, forensics, incident response and methods/practices to secure systems. Additional real-world security problems are discussed using hands-on experiments.
Prerequisites: EECS 2110 with a minimum grade of D-
Term Offered: Spring, Fall

EECS 4730 Open Source Software
[3 credit hours]
History and description of the open source movement, who participates, how it works, and why it works. Evolution patterns of open source development, the code itself, and the open source community as a whole. Open source licenses, legal issues, and commercial markets. Survey of real-world implementations.
Prerequisites: EECS 3550 with a minimum grade of D-

EECS 4740 Artificial Intelligence
[3 credit hours]
This course explores the topic of intelligent software agents with a emphasis on hands-on design of adaptive problem-solving agents for environments of increasing complexity ranging from single-agent computer games to complex real-world multi-agent environments.
Prerequisites: EECS 2510 with a minimum grade of D-
Term Offered: Spring, Fall

EECS 4750 Machine Learning
[3 credit hours]
This course emphasizes learning algorithms and theory including concept, decision tree, neural network, computational, Bayesian, evolutionary, and reinforcement learning.
Prerequisites: (MIME 4000 with a minimum grade of D- and MATH 2890 with a minimum grade of D- and EECS 2110 with a minimum grade of D-) or (EECS 2110 with a minimum grade of C-) or (EECS 5720 with a minimum grade of C)
Term Offered: Spring, Fall

EECS 4760 Computer Security
[3 credit hours]
Prerequisites: EECS 2110 with a minimum grade of D- and EECS 3540 with a minimum grade of D-

EECS 4770 Computer Hacking and Forensic Analysis
[3 credit hours]
This course is an introduction to discovering vulnerabilities, attacking/defending systems, responding to attacks, and identifying/designing controls for attack prevention. Topics include the evolution of hacking, penetration testing; cryptology; footprinting; vulnerability scanning and exploit; wireless, web, and database attacks; traffic analysis; incident response; and defensive technologies and controls.
Prerequisites: (EECS 2110 with a minimum grade of D- and EECS 4720 with a minimum grade of D-) or (EECS 5720 with a minimum grade of C) or (EECS 5720 with a minimum grade of C)
Term Offered: Spring

EECS 4790 Network Security
[4 credit hours]
Theory and practice of network security. Topics include firewalls, Windows, UNIX and TCP/IP network security. Security auditing, attacks, viruses, intrusion detection and threat analysis will also be covered.
Prerequisites: EECS 4720 with a minimum grade of D- or EECS 5720 with a minimum grade of C
Term Offered: Spring
EECS 4800 Assured and Trusted Digital Microelectronics
[3 credit hours]
This course will cover the following topics: Assurance and Trust, VHDL, Hardware Security and Trust for Integrated Circuits, Physical Unclonable Functions (PUFs), FPGA Security and Testing, Hardware Obfuscation, Counterfeit Chip Detection, Hardware Trojans, Side Channel Attacks, Hardware Cryptography, Block Chain Technology for IC Supply Chain Protection.
Prerequisites: EECS 3100 with a minimum grade of C-
Term Offered: Spring

EECS 4980 Special Topics In EECS
[1-4 credit hours]
Pilot offerings of new courses involving emerging topics of interest are introduced using this number. One credit per lecture/recitation hour and/or 2.5 lab hours per week.
Term Offered: Spring, Summer, Fall

EECS 4990 Independent Study In Eecs
[1-4 credit hours]
Selected topics in electrical engineering or computer science and engineering. The instructor will specify the scope of the investigation and will meet regularly with the student(s). The study is expected to require an average of 3 hours student effort per week per credit.
Term Offered: Spring, Summer, Fall

BS in Computer Science and Engineering

BS in Computer Science and Engineering

Computer Science and Engineering - Microelectronics Security Concentration

First Term
- MATH 1850 Single Variable Calculus I: 4 hours
- CHEM 1230 General Chemistry I: 4 hours
- ENGL 1110 College Composition I: 3 hours
- EECS 1030 Introduction to Computer Science and Engineering: 3 hours
- PHIL 1010 Introduction to Computer Science and Engineering: 3 hours

Total Hours: 17

Second Term
- MATH 1860 Single Variable Calculus II: 4 hours
- PHYS 2130 Physics For Science And Engineering Majors I: 5 hours
- EECS 2000 EECS Professional Development: 1 hour
- EECS 1510 Introduction To Object Oriented Programming: 4 hours
- ENGL 2950 Science And Technical Report Writing: 3 hours

Total Hours: 17

Third Term
- MATH 2850 Elementary Multivariable Calculus: 4 hours
- PHYS 2140 Physics For Science And Engineering Majors II: 5 hours
- EECS 1100 Digital Logic Design: 4 hours
- EECS 2500 Linear Data Structures: 4 hours

Total Hours: 17

Fourth Term
- MATH 2860 Elementary Differential Equations: 3 hours
- MATH 2890 Numerical Methods And Linear Algebra: 3 hours
- EECS 2110 Computer Architecture and Organization: 3 hours
- EECS 2300 Electric Circuits: 4 hours
- EECS 2520 Discrete Structures: 3 hours

Total Hours: 16

Fifth Term
- EECS 3940 Co-Op Experience: 1 hour

Total Hours: 1

Sixth Term
- EECS 2510 Non-Linear Data Structures: 4 hours
- EECS 3210 Signals and Systems: 3 hours
- EECS 3400 Electronics I: 4 hours
- Social Sciences Core: 3 hours

Total Hours: 14

Seventh Term
- EECS 3940 Co-Op Experience: 1 hour

Total Hours: 1

Eighth Term
- EECS 3100 Embedded Systems: 4 hours
- EECS 3150 Data Communications: 3 hours
- MIE 4000 Engineering Statistics I: 3 hours
- ECON 1150 or ECON 1200 Principles Of Macroeconomics or Principles Of Microeconomics: 3 hours
- Arts/Humanities Core/Diversity of US: 3 hours

Total Hours: 15

Ninth Term
- EECS 3940 Co-Op Experience: 1 hour

Total Hours: 1

Tenth Term
- EECS 3540 Systems And Systems Programming: 3 hours
- EECS 3550 Software Engineering: 3 hours
- EECS 4010 Senior Design Project I: 1 hour
- EECS 4100 Theory of Computation: 3 hours
- EECS 4560 Database Management Systems: 3 hours
- Technical Elective: 3 hours

Total Hours: 16

Eleventh Term
- EECS 3100 Embedded Systems: 4 hours
- EECS 3150 Data Communications: 3 hours
- MIE 4000 Engineering Statistics I: 3 hours
- ECON 1150 or ECON 1200 Principles Of Macroeconomics or Principles Of Microeconomics: 3 hours
- Arts/Humanities Core/Diversity of US: 3 hours

Total Hours: 15

Twelfth Term
- EECS 4020 Senior Design Project II: 3 hours
- Technical Elective: 3 hours
- Technical Elective: 3 hours
- Non-US Diversity: 3 hours
- EECS 4760 Computer Security: 3 hours

Total Hours: 16

CAC Outcome #1: Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.

CAC Outcome #2: Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.

CAC Outcome #3: Communicate effectively in a variety of professional contexts.

CAC Outcome #4: Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.

CAC Outcome #5: Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

CAC Outcome #6: Apply computer science theory and software development fundamentals to produce computing-based solutions.

EAC Outcome #1: An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

EAC Outcome #2: An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

EAC Outcome #3: an ability to communicate effectively with a range of audiences.
EAC Outcome #4: An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

EAC Outcome #5: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

EAC Outcome #6: An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

EAC Outcome #7: An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**131**
Minor in Computer Science

The College of Engineering offers several minors for students at The University of Toledo. These minors are recommended for students who want to enhance their academic programs with engineering-related course work and are intended to allow students to develop expertise in a discipline outside their majors. Students taking courses in these minors must meet course prerequisite requirements. Students should contact advisors in the College of Engineering for additional details about the course requirements of minors and contact advisors in their home college to determine how the minors will fit into their degree curriculum. Note that per University of Toledo policy, minors cannot be declared by students in the same major as a given minor since at least 12 hours of...
the minor must be distinct from any credit hours used to fulfill any major the student is pursuing.

Students may earn a minor in Computer Science by completing 7 EECS courses as listed below and score a minimum GPA of 2.70 with no D+, D, D- or F for any of the courses.

Eligibility to take the courses listed below requires students to be coded as CS minor candidates.

<table>

</tbody>
</table>

Total Hours 24

1. Analyze a computing problem and to apply principles of computing to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements.
3. Apply computer science theory and software development fundamentals to produce computing-based solutions.

**Department of Engineering Technology**

Abdulnasser Alaraje, Chair
North Engineering Room 1600
Phone: 419.530.3159
Fax: 419.530.3068
abdulnasser.alaraje@utoledo.edu

Jared Oluoch, Associate Chair; CSET Program Director and IT Program Director
jared.olouch@utoledo.edu

William (Ted) Evans, EET Program Director
william.evans@utoledo.edu (william.evans@utoledo.edu)

Luis Mata, CET Program Director
luis.mata@utoledo.edu

Amy Bian, MET Program Director
amy.bian@utoledo.edu (Hongxin.Bian@utoledo.edu)

Myrna Rudder, Associate Director of Dept. Student Services
myrna.rudder@utoledo.edu

An education in engineering technology emphasizes problem solving, technical skills and extensive laboratory experience to integrate theory and practice. The curriculum includes a solid foundation in applied sciences and mathematics.

**Degrees Offered**

- BS in Computer Science and Engineering Technology (p. 256)
- BS in Construction Engineering Technology (p. 257)
- BS in Electrical Engineering Technology (p. 258)
- BS in Information Technology (p. 260)
- BS in Mechanical Engineering Technology (p. 262)
- Minor in Cyber Security (p. 263)
- Minor in Software Engineering (p. 264)

**ENGT 1000 Engineering Technology Orientation**

[1 credit hour]
Overview of careers in engineering technology, information about each program in Engineering Technology, and skills required for success in technological fields, such as computer skills.

**Term Offered:** Spring, Fall

**ENGT 2000 Professional Development**

[1 credit hour]
An introduction to the performance expectations of the engineering profession. Topics covered include resume writing, public speaking, interviewing skills, ethics, social responsibilities and the value of continuing education and professional registration.

**Prerequisites:** ENGT 1000 with a minimum grade of D-

**Term Offered:** Spring, Fall

**ENGT 2500 Technical Project Management**

[3 credit hours]
General methodology of managing a technical project from concept to operational use. Emphasis is on the functions and responsibilities of the project manager related to maintaining project control and team management.

**Term Offered:** Spring, Fall

**ENGT 3010 Applied Statistics And Design Of Experiments**

[4 credit hours]
Introduction to probability, statistical inference and design of experiments. Topics include confidence intervals, tests of hypothesis, regression, analysis of variance, factorial experimental designs and propagation of experimental errors.

**Prerequisites:** MATH 2460 with a minimum grade of C- or MATH 1860 with a minimum grade of C- or MATH 1730 with a minimum grade of C-

**Term Offered:** Spring, Summer, Fall

**ENGT 3020 Applied Engineering Mathematics**

[3 credit hours]

**Prerequisites:** (MATH 2460 with a minimum grade of C- or MATH 1860 with a minimum grade of C-) and ENGL 1110 with a minimum grade of D-

**Term Offered:** Spring, Summer, Fall
ENGT 3050 Fundamentals Of Electricity  
[0-4 credit hours]  
An introduction to basic analytical techniques for resistive and reactive  
DC and AC electric circuits, and an introduction to electronic devices,  
including diodes and transistors.  
Prerequisites: MATH 1330 with a minimum grade of D- or MATH 1730  
with a minimum grade of C-  
Term Offered: Spring, Summer, Fall

ENGT 3600 Engineering Economics  
[3 credit hours]  
Fundamentals of analysis of engineering projects and capital investment  
decisions. Review of break-even analyses, rate of return, cost benefit  
ratios and tax and inflation implications will be performed.  
Term Offered: Spring, Fall

ENGT 3940 Co-Op Experience  
[1 credit hour]  
Approved co-op work experience. Course may be repeated.  
Prerequisites: ENGT 2000 with a minimum grade of D-  
Term Offered: Spring, Summer, Fall

ENGT 3950 Co-Op Experience  
[1 credit hour]  
Approved co-op work experience beyond third required co-op experience.  
Course may be repeated.  
Prerequisites: ENGT 3940 with a minimum grade of D-  
Term Offered: Spring, Summer, Fall

BS in Computer Science and Engineering Technology

The computer science and engineering technology program provides  
hands-on curriculum with an in-depth understanding of computer  
hardware and software as they relate to computer design and  
applications. Students get a solid foundation in the principles of  
electronics, with an emphasis on installation, maintenance and  
troubleshooting of computer systems. They also learn about the use  
of software in engineering technology, which requires a knowledge of  
programming and computer operating systems.

Below is a sample plan of study. Consult your degree audit for your  
program requirements.

- BS in Computer Science and Engineering Technology
- BS in Computer Science and Engineering Technology - Cyber Security  
  Concentration (p. 257)

### BS in Computer Science and Engineering Technology

#### First Term

<table>
<thead>
<tr>
<th>Course Code</th>

### Total Hours

- **128 hours**

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

### BS in Construction Engineering Technology

The construction engineering technology program combines civil engineering and construction management curriculums. We offer unique courses that distinguish us from our competitors. Courses are grounded...
in practical applications, rather than theory. Every class has a laboratory component or project that tackles a real-world problem.

(1) an ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline;
(2) an ability to design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the discipline;
(3) an ability to apply written, oral, and graphical communication in broadly-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature;
(4) an ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes; and
(5) an ability to function effectively as a member as well as a leader on technical teams.

**BS in Electrical Engineering Technology**

The electrical engineering technology program emphasizes the application of electrical principles to manufacturing, maintenance, testing, installation, and inspection. There is a strong focus on computer simulation, software application and technical skills.

Below is a sample plan of study. Consult your degree audit for your program requirements.

- Electrical Engineering Technology (p. 258)
- Electrical Engineering Technology, Concentration in Mechanical, BS (p. 259)
- Electrical Engineering Technology-Concentration in Mechatronics, BS (p. 260)

### Electrical Engineering Technology-Concentration in Mechatronics, BS

#### First Term
- ENGT 1000 Engineering Technology Orientation 1
- MATH 1330 Trigonometry 3
- ENGL 1110 College Composition I 3
- EET 1010 DC Circuits 4
- CHEM 1230 General Chemistry I 4

**Hours** 15

#### Second Term
- ENGL 2950 Science And Technical Report Writing 3
- Social Sciences Core 3
- EET 1410 Electrical Drafting 3
- EET 1020 AC Circuits 4
- EET 2210 Digital Logic Fundamentals 4

**Hours** 17

#### Third Term
- MATH 2450 Calculus For Engineering Technology I 4
- PHYS 2010 Technical Physics I 5
- Communications Elective 3
- EET 2010 Electronic Principles 4

**Hours** 16

#### Fourth Term
- MATH 2460 Calculus For Engineering Technology II 4
- PHYS 2020 Technical Physics II 5
- EET 2020 Electronic Device Applications 4
- CSET 2200 PC and Industrial Networks 4

**Hours** 17

#### Fifth Term
- ENGT 3010 Applied Statistics And Design Of Experiments 4
- ENGT 3020 Applied Engineering Mathematics 3
- EET 3150 C Programming 4
- EET 2410 Mechatronics I 4

**Hours** 15

#### Sixth Term
- Diversity of US 3
- EET 3250 Network Analysis 3
- EET 3350 Embedded Systems Design 4

Select one of the following: 4

<table>
<thead>
<tr>
<th>Hours</th>
<th>Total Hours 128</th>
</tr>
</thead>
</table>

#### Seventh Term
Select one of the following: 4
- EET 4150 Analog Systems Design
- EET 4250 Database Applications for Industry
- EET 4550 Mechatronics II
- EET 4600 Industrial Robotics
- EET 4650 Industrial Robotics Vision
- EET 4300 Motors and Generators
  - or EET 4350 Electric Power Systems
- Arts/Humanities Core 3
- Arts/Humanities Core 3
- Arts/Humanities Core/Non-US Diversity 3

**Hours** 17

#### Eighth Term
- Elective - Professional Development 3
- EET 4450 Automatic Control Systems 4

Select one of the following: 4
- EET 4150 Analog Systems Design
- EET 4250 Database Applications for Industry
- EET 4550 Mechatronics II
- EET 4600 Industrial Robotics
- EET 4650 Industrial Robotics Vision
- ENGT 4050 Senior Technology Capstone 3

**Hours** 14

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

**BS in Information Technology**

The information technology program provides a broad base of core, computer-related skills, and knowledge — programming, networking, human computer interaction, databases, and web systems. Students become technically competent in computer systems and learn how to manage existing technologies. But they also learn "context" — how to advocate for users.
Below is a sample plan of study. Consult your degree audit for your program requirements.

**Information Technology- Cyber Security Concentration, BS Learning Outcomes**

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

6. Identify and analyze user needs and to take them into account in the selection, creation, integration, evaluation, and administration of computing-based systems.

**BS in Mechanical Engineering Technology**

The mechanical engineering technology program emphasizes hands-on and problem-solving skills. Students learn how to model, design, develop, test, and supervise advanced mechanical systems and processes. We prepare students with the practical knowledge and skills to enter careers in automotive and manufacturing in general, automation and control, invention, and entrepreneurship.

Below is a sample plan of study. Consult your degree audit for your program requirements.

Hours 13

Total Hours 128

(1) an ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline;
(2) an ability to design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the discipline;
(3) an ability to apply written, oral, and graphical communication in broadly-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature;
(4) an ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes; and
(5) an ability to function effectively as a member as well as a leader on technical teams.

Minor in Cyber Security

The College of Engineering offers several minors for students at The University of Toledo. These minors are recommended for students who want to enhance their academic programs with engineering-related course work and are intended to allow students to develop expertise in a discipline outside their majors. Students taking courses in theses minors must meet course prerequisite requirements. Students should contact advisors in the College of Engineering for additional details about the course requirements of minors and contact advisors in their home college to determine how the minors will fit into their degree curriculum.

Note that per University of Toledo policy, minors cannot be declared by students in the same major as a given minor since at least 12 hours of the minor must be distinct from any credit hours used to fulfill any major the student is pursuing.

Department of Mechanical, Industrial and Manufacturing Engineering

Mohammad Elahinia, University Distinguished Professor and Chair
mohammad.elahinia@utoledo.edu

Sorin Cioc, Undergraduate Program Director
sorin.cioc@utoledo.edu

Mohamed Samir Hefzy, Professor and Graduate Program Director
mohamed.hefzy@utoledo.edu

Debra Kraftchick, Associate Director of Dept. Student Services
debrakraftchick@utoledo.edu

Department of Mechanical, Industrial and Manufacturing Engineering’s guiding mission statement:
Excellence in undergraduate and graduate education and research with regional and national impact.

Department of Mechanical, Industrial and Manufacturing Engineering vision:
To be a leading department in the State of Ohio with state and national ranking in the upper quartile, providing state-of-the-art education and research programs which prepare our graduates for leadership roles in a globally competitive environment.

Degrees Offered

• BS in Mechanical Engineering (p. 270)
• Materials Science & Engineering, Certificate (p. 272)
• Minor in Mechatronics (p. 272)

MIME 1000 Orientation To ME & IE
[0-3 credit hours]
The mechanical engineering profession is discussed with emphasis on career opportunities. Orientation to the university campus, study skills and time management. Word processing, spreadsheets, e-mail, design projects, and MATLAB programming are studied.
Term Offered: Summer, Fall

MIME 1010 Professional Development
[1 credit hour]
Social protocol and ethics in industry are reviewed. Resume writing and interview skills are developed. Course assists in preparing the student for the co-op experience in industry.
Prerequisites: MIME 1000 with a minimum grade of D-
Term Offered: Spring, Summer
MIME 1100 Introduction to CAD
[3 credit hours]
Techniques for visualization and representation of machine components using solid modeling and projection. Section views, orthographic projection, dimensioning and tolerancing. CAD techniques for solving vector problems.
Term Offered: Summer, Fall

MIME 1650 Materials Science & Engineering
[0-3 credit hours]
Engineering properties of materials, the effect of atomic bonding and crystalline structure on the mechanical properties of metals, ceramics and polymers. Common measurement, testing and comparison techniques to aid in selection of materials. Laboratory experiences include compressive and tensile strength testing, the effects of heat upon strength, hardness and micro-structure, the effects of combining certain materials in a composite to improve overall mechanical properties.
Prerequisites: CHEM 1230 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

MIME 2000 Measurements Laboratory
[0-2 credit hours]
How to write engineering laboratory reports. Statistical analysis of experimental data, uncertainty analysis, general characteristics of measurement systems, static and dynamic measurements, computer data acquisition, applications to thermal, mechanical and electrical systems.
Prerequisites: EECS 2340 with a minimum grade of D- and (ENGL 1930 with a minimum grade of D- or ENGL 2950 with a minimum grade of D-)
Term Offered: Spring, Summer, Fall

MIME 2300 Engineering Dynamics
[3 credit hours]
Kinematics of particles and rigid bodies. Thorough study of kinetics of particles and rigid bodies using Newton's laws of motion, work-energy methods, and impulse and momentum methods.
Prerequisites: CIVE 1150 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

MIME 2600 Engineering Economics
[3 credit hours]
The study of micro-economic and macro-economic theories. Methods of economic analysis, including the time value of money, are described. Economic decision criteria are used to select best alternatives with emphasis in engineering. Impact of economic decisions on various sectors of society are discussed.
Term Offered: Spring, Fall

MIME 2650 Manufacturing Processes
[0-3 credit hours]
Manufacturing processes discussed include metal casting and forming such as forging, rolling, extrusion, stamping and drawing. Metal cutting processes such as turning, boring, drilling, milling, sawing and broaching are discussed. Polymer processes including injection molding and extrusion as well as ceramic part production are covered. Laboratory experiences include creating parts using many of these processes.
Prerequisites: MIME 1650 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

MIME 2700 Applied Measure & Instrument
[4 credit hours]
A hands on introduction to engineering measurement methods and instrumentation, including electrical circuits, sensors, actuators, data acquisition, and system response.
Prerequisites: PHYS 2140 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

MIME 2920 Special Projects
[1-3 credit hours]
A special project by the student to investigate or solve an acceptable problem in industrial or mechanical engineering. This course is primarily intended for students interested in mechanical, industrial or manufacturing engineering early in their undergraduate program. Instructor will specify scope of project to correspond to credit hours.
Term Offered: Spring, Summer, Fall

MIME 2980 Special Topics
[1-3 credit hours]
A special topic at the undergraduate level in Mechanical, Industrial or Manufacturing Engineering to be offered as a course during a term by a faculty member. Credits will correspond to regular class meetings of one lecture hour per week per credit hour.
Term Offered: Spring, Fall

MIME 2990 Independent Study
[1-3 credit hours]
An independent study by the student to investigate or solve an acceptable problem in industrial or mechanical engineering. This course is primarily intended for engineering students early or midway through their program of study. Instructor will specify scope of project to correspond to credit hours.

MIME 3200 Introduction to Project Engineering
[3 credit hours]
Topics include: engineering economics; societal, legal and ethical concerns; project scheduling; and designing for quality as well as matching client desires with product attributes.
Term Offered: Spring, Summer, Fall

MIME 3300 Design And Analysis Of Mechanical Systems
[3 credit hours]
Prerequisites: MIME 2300 (may be taken concurrently) with a minimum grade of D-
Term Offered: Spring, Summer, Fall

MIME 3310 Mechanical Design I
[3 credit hours]
Applications of mechanics of materials to analysis and design of mechanical components; introduction to fracture mechanics; applications of failure theories to design of machine elements subjected to static and cyclic loadings.
Prerequisites: (CIVE 1160 with a minimum grade of D- and MIME 1650 with a minimum grade of D-
Corequisites: MIME 3330
Term Offered: Spring, Summer, Fall
MIME 3320 Mechanical Design II  
[3 credit hours]  
Application of failure theories in static and fatigue loading to the design and analysis of mechanical elements including fasteners, power screws, welded joints, springs, bearings, gears, clutches, brakes and shafts.  
Prerequisites: MIME 3310 with a minimum grade of C-  
Term Offered: Spring, Summer, Fall  
MIME 3330 Mechanics Laboratory  
[0-1 credit hours]  
This laboratory course consists of experiments in strength of materials and stress analysis. Experiments include stress analysis of straight and curved beams, analysis of torsion and combined stresses in shafts, stress concentrations, and determination of mechanical properties from tension tests and fatigue tests.  
Corequisites: MIME 3310  
Term Offered: Spring, Summer, Fall  
MIME 3360 Vibration Laboratory  
[0-1 credit hours]  
This laboratory course will be taken concurrently with Mechanical Vibration and consists of experiments to determine the natural frequency of one degree of freedom systems, free and forced vibrations of lumped parameter systems, mode shapes and natural frequencies of multidegree of freedom systems, and mode shapes and natural frequencies of torsional vibration systems.  
Corequisites: MIME 3370  
Term Offered: Spring, Summer, Fall  
MIME 3370 Mechanical Vibration  
[3 credit hours]  
Modeling mechanical systems, mechanical elements, equations of motion for single-DOF and multi-DOF systems, linearization of equations of motion, free and forced response, electrical systems, frequency response, feedback control systems.  
Prerequisites: MIME 2300 with a minimum grade of D- and MATH 3860 with a minimum grade of D- or MATH 2860 with a minimum grade of D- or MATH 3820 with a minimum grade of D-  
Corequisites: MIME 3360  
Term Offered: Spring, Summer, Fall  
MIME 3380 Modeling and Control of Engineering Systems  
[3 credit hours]  
Physical modeling and feedback principles are applied for control of mechanical systems. Transient response, root locus and frequency response principles are applied to control of basic mechanical and electrical systems.  
Prerequisites: MIME 3370 with a minimum grade of D-  
Term Offered: Spring, Summer, Fall  
MIME 3400 Thermodynamics I  
[3 credit hours]  
Introduction to thermal sciences with an emphasis on the first and second law of thermodynamics. Topics include conservation of energy for closed and open systems, thermodynamic properties and cycles and entropy production.  
Prerequisites: (MATH 3860 with a minimum grade of D- or MATH 2860 with a minimum grade of D- or MATH 3820 with a minimum grade of D-) and PHYS 2140 with a minimum grade of D-  
Term Offered: Spring, Summer, Fall  
MIME 3410 Thermodynamics II  
[3 credit hours]  
Review of open and closed systems in thermodynamics, the Carnot principle and cycle efficiency concepts. Application to gas and vapor power cycles and refrigeration cycles. Thermodynamic property relations, gaseous mixtures and combustion.  
Prerequisites: MIME 3400 with a minimum grade of D-  
Corequisites: MIME 3420  
Term Offered: Spring, Summer, Fall  
MIME 3420 Fluid Mechanics  
[3 credit hours]  
Fluid mechanics for mechanical engineers. Topics include fluid statics and dynamics, equations of motion, dimensional analysis, boundary layer theory, flow in pipes, turbulence, fluid machinery, potential flow, CFD and aerodynamics.  
Prerequisites: MIME 3400 with a minimum grade of D-  
Corequisites: MIME 3420  
Term Offered: Spring, Summer, Fall  
MIME 3440 Heat Transfer  
[3 credit hours]  
Prerequisites: MIME 3430 with a minimum grade of D-  
Corequisites: MIME 3450  
Term Offered: Spring, Summer, Fall  
MIME 3450 Energy Laboratory  
[0-1 credit hours]  
This laboratory course is to be taken with Heat Transfer to illustrate the concepts in those courses. Experiments include fluid statics, forces on a submerged surface, center of pressure, manometers, surface tension, flow visualization, Bernoulli’s equation, control volume analysis, viscous flow in pipes, flow over bodies, turbomachinery, and thermodynamic cycles.  
Corequisites: MIME 3410, MIME 3430  
Term Offered: Spring, Summer, Fall  
MIME 3470 Strength of Materials  
[3 credit hours]  
Introduction to the mechanics of materials with stress analysis. Applications include analysis of tension and compression members, bending of beams, deflection of beams, deflection of beams, and analysis of shear and bending.  
Prerequisites: MATH 2860 with a minimum grade of D- or MATH 3860 with a minimum grade of D- or MATH 3820 with a minimum grade of D-  
Corequisites: MIME 3310, MIME 3420  
Term Offered: Spring, Summer, Fall  
MIME 3480 Mechanics Laboratory  
[0-1 credit hours]  
This laboratory course is to be taken concurrently with Mechanics Laboratory and consists of experiments to determine the natural frequency of one degree of freedom systems, free and forced vibrations of lumped parameter systems, mode shapes and natural frequencies of multidegree of freedom systems, and mode shapes and natural frequencies of torsional vibration systems.  
Corequisites: MIME 3370  
Term Offered: Spring, Summer, Fall  
MIME 3620 Fluids Laboratory  
[0-1 credit hours]  
This laboratory course is to be taken with Fluid Mechanics and Thermodynamics II to illustrate the concepts in those courses. Experiments include fluid statics, forces on a submerged surface, center of pressure, manometers, surface tension, flow visualization, Bernoulli’s equation, control volume analysis, viscous flow in pipes, flow over bodies, turbomachinery, and thermodynamic cycles.  
Corequisites: MIME 3410, MIME 3430  
Term Offered: Spring, Summer, Fall  
MIME 3780 Engineering Management  
[3 credit hours]  
The development of the fundamentals required in an engineering and manufacturing environment where technical competency is considered standard and an appreciation of the human behavioral responses to managerial policies and rules is essential. This course covers the basics of planning organizing, leading and control from the subordinates’ as well as the manager’s perspective.  
Term Offered: Fall
MIME 3940 Co-Op Experience  
[1 credit hour]  
Students in the Industrial and Mechanical Engineering programs are to enroll in this course during each of their approved Co-Op experiences.  
Prerequisites: MIME 1010 with a minimum grade of D-  
Term Offered: Spring, Summer, Fall  

MIME 3950 Co-Op Experience  
[1 credit hour]  
Approved co-op work experience beyond third required co-op experience. Course may be repeated.  
Prerequisites: MIME 3940 with a minimum grade of D-  
Term Offered: Spring, Summer, Fall  

MIME 4000 Engineering Statistics I  
[3 credit hours]  
This course introduces the student to the areas of probability theory and statistical inferences. Topics include sample spaces, the concepts of random variables, probability distributions; functions of random variables, transformation of variables, moment generating functions, sampling and estimation theory; T, F and chi-square distribution.  
Prerequisites: MATH 2850 with a minimum grade of D- or MATH 2950 with a minimum grade of D-  
Term Offered: Spring, Summer, Fall  

MIME 4040 Modern Manufacturing Methods  
[3 credit hours]  
This course provides an overview of the philosophy, design and management of production factories throughout the world. This course explores the evolution and revolution of manufacturing since the 1960's and the numerous philosophical changes that have shaped the factory of today. The course examines the fundamental design of the factory in an effort to meet the demands of customers, culture of the organization, competitive situation, and pressures of marketing and management.  
Term Offered: Fall  

MIME 4060 Manufacturing Engineering  
[3 credit hours]  
The course provides an overview of advanced manufacturing processes, manufacturing management, nano- and bio-manufacturing processes and their applications.  
Term Offered: Spring, Fall  

MIME 4070 Computer-Aided Manufacturing  
[3 credit hours]  
The study of machining processes using numerical control machine tools and controllers. Development of programs to machine parts on mills and lathes. Conversion of CAD models to programs through software interfaces.  
Prerequisites: MIME 2650 with a minimum grade of D-  
Term Offered: Fall  

MIME 4080 Operations Research I  
[3 credit hours]  
This course focuses on the mathematical methods of Operations Research and their applications in engineering. Topics include the optimal solution of deterministic and stochastic mathematical models, modeling process, linear programming, the simplex method, duality theory and sensitivity analysis.  
Prerequisites: MIME 4000 with a minimum grade of D- and MATH 2860 with a minimum grade of D-  

MIME 4100 Manufacturing Systems Simulation  
[3 credit hours]  
Discrete and continuous simulation models are used to study queuing, networks, manufacturing and related engineering systems. Simulation languages and animation are covered. Statistical inference is used to draw conclusions and to identify the best system.  
Prerequisites: MIME 2650 with a minimum grade of D- and MATH 2860 with a minimum grade of D- or MATH 3860 with a minimum grade of D-  
Term Offered: Spring  

MIME 4180 Legal Aspects of Engineering  
[3 credit hours]  
This course offers an introduction to legal topics for engineers. Topics include: contracts, negligence, products liability, patents and copyright, employment law, criminal law, environmental law, and business law.  
Term Offered: Spring, Fall  

MIME 4200 Senior Design Projects  
[3 credit hours]  
Students work in teams using knowledge gained in earlier courses to solve real design, manufacturing and operational problems relevant to industry. Oral and written communications with participating companies as well as teamwork are stressed. Other topics include patents, product liability, safety, ethics and design for manufacturing.  
Prerequisites: (MIME 3200 with a minimum grade of D- and MIME 3320 (may be taken concurrently) with a minimum grade of D- and MIME 3440 (may be taken concurrently) with a minimum grade of D-)  
Term Offered: Spring, Fall  

MIME 4220 Assembly And Joining Processes  
[3 credit hours]  
This course is comprised of two parts: joining processes and assembly systems. Commonly used joining methods, such as welding, mechanical fastening and adhesion are discussed. General principles of assembly are presented with extensive use of automobile assembly as an example.  
Term Offered: Spring  

MIME 4230 Dynamics Of Human Movement  
[3 credit hours]  
The goal of this course is for students to be able to describe motions of the human body. Three-dimensional analysis and measurements of human body movements including kinematics, kinetics and energetics of human gait, anthropometry and application to bioengineering and orthopedics will be presented. Euler angles and the screw axis method will be used to describe three-dimensional motions.  
Prerequisites: MIME 2300 with a minimum grade of D-  
Term Offered: Spring, Fall  

MIME 4240 Experimental Methods in Orthopedic Biomechanics  
[3 credit hours]  
Experimental techniques used in orthopedics and in the study of the musculoskeletal system including mechanical testing, experimental and analytical methods for stress analysis, strain gauges, methods used in human motion analysis to include motion capture, force plates and EMG.  
Prerequisites: MIME 1650 with a minimum grade of D- and CIVE 1160 with a minimum grade of D-  
Term Offered: Spring, Fall
MIME 4280 Cad-Finite Element Methods
[3 credit hours]
An introduction to the basic concepts of the finite element method. Topics include engineering analysis of continuous systems, numerical solutions of boundary value problems, method of weighted residuals and the principle of minimum potential energy, applications of commercially available finite element programs.
Prerequisites: MIME 3320 with a minimum grade of D-
Term Offered: Summer, Fall

MIME 4300 Advanced Mechanics Of Materials
[3 credit hours]
Theory of elasticity, plane stress and plane problems, yield criteria and failure theories, bending of beams, energy methods, curved flexural members, unsymmetric bending, torsion, shear center and axisymmetrically loaded members.
Prerequisites: CIVE 1160 with a minimum grade of D- and MATH 2860 with a minimum grade of D- or MATH 3860 with a minimum grade of D-
Term Offered: Fall

MIME 4310 Mechanics Of Composite Materials
[3 credit hours]
Review of elasticity of anisotropic solids, determination of mechanical properties of fiber-reinforced lamina, analysis and performance of laminated composites.
Prerequisites: (CIVE 1160 with a minimum grade of D- and MIME 1650 with a minimum grade of D-) or (MIME 1650 with a minimum grade of C-
Term Offered: Spring

MIME 4320 Fatigue Of Materials & Structures
[3 credit hours]
Fatigue design methods; fatigue fracture mechanisms; cyclic deformation behavior and material cyclic properties; stress-based, and fracture mechanics-based methodologies to fatigue life prediction of smooth and notched members subjected to constant or variable amplitude loadings.
Prerequisites: CIVE 1160 with a minimum grade of D-
Term Offered: Spring

MIME 4350 Advanced Ceramics
[3 credit hours]
This course provides greater knowledge on the atomic bonding, crystal structure, structure, crystal imperfections, phases and interfaces, microstructures, phase diagrams, phase transformation, transport and diffusion, metal deformation, fracture of materials, deterioration of materials, electronic and physical properties of ceramics.
Prerequisites: MIME 1650 with a minimum grade of C- and PHYS 2130 with a minimum grade of C-
Term Offered: Spring, Fall

MIME 4370 Advanced Materials for Automotive Structures
[3 credit hours]
An in-depth study of the broad range of engineering materials used in the construction of motor vehicles. Interrelations between materials microstructure, components manufacturing process and components service behavior.
Prerequisites: (MIME 1650 with a minimum grade of C- and PHYS 2130 with a minimum grade of C-)
Term Offered: Spring, Fall

MIME 4380 Engineering Polymers and Rubbers
[3 credit hours]
Polymers and rubber are introduced through lecture and lab components at three levels - 1) synthesis and characterization, 2) thermal, molecular and mechanical properties, and 3) design considerations for engineering applications.
Prerequisites: (MIME 1650 with a minimum grade of C- and PHYS 2130 with a minimum grade of C-)
Term Offered: Spring, Fall

MIME 4390 Failure Analysis of Materials
[3 credit hours]
The failure analysis is a procedure to determine the physical cause of the failure of an element, component or industrial equipment. The course will be focused on material related and will present an introduction to the principles of failure analysis and the fundamental aspects to conduct a failure analysis investigation. A key component of the course is the discussion of real cases of failures (case studies), i.e. failures in mining machinery, chemical processing equipment, energy production, systems, aircraft and petrochemical industry components. This course provides the connection between mechanisms that are responsible for material failures and will address the characterization techniques used in failure analysis. Fundamental failure mechanisms in various materials applications including fracture of metals and alloys, failure in electronic devices, and environmental factor induced failures will be covered. Each categorized phenomenon will be approached by historical events to reveal the application and connection between the mechanism and the incidents.
Prerequisites: (MIME 1650 with a minimum grade of C- and PHYS 2130 with a minimum grade of C-)
Term Offered: Spring, Fall

MIME 4410 Alternative Energy
[3 credit hours]
This course focuses on the technical aspects of sustainable energy technologies, such as wind, solar, biomass, ocean waves/tides, geothermal, and hydropower; it also covers issues and applications related to storage, transportation, distribution, industrial usage, and buildings. The course investigates the progress, challenges, and opportunities of each technology to be both technically feasible and economically viable.

MIME 4430 Automotive Control Systems
[3 credit hours]
This course covers the major aspects of automotive control, including engine, driveline, and complete vehicle control. This includes applications such as fuel and ignition control, ABS systems, gear-shifting, and vehicle velocity estimation.
Prerequisites: MIME 3380 with a minimum grade of D-
Term Offered: Spring, Fall

MIME 4440 Mechatronics
[3 credit hours]
This course will give students hands-on experience with mechatronic systems and components. The laboratory will be used to demonstrate several mechatronics systems including inverted pendulums, suites of sensors and motors, and other more complex systems. A major part of the course will be a semester-long project where the students conceive, design, and build a mechatronic device.
Prerequisites: MIME 3380 with a minimum grade of D-
Term Offered: Spring, Fall
MIME 4450 Automation Design
[3 credit hours]
This course will introduce the range of common components used in automation, including actuators, sensors, motors, linear guides, energy chain, industrial robots and light curtains. Students will practice (with feedback) walking through the design process in specifying, sizing, laying out and integrating these components.
Prerequisites: MIME 1100 with a minimum grade of D- and MIME 2300 with a minimum grade of D- and CIVE 1160 with a minimum grade of D-
Term Offered: Spring, Fall

MIME 4460 MATLAB for Engineers
[3 credit hours]
This course will review the basics of using MATLAB, identify best-practices applicable to MATLAB and other programming languages, and provide examples of more-advanced functionality such as image processing, Simulink control of mechatronic systems, numerically solving differential equations, GPU computation, and optimization. Programming experience would be helpful, but this would also be a good opportunity to rapidly grow programming skills with an easy-to-learn language.
Prerequisites: MATH 2860 with a minimum grade of D-
Term Offered: Spring, Fall

MIME 4510 Turbomachinery
[3 credit hours]
Theory of energy transfer between fluid and rotor in turbomachines. Design of turbomachine components. Applications to pumps, compressors and turbines.
Prerequisites: (MIME 3410 with a minimum grade of D- and MIME 3430 with a minimum grade of D-)
Term Offered: Spring, Summer, Fall

MIME 4520 Heating, Ventilating And Air Conditioning
[3 credit hours]
Control of the thermal environment within enclosed spaces including psychometric properties of air heating and cooling, loads and factors affecting human comfort. Analysis of basic heating and refrigeration systems, heat pumps, heaters, utilization of solar energy, humidifiers, energy conservation and controls for systems.
Prerequisites: MIME 3410 with a minimum grade of D-
Term Offered: Fall

MIME 4530 Internal Combustion Engines
[3 credit hours]
Study of Carnot, Otto, Diesel and Brayton Cycles, performance characteristics, combustion engines and construction details of internal combustion engines. Analysis of problems associated with carburetion, fuel injection, combustion, cooling, supercharging, emissions and emission control.
Prerequisites: MIME 3410 with a minimum grade of D-
Term Offered: Fall

MIME 4540 Jet Propulsion
[3 credit hours]
Prerequisites: MIME 3410 with a minimum grade of D-
Term Offered: Summer, Fall

MIME 4550 Aerodynamics
[3 credit hours]
Fundamentals of aerodynamics, potential flow theory, aerodynamic forces and moments, introduction to numerical analysis, application to internal flows, theory of lift for infinite and finite wings, induced drag.
Prerequisites: MIME 3430 with a minimum grade of D-
Term Offered: Spring, Fall

MIME 4560 Gas Dynamics
[3 credit hours]
Analysis of compressible flow phenomena including shock and detonation waves. Internal flow with friction and heat addition. Analysis and application to supersonic airfoil theory, inlet nacelles, nozzles to generate supersonic thrust and jet engine combustors.
Prerequisites: MIME 3430 with a minimum grade of D-
Term Offered: Spring

MIME 4690 Reliability
[3 credit hours]
Reliability of components and multicomponent systems. Static and dynamic reliability models for both independent and dependent failures. Effects of redundancy. Reliability testing consideration.
Term Offered: Spring, Fall

MIME 4800 Design For Manufacturability
[3 credit hours]
The course is an introduction to modern manufacturing methodologies used in the fabrication and analysis of new and existing product designs with three areas of emphasis: manufacturing processes, materials, and product development. The course exposes the students to the product development methods and the relationship of design to production processes, product material, material handling, quality costs, and CAD/CAM are presented. Emphasis is primarily on assembled products. Cost estimation software and other design analysis tools are employed. Lean manufacturing and Six Sigma concepts in the design context are also introduced.
Prerequisites: MIME 2650 with a minimum grade of D-
Term Offered: Spring, Fall

MIME 4820 Sustainability Analysis and Design
[3 credit hours]
The course is intended to introduce students to sustainability analysis and design in manufacturing and service settings as related to mechanical and industrial engineering. It will cover solid waste minimization for manufacturers, life cycle analysis, and environmentally conscious design.
Term Offered: Spring, Fall

MIME 4830 Additive Manufacturing
[3 credit hours]
Additive manufacturing (AM) is a method of manufacturing that has been growing rapidly. In this course the students will learn about various AM technologies. They will also work with the required design software packages to create 3D models and 3D-print objects from the designed models.
Prerequisites: MIME 2650 (may be taken concurrently) with a minimum grade of D-
Term Offered: Spring, Fall
MIME 4920 Special Projects
[1-3 credit hours]
A special project by the student to investigate or solve an acceptable problem in industrial or mechanical engineering. This course is primarily intended for students interested in mechanical, industrial or manufacturing engineering nearing completion of their undergraduate degree. Instructor will specify scope of project to correspond to credit hours.
Term Offered: Spring, Summer, Fall

MIME 4980 Special Topics
[1-3 credit hours]
A special topic at the undergraduate level in Mechanical, Industrial or Manufacturing Engineering to be offered as a course during a term by a faculty member. This is intended for students nearing graduation. Credits will correspond to regular class meeting of one lecture hour per week per credit hour.
Term Offered: Spring, Summer, Fall

MIME 4990 Independent Study
[1-3 credit hours]
An independent study by the student to investigate or solve an acceptable problem in industrial or mechanical engineering. This course is primarily intended for engineering students nearing graduation. Instructor will specify scope of study to correspond to credit hours.
Term Offered: Fall

BS in Mechanical Engineering

Below is a sample plan of study for a BS in Mechanical Engineering. Consult your degree audit for your program requirements.

- BS in Mechanical Engineering with no concentration (general) (p. 270)
- BS in Mechanical Engineering - Mechatronics Concentration (p. 271)

| Total Hours | 131 |
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Materials Science & Engineering, Certificate

The College of Engineering offers several minors for students at The University of Toledo. These minors are recommended for students who want to enhance their academic programs with engineering-related course work and are intended to allow students to develop expertise in a discipline outside their majors. Students taking courses in theses minors must meet course prerequisite requirements. Students should contact advisors in the College of Engineering for additional details about the course requirements of minors and contact advisors in their home college to determine how the minors will fit into their degree curriculum. Note that per University of Toledo policy, minors cannot be declared by students in the same major as a given minor since at least 12 hours of the minor must be distinct from any credit hours used to fulfill any major the student is pursuing.

Total Hours 12

Upon the successful completion of the Materials Science and Engineering Certificate, the students will be able to achieve the following outcomes:
1. An ability to identify, formulate, and solve complex engineering problems by applying the properties of materials.
2. An ability to apply engineering design and produce different devices that meet specified needs based on different materials.
3. An ability to recognize ethical and professional responsibilities in materials science and engineering related to engineering manufacturing.
4. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions related to materials science and engineering.

5. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Minor in Mechatronics

The College of Engineering offers several minors for students at The University of Toledo. These minors are recommended for students who want to enhance their academic programs with engineering-related course work and are intended to allow students to develop expertise in a discipline outside their majors. Students taking courses in theses minors must meet course prerequisite requirements. Students should contact advisors in the College of Engineering for additional details about the course requirements of minors and contact advisors in their home college to determine how the minors will fit into their degree curriculum. Note that per University of Toledo policy, minors cannot be declared by students in the same major as a given minor since at least 12 hours of the minor must be distinct from any credit hours used to fulfill any major the student is pursuing.

Total Hours 15

Special Programs for Undergraduates

We offer an number of special programs to allow our students to extend their education beyond their Bachelor of Science in Engineering or Bachelor of Science in Engineering Technology degree programs:

- Early Admission to Master of Science in Engineering (p. 272)
- Joint B.S. in Engineering or Engineering Technology/M.B.A. Program (p. 273)
- Minor in Business Administration (p. 273)
- Presumptive Admission Program to the University of Toledo College of Law (p. 273)

Early Admission to Master of Science in Engineering

The College of Engineering offers students currently enrolled in a Bachelor of Science in Engineering degree program at The University of Toledo an opportunity to begin work toward a Master of Science in Engineering degree. This option offers talented students who intend to continue their education beyond the B.S. a unique opportunity to begin their graduate research activities at an earlier stage in their career and proceed into the graduate programs in a timely manner.

Up to nine semester credit hours of graduate-level technical elective or required courses may be applied toward the B.S. degree in lieu of selected undergraduate elective courses, subject to specific departmental restrictions. Only 5000-level or higher engineering courses taken at The University of Toledo may be applied toward this option. In addition, an approved M.S. plan of study must be filed indicating those courses that
will be accepted in lieu of specific B.S. course requirements. Application and admission requirements are described in the graduate section of the catalog.

Normally, the Bachelor of Science in Engineering degree programs (with co-op) require five years and the Master of Science in Engineering degree programs require an additional two years. It is anticipated that by participating in this option, a total of six years will be required for the completion of both degrees.

**Joint B.S. in Engineering or Engineering Technology/M.B.A. Program**

The College of Business and Innovation, in conjunction with the College of Engineering, offers a program whereby a student may earn a Bachelor of Science in Engineering or Engineering Technology and a Master of Business Administration (M.B.A.). This program provides a unique opportunity to combine business and engineering skills to prepare graduates for global competitiveness and supports the mission to prepare corporate leaders for the future. The program should be particularly attractive to students who want to start their own company or who simply want to develop an appreciation for how engineering and business complement each other.

This program will allow engineering students in their final two semesters of study to begin taking M.B.A. courses while completing their B.S. degree program. Students with senior standing may be formally admitted into the M.B.A. program and can complete the M.B.A. at the end of six years of study. The business undergraduate prerequisites can be satisfied as part of the undergraduate curriculum.

To be admitted to the program, students must have senior standing, score a minimum of 450 on the Graduate Management Admissions Test (GMAT) and have at least a 3.0 cumulative GPA. Students also must have completed the requirements for the business minor. The business minor courses should be chosen carefully however, as not all business minor courses can be used towards the M.B.A. The six business courses listed in the business minor section plus MIM 2600 or ECON 1150 and ECON 1200 satisfy the basic core prerequisite requirement for the M.B.A. program for engineering students.

Students who wish to pursue the program should inform the associate dean of undergraduate studies in the College of Engineering during their junior year and complete the GMAT by the end of their junior year. Students should submit completed application materials to the Graduate School for admission to the M.B.A. program before the fall semester of their senior year.

Upon admission to the program by the Graduate School and the College of Business and Innovation, students will be classified as special provisional graduate students so that they may take graduate courses while completing the Bachelor of Science degree requirements. Students’ special status must be tracked by the M.B.A. office to assure AACSB compliance. Also, the Bachelor of Science in Engineering or Engineering Technology must be granted in a semester prior to graduating with the M.B.A.

To satisfy the requirements for the M.B.A., students must complete all of the core and elective required courses in the M.B.A. program. By choosing the correct courses, this may be accomplished with six undergraduate and eleven graduate-level business courses.

Normally, the Bachelor of Science in Engineering degree programs (with co-op) require five years, and the M.B.A. would require an additional two years. It is anticipated that by enrolling in the two programs simultaneously, a total of six years will be required for completion of both degrees. Similarly, for Engineering Technology students, the degree program normally requires four years, and the M.B.A. program would require an additional two years. It is anticipated that by enrolling in the two programs simultaneously, a total of five and one half years will be required for completion of both degrees.

**Minor in Business Administration**

Engineering students may earn a General Minor in Business for Non-Business Students. This link provides additional information:

GENERAL MINOR FOR NON-BUSINESS STUDENTS (p. 533)

Students interested in a business minor should consult advisors in the College of Business and Innovation and the College of Engineering.

**Presumptive Admission Program to the University of Toledo College of Law**

Through the UT Advantage program, students who graduate with a Bachelor of Science degree from the College of Engineering, have a minimum GPA of 3.4, have an LSAT score at or above the 50th percentile for the previous year’s entering class at Toledo Law, and have not committed an act or acts reflecting unsatisfactory character and fitness (e.g., a felony, an academic suspension) will be presumptively admitted to The University of Toledo College of Law upon submission of a completed application.

**Faculty**

**DEPARTMENT OF BIOENGINEERING**

Halim Ayan, 2012, Associate Professor and Graduate Program Director, B.S., Ege University; Ph.D., Drexel University

CHHSDean@utoledo.edu

Mission:
The University of Toledo’s College of Health and Human Services, an innovative college housed within a national public research university, prepares engaged professionals who improve the human condition in the region and the world.

Vision:
The College of Health and Human Services will deliver nationally recognized academic programs committed to discovery, teaching, professional practice and service that directly improve human lives.

College Statement of Diversity and Inclusion:
In concert with the University of Toledo’s values and expectations, the faculty and staff within the College of Health and Human Services uphold the tenets pledged by the University to respect and value personal uniqueness and differences. Specifically, we will actively participate in the initiatives of the University to attract and retain diverse students, faculty, and staff; to challenge stereotypes; and to promote sensitivity toward diversity and foster an environment of inclusion in all curricular and extra-curricular activities. Hence, the college values and encourages its faculty, staff and students to:

• Be considerate of the thoughts and ideas of others
• Demonstrate accountability, integrity and honor in all course-related activities
• Promote a collaborative and supportive educational environment
• Treat every individual with kindness, dignity, and respect regardless of:
  • Gender
  • Race/Ethnicity
  • Religion
  • Sexual Orientation, Gender Identity, Gender Expression
  • Impairment(s)/Disability(ies)
  • Political Views
  • Social Class/Socioeconomic Status
  • Linguistic Diversity
  • Nationality/Country of Origin
  • Other Element(s) of Uniqueness

- BS in Registered Respiratory Therapy (p. 298) (RRT to BSRT)
- BS in Respiratory Care (p. 299)
- BS in Speech Language Pathology (http://utoledo-public.courseleaf.com/undergraduate/health-human-services/exercise-rehabilitation-sciences/bs-speech-language-pathology/)
- Minor in Exercise Science (p. 301)

Department of Human Services (p. 302)
- Associate of Applied Science in Paralegal Studies (http://utoledo-public.courseleaf.com/undergraduate/health-human-services/human-services/aas-paralegal-studies/)
- BS in Criminal Justice (http://utoledo-public.courseleaf.com/undergraduate/health-human-services/human-services/bs-criminal-justice/)
- BS in Paralegal Studies (http://utoledo-public.courseleaf.com/undergraduate/health-human-services/human-services/bs-paralegal-studies/)

Department of Population Health (p. 309)
- BS in Healthcare Administration (p. 314)
- BS in Healthcare Administration Completion (p. 315)
- BS in Health Information Administration (p. 316)
- BS in Public Health (p. 317)
- Minor in Public Health (p. 320)

Admission Policies

Requirements for Direct-From-High-School Students

For all programs not listed below:
- 2.7 GPA or 21 ACT/990 SAT (taken prior to March 2016) or 1070 SAT (taken after March 2016)

Criminal Justice, Nurse Paralegal Certificate, Paralegal Studies, Social Work, and Undecided
- 2.5 GPA or 19 ACT/910 SAT (taken prior to March 2016) or 990 SAT (taken after March 2016)

Students not qualifying for admission to the College of Health and Human Services will be admitted through the Department of Exploratory Studies in University College.

Selective/Limited Admission

The following programs require an additional application for admission to their professional programs:
- Public health
- Recreation therapy
- Respiratory care
- Social work

Requirements for Students with an Associate’s Degree

Students holding associate’s degrees from accredited colleges are encouraged to enroll in the College. Students may earn a bachelor’s degree upon completion of two or more additional years of full-time study; see the advisor in the major to determine a plan of study. The following regulations apply:

1. Students must complete the equivalent of the specified University core.
2. In all baccalaureate programs, a minimum of 64 hours must be taken at the 2000 to 4000 levels; of these a minimum of 32 hours must be taken at the 3000 and 4000 levels. Coursework from other institutions is accepted at the level at which the course was taught at that institution.
Admission with Transfer Credit/Change of College

Students with satisfactory academic records wishing to transfer into the College of Health and Human Services must meet the minimum entrance requirements of The University of Toledo. After submission of official transcripts from all colleges/universities attended and acceptance by the College, transfer courses are evaluated. The evaluation process should be completed before the first term of attendance to avoid duplication of credit.

Students in good standing who wish to change from another college within The University of Toledo to the College of Health and Human Services should make an appointment with a college advisor in the Office of Student Services to discuss the transfer and have academic records reviewed. All program requirements, including University core, must be fulfilled as specified in the catalog for the year in which the student enters the College. All undergraduate hours attempted and earned at The University of Toledo, as well as the GPA, will transfer.

Health Science Majors: minimum 12 hours of earned college-level credit and 2.7 cumulative GPA to transfer

Criminal Justice, Paralegal Studies, and Social Work majors: 2.2 cumulative GPA if 12-29 hours of earned college-level credit; 2.4 cumulative GPA if 30-59 hours; and 2.5 cumulative GPA if 60+ hours

Readmission of Former Students

Undergraduate students who discontinue course work for a period of at least one academic year (not including summer) must request readmission to the University. If students have taken any course work at another institution during the time they have been away from the University (other than transient status), they must complete a new application in the Office of Undergraduate Admission and meet transfer admission requirements.

Students who have not taken course work for more than 12 months must comply with the college requirements at the time of readmission.

Honors Program

The Honors Program in the College of Health and Human Services provides opportunities for challenging and individualized study for undergraduate students of unusually high ability, motivation and initiative. For admission requirements, see the Jesup Scott Honors College section of this catalog.

Academic Policies

Refer to The University of Toledo Policy website (https://www.utoledo.edu/policies/) for academic policies that apply to all students.

The College of Health and Human Services adheres to all UToldeo policies and procedures. Please refer to the General Section (http://utoledo-public.courseleaf.com/general-section/) of this catalog for academic policies governing all students enrolled at the University. In any case where University, college, departmental and/or program policies conflict, the most stringent policy applies. Students should consult with their program for a complete list of all policies and procedures specifically related to their program.

Academic Grievance

Students have the responsibility and right to call to the attention of a professor any course grade believed to be in error. The college grievance procedure must be initiated within 60 days of the posting of the final grade. Academic grievances must follow the procedure described below:

- The student meets with the professor to attempt to resolve the problem.
- If meeting with the professor does not resolve the problem, the student must discuss the problem with the department chair of the faculty member who issued the grade. The chair attempts to resolve the problem, but may not unilaterally change the grade.
- If meeting with the chair does not resolve the issue, the student will forward the appeal to the associate dean of the College of Health and Human Services.
- The college's Petition for Academic Grievance (https://www.utoledo.edu/academic/undergraduate/pdfs/3364-71-04%20Petition%20for%20Academic%20Grievance%2003032017.pdf) should be used for this purpose. The student must state the reasons for the appeal and the desired outcome. The student must meet with the associate dean to review and discuss the problem. The associate dean will attempt to resolve the problem by meeting with the appropriate faculty member, but may not unilaterally change the grade.
- If the student wishes to continue the appeal, he/she must forward the appropriate information relative to the problem to the Student Grievance Council. Information on this process may be found on the Academic Grievance (https://www.utoledo.edu/offices/provost/academicgrievance/undergraduate.html) website. Note: If the grievance occurs during the fall or summer semester, a grievance petition must be filed with the chair of the Student Grievance Council no later than the last day of classes in the next semester. If the grievance occurs during the spring semester, the grievance petition must be filed with the chair of the Student Grievance Council no later than the last day of classes in the final summer session.

Academic Honesty

Refer to the UToledo Policy website (https://www.utoledo.edu/policies/academic/undergraduate/pdfs/3364-71-04%20Academic%20dishonesty.pdf) for further information on Academic Honesty.

Academic Probation & Suspension

Students with a cumulative GPA of less than 2.0 are automatically placed on probation until a cumulative GPA of 2.0 is achieved. While on probation, it is recommended that students not enroll for more than 15 credit hours. Students on probation must see an academic advisor.

Academic suspension means the student is prohibited from registering at UToldeo for a period of at least one semester. A student is subject to academic suspension if that person falls below the minimum GPA listed in the Academic Standing policy or fails to make sufficient progress toward attainment of the degree by accumulating excess W grades. Students may remove incompletes while under suspension. Refer to the college's Office of Student Services (https://www.utoledo.edu/hhs/
student-services/reinstatement.html) site for additional information on academic suspension.

**Dismissal**

Dismissed students are not eligible for readmission to the College of Health and Human Services. A student may be dismissed for:

- Failing to meet the conditions of readmission after suspension from the College of Health and Human Services.
- Demonstrating patterns of behavior that are inappropriate for students preparing for professional roles or for failing to meet the morals standard as defined by the State of Ohio.

Regulations for probation, suspension and dismissal apply to both full-time and part-time students. In all matters, the decision of the Dean is final.

**GPA Recalculation for Repeated Courses**

Student who have retaken a course and earned a higher grade may petition to have the first grade excluded from grade point average. Credit will only be awarded once for repeated courses. If a grade has been deleted that grade will not be used in determining the UT Toledo grade point average. However, all grades, including those for repeated courses, will be included in the determination of eligibility for graduation honors, fellowships, or other distinctions awarded on the basis of GPA. No more than a total of 18 semester hours of course work will be deleted. Students who have had their GPAs recomputed under the Academic Forgiveness Policy are not eligible for grade deletions. Specific programs within the college may have more rigorous requirements for grade deletions of major or related courses.

**Student Responsibilities**

Students are responsible to complete the following:

- All first-year students must see an advisor each semester; all College of Health and Human Services students are strongly encouraged to see an academic advisor at least once a year.
- Readmit students are responsible for degree requirements in effect at the time of readmission.
- Students are responsible for fulfilling all degree requirements.
- Students must contact the Office of Student Services to schedule an advising appointment.

**Withdrawal Policy (W Grades)**

The number of credit hours of W is limited to 22 hours for all undergraduate students in degree programs in the College of Health and Human Services. Once a student has accumulated 22 hours of W, further withdrawals will be counted as F’s in computation of the student’s GPA for the purposes of probation or suspension. In addition, students risk the loss of financial aid if they accumulate excessive hours of W.

**Student Services**

The Office of Student Services coordinates academic advising for the College of Health and Human Services. The office’s mission is to provide quality, timely and comprehensive student services that will enhance student success in achieving academic goals. Although the ultimate responsibility for making personal and educational decisions rests with the individual, every student can benefit from working with the college’s advisors, who provide assistance in identifying educational options and enhancing student potential.

Students in the College of Health and Human Services are assigned academic advisors by major. Essential services provided by advisors include monitoring degree requirements, selective admissions within the college, and interpretations of college and University policies and procedures. Advisors are located within the Health and Human Services building.

For more information, please go to http://www.utoledo.edu/hhs/student-services/

Heather Tessler, Director of Student Services
Health and Human Services Building Room 3100N
Phone: 419.530.5366
heather.tessler@utoledo.edu
CHHSAdvising@utoledo.edu

**Degree Requirements**

Students in baccalaureate programs must complete a 120-125 hours of course work and have the proper number of credit hours as outlined in their program of study. In all baccalaureate programs, a minimum of 64 hours must be taken at the 2000 level or above; of these, a minimum of 32 hours must be taken at the 3000 and 4000 levels.

**College Requirements**

The College of Health and Human Services is committed to the health and well-being of our students and the public. Consequently, all College of Health and Human Services students majoring in programs that require contact with patients or clients must provide verification of appropriate immunizations and exemplify ethical practice during their academic careers at The University of Toledo. The requirements for each major are specified under the respective programs.

**University Core Curriculum**

Students earning bachelor’s or associate’s degrees in all University colleges and programs are required to complete the University Core Curriculum. Those courses are distributed in the areas of English composition, mathematics, humanities/fine arts, social sciences, natural sciences and multicultural studies (see the General Section (http://utoledo-public.courseleaf.com/general-section/) of this catalog for details). Some colleges and programs require courses in these areas over and above those required to fulfill University core requirements. The student’s academic department or college office should be contacted for specific details.

**Residence Requirement**

Students transferring from other institutions must earn at least 32 credit hours in the College of Health and Human Services at The University of Toledo to be eligible for graduation.
Full-time students transferring into the College of Health and Human Services must complete at least the final semester and 25 percent of their program of study in residence within the college. Part-time students must complete the last 12 credit hours and 25 percent of the program of study within the college.

**Department of Exercise & Rehabilitation Sciences**

Eric Longsdorf, Chair and Interim Exercise Science Program Director  
Holly Eichner, Recreation Therapy Program Director  
Nicole McKenzie, Respiratory Care Program Director  
Jennifer Glassman, Speech-Language Pathology Program Director

The Department of Exercise and Rehabilitation Sciences offers undergraduate degree programs in exercise science, recreation therapy, respiratory care, and speech-language pathology. A minor in exercise science is available.

**Accreditation**

- The BS in Recreation Therapy degree program is accredited by Council on Accreditation of Parks, Recreation, Tourism and Related Professions (COAPRT).
- The BS in Respiratory Care degree program is accredited by the Commission on Accreditation for Respiratory Care (CoARC).

**Degrees Offered**

- BS in Exercise Science (p. 291)
- BS in Recreation Therapy (p. 295)
- BS in Registered Respiratory Therapy (p. 298)
- BS in Respiratory Care (p. 299)
  - Minor in Exercise Science (p. 301)

**EXSC 1460 Fundamentals of Anatomy and Physiology Lab**  
[1 credit hour]  
Laboratory sessions designed to provide the fundamentals of anatomy and physiology of the cell, tissues, and major organ systems of the human body using a systemic approach. Topics include scientific method, anatomical terminology, the cell, the four tissue types, and the eleven organ systems of the human body.  
**Corequisites:** EXSC 1560  
**Term Offered:** Spring, Summer, Fall  
Core Natural Sciences

**EXSC 1560 Fundamentals of Anatomy and Physiology**  
[3 credit hours]  
This course describes the fundamentals of anatomy and physiology of the cell, tissues, and major organ systems of the human body using a systemic approach. Topics include anatomical terminology, homeostasis, the cell, the four tissue types, and the eleven organ systems of the human body.  
**Corequisites:** EXSC 1460  
**Term Offered:** Spring, Summer, Fall  
Core Natural Sciences

**EXSC 1700 Intro to Exercise Science**  
[2 credit hours]  
An introduction to the professions involving exercise science, sports science, athletic training and rehabilitation therapy. Emphasis is on basic concepts of anatomical, neurological, physiological, biomechanical and psychological function in human movement.  
**Term Offered:** Spring, Fall

**EXSC 2460 Human Anatomy And Physiology I Lab**  
[1 credit hour]  
Laboratory exercise in anatomical terminology, cell division and transport, histology, and dissection, identification, and physiology of the skeletal system, skeletal muscle system, and nervous system; including the eye and ear.  
**Corequisites:** EXSC 2560  
**Term Offered:** Spring, Summer, Fall  
Core Natural Sciences

**EXSC 2470 Human Anatomy And Physiology II Lab**  
[1 credit hour]  
Laboratory exercises in endocrine, cardiovascular, respiratory, digestive, lymphatic, urinary, and reproductive anatomy, histology, physiology, including computer assisted experiments.  
**Corequisites:** EXSC 2570  
**Term Offered:** Spring, Summer, Fall

**EXSC 2510 Human Anatomy**  
[3 credit hours]  
An integrated study of both regional anatomy and musculoskeletal, cardiovascular, lymphatic, respiratory, neurologic, digestive, renal, endocrine and reproductive systems. Required for students in exercise science and allied health professional programs.  
**Prerequisites:** KINE 1700 with a minimum grade of C or EXSC 1700 with a minimum grade of C  
**Corequisites:** EXSC 2520  
**Term Offered:** Spring, Summer, Fall  
Core Natural Sciences

**EXSC 2520 Human Anatomy Lab**  
[1 credit hour]  
Laboratory exercises in musculoskeletal, neurological, cardiovascular and respiratory anatomy.  
**Corequisites:** EXSC 2510  
**Term Offered:** Spring, Summer, Fall  
Core Natural Sciences
EXSC 2530 Human Physiology
[3 credit hours]
This course provides foundational information on human physiology. Emphasis is placed on cell physiology, metabolism, as well as the musculoskeletal, cardiovascular, respiratory, endocrine, and immune systems in the maintenance of normal body function.
Prerequisites: (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (KINE 2510 with a minimum grade of C and KINE 2520 with a minimum grade of C)
Term Offered: Spring, Summer, Fall

EXSC 2540 Human Physiology Lab
[1 credit hour]
Laboratory exercises in musculoskeletal, neurological, cardiovascular and respiratory physiology.
Corequisites: EXSC 2530
Term Offered: Spring, Summer, Fall

EXSC 2560 Anatomy and Physiology I
[3 credit hours]
Anatomy and physiology of the human body. Study of cells, tissues, special senses, and the skeletal, muscle, and nervous systems.
Corequisites: EXSC 2460
Term Offered: Spring, Summer, Fall
Core Natural Sciences, Trans Mod Natural Science

EXSC 2570 Human Anatomy and Physiol II
[3 credit hours]
Anatomy and physiology of human endocrine, blood, cardiovascular, lymphatic, respiratory, digestive, urinary and electrolyte, and reproductive systems.
Prerequisites: (KINE 2460 with a minimum grade of C and KINE 2560 with a minimum grade of C) or (EXSC 2460 with a minimum grade of C and EXSC 2560 with a minimum grade of C)
Corequisites: EXSC 2470
Term Offered: Spring, Summer, Fall

EXSC 2580 Human Pathophysiology For Health Care
[3 credit hours]
Study of pathology and general health management of diseases and injuries across the life span. Topics include etiology, symptoms, and the physical and psychological reactions to diseases and injuries of organ systems.
Prerequisites: (KINE 2460 with a minimum grade of D- and KINE 2470 with a minimum grade of D- and KINE 2560 with a minimum grade of D- and KINE 2570 with a minimum grade of D-) or (KINE 2510 with a minimum grade of D- and KINE 2520 with a minimum grade of D-) or (EXSC 2460 with a minimum grade of D- and EXSC 2470 with a minimum grade of D- and EXSC 2560 with a minimum grade of D- and EXSC 2570 with a minimum grade of D-) or (EXSC 2510 with a minimum grade of D- and EXSC 2520 with a minimum grade of D-)
Term Offered: Spring, Fall

EXSC 2590 Microbiology and Infectious Diseases
[3 credit hours]
This course describes and differentiates basic Microbiology topics as well as covering bacterial, viral, and protozoan infections within various body systems.
Prerequisites: BIOL 2150 with a minimum grade of C or BIOL 2170 with a minimum grade of C or EEES 2150 with a minimum grade of C or KINE 2510 with a minimum grade of C or KINE 2530 with a minimum grade of C or KINE 2560 with a minimum grade of C or EXSC 2510 with a minimum grade of C or EXSC 2530 with a minimum grade of C or EXSC 2560 with a minimum grade of C
Term Offered: Spring, Summer, Fall

EXSC 3200 Advanced Human Anatomy
[3 credit hours]
An elective course that applies musculoskeletal anatomy to human movement, function, injury evaluation and rehabilitation through in cadaver observation and dissection.
Prerequisites: (KINE 2510 with a minimum grade of C and KINE 2520 with a minimum grade of C and KINE 2530 with a minimum grade of C and KINE 2540 with a minimum grade of C or EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C and EXSC 2530 with a minimum grade of C and EXSC 2540 with a minimum grade of C)
Term Offered: Spring, Summer, Fall

EXSC 3240 Concepts of Exercise Fitness and Health Strategies
[3 credit hours]
This focus of this course is the self-exploration of the importance of regular physical activity including cardiovascular and muscular exercise on maintaining physical fitness and wellness. Students will conduct fitness assessments.Min.grade of C for HPFP concentration.
Prerequisites: EXSC 1560 with a minimum grade of C and EXSC 1460 with a minimum grade of C or (EXSC 2560 with a minimum grade of C and EXSC 2460 with a minimum grade of C and EXSC 2470 with a minimum grade of C and EXSC 2570 with a minimum grade of C and EXSC 2530 with a minimum grade of C and EXSC 2520 with a minimum grade of C and EXSC 2570 with a minimum grade of C)
Term Offered: Spring, Summer, Fall

EXSC 3250 Applied Exercise Physiology
[3 credit hours]
This course will provide information related to the physiological responses of the human organism to exercise and exercise training. Emphasis will also be placed on the role exercise plays in health and disease prevention.
Prerequisites: KINE 2530 with a minimum grade of C or KINE 2570 with a minimum grade of C or EXSC 2530 with a minimum grade of C or EXSC 2570 with a minimum grade of C
Term Offered: Spring, Summer, Fall

EXSC 3530 Applied Exercise Physiology Laboratory
[1 credit hour]
This course is the laboratory component of the applied exercise physiology course. Emphasis will be placed on the concepts learned in lecture. This will occur through hands-on activities and experiments involving various forms of exercise testing and the use of standardized equipment.
Corequisites: EXSC 3520
Term Offered: Spring, Summer, Fall
EXSC 3580 Exercise Pathophysiology
[3 credit hours]
A discovery of the pathophysiology of organ systems, concentrating on metabolic, cardiovascular, respiratory, endocrine, muscle, and gastrointestinal systems with exercise as a guiding element of discussion.

Prerequisites: EXSC 2530 with a minimum grade of C
Term Offered: Spring, Fall

EXSC 3620 Professional Responsibilities in the Fitness Industry
[3 credit hours]
This course examines the ethical, legal and professional responsibilities of working in an allied health profession as a personal trainer, fitness consultant or exercise specialist. Min. grade of C for HPFP concentrations.

Term Offered: Spring, Fall

EXSC 3650 Foundations of Sports Medicine
[3 credit hours]
A review of the foundation aspects of sports medicine, including but not limited to: prevention and wellness, emergency care, clinical examination and diagnosis, therapeutic interventions and aspects of professional practice. Specifically relates to the fields of athletic training, sports medicine, musculoskeletal rehabilitation and orthopedic medicine. Course will also include observation of sports medicine professionals in a clinical setting.

EXSC 3680 Sport and Exercise Pharmacology
[3 credit hours]
Provide the basics of pharmacology related to sport and exercise including: pharmacokinetics, indications and contradictions of various drugs and legal concerns related to using therapeutic and non-therapeutic drugs. Min. grade of C for HPFP concentration.

Prerequisites: (KINE 2560 with a minimum grade of C and KINE 2460 with a minimum grade of C and KINE 2470 with a minimum grade of C and KINE 2570 with a minimum grade of C and KINE 2470 with a minimum grade of C and EXSC 2460 with a minimum grade of C and EXSC 2470 with a minimum grade of C and EXSC 2570 with a minimum grade of C with a minimum grade of C and EXSC 2460 with a minimum grade of C and EXSC 2470 with a minimum grade of C and EXSC 2570 with a minimum grade of C) or (KINE 2510 with a minimum grade of C and KINE 2520 with a minimum grade of C and KINE 2530 with a minimum grade of C and KINE 3520 with a minimum grade of C and KINE 3530 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C and EXSC 2530 with a minimum grade of C and EXSC 2540 with a minimum grade of C) or (KINE 2510 with a minimum grade of C and KINE 2520 with a minimum grade of C and KINE 2530 with a minimum grade of C and KINE 3520 with a minimum grade of C)

Corequisites: EXSC 3520 with a minimum grade of C and EXSC 3530 with a minimum grade of C

EXSC 3830 Principles of Strength Conditioning
[3 credit hours]
This course provides students with a fundamental understanding of muscular strength conditioning principles and the application of these principles to exercise programming relevant to physical activity and athletic performance. Min. grade of C for HPFP concentration.

Prerequisites: (KINE 2510 with a minimum grade of C and KINE 2520 with a minimum grade of C and KINE 2530 with a minimum grade of C and KINE 2540 with a minimum grade of C and KINE 3520 with a minimum grade of C and KINE 3530 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C and EXSC 2530 with a minimum grade of C and EXSC 2540 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C)

Corequisites: EXSC 3520 with a minimum grade of C and EXSC 3530 with a minimum grade of C

Term Offered: Spring, Fall

EXSC 3850 Cardiac Dysrhythmia Interpretation
[3 credit hours]
This course examines cardiac anatomy, electrophysiology and basic cardiac rhythms with an emphasis on the recognition and interpretation of cardiac dysrhythmias. Min. grade of C for HPFP concentration.

Prerequisites: (KINE 2510 with a minimum grade of C and KINE 2520 with a minimum grade of C and KINE 2530 with a minimum grade of C and KINE 2540 with a minimum grade of C and KINE 3520 with a minimum grade of C and KINE 3530 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C and EXSC 2530 with a minimum grade of C and EXSC 2540 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C and EXSC 2530 with a minimum grade of C and EXSC 2540 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C)

Corequisites: EXSC 3860

Term Offered: Fall

EXSC 3860 Cardiac Dysrhythmia Lab
[1 credit hour]
This course is the practical application of the techniques required to administer a 12 lead EKG at rest and during exercise. Students will record multiple EKG’s and interpret the rhythm. Min. grade of C for HPFP concentration.

Prerequisites: (KINE 2510 with a minimum grade of C and KINE 2520 with a minimum grade of C and KINE 2530 with a minimum grade of C and KINE 2540 with a minimum grade of C and KINE 3520 with a minimum grade of C and KINE 3530 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C and EXSC 2530 with a minimum grade of C and EXSC 2540 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C and EXSC 2530 with a minimum grade of C and EXSC 2540 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C)

Corequisites: EXSC 3860

Term Offered: Fall

EXSC 3880 Exercise Science Seminar
[1 credit hour]
This course provides opportunities for students to develop and present a professional paper to the class, or participate in a seminar focused on a scholarly presentation. Min. grade of C for HPFP concentration.

Prerequisites: (KINE 2510 with a minimum grade of C and KINE 2520 with a minimum grade of C and KINE 2530 with a minimum grade of C and KINE 2540 with a minimum grade of C and KINE 3520 with a minimum grade of C and KINE 3530 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C and EXSC 2530 with a minimum grade of C and EXSC 2540 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C and EXSC 2530 with a minimum grade of C and EXSC 2540 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2520 with a minimum grade of C)

Corequisites: EXSC 3860

Term Offered: Spring
EXSC 3950 Research Design in Exercise Science
[3 credit hours]
This course emphasizes the design, analysis and interpretation of qualitative and quantitative research methods in the areas of athletic training, exercise science and other health-related fields. Min. grade of C or better for HPFP concentration.
Prerequisites: MATH 2600 with a minimum grade of D- or RESM 4100 with a minimum grade of D-
Term Offered: Spring, Fall

EXSC 4140 Fitness Internship I
[4 credit hours]
Students will actively engage and participate in the day-to-day functions including operational, managerial and client assessments in a health, wellness or fitness facility (16 hours/week). Min. grade of C for HPFP concentration.
Prerequisites: (KINE 3850 with a minimum grade of C and KINE 3860 with a minimum grade of C and KINE 4850 with a minimum grade of C and KINE 4860 with a minimum grade of C) or (EXSC 3850 with a minimum grade of C and EXSC 3860 with a minimum grade of C and EXSC 4850 with a minimum grade of C and EXSC 4860 with a minimum grade of C)
Term Offered: Fall

EXSC 4140 Fitness Internship II
[4 credit hours]
Students will actively engage and participate in the day-to-day functions including operational, managerial and client assessments in a health, wellness or fitness facility (16 hours/week). Min. grade of C for HPFP concentration.
Prerequisites: (KINE 2510 with a minimum grade of C or KINE 2560 with a minimum grade of C or EXSC 2510 with a minimum grade of C or EXSC 2560 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C or EXSC 2560 with a minimum grade of C)
Term Offered: Spring, Summer, Fall

EXSC 4150 Exercise Facility Management
[3 credit hours]
Students will develop an understanding of the skills necessary for marketing, promoting and managing various fitness, wellness and rehabilitation facilities. Min. grade of C for HPFP concentration.
Term Offered: Spring

EXSC 4200 Exercise Facility Management
[3 credit hours]
Students will actively engage and participate in the day-to-day functions including operational, managerial and client assessments in a health, wellness or fitness facility (16 hours/week). Min. grade of C for HPFP concentration.
Prerequisites: (KINE 3850 with a minimum grade of C and KINE 3860 with a minimum grade of C and KINE 4850 with a minimum grade of C and KINE 4860 with a minimum grade of C) or (EXSC 3850 with a minimum grade of C and EXSC 3860 with a minimum grade of C and EXSC 4850 with a minimum grade of C and EXSC 4860 with a minimum grade of C)
Term Offered: Fall

EXSC 4250 Readings in Exercise Biology
[3 credit hours]
Faculty and student directed readings of original research in Exercise Biology, along with laboratory demonstrations. Readings will focus on how changes in physical activity influence the biology of skeletal muscle.
Term Offered: Spring

EXSC 4350 Applied Biomechanics
[3 credit hours]
This course focuses on the application of biomechanics concepts to the acquisition and refinement of fundamental movement patterns, basic functional skills and sport activities. Such topics as locomotion, balance and the biomechanical basis of injury are examined.
Prerequisites: (KINE 2510 with a minimum grade of C and KINE 2530 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C and EXSC 2530 with a minimum grade of C)
Term Offered: Spring, Fall

EXSC 4350 Applied Biomechanics Lab
[1 credit hour]
This course is the laboratory component of the applied biomechanics course. Emphasis will be placed on the application of the concepts learned in lecture to rehabilitation, sports in jury, exercise, and sport situations. This will occur through hands-on activities and experiments involving contemporary forms of biomechanical instrumentation.
Corequisites: EXSC 4540
Term Offered: Spring, Fall

EXSC 4450 Neurological And Pathological Foundations Of Rehabilitation
[3 credit hours]
Study of neurological control of normal movement and the implications of various medical pathologies for rehabilitation. Emphasis on inflammatory processes, metabolic and vascular disturbances, traumatic injuries, nutritional deficiencies, neoplasms, degenerative conditions and congenital disorders.
Prerequisites: (KINE 2510 with a minimum grade of C or KINE 2560 with a minimum grade of C) or (EXSC 2510 with a minimum grade of C or EXSC 2560 with a minimum grade of C)
Term Offered: Spring, Fall

EXSC 4450 Clinical Exercise Testing
[3 credit hours]
The purpose of this course is to provide students with an understanding of the relationship between exercise and chronic disease, an understanding of the mechanisms and adaptations by which exercise influences the disease process, and an understanding of the role and importance of exercise testing and training in the prevention, evaluation and treatment of these chronic diseases. Min. grade of C for HPFP concentration.
Prerequisites: (KINE 3850 with a minimum grade of C and KINE 3860 with a minimum grade of C) or (EXSC 3850 with a minimum grade of C and EXSC 3860 with a minimum grade of C)
Term Offered: Spring
EXSC 4860 Clinical Exercise Testing Lab
[1 credit hour]
The purpose of this course is to provide students with the skills needed to perform a 12 lead electrocardiogram stress test on their own. Min. grade of C for HPFP concentration.
Prerequisites: EXSC 3520 with a minimum grade of C- and EXSC 3530 with a minimum grade of C-
Corequisites: EXSC 4850
Term Offered: Spring

EXSC 4900 Human Performance Seminar
[1-3 credit hours]
Classroom and laboratory analysis of current research in varied topic areas.
Term Offered: Spring, Fall

EXSC 4940 Internship-Practicum
[2-15 credit hours]
Clinical experience in locations both inside and outside the university setting. Placement depends on area of study.
Term Offered: Summer

EXSC 4990 Independent Study In Exercise Science
[1-3 credit hours]
Directed individual study. Specialty title, seminar sheet and permission of instructor required.
Term Offered: Spring, Summer, Fall

OCCT 1000 Toledo Transition (T2) - Postsecondary Program Seminar
[1-5 credit hours]
Addresses topics on independent living, self-determination & student development, academics, and employment.
Term Offered: Spring, Summer, Fall

OCCT 2550 PURPOSEFUL LIVING ROLE OF OCCUPATIONAL THERAPY
[3 credit hours]
Introduces the occupational therapy profession and occupational therapy's role in maintaining functional daily living. Explore your daily occupations through self-reflection and develop strategies for personal growth.
Term Offered: Spring, Fall

RCBS 3010 Respiratory Care Fundamentals
[4 credit hours]
A study of the anatomy and physiology of the respiratory and cardiovascular systems, including the physics of gas exchange, ventilation, and blood flow.
Corequisites: RCBS 3020
Term Offered: Summer

RCBS 3020 Respiratory Care Practice I
[4 credit hours]
An introductory experience in the basic assessment and care of the patient with cardiopulmonary disease. Ethical issues, interpersonal communication, and infection control in the healthcare setting will also be covered.
Corequisites: RCBS 3010
Term Offered: Summer

RCBS 3110 Respiratory Care Therapeutics I
[4 credit hours]
Etiology, pathophysiology, clinical manifestations, and treatment of selected diseases of pulmonary and cardiovascular systems with emphasis on pharmacologic principles and agents used in the treatment of those diseases.
Prerequisites: (RCBS 3010 with a minimum grade of D- and RCBS 3020 with a minimum grade of D-)
Term Offered: Fall

RCBS 3120 Respiratory Care Practice II
[7 credit hours]
Didactic, laboratory, and introductory clinical experiences with a variety of equipment and procedures that are used to establish and maintain a patent airway, and to monitor and treat patients with cardiopulmonary diseases.
Prerequisites: (RCBS 3010 with a minimum grade of D- and RCBS 3020 with a minimum grade of D-)
Term Offered: Fall

RCBS 3130 Cardiopulmonary Diagnostics I
[4 credit hours]
Discussion of the theory and selected techniques used in cardiopulmonary diagnostics, including analysis of blood gases, cardiac rhythms, hemodynamic monitoring values, spirometry results, and chest x-rays.
Prerequisites: (RCBS 3010 with a minimum grade of D- and RCBS 3020 with a minimum grade of D-)
Term Offered: Fall

RCBS 3200 Introduction to Critical Care
[1 credit hour]
An introductory experience in the theory, initiation and practice of providing non-invasive and mechanical ventilation in a critical care setting.
Prerequisites: RCBS 3110 with a minimum grade of C and RCBS 3120 with a minimum grade of C and RCBS 3130 with a minimum grade of C
Term Offered: Spring

RCBS 3210 Respiratory Care Therapeutics II
[4 credit hours]
Continuation of RCBS 3110 with consideration of disease states of the pulmonary and cardiovascular systems not previously considered. Emphasis on analysis of assessment, diagnosis and treatment of individual patients by students.
Prerequisites: (RCBS 3110 with a minimum grade of D- and RCBS 3120 with a minimum grade of D- and RCBS 3130 with a minimum grade of D-)
Term Offered: Spring

RCBS 3220 Respiratory Care Practice III
[7 credit hours]
Theoretical principles involved in the initiation, maintenance, and discontinuance of mechanical ventilation. Laboratory experiences with a variety of adult mechanical ventilators. Clinical experiences providing respiratory care for patients requiring mechanical ventilation.
Prerequisites: (RCBS 3110 with a minimum grade of D- and RCBS 3120 with a minimum grade of D- and RCBS 3130 with a minimum grade of D-)
Term Offered: Spring
RCBS 3230 Cardiopulmonary Diagnostics II
[2 credit hours]
Classroom and field experiences in the theory and practice of selected cardiopulmonary diagnostic procedures including measures of pulmonary volumes, flows, gas distribution, and gas diffusion. Capnography, exercise testing, and specialized test regimens will also be covered.
Prerequisites: (RCBS 3110 with a minimum grade of C and RCBS 3120 with a minimum grade of C and RCBS 3130 with a minimum grade of C)
Term Offered: Spring, Fall

RCBS 3300 Advanced Cardiac Life Support
[1 credit hour]
American Heart Association Advanced Cardiac Life Support course designed to aid in the management of cardiopulmonary emergencies. Students must have previous knowledge of cardiac pharmacology and rhythms, and current CPR certification.
Term Offered: Spring, Fall

RCBS 4140 Integrated Clinical Practice I
[4 credit hours]
Clinical experiences in the acute care setting that requires the application of theory related to the diagnosis, treatment and management of adult, neonatal and pediatric patients with cardiopulmonary disease.
Prerequisites: (RCBS 3210 with a minimum grade of D- and RCBS 3220 with a minimum grade of D- and RCBS 3230 with a minimum grade of D-)
Term Offered: Fall

RCBS 4150 Neonatal/Pediatric Respiratory Care
[4 credit hours]
A discussion of the etiology, pathophysiology and treatment of neonatal and pediatric disorders. Laboratory exercises designed to familiarize student with neonatal and pediatric resuscitation and ventilation.
Prerequisites: (RCBS 3210 with a minimum grade of D- and RCBS 3220 with a minimum grade of D- and RCBS 3230 with a minimum grade of D-)
Term Offered: Fall

RCBS 4160 Clinical Assessment
[3 credit hours]
This course will provide the students with knowledge and enhance their critical thinking skills related to patient assessment and the development and modification of patient respiratory care plans.
Prerequisites: (RCBS 3210 with a minimum grade of D- and RCBS 3220 with a minimum grade of D- and RCBS 3230 with a minimum grade of D-)
Term Offered: Fall

RCBS 4240 Integrated Clinical Practice II
[3 credit hours]
Clinical experiences with a primary focus on advanced skills used in the management of cardiopulmonary patients of all ages in the acute and subacute care settings.
Prerequisites: (RCBS 4150 with a minimum grade of D- and RCBS 4140 with a minimum grade of D-)
Term Offered: Spring

RCBS 4510 Respiratory Care in Alternate Sites
[3 credit hours]
The delivery of care to cardiopulmonary patients outside of the acute care facility will be discussed. Standards of care in addition to the funding of this care will be investigated. Special procedures in respiratory care will be presented.
Term Offered: Spring, Fall

RCBS 4700 Research Analysis In Respiratory Care
[3 credit hours]
Review of appropriate statistical knowledge required to analyze applied/clinical and basic published research. Includes a review of the elements of basic research design, reliability and validity, and critical review of cardiopulmonary research literature.
Term Offered: Spring, Fall

RCBS 4800 Issues In Professional Practice
[3 credit hours]
A capstone course designed to prepare the senior student for professional practice. Decision-making skills in complex clinical situations are developed through the use of clinical simulations and student case presentations.
Prerequisites: (RCBS 4140 with a minimum grade of D- and RCBS 4150 with a minimum grade of D- and RCBS 4160 with a minimum grade of D-)
Term Offered: Spring, Fall

RCBS 4810 Preparation For Professional Practice
[1 credit hour]
This laboratory course is designed to complement the corequisite RBRS 4800 lecture course. Emphasis on enhancing the students' ability to integrate complex cognitive and psychomotor skills in preparation for professional practice.
Term Offered: Spring

RCBS 4990 Independent Study
[1-4 credit hours]
Independent study of specific topics and issues under the supervision of a faculty member of the department of health promotion and human performance. The student will participate in independent reading, clinical/laboratory research, field experience and other similar activities. Independent study course must have a specialty; seminar sheet required.
Term Offered: Spring

RCRT 1300 Introduction To Recreation And Leisure Studies
[3 credit hours]
An introductory course which gives an overview of recreation and leisure in educational, governmental, institutional and professional settings. Explores historical, social and economic implications from personal and professional perspectives. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall

RCRT 1310 Introduction to Recreational Therapy Programming
[3 credit hours]
An introductory course that presents theories and principles of programming, program planning, practical experiences in implementation, and facilitation of recreational therapy programs. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall

RCRT 3310 Inclusion and Recreational Therapy Services
[3 credit hours]
An introductory course which defines the principals of inclusion and major legislation that impacts the provision and delivery of recreational therapy services for individuals with disabilities. Thirty hour volunteer component required. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall
RCRT 3710 Outdoor and Adaptive Sports Program Delivery in Recreational Therapy Practice
[3 credit hours]
An introduction to theory and techniques related to risk management, leadership, and administration of outdoor pursuits in RT practice as it applies to working with individuals in clinical and non-clinical settings. Students will also gain an understanding of adapted sports, modification of equipment, adapted sports competition for persons with disabilities and the classification system governing adapted sports competition for veterans. Minimum "C" required for RCRT majors. Prerequisite: Senior Standing and Acceptance in the Recreational Therapy program.
Term Offered: Spring

RCRT 4000 Community and Event Planning in Recreational Therapy Service
[3 credit hours]
This course introduces the principles, strategies, and risk management concerns for planning a variety of events to achieve RT treatment outcomes and community/social integration. Students gain experience planning accessible events for a variety of group sizes and diverse populations in RT service. Event critiques required. Minimum "C" required for RCRT majors.
Term Offered: Summer, Fall

RCRT 4010 Planning & Promotion of Sport
[3 credit hours]
This course focuses on the basic principles of marketing and delivery of services associated with intercollegiate athletics, professional, and multi-sport club operations, facilities and management of resources. This course also examines motivation and behavior of sports tourists.
Term Offered: Fall

RCRT 4040 Recreational Therapy Services within the Veterans Administration
[3 credit hours]
The course will focus on current trends, issues, and clinical techniques specific to serving Veterans within the Veteran's Administration VA system as a Recreational Therapist. Course content will include orientation to military culture and rituals, specific diagnoses, and conditions commonly experienced by Veterans, delivery of outcome-based RT interventions and special programs, partnerships, and an in-depth look into internships and employment opportunities within the VA system.
Term Offered: Fall

RCRT 4330 Administration In Recreational Therapy
[3 credit hours]
This course focuses on the administrative functions of delivering Recreational Therapy services. Students will gain an understanding of the aspects of management principles including ethics, legislation, technology, quality management, risk management, financial and human resources, marketing, and accrediting agencies. Minimum "C" required for RCRT majors. Note: Senior Standing and Acceptance in the Recreational Therapy program.
Term Offered: Spring, Fall

RCRT 4340 Leisure, Recreation, And Aging in Recreational Therapy Practice
[3 credit hours]
This course provides a study of the impacts of aging on leisure and recreation activities during middle and later adulthood by investigating the aging process, leisure across the lifespan, and the impact of leisure and recreation on quality of life and wellness from an RT perspective. Minimum grade of "C" required for RCRT majors.
Term Offered: Spring, Fall

RCRT 4440 Park And Recreation Planning
[3 credit hours]
An integration of landscape architecture, facility design and location, as well as the functional aesthetic considerations of park and recreational facility planning. Emphasis will be on plan-formation procedures.
Term Offered: Spring

RCRT 4450 Research Applications In Recreational Therapy
[3 credit hours]
This course introduces research applications utilized by Recreation Therapy practitioners. Students will learn about evidence based practice, development and implementation of survey research, and the use of experimental designs. Minimum "C" required for RCRT majors.
Term Offered: Fall

RCRT 4600 Therapeutic Arts
[1 credit hour]
This course provides the student the fundamental skill development needed to implement therapeutic outcomes using arts and crafts modalities. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall

RCRT 4610 Rt Intervention: Horticulture Therapy
[1 credit hour]
This course provides the student the fundamental skill development needed to implement therapeutic outcomes using horticulture modalities. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall

RCRT 4620 Animal Assisted Therapy
[1 credit hour]
This course provides the student the fundamental skill development needed to implement therapeutic outcomes using a variety of animal-assisted modalities. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall

RCRT 4630 Therapeutic Activities
[1 credit hour]
This course provides the student the fundamental skill development needed to implement therapeutic outcomes using a variety of games, humor and play modalities. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall

RCRT 4640 Rt Intervention: Therapeutic Groups
[1 credit hour]
This course provides the student the fundamental skill development needed to implement therapeutic outcomes using therapeutic group techniques and processes as a modality. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall
RCRT 4660 Relaxation And Stress Management
[1 credit hour]
This course provides the student the fundamental skill development needed to implement therapeutic outcomes using relaxation and stress management techniques as a modality. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall

RCRT 4670 Rt Intervention: Leisure Education
[1 credit hour]
This course provides the student the fundamental skill development needed to implement therapeutic outcomes using leisure education activities, including: social skills, values clarification, leisure awareness, resources and knowledge. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall

RCRT 4680 Rt Intervention: Assistive Technology And Techniques
[1 credit hour]
This course provides the student the fundamental skill development needed to implement therapeutic outcomes utilizing assistive technology, techniques, and resources in therapeutic settings. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall

RCRT 4690 Rt Intervention: Aquatic Therapy
[1 credit hour]
This course provides the student the fundamental skill development needed to implement therapeutic outcomes utilizing swimming, evidence-based aquatic programming methods, and resources. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall

RCRT 4720 Introduction To Therapeutic Recreation
[3 credit hours]
This course is designed to introduce the student to theories, models, principles, and history of therapeutic recreation service. Through lectures, discussions and self-directed learning activities, the student will examine the structure and function of therapeutic recreation processes in a variety of treatment settings. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall

RCRT 4730 Physical and Neurological Diagnosis and Conditions in Recreational Therapy Practice
[3 credit hours]
This course is designed to provide the student with in-depth knowledge of the diagnostic criteria, etiology, and symptomology related to physical, neurological, sensory, and metabolic diagnosis and conditions across the lifespan with a focus on RT practice. RT interventions, pharmacological interventions, family involvement, risk management, and other implications impacting RT practice will also be examined.
Term Offered: Fall

RCRT 4740 Assessment And Documentation In Therapeutic Recreation
[3 credit hours]
This course introduces the student to the APIE(D) process, reviews assessment tools (standardized and self-designed) used in practice, common documentation methods and skills needed for therapeutic recreation practice including: initial assessment, treatment planning, documentation, and discharge planning. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall

RCRT 4750 Group Dynamics In Recreational Therapy
[3 credit hours]
This course introduces students to the concepts and theories of the therapeutic group process as it applies to professional practice. Students will be introduced to and practice: facilitation skills, behavior modification techniques, and effective communication and leadership skills. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall

RCRT 4760 Research Administrative Programming In Therapeutic Recreation
[3 credit hours]
Course will focus on current issues and techniques relating to comprehensive research program design, implementation and evaluation relating to the practice of therapeutic recreation.
Prerequisites: (RCRT 4720 with a minimum grade of D- and RCRT 4730 with a minimum grade of D- and RCRT 4740 with a minimum grade of D-)

RCRT 4770 Recreational Therapy Project Design
[2 credit hours]
In support of the recreational therapy internship, the student will design a capstone project that links practical experience with formal academic preparation. Minimum "C" required for RCRT majors. Prerequisite: Senior Standing and Acceptance in the Recreational Therapy program.
Corequisites: RCRT 4940
Term Offered: Spring, Summer, Fall

RCRT 4780 Recreational Therapy Project Evaluation
[2 credit hours]
In support of RCRT 4770, this course requires the student to implement, evaluate, and prepare a professional presentation of the recreation therapy internship capstone project. Minimum "C" required for RCRT majors. Prerequisite: Senior Standing and Acceptance in the Recreational Therapy program.
Term Offered: Summer

RCRT 4790 Psychological Diagnosis and Conditions in Recreational Therapy Practice
[3 credit hours]
This course is designed to provide the student with in-depth knowledge of the diagnostic criteria, etiology, and symptomology related to psychological conditions across the lifespan with a focus on RT practice. RT interventions, pharmacological interventions, family involvement, risk management, and other implications impacting RT practice will be examined.
Prerequisites: RCRT 4730 with a minimum grade of D-
Term Offered: Spring

RCRT 4800 Clinical: Physical Rehabilitation
[1 credit hour]
This course requires a 50-hour practicum experience in a community agency. The practicum experience provides the student a structured environment to apply the APIE(D) process with a physical rehabilitation population. Minimum "C" required for RCRT majors.
Prerequisites: RCRT 4730 with a minimum grade of D-
Term Offered: Spring, Summer, Fall
RCRT 4810 Clinical: Psychiatric Rehabilitation
[1 credit hour]
This course requires a 50-hour practicum experience in a community agency. The practicum experience provides the student a structured environment to apply the APIE(D) process with a psychiatric rehabilitation population. Minimum "C" required for RCRT majors.
Prerequisites: RCRT 4730 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

RCRT 4820 RT Clinical: Intellectual Deficits / Developmental Disability
[1 credit hour]
This course requires a 50-hour practicum experience in an ID/DD agency. The practicum experience provides the student a structured environment to apply the APIE(D) process with an ID/DD rehabilitation population. Minimum grade of "C" required for RCRT majors. Registration restriction: Acceptance in the Recreational Therapy program.
Prerequisites: RCRT 4730 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

RCRT 4830 Clinical: Geriatric
[1 credit hour]
This course requires a 50-hour practicum experience in a community agency. The practicum experience provides the student a structured environment to apply the APIE(D) process with a geriatric population. Minimum "C" required for RCRT majors.
Prerequisites: RCRT 4730 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

RCRT 4840 Clinical: Pediatric
[1 credit hour]
This course requires a 50-hour practicum experience in a community agency. The practicum experience provides the student a structured environment to apply the APIE(D) process with a pediatric population. Minimum "C" required for RCRT majors.
Prerequisites: RCRT 4730 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

RCRT 4850 Recreational Therapy Internship Preparation
[1 credit hour]
This course is designed to prepare the student for the recreational therapy internship process and professional employment in recreational therapy. Students will learn and practice professional skills, such as, resume writing, interviewing techniques, and professionalism. Student internship expectations and professional certifications and licensure are also addressed. Minimum "C" required for RCRT majors. Prerequisite: Senior Standing and Acceptance in the Recreational Therapy program.
Term Offered: Spring, Fall

RCRT 4860 Therapeutic Fitness
[1 credit hour]
This course provides the student the fundamental skill development needed to implement therapeutic outcomes using therapeutic fitness modalities. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall

RCRT 4870 Comprehensive Program Planning In Recreational Therapy
[3 credit hours]
This course requires the student to apply cumulative knowledge of the RT APIE(D) process through designing evidence-based: treatment programs, program evaluations, protocols and treatment plans in recreation therapy practice. Minimum "C" required for RCRT majors. Prerequisite: Senior Standing and Acceptance in the Recreational Therapy program.
Term Offered: Spring

RCRT 4900 Seminar In Recreation And Leisure
[1-3 credit hours]
This course provides faculty the opportunity to develop additional curriculum in recreation therapy related academic areas not offered as part of the current curriculum. Minimum "C" required for RCRT majors.
Term Offered: Spring, Fall

RCRT 4930 Senior Internship
[4 credit hours]
An opportunity for the student to become totally involved as an intern in functionally related tasks which will help prepare for an appropriate role as a professional in the field. Not available for therapeutic recreation students. This course may be taken twice in the same semester.
Term Offered: Spring, Summer, Fall

RCRT 4940 Internship In Recreational Therapy
[5 credit hours]
In accordance with the University of Toledo and NCTRC certification requirements, this course requires 560 hours of internship experience over a minimum of 14 consecutive weeks supervised by a CTRS. The internship experience is only offered in the summer and requires faculty approval. Minimum "C" required for RCRT majors.
Prerequisites: RCRT 4950 with a minimum grade of D-
Term Offered: Summer

RCRT 4950 Recreation Therapy Internship I
[5 credit hours]
In accordance with the University of Toledo and NCTRC certification requirements, this course requires 280 hours of internship experience over a minimum of 7 consecutive weeks supervised by a CTRS. The internship experience is only offered in the summer and requires faculty approval. Minimum "C" required for RCRT majors.

RCRT 4960 Recreation Therapy Internship II
[5 credit hours]
In accordance with the University of Toledo and NCTRC certification requirements, this course requires 280 hours of internship experience over a minimum of 7 consecutive weeks supervised by a CTRS. The internship experience is only offered in the summer and requires faculty approval. Minimum "C" required for RCRT majors.

RCRT 4990 Independent Study In Recreation And Leisure Studies
[1-3 credit hours]
This course provides students the opportunity to develop an independent learning experience in support of academic and/or professional interests. Minimum "C" required for RCRT majors.
Term Offered: Spring, Summer, Fall

SLP 2400 Communication Disorders
[3 credit hours]
A study of causative factors and characteristics of communicative disorders in comparison to normal speech/language/hearing processes.
Term Offered: Spring, Fall

SLP 3010 Clinical Phonetics
[0-4 credit hours]
Understanding of articulatory and acoustic phonetics with emphasis on the development of transcription skills using the International Phonetic Alphabet in recording normal and disordered speech production. Laboratory required for transcription skill development.
Term Offered: Spring, Fall
SLP 3020 Anatomy And Physiology Of Communication Mechanisms
[0-4 credit hours]
The study of the anatomy and physiology of the mechanisms used for communication including oral-pharyngeal-esophageal, respiratory, and neurological systems.
Term Offered: Spring, Fall

SLP 3030 Normal Language Acquisition
[0-4 credit hours]
Presents basic theories of language acquisition and procedures to describe the developmental sequence of childhood language. Procedures and techniques for analyzing childhood language are introduced and practiced in laboratory experiences.
Term Offered: Spring, Fall

SLP 3150 Speech and Hearing Science
[0-4 credit hours]
A detailed exploration of the speech and language production system, as well as the hearing mechanism with relation to the auditory environment. Information on aerodynamic and acoustic parameters of speech, the anatomy and physiology of the speech and hearing mechanisms, the neural basis of speech/language/hearing, and the speech perception system is provided during this course. The course is designed with lab experiences so students can get hands-on practice.
Term Offered: Spring, Fall

SLP 3200 Articulation/Phonological Disorders
[0-4 credit hours]
Assessment techniques and intervention strategies for persons with disorders of the sound system of the language. Theories of phonological acquisition and etiological factors will be discussed during this course. Laboratory experience required.
Prerequisites: SLP 3010 with a minimum grade of D- and SLP 3020 with a minimum grade of D-
Term Offered: Spring, Fall

SLP 3300 Language Disorders
[0-4 credit hours]
Course includes the identification of etiologic bases and characteristics of language disorders. Assessment strategies leading to choice of intervention techniques will be discussed. Laboratory experience required.
Prerequisites: SLP 3030 with a minimum grade of C
Term Offered: Spring, Fall

SLP 3400 Clinical Audiology
[3 credit hours]
The student learns to administer and interpret the comprehensive auditory battery consisting of pure-tone air conduction and bone conduction thresholds, speech reception thresholds, speech discrimination tests and acoustic emittance test battery.
Term Offered: Spring, Fall

SLP 3800 Methods For Clinical Intervention
[3 credit hours]
Teaches methods of intervention of speech, language and hearing services in various settings. Emphasis on developing skills in observation, report writing, and structuring intervention services and their implementation. Requires 25 hours of observation. Mandatory clinic meeting, and one hour lab duty. Laboratory experience required.
Prerequisites: (SLP 3200 with a minimum grade of B- and SLP 3300 with a minimum grade of B-)
Term Offered: Spring, Fall

SLP 4000 Beginning Clinical Practicum
[2 credit hours]
Supervised participation in structured individual or group intervention leading to the accumulation of 25 clinical hours of practicum.
Prerequisites: SLP 3800 with a minimum grade of B-
Term Offered: Spring, Summer, Fall

SLP 4350 Concomitant Disorders
[3 credit hours]
This capstone course explores literature in advanced speech and language disorders as well as intervention communication disorders.
Term Offered: Spring

SLP 4440 Augmentative Communication Systems
[3 credit hours]
Technological systems available for persons with the absence of functional speech will be described. Etiological factors, assessment and intervention procedures and hands-on experience with devices will be provided.
Term Offered: Spring, Fall

SLP 4910 Directed Research In Speech-Language Pathology
[1-5 credit hours]
Directed research provides students the opportunity to explore specific topics and develop individual research with a faculty member. Current questions in the area of speech-language pathology will be the focus.
Term Offered: Spring, Summer, Fall

SLP 4920 Readings In Speech-Language Pathology
[1-5 credit hours]
Individual Readings is designed to provide students with opportunities to examine literature related to specific issues. The student works under the direction of a faculty member in the speech-language pathology program.
Term Offered: Spring, Summer, Fall

SLP 4980 Special Topics In Speech-Language Pathology
[1-5 credit hours]
An advanced course for undergraduate majors in speech-language pathology or majors in related fields covering an important area of communication disorders. Student may repeat this course under different section numbers.
Term Offered: Spring, Fall

SLP 4990 Independent Study Speech-Language Pathology
[1-5 credit hours]
Independent study provides students with opportunities to work individually on issues under the direction of the speech-language pathology program faculty. The student meets with instructor without formal classes.
Term Offered: Spring, Summer, Fall
BS in Exercise Science

The University of Toledo offers a bachelor of science degree in exercise science. This degree requires 120 credit hours for graduation. The degree is for students who want to study the anatomical, physiological, biomechanical and psychological bases of human physical performance. The curriculum has a strong foundation in the natural sciences. Students have the opportunity to concentrate in one of the following areas:

- Human Performance and Fitness Promotion
- Pre-Medical Professions
- Pre-Rehabilitation Sciences

Many students use the degree as a preparation for graduate education in exercise science, medicine and other allied health fields such as athletic training and physical therapy.

Additional information about the degree can be found at the department's web site at http://www.utoledo.edu/hhs/exercise-science/undergradprograms.html

Human Performance and Fitness Promotion

Many exercise science students are interested in applying their interest and expertise in human physical performance to the prevention and treatment of disease and disability, to the enhancement of health and fitness, and to the facilitation of sport performance through training and conditioning. The concentration in human performance and fitness promotion is for these students. Beyond the required exercise science courses, these students take additional course work that focuses on the use of exercise and exercise testing in the diagnosis and treatment of cardiovascular and metabolic diseases, reduced muscle strength and endurance tolerance. Students in this concentration will focus on the development of exercise programs designed to enhance health, general fitness and exercise performance.

In addition to two internships, many students complete one or more of the certification programs offered by organizations such as the American College of Sports Medicine and the National Strength and Conditioning Association. These certifications, in combination with the student's academic training, provide excellent credentials for employment in fitness/wellness programs or cardiovascular rehabilitation as well as many commercial fitness facilities.

Pre-Medical Professions

The Pre-Medical Professions concentration provides students with the opportunity to complete the exercise science degree and prepare for admission into medical school or physician assistant graduate programs. Students will identify and research the specific admission requirements for those programs to which they intend to apply. If the requirements are not in the degree program, they should be included among the supporting electives in consultation with the program advisor. It is the student's responsibility to make sure all prerequisites for intended programs are completed. All medical and physician assistant programs involve a competitive admission process. Thus, completion of the Pre-Medical Professions option at UT is not in the degree program, they should be included among the supporting electives in consultation with the program advisor. It is the student's responsibility to make sure all prerequisites for intended programs are completed. All medical and physician assistant programs involve a competitive admission process. Thus, completion of the Pre-Medical Professions option at UT does not guarantee acceptance to any graduate program.

Pre-Rehabilitation Sciences

The Pre-Rehabilitation Sciences concentration provides students with the opportunity to complete the exercise science degree and prepare for admission into a graduate entry-level program for athletic training, occupational therapy, or physical therapy. Students will identify and research the specific admission requirements for those programs to which they intend to apply. If the requirements are not in the degree program, they should be included among the supporting electives in consultation with the program advisor. It is the student’s responsibility to make sure all prerequisites for intended programs are completed. All athletic training, occupational therapy, and physical therapy programs involve a competitive admission process. Thus, completion of the Pre-Rehabilitation Sciences option at UT does not guarantee acceptance to any graduate program.

Human Performance and Fitness Promotion Internship Requirements

- Certification in CPR.
- Criminal background check policy

Human performance and fitness promotion students may be required to complete both an Ohio BCI & I check and an FBI criminal background check. In the event that the background check report identifies a history of criminal activity, the student may be at risk for not being able to successfully complete the required internship education requirements of the program.

Successful completion of all designated internships is a graduation requirement. Further, students with a criminal background may be "at risk" for not meeting credentialing eligibility requirements (ACSM, NSCA, etc.) in some states due to a felony conviction.

- Medical policy

Each student, while enrolled in the didactic and internship portions of the curriculum, is required to complete various immunizations, titers, tests, and a physical examination each year as specified in the Student Health Form Packet in the Student Handbook and in conjunction with University affiliate agreements. Students are prohibited to engage in laboratory activities or to attend an internship if this information is not on file for the current year. Students are to refer to the Student Handbook for program information.

It should also be noted that some internship sites have additional health requirements (flu shots, drug screens, etc.). When these are known in advance, the program will inform the student of any additional health requirements. However, during preparations for upcoming internships, the student is responsible for checking with the Internship Coordinator to determine if there are any additional health requirements. It is recommended that this process be initiated approximately 4-6 weeks prior to the start of the internship to allow adequate time for completion of any additional health requirements. If the student does not complete the additional requirements of the internship site, the student is prohibited from attending that facility for their internship education experience.
All expenses incurred in obtaining a background check, physical, necessary laboratory tests, immunizations and additional health requirements are the responsibility of the student.

- **Physical requirements:** must be able to move, lift or carry equipment weighing up to 50 lbs., push equipment up to 600 lbs., and lift/assist clients up to 300 lbs. with assistance. Must have full range of body motion and eye/hand coordination. Required to have corrected vision and hearing to normal range.

Physical Demands: Performance of appropriate exercise recommendations involves standing, walking, and moving of heavy exercise equipment.

Speech, Vision and Hearing Demands: Be able to interact and communicate effectively.

Mental Demands: Must possess the emotional health required for full utilization of intellectual abilities (appropriate medical judgment).

Transportation: Students must provide own transportation to sites up to 100 mile radius.

- **BS in Exercise Science, Human Performance and Fitness Promotion** (p. 292)
- **BS in Exercise Science, Pre-Medical Professions** (p. 293) (Pre-Medical or Pre-Physician Assistant focus)
- **BS in Exercise Science, Pre-Rehabilitation Sciences** (p. 294) (Pre-Athletic Training, Pre-Occupational Therapy, Pre-Physical Therapy)

### BS in Exercise Science, Human Performance and Fitness Promotion

Courses noted with FL or SP are only offered in those semesters. Please be aware that requirements for medical school or graduate programs for Physician Assistant may vary. It is your responsibility to make sure that you have completed all prerequisites for the programs in which you intend to apply. Biology, Chemistry, and Math placement can alter this sequence.

**BS in Exercise Science, Pre-Rehabilitation Sciences (Pre-Athletic Training, Pre-Occupational Therapy, Pre-Physical Therapy)**

Below is a sample plan of study. Consult your degree audit for your program requirements.
Please be aware that requirements for graduate school for Physical Therapy, Athletic Training, and Occupational Therapy may vary. It is your responsibility to make sure that you have completed all prerequisites for the programs in which you intend to apply.

1. Examine the physiological, biomechanical and anatomical foundations of exercise.
2. Describe the role of physical activity in the maintenance of health, with particular focus on the physiological mechanisms whereby physical activity reduces incidences of cardiovascular disease, diabetes and obesity.
3. Compare and contrast: a) pre-participation screening/ health risk appraisal and stratification, b) fitness assessment and evaluation with appropriate exercise techniques of both apparently healthy and chronic disease populations.
4. Perform a search of the scientific literature within exercise science.
5. Develop critical thinking/analytical skills in the design and implementation of laboratory research projects.

**BS in Recreation Therapy**

The University of Toledo offers a bachelor of science degree in recreation therapy (RECT). This degree requires 125 credit hours for graduation. The baccalaureate RECT program is the only undergraduate recreation therapy program in the State of Ohio and is accredited by the Council on Accreditation of Parks, Recreation, Tourism and Related Professions (COAPRT). This program meets professional standards set by the National Council for Therapeutic Recreation Certification (NCTRC) and the American Therapeutic Recreation Association (ATRA). This is an online degree program.

Students enrolling in the recreation therapy program receive an education designed to prepare them for employment in the areas of physical rehabilitation, psychiatric rehabilitation, geriatric services, pediatric services, camps for individuals with disabilities, community recreation for individuals with disabilities, and centers for intellectual deficits/developmental disabilities. Specialized tracks are available in psychology, pediatric, geriatric, communication, therapeutic arts and pre-occupational therapy.

The pre-occupational therapy track can provide the student with the background needed for application to graduate degree programs in occupational therapy. Requirements for occupational therapy graduate programs vary. It is the student’s responsibility to complete all prerequisites for the graduate programs to which he or she plans to apply.

Students graduating from the RECT program will have met the educational and clinical eligibility requirements to sit for the Certified Therapeutic Recreation Specialist (CTRS) examination as administered by the National Council for Therapeutic Recreation Certification.

Students wishing to major in the recreation therapy program complete a pre-professional course sequence their freshman and sophomore years consisting of undergraduate core curriculum courses, pre-recreation therapy curriculum courses and recreation therapy support courses. Upon acceptance into the professional sequence entering their junior year, students complete 46 credit hours of recreation therapy-specific coursework followed by a 15-credit hour, 560-clock hour internship the summer of their senior year.

A grade of "C" or better is required in this course.

Courses noted with FL or SP are only offered in those semesters. Biology, Chemistry, and Math placement can alter this sequence.

Requirements

- Current certification in CPR.
- Immunizations: Mantoux, Rubella Titer/Roseolla (MMR), Hepatitis B required. Additional immunizations may be required by internship agency.
- Background checks: May be required by internship agency.
- Physical requirements: “Fit for Duty” test may be required by internship agency.
- Transportation: Students must provide their own transportation to internship site.
- Summer classes are required after the junior and senior years. Students graduate in August.

---

1 A "C" or better is required in this course.

7.01 a) Students graduating from the program shall demonstrate entry-level knowledge of the scope and practice of the therapeutic recreation.

Fundamental elements include:  
- Professionalism, including standards of practice, credentialing, and codes of ethics of therapeutic recreation service
- Role and function of therapeutic recreation professionals in health, human, recreation, education, and other relevant systems
- Models of service delivery and best practices in the profession

7.01 b) Students graduating from the program shall demonstrate entry-level knowledge of the techniques and processes of the therapeutic recreation profession in decision-making.

Fundamental elements include:  
- Use of best professional practices based on theoretical, philosophical, and scientific foundations of the field
- Adherence to laws, regulations, standards of practice and codes of ethics
- Professional involvement

7.01 c) Students graduating from the program shall demonstrate entry-level knowledge of the historical, philosophical, theoretical, and scientific foundations of the therapeutic recreation profession. Fundamental elements include:  
- Theoretical foundations of play, recreation, and leisure behavior
- Theoretical and historical foundations of therapeutic recreation
- Theoretical and scientific foundations of the systems in which therapeutic recreation is delivered, including the impact of technology and globalization on those systems
- Human functioning, including anatomy and physiology, human growth and development across the lifespan, variations in development and resulting disability, psychology, including abnormal psychology, and theories of human behavior change
- Human services supportive areas (e.g., medical terminology, pharmacology, counseling approaches, therapeutic communication, community development, positive behavioral supports)

7.02 a) Students graduating from the program shall demonstrate the ability to create/select, conduct, and evaluate individualized assessment for therapeutic recreation services clearly reflecting application of knowledge from relevant facets of contemporary professional therapeutic recreation practice, science, and philosophy. Fundamental elements of assessment:
Focus on leisure, physical, social, cognitive, psychological/emotional, and spiritual domains of human well-being
Encompass standardized assessments, observation, interview, and record review
Are team-based and inter/transdisciplinary
Ascertain participants abilities, strengths, goals, and aspirations
7.02 b) Students graduating from the program shall demonstrate the ability to conduct individualized planning of therapeutic recreation services clearly reflecting application of knowledge from relevant facets of contemporary professional therapeutic recreation practice, science, and philosophy. Fundamental elements of individualized planning:
Utilize assessment results to generate person-centered contextualized plans Use appropriate and correctly formatted goals and objectives
Use culturally relevant evidence-based interventions, strategies, facilitation techniques, modalities, activities, and adaptations
Are team-based and involve the family/community
Are contextualized to the service delivery system (e.g., health care, human services, recreation, education)
7.02 c) Students graduating from the program shall demonstrate the ability to implement and facilitate therapeutic recreation interventions and services for diverse clientele, settings, cultures, and contexts. Fundamental elements of implementation and facilitation include:
Individual and group leadership skills
Helping relationship skills
A variety of common therapeutic recreation interventions, facilitation techniques, activities, and modalities
Activity/task analysis, adaptation, and assistive technologies
Team and family participation
Advocacy
Contextualization to the service delivery system (e.g., health care, human services, recreation, education)
7.02 d) Students graduating from the program shall demonstrate the ability to document therapeutic recreation services according to regulatory, professional, and system requirements. Fundamental elements of documentation include:
Assessment results
Individualized plans
Progress notes
Discharge/transition summaries
Compliance with agency, accreditation, and professional standards for documentation
7.02 e) Students graduating from the program shall demonstrate the ability to evaluate therapeutic recreation services at the participant and program level and to use evaluation data to improve the quality of services. Fundamental elements include:
Use of appropriate research and evaluation designs and methods to conduct formative and summative evaluation to document outcomes from services
Use of evaluation results to improve services or programs and show accountability
Quality assurance/quality improvement contextualized to the service delivery system
7.03 Students graduating from the program shall be able to demonstrate entry-level knowledge about facts, concepts, principles, and procedures of management/administration in therapeutic recreation. Fundamental elements include:
Regulatory and legal compliance contextualized to the service delivery system (e.g., health care, human services, recreation, education)
Operations and maintenance
Finance and budgeting, reimbursement
Marketing and advocacy
Strategic and other agency/program level planning
Risk and safety management
Quality management
Human resource development and management
Professional development
Evidence-based practices
Research and technological impacts
7.04 a) Students graduating from the program shall demonstrate a readiness for the internship as determined by meeting criteria set by the program (e.g., fieldwork hours prior to the internship, competency testing, GPA requirements in core coursework, basic certifications in first aid/CPR, other dispositions or candidacy benchmarks set by the program).
7.04 b) Students graduating from the program shall demonstrate, through a comprehensive and culminating internship, the ability to apply the therapeutic recreation process, use diverse, structured ways of thinking to solve problems related to different facets of professional practice, engage in advocacy, and stimulate innovation. The internship must meet current professional standards for credentialing with the state, national/international credentialing bodies.

**BS in Registered Respiratory Therapy**

The University of Toledo offers a bachelor of science in respiratory care degree (RRT to BSRT). This degree requires 120 credit hours for graduation and can be completed online. The RRT to BSRT degree completion program is designed for individuals who have completed an associate's degree in respiratory care and have earned the Registered Respiratory Therapist (RRT) credential granted by the National Board for Respiratory Care. The program includes upper division respiratory care courses and allows for student selection of an area of specialization to enhance professional growth. In addition, professional support courses encompass many issues in health care and health education that are relevant to the practicing professional.

To complete the RRT to BSRT degree, a student must take 120 semester hours and maintain a minimum GPA of 2.0 at the University of Toledo. A
minimum of 64 hours must be taken at the 2000 to 4000 levels, with a minimum of 32 hours at the 3000 and 4000 levels.

**BS in Respiratory Care**

The University of Toledo offers a bachelor of science degree in respiratory care. This degree requires 120 credit hours for graduation. Respiratory care is an allied health specialty. Respiratory care practitioners work with physicians in the treatment, management, control, diagnostic evaluation and care of patients with diseases and abnormalities associated with the cardiopulmonary system.

Respiratory therapists treat a diverse group of patients ranging from newborn and pediatric patients to adults and the elderly. Disease states or conditions often requiring care include asthma, emphysema, chronic obstructive pulmonary disease (COPD), pneumonia, cystic fibrosis, acute and infantile respiratory distress syndrome as well as conditions brought on by shock, trauma or post-operative surgical complications. Respiratory therapists function in many specialty areas in the hospital, such as newborn labor and delivery, neonatal and pediatric intensive care units, pulmonary function laboratory, sleep laboratory and adult intensive care units. The baccalaureate degree prepares respiratory therapists to deliver respiratory care in the hospital, home and alternative care sites.
The student completing the Bachelor of Science in respiratory care degree program will be an advanced-level practitioner eligible to sit for the national board examination to become a Registered Respiratory Therapist (RRT) as well as take specialty examinations in the areas of Perinatal/Pediatrics, Adult Critical Care, Sleep Disorders and Pulmonary Function Technology.

For additional information please visit the Respiratory Care Website at http://www.utoledo.edu/hhs/respiratorycare/ (http://www.utoledo.edu/healthsciences/depts/kinesiology/respiratorycare/)

**Selective Admissions Requirements**

Admission into the Professional Division of the Respiratory Care Program is selective, competitive and limited due to the number of students who can be accommodated by the faculty and clinical facilities. Once accepted to the University, students must file a separate application for the respiratory care program with the program selective admissions committee through the Office of Student Services. This occurs during the second semester of the sophomore year. Students admitted to the Professional Division are required to take summer courses to start the program.

To be eligible for admission to the Professional Division of the Respiratory Care Program the criteria listed below must be met.

- Complete the following courses (or their equivalent or higher) with a grade of C or better:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 110</td>
<td>College Composition I</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 1130</td>
<td>College Composition II: Academic Disciplines And Discourse</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1320</td>
<td>College Algebra</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 1120</td>
<td>Chemistry For Health Sciences</td>
<td>4</td>
</tr>
<tr>
<td>EXSC 2560</td>
<td>Human Anatomy And Physiology I Lab</td>
<td>1</td>
</tr>
<tr>
<td>EXSC 2570</td>
<td>Human Anatomy and Physiology II</td>
<td>3</td>
</tr>
<tr>
<td>EXSC 2470</td>
<td>Human Anatomy And Physiology II Lab</td>
<td>1</td>
</tr>
<tr>
<td>EXSC 2590</td>
<td>Microbiology and Infectious Diseases</td>
<td>3</td>
</tr>
<tr>
<td>HEAL 1800</td>
<td>Medical Terminology</td>
<td>3</td>
</tr>
<tr>
<td>Total Hours</td>
<td>27</td>
<td></td>
</tr>
</tbody>
</table>

- Minimum cumulative GPA of 2.5
- In addition to cumulative GPA, the student’s GPA in the following courses fulfilling the math and science prerequisite course requirements will be evaluated separately from overall GPA:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1320</td>
<td>College Algebra</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 1120</td>

<td>1</td>
</tr>
<tr>
<td>EXSC 2590</td>
<td>Microbiology and Infectious Diseases</td>
<td>3</td>
</tr>
<tr>
<td>Total Hours</td>
<td>14</td>
<td></td>
</tr>
</tbody>
</table>

- Admission to the Professional Division is based primarily upon the overall GPA and the GPA in math and science prerequisite classes.

The Respiratory Care Program complies with the American with Disabilities Act (ADA). If a student is unable to meet the required “Functional Abilities/Core Performance Standards,” the student may consult with program faculty and with an Accessibility Specialist from The University of Toledo Student Disability Services to determine, on a case by case basis, if reasonable accommodations can be made that would permit the student to meet these “Functional Abilities/Core Performance Standards” and thus enter into the program. For a list of “Functional Abilities/Core Performance Standards” please refer to the following website: http://www.utoledo.edu/hhs/respiratorycare/pdfs/Functional%20Abilities%202019.pdf

Other requirements for entry in the Professional Division Program include completion of the following:

- Physical exam form and Fit for Duty Form
- Positive Hepatitis B antibody titer or evidence of completion of 3-shot Hepatitis B vaccination series
- Positive antibody titers for Rubella, Rubeola, Mumps, and Varicella. If titers are not positive, vaccination must be completed
- Tuberculosis 2-step skin test (yearly). If positive, must have negative chest x-ray
- Evidence of tetanus and diphtheria vaccination within last 10 years
- Annual multivalent flu vaccination

In addition to University Core Credits, required courses include: CHEM 1120, ENGL 1110, HEAL 1800, HHS 1000, MATH 1320, ENGL 1130, EXSC 2560, EXSC 2460, PHIL 1010, EXSC 2570, EXSC 2470, HEAL 3800, MATH 2600, EXSC 2590, HEAL 4700, PHIL 3370, RCBS 3010, RCBS 3020, RCBS 3110, RCBS 3120, RCBS 3130, RCBS 3200, RCBS 3210, RCBS 3220, RCBS 3230, RCBS 4140, RCBS 4150, RCBS 4160, RCBS 4700, RCBS 3300, RCBS 4240, RCBS 4510, RCBS 4800, RCBS 4810. All RCBS courses must be completed with a grade of “C” or better.

Below is a sample program of study. Consult your degree audit for your program requirements.

Safely and correctly perform all forms of Cardiopulmonary Resuscitation (CPR) in adult and neonatal-pediatric patients.
Perform airway management techniques to ensure maintenance of a patent airway.
Safely and effectively initiate and manage various classifications of mechanical ventilation on adult patients.
Safely and effectively initiate and manage various classifications of mechanical ventilation on neonatal-pediatric patients.
Safely and effectively administer all forms of oxygen therapy.
Safely and effectively administer all forms of humidity therapy.
Safely and effectively administer appropriate aerosol therapy via inhalation route.
Safely draw, analyze and interpret arterial blood gas sample.
Correctly assess and interpret the status of a patient’s acid-base balance.
Perform appropriate pulmonary function testing techniques and provide accurate interpretation of the patient data.
Recognize and identify in the professional literature best-practices of evidence-based Respiratory Care treatments and procedures.
Correctly and accurately assess the condition of a cardiopulmonary patient.

**Minor in Exercise Science**

A minor in exercise science provides students from other departments across the University with the opportunity to gain experience in this area. The minor requires 24 credits of course work, including required lecture and lab courses in human anatomy, physiology, exercise physiology, and biomechanics as well as elective courses taken from a variety of areas within exercise science. Students interested in completing the minor in exercise science should contact the program academic advisor for additional information.

1. A "C" or better is required in this course.
Courses noted with FL or SP are only offered in those semesters. Students will be required to meet all of the prerequisites and co-requisites for the elective courses in the minor.

1. Examine the physiological, biomechanical and anatomical foundations of exercise.
2. Describe the role of physical activity in the maintenance of health, with particular focus on the physiological mechanisms whereby physical activity reduces incidences of cardiovascular disease, diabetes and obesity.
3. Compare and contrast: a) pre-participation screening/ health risk appraisal and stratification, b) fitness assessment and evaluation with appropriate exercise techniques of both apparently healthy and chronic disease populations.
4. Perform a search of the scientific literature within exercise science.
5. Develop critical thinking/analytical skills in the design and implementation of laboratory research projects.

The Department of Human Services offers undergraduate degree programs in criminal justice, paralegal studies, and social work. Minors are available in counseling, criminal justice, data science, forensic science investigation, and legal specialties. Undergraduate certificates are offered in chemical dependency counseling, nurse paralegal, and post-baccalaureate paralegal studies.

Accreditation

- The BS in Paralegal Studies degree program maintains approval from the American Bar Association (ABA).
- The BSW in Social Work degree program is accredited by the Council on Social Work Education (CSWE).

Degrees Offered

- Minor in Counseling

1. Examine the physiological, biomechanical and anatomical foundations of exercise.
2. Describe the role of physical activity in the maintenance of health, with particular focus on the physiological mechanisms whereby physical activity reduces incidences of cardiovascular disease, diabetes and obesity.
3. Compare and contrast: a) pre-participation screening/ health risk appraisal and stratification, b) fitness assessment and evaluation with appropriate exercise techniques of both apparently healthy and chronic disease populations.
4. Perform a search of the scientific literature within exercise science.
5. Develop critical thinking/analytical skills in the design and implementation of laboratory research projects.

COUN 3000 Cultural Competence in Health and Human Services Professions  
[3 credit hours]  
This course provides an introduction to multicultural helping in the health and human services professions. The influence of socio-identities (e.g., race, ethnicity, religion, gender, socioeconomic status, sexual orientation, ability) on individuals' functioning, concerns, and the helping process will be explored in the context of health and human service professions.  
Term Offered: Spring, Summer, Fall  
COUN 3110 Case Management In Mental Health  
[3 credit hours]  
The study of and practice of using case management models and skills with clients within the mental health environment. Models appropriate for different agency types will be explored and the various modalities available will be introduced.  
Term Offered: Spring  
COUN 3140 Substance Abuse Prevention And Community Programming  
[3 credit hours]  
An evaluation of prevention programs and community resources available in the prevention and treatment of substance abuse.  
Term Offered: Fall  
COUN 3150 Models Of Treatment For Substance Abuse  
[3 credit hours]  
A review of the various components of substance abuse and philosophies of treatment. Theories of etiology and maintenance are also addressed.  
Term Offered: Spring  
COUN 3220 Theories in Mental Health  
[3 credit hours]  
Overview of current approaches of psychological theory. This course includes an examination of the basic issues in mental health, including ethical issues and personal implications for the mental health professional.  
Term Offered: Fall  
COUN 3380 College Student Leadership Development I  
[1-3 credit hours]  
First semester in development of skills for student leaders through didactic experience, simulation exercises and practicum experiences. Especially designed for student government leaders and peer counselor/advisers.  
Term Offered: Fall  
COUN 3390 College Student Leadership Development II  
[1-3 credit hours]  
Second semester in student leadership training. The development of skills for student leaders through didactic experience, simulation exercises and practicum experiences. Especially designed for student government leaders and peer counselor/advisers.  
Prerequisites: COUN 3380 with a minimum grade of D- or CMHS 3380 with a minimum grade of D-  
Term Offered: Spring  
COUN 4080 Essentials Of Helping Relationships  
[3 credit hours]  
Emphasis upon skills, concepts and practices in the helping professions. Multicultural and ethical issues along with dealing with crisis situations will be covered.  
COUN 4240 Substance Abuse Treatment Techniques  
[3 credit hours]  
An examination of ethical and legal issues in substance abuse, as well as examination of the specific skills needed by workers in substance abuse programs.  
Term Offered: Spring  
COUN 4980 Special Topics In Counselor Education  
[1-3 credit hours]  
This course is open to an undergraduate student pursuing a degree program and may be a requirement of that program.  
COUN 4990 Independent Study  
[1-3 credit hours]  
Individual study is designed to provide the student to work independently on professional problems under the direction of a faculty member in the department of counseling and mental health services.  
CRIM 1010 Criminal Justice  
[3 credit hours]  
The overall history, philosophy and functioning of the criminal justice system in the U.S. The integrated roles of law enforcement, the courts and corrections will be analyzed and discussed.  
Term Offered: Spring, Fall  
CRIM 1040 HUMAN RELATIONS AND DIVERSITY IN CRIMINAL JUSTICE  
[3 credit hours]  
This class will focus on human relations and cultural diversity faced by the criminal justice system, including the police, courts, corrections, and community organizations, and the course will explore general principles in effective human relations, the importance of diversity, and their application in the field of criminal justice.  
Term Offered: Spring, Fall  
CRIM 1050 Applied Criminology  
[3 credit hours]  
The study of jails, prisons and other types of specialized correctional institutions. The philosophy of incarceration along with the administration, staffing and operations of these facilities will be reviewed.  
Term Offered: Spring, Fall  
CRIM 1110 Penology  
[3 credit hours]  
Introduction to law enforcement practices and agencies in the United States, including the history, philosophy and operation of federal, state and local enforcement agencies.  
Term Offered: Spring, Fall  
CRIM 1240 Policing  
[3 credit hours]  
Introduction to law enforcement practices and agencies in the United States, including the history, philosophy and operation of federal, state and local enforcement agencies.  
Term Offered: Spring, Fall  
CRIM 2050 Applied Criminology  
[3 credit hours]  
This course examines the theoretical causes of crime in relation to the duties and responsibilities of police and corrections personnel, and the development of criminal justice polices.  
Term Offered: Spring, Summer, Fall  
CRIM 2200 Criminal Law  
[3 credit hours]  
The statutes of Ohio relating to crime and the elements necessary for establishing and providing proof of crimes are studied.  
Prerequisites: CRIM 1010 with a minimum grade of D-  
Term Offered: Spring, Summer, Fall
CRIM 2210 Criminal Investigation I
[3 credit hours]
Introduction to the processes, theories and principles of criminal investigation. Methods of gathering information, report writing, interview/interrogation strategies, surveillance, search warrant information, affidavit preparation and execution are studied.
**Prerequisites:** CRIM 1010 with a minimum grade of D-
**Term Offered:** Fall

CRIM 2220 Laws Of Evidence
[3 credit hours]
A thorough study of the evidence rules with specific emphasis on the application of these rules in preparing and presenting evidence.
**Prerequisites:** CRIM 1010 with a minimum grade of D-
**Term Offered:** Spring, Summer, Fall

CRIM 2230 Criminal Procedure
[3 credit hours]
An examination of the Bill of Rights of the U.S. Constitution as it appears to arrest, search, seizure, detention, interviews, and interrogations.
**Term Offered:** Spring, Summer, Fall

CRIM 2250 Juvenile Justice
[3 credit hours]
To analyze the causes of juvenile delinquency and the extent of the problem in the U.S. Also, to discuss the inter-workings of the juvenile justice system in response to the delinquency problem, in conjunction with delinquency prevention programs.
**Term Offered:** Spring, Summer, Fall

CRIM 2990 Independent Study
[1-6 credit hours]
Supervised independent study.
**Term Offered:** Spring, Fall

CRIM 3000 Police Academy
[1-15 credit hours]
This course provides students with an experiential learning opportunity in the field of policing.

CRIM 3110 Hate Crimes
[3 credit hours]
The course examines the genesis, development, theory and practice of hate crimes and how society has and can respond to hate crimes.
**Term Offered:** Summer, Fall

CRIM 3210 Applied Psychology for Criminal Justice Personnel
[3 credit hours]
This course overviews mental disorders and substance abuse problems common to persons entering the criminal justice system. Related social policies and criminal justice practices are critically examined.
**Term Offered:** Spring, Summer, Fall

CRIM 3220 Crime Mapping And Criminal Profiling
[3 credit hours]
The course content develops an understanding of the uses of information technologies and psychological profiling in defining criminal behavior as well as the geographic consideration.

CRIM 3230 White Collar Crime
[3 credit hours]
A historical overview of the evolution of white-collar crime in American Society as well as an understanding of the nature, causes and consequences of different forms of white-collar crime.

CRIM 3240 Victimology
[3 credit hours]
This course examines the history of victimology and includes topics such as the characteristics of crime victims and specific types of victimization such as hate crimes and sexual assault.
**Prerequisites:** CRIM 1010 with a minimum grade of D-
**Term Offered:** Summer, Fall

CRIM 3250 Women and Crime
[3 credit hours]
This course will explore the causes and social consequences of crimes by and against women. The course will expose students to feminist theory and examine the interlocking effects of gender, race and class.
**Term Offered:** Spring, Summer, Fall

CRIM 3290 Criminal Investigation II
[3 credit hours]
An introduction to the crime scene, including methods of searching, photography, sketching and gathering of physical evidence. Fingerprint analysis. Methods utilized in drug investigations and development of information sources are studied.
**Prerequisites:** CRIM 2210 with a minimum grade of D-
**Term Offered:** Spring

CRIM 3300 Sex Crimes
[3 credit hours]
Overview of a variety of sex crimes, characteristics of sexual predators, theories to explain sex crimes, and current legislation and treatment efforts utilized today to combat sex crimes.

CRIM 4000 Narcotics Policy and Enforcement
[3 credit hours]
This course will explore the “War on Drugs” from a historical, pharmacological, economic, political, and practical perspective.
**Term Offered:** Spring, Summer

CRIM 4010 Probation and Parole
[3 credit hours]
An introduction to the history and dynamics of probation and parole, how they interact within the criminal justice system, and the effective treatment of offender clients.
**Term Offered:** Spring

CRIM 4100 Criminal Justice Research Methods
[3 credit hours]
This course provides students with an understanding of criminal justice research, the concepts and logic of research designs and widely used statistical procedures.
**Term Offered:** Spring, Summer, Fall

CRIM 4200 Ethics In Criminal Justice
[3 credit hours]
This course is designed to provide students with an opportunity to integrate ethics in their understanding of criminal justice.
**Term Offered:** Spring, Summer, Fall
CRIM 4410 Criminal Forensic and Trial Practice  
[3 credit hours]  
This cross-listed capstone course will allow students to step out of the traditional classroom setting and participate in an applied skills course that will benefit them in the real world of Criminal Justice. Students will be presented with a case and will be responsible for the various stages of the investigative process as well as the trial process.  
Prerequisites: CRIM 2210 with a minimum grade of D- and CRIM 3290 with a minimum grade of D-  
CRIM 4450 Administration Of Police Services  
[3 credit hours]  
The application of management principles to municipal police departments, emphasizing the resources, constraints and strategies of police managers.  
Term Offered: Spring, Summer, Fall  
CRIM 4490 Current Topics-Crim  
[3 credit hours]  
Examination of selected current issues in criminal justice that impact our knowledge and understanding of the field.  
Term Offered: Spring, Summer, Fall  
CRIM 4520 Police And Society  
[3 credit hours]  
An examination of the role of the police in contemporary America, emphasizing the ambivalence of the self-image of the police and the social and political forces that compete to redefine police function.  
Term Offered: Spring, Summer, Fall  
CRIM 4590 Administration Of Criminal Justice  
[3 credit hours]  
A research-oriented course into the relationship of the major structures of criminal justice-police, prosecutor, courts and corrections with emphasis on the development of performance evaluation criteria.  
Term Offered: Fall  
CRIM 4940 Criminal Justice Internships  
[3-12 credit hours]  
Field placement experience within a criminal justice agency to enhance the student’s practical knowledge of the field in conjunction with career planning opportunities.  
Term Offered: Spring, Summer, Fall  
CRIM 4990 Independent Study In Criminal Justice  
[1-3 credit hours]  
Individual course of study in a selected topic pertaining to Criminal Justice chosen by the student, with the consent of the instructor.  
Term Offered: Spring, Summer, Fall  
LGL 1010 Introduction To Law  
[3 credit hours]  
The course is designed to improve oral and written communication skills through the study of contracts, real property, torts and criminal law. The course includes the structure and operation of the state and federal court systems, as well as the status and uses of paralegals.  
Term Offered: Spring, Fall  
LGL 1150 Tort Law  
[3 credit hours]  
This course covers the traditional areas of tort law, including negligence, trespass, mental distress and conversion as well as the defenses to these claims. The course is taught through the case study method.  
Term Offered: Spring  
LGL 1160 Legal Research, Writing And Case Analysis  
[3 credit hours]  
Designed to provide the student with an understanding of the function of the law library and to develop research techniques and legal analysis and writing skills through use of traditional law library materials and computerized legal research techniques such as Lexis and Anderson CD-ROM Law on Disk.  
Prerequisites: LGL 1010 with a minimum grade of D-  
Term Offered: Spring  
LGL 1500 Legal Aspects of Poverty  
[3 credit hours]  
A significant part of the United States population lives in poverty. Students will learn to think critically about how poverty intersects with issues of diversity, political discourse, macro-ethics, and societal concepts of economic justice. Students will ultimately gain effective communication skills to participate meaningfully in social discourse about poverty. Students will explore a range of legal and policy issues affecting the ability of low-income people to access the most basic necessities of life. We will examine (1) the substantive law governing access to necessities; (2) human rights theories of poverty; (3) the effects of market forces on poverty; and (4) poverty affects work, education, criminalization, and access to justice. This course aims to give students a solid grounding in both the content and impact of the laws and policies governing poverty in America.  
Term Offered: Fall  
Multicultural US Diversity  
LGL 1720 Law Practice Management  
[3 credit hours]  
This course exposes students to various management structures within and the administration of the law office and other legal environments. Critical thinking will be applied to management theories and applications.  
Term Offered: Fall  
LGL 2020 Civil Procedure  
[3 credit hours]  
An in-depth study of the Rules of Civil Procedure, including application of rules of fact patterns. Students will draft litigation documents including complaint, answer and discovery pleadings.  
Prerequisites: (LGL 1010 with a minimum grade of D- and LGL 1150 with a minimum grade of D-)  
Term Offered: Fall  
LGL 2110 Estate & Probate Administration  
[3 credit hours]  
Study of the common forms of wills and trusts and a survey of the fundamental principles of law applicable to each; study of the organization and jurisdiction of the probate court, analysis of the administration of estates in probate court and a review of estate and inheritance taxes.  
Term Offered: Spring
LGL 2120 Real Estate Transactions
[3 credit hours]
The law of real property and common types of real estate transactions and conveyances, such as deeds, land installment contracts, sales contracts and leases, with emphasis on researching, drafting and recording of documents related thereto.
Term Offered: Fall

LGL 2130 Family Law
[3 credit hours]
Study of the law and practice of divorce, dissolution and all matters relating to the termination of a marriage. Students will be trained to conduct client interviews, draft pleadings and associated court forms, and calculate support under state-mandated guidelines.
Prerequisites: (LGL 1010 with a minimum grade of D- and LGL 1160 with a minimum grade of D-)
Term Offered: Fall

LGL 2210 Practices And Procedures In Administrative Law
[3 credit hours]
This course takes a look at the substantive and procedural aspects of various administrative law agencies with emphasis on providing skills to practice in administrative law.
Term Offered: Spring

LGL 2700 Advocacy: Mock Trial
[3 credit hours]
An in-depth survey of the trial process which exposes students to each step of a trial in a hands-on fashion. The course will be taught utilizing traditional lecture, reading and actual mock trial experience.
Term Offered: Fall

LGL 2940 Legal Assisting Internship
[3 credit hours]
Field experience in law offices. Students will be placed in various legal assisting positions by the program director. Students will meet for job-related seminar once a week and will work at their assigned law office for 180 hours during the semester.
Term Offered: Spring, Summer, Fall

LGL 2990 Independent Study
[1-3 credit hours]
This course is used for faculty-assisted independent study in the area of legal assisting.

LGL 3010 Law Of Business Associations
[3 credit hours]
Study of business entities: sole proprietorships, partnerships and corporations. Critical analysis of business entities, de facto and de jure entities. Students will complete articles of incorporation, bylaws and minute books.
Prerequisites: (LGL 1010 with a minimum grade of D- and LGL 1720 with a minimum grade of D-)
Term Offered: Spring

LGL 3030 Advanced Legal Research & Writing
[3 credit hours]
Focus on advanced legal writing. Students will be challenged to master computer assisted legal research methods.
Prerequisites: (LGL 1010 with a minimum grade of D- and LGL 1160 with a minimum grade of D-)
Term Offered: Fall

LGL 3050 Bankruptcy Practices & Consumer Applications
[3 credit hours]
An analysis of consumer laws including landlord-tenant relationships, consumer sales practices, uniform commercial code transactions, credit card law, garnishment, fair debt collection practices act and the United States Bankruptcy Code.
Prerequisites: (LGL 1010 with a minimum grade of D- and LGL 1160 with a minimum grade of D-)
Term Offered: Fall

LGL 3110 Personal Law
[3 credit hours]
Through critical reasoning/collaborative learning, students will examine personal law issues and legal rights/responsibilities, enabling them to formulate analytical models readily transferable to legal issues in their present and future lives.
Term Offered: Summer

LGL 3120 Personal Law II
[3 credit hours]
An analysis of current legal decisions on topics such as same sex marriage, home forced entry and theology studies subsidies through analogizing/distinguishing related fact patterns and criticizing judicial exposition/logic.
Prerequisites: LGL 3110 with a minimum grade of D-

LGL 3330 Litigation
[3 credit hours]
Focus on evidence and investigation, applying critical thinking skills to actual litigation cases. Analysis of court pleadings for appropriateness and alternative mechanisms. Study of post trial and appellate matters.
Prerequisites: (LGL 1150 with a minimum grade of D- and LGL 2020 with a minimum grade of D-)
Term Offered: Spring

LGL 3350 Alternative Dispute Resolution
[3 credit hours]
Students will overview conflict theory, resolution and its history. Students will focus on skills necessary for alternative dispute resolution: negotiation, mediation, arbitration, summary jury trial and mini trial.
Prerequisites: (LGL 1010 with a minimum grade of D- and LGL 1150 with a minimum grade of D- and LGL 2020 with a minimum grade of D-)
Term Offered: Fall

LGL 4030 Contract Law
[3 credit hours]
Focus on the laws concerning creation and termination of contracts. Students will analyze contractual terms including reliance, capacity, unconscionability, conditions, assignments, third-party beneficiaries and the effect of changed circumstances.
Prerequisites: (LGL 1010 with a minimum grade of D- and LGL 1160 with a minimum grade of D-)
Term Offered: Spring, Summer, Fall

LGL 4130 Clinic Experience
[3 credit hours]
Students will work in a clinical environment, such as: Court Appointed Special Advocates, the UT Center for Mediation and Legal Rights, the Toledo Bar Association's Pro Se Family Law Program.
Prerequisites: (LGL 1010 with a minimum grade of D- and LGL 1160 with a minimum grade of D-)
Term Offered: Spring
LGL 4230 Health Care And The Law
[3 credit hours]
An analysis of health care laws and legal issues, including treatment relationships, medical malpractice, the right to die, reproductive rights, bioethics, health care financing, public health, delivery systems and regulations.
Term Offered: Spring, Summer, Fall

LGL 4330 Mediation: Topics And Techniques
[3 credit hours]
This service learning course teaches the facilitative approach to mediating disputes. Students break down disputed issues, role play, and observe actual mediations for the peaceful and cooperative resolution of disputes.
Term Offered: Spring

LGL 4940 Advanced Paralegal Internship
[3 credit hours]
Field experience for seniors, placement within their specialty. Students meet for 1 hour seminar and work at assigned law office for 12 hours per week.
Term Offered: Spring, Summer, Fall

LGL 4990 Criminal Forensics and Trial Practice
[3 credit hours]
This course allows students to step out of the traditional classroom setting and practice hands-on skills. Students will be assigned as crime scene investigators, paralegals and attorneys and will be responsible for investigating a homicide, indicting a suspect and conducting a trial. Part I of the class involves investigative techniques for the homicide investigative process. Part II of the class exposes students to each step of the trial in a hands-on fashion.
Prerequisites: LGL 2700 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

SOCW 1030 Introduction To Social Welfare
[3 credit hours]
Introduction to the social welfare institution, its history, relation to social values, social welfare laws and programs, and the systems characteristic of service delivery. C or better required for majors.
Term Offered: Spring, Summer, Fall
Core Social Sciences, Multicultural US Diversity

SOCW 2010 Survey Of The Social Work Profession
[4 credit hours]
This course provides an opportunity for the student to explore the dynamics of the social work profession. The student will examine various components of social work, including an overview of strengths perspective, systems theory, ethics, client populations served, roles of social workers who serve these populations, and APA style of professional writing. The course also includes sixty hours of supervised field experience and directed classroom discussion connecting field experience to social work practice.
Prerequisites: SOCW 1030 (may be taken concurrently) with a minimum grade of C
Term Offered: Spring, Summer, Fall

SOCW 2210 Field Experience And Lab I
[3 credit hours]
Supervised field experience. Ninety hours evenly distributed with weekly directed classroom discussion of reflecting the relationship of field experience to social work practice. This course meets the WAC requirements, and journaling and written classroom exercises will be required.
Prerequisites: SOCW 2010 with a minimum grade of C
Term Offered: Spring, Summer, Fall

SOCW 3020 Social Work Issues In Social & Economic Justice
[3 credit hours]
Provides an in depth study of the concepts of social and economic justice relative to the practice of social work including power and economic distribution, oppression, discrimination and confronting injustice.
Prerequisites: SOCW 2210 with a minimum grade of D-

SOCW 3030 Survey Of Social Work Assessment Tools
[3 credit hours]
Provides an overview of various tools used by social workers in practice including use of DSM IV, individual, family, group, organization and community assessments.
Prerequisites: SOCW 2210 with a minimum grade of D-

SOCW 3040 Social Work With Older Adults
[3 credit hours]
History and development of practice with older adults. Trends in aging, services for older adults, health care, social security, retirement, elder abuse, substitute care decision, hospice, loss, death and dying.
Term Offered: Spring, Summer

SOCW 3050 Crisis Intervention
[3 credit hours]
Provides an examination of crisis intervention theories and strategies to deal with stress. Emphasis is on observing, formulating, defining and measuring the threats, tasks and opportunities associated with crisis behavior.
Prerequisites: SOCW 2010 with a minimum grade of D-

SOCW 3060 Social Work Ethics
[3 credit hours]
Examination of social work values and their professional implications. Provision of working knowledge of Social Work Code of Ethics and licensing and subsequent professional responsibilities. Integration of theoretical models with practice situations.
Term Offered: Spring, Summer

SOCW 3070 Child Welfare I
[3 credit hours]
Child welfare history. Knowledge, concepts and skill development concerning child maltreatment and protection, risk assessment and family-centered services.
Prerequisites: SOCW 2010 with a minimum grade of C
Term Offered: Fall

SOCW 3080 Women In Poverty
[3 credit hours]
Provides an understanding of women's poverty and its perpetuation through marriage and divorce, women's work and wages, welfare, children, child support and the economics of the unpaid women's labor.
Term Offered: Spring, Summer, Fall
SOCW 3090 Social Work Perspectives On Culture And Oppression
[3 credit hours]
Focus is on vulnerable and oppressed groups who are among social welfare consumers. Cultural characteristics and group strengths, needs, priorities and experiences within the context of social work are also explored.
Prerequisites: SOCW 2010 with a minimum grade of C
Term Offered: Spring, Fall

SOCW 3110 Social Work Practice I
[3 credit hours]
An overview of generalist social work practice with various system sizes. Emphasizes strengths, empowerment, social and economic justice, ethical practice and examination of self in relation to professional social work. Must be admitted to the social work program.
Prerequisites: SOCW 2010 with a minimum grade of C
Term Offered: Fall

SOCW 3120 Social Work Interviewing And Recording
[4 credit hours]
Develops skills needed for the generalist social work interview and appropriate recording techniques. Integrates computer simulation, role-play and video recording for a participatory learning experience.
Prerequisites: SOCW 3110 with a minimum grade of C
Term Offered: Spring

SOCW 3170 Child Welfare II
[3 credit hours]
Addresses the developmental and permanence needs of children, effects of maltreatment on children, placement issues, separation, reunification and adoption. Includes child welfare services for children with developmental disabilities.
Prerequisites: (SOCW 3070 with a minimum grade of C and SOCW 2010 with a minimum grade of C)
Term Offered: Spring

SOCW 3210 Human Behavior in the Soc Environment I
[3 credit hours]
Theoretical social-work related approaches to understanding human behavior and related biological, psychological, social, cultural and environmental factors affecting individuals, families and groups, from infancy to adolescence, within the context of diversity.
Prerequisites: SOCW 2010 with a minimum grade of C
Term Offered: Fall

SOCW 3220 Human Behavior In Social Environment II
[3 credit hours]
Theoretical social work - related approaches to understanding human behavior and related biological, psychological, social, cultural and environmental factors affecting individual, family and group behavior, from young adulthood to old age.
Prerequisites: SOCW 3210 with a minimum grade of C
Term Offered: Spring

SOCW 3230 Human Behavior in the Social Environment III
[3 credit hours]
This course provides a view of behavior of larger systems including groups, organizations, and communities through a strengths perspective, focusing on social and economic justice, and the values of the social work profession.
Prerequisites: SOCW 3210 with a minimum grade of C
Term Offered: Spring, Fall

SOCW 3300 Social Policy And Legislation
[3 credit hours]
An examination of current social welfare issues and theories and the significance to the social, economic and political factors which influence policymaking and implementation.
Prerequisites: PSC 1200 with a minimum grade of C
Term Offered: Summer, Fall

SOCW 3410 Social Work Research Practicum I
[3 credit hours]
Presentation of basic methods used in social work research. Practice based methods are emphasized. Course content will focus on scientific methods of building knowledge for evidence-based social work practice.
Prerequisites: SOCW 2010 with a minimum grade of C
Term Offered: Fall

SOCW 3420 Social Work Research Practicum II
[3 credit hours]
Develop student competency in use of statistical applications in applied social work research. Entails continuation and completion of community-based research project started in Research Practicum I.
Prerequisites: SOCW 3410 with a minimum grade of C
Term Offered: Spring

SOCW 3510 Interpersonal Practice with Lesbian, Gay, Bisexual, Transgender and Queer Individuals
[3 credit hours]
This course will provide an introduction and overview of sexual orientation and gender identity and expand understanding of how to implement affirmative models of practice with LGBTQ individuals, families and communities. Course content will include: perspectives on gender, identity formation, impact of homophobia, biphobia, and transphobia, affirming interventions with lesbian, gay, bisexual and transgendered persons, families, youth, communities and aging; and specific challenges facing the LGBT communities such as homelessness, domestic violence, bullying, and policy.
Term Offered: Spring, Summer, Fall

SOCW 3520 Human Animal Interaction, Health and Wellness
[3 credit hours]
The majority of households in the United States have a companion animal. This course provides an overview of how human-animal interactions (HAI) and the human-animal bond (HAB) impact human health and well-being. Topics include: the social, physical and emotional/psychological impacts across the lifespan; therapeutic roles of animals; animal welfare and ethical considerations; and the connection between violence toward people and violence toward animals.
Term Offered: Spring, Summer, Fall

SOCW 3530 Health Care Social Work Experiences with Interprofessional Teaming
[1-3 credit hours]
Students will be introduced to the unique demands of health care social work (3 credits more content and more assignments). Students will utilize generalist skills developed in their BSW program to negotiate the interdisciplinary classroom by participating in real-world problem solving and simulations by joining students from across the University of Toledo campuses and the free clinic to learn how to be an integral part of health care with an emphasis on just service delivery.
Term Offered: Fall
SOCW 4120 Social Work Practice II
[3 credit hours]
Provides advanced theory and skill development as a generalist social worker with organizations and communities. Emphasis is on a strengths and empowerment perspective focused on social and economic justice.
**Prerequisites:** SOCW 3110 with a minimum grade of C and SOCW 3120 with a minimum grade of C
**Term Offered:** Fall

SOCW 4130 Social Work Practice III
[3 credit hours]
Provides advanced theory and skill development as a generalist social worker with individuals, families and groups. Emphasis is on a strengths and empowerment perspective focused on social and economic justice.
**Prerequisites:** SOCW 4120 with a minimum grade of C and SOCW 4200 with a minimum grade of C
**Term Offered:** Spring

SOCW 4200 Field Seminar II
[1 credit hour]
Integration of field experience and proactive principles.
**Corequisites:** SOCW 4210, SOCW 4220
**Term Offered:** Fall

SOCW 4210 Field Seminar III
[1 credit hour]
Integration of field experience and proactive principles.
**Prerequisites:** SOCW 4120 with a minimum grade of C and SOCW 4200 with a minimum grade of C
**Term Offered:** Spring

SOCW 4220 Social Work Field Experience II
[5 credit hours]
A professional experience in generalist social work practice with an integration of classroom learning with practice in a social agency. Must be taken in successive semesters during a single academic year. Application for entry to field placement must be submitted to social work office during spring semester prior to fall placement.
**Term Offered:** Fall

SOCW 4230 Field Experience III
[5 credit hours]
A professional experience in generalist social work practice with an integration of classroom learning with practice in a social agency. Must be taken in successive semesters during a single academic year. Application for entry to field placement must be submitted to social work office during spring semester prior to fall placement.
**Prerequisites:** SOCW 4220 with a minimum grade of C and SOCW 4200 with a minimum grade of C
**Term Offered:** Spring

SOCW 4500 Appreciating Diversity In Social Work Practice
[3 credit hours]
This course focuses upon the cultural group strengths, needs, priorities and experiences of ethnic/racial groups in the U.S. through a social welfare perspective. Individual and institutional racism are examined.
**Prerequisites:** SOCW 2210 with a minimum grade of D-

SOCW 4960 Honors Thesis
[1-6 credit hours]
Senior standing and approval of the department honor adviser.
**Term Offered:** Spring, Summer, Fall

SOCW 4980 Special Issues In Social Work
[1-3 credit hours]
Courses on various social work specialties. May be repeated in different topics.
**Term Offered:** Spring, Summer, Fall

**Department of Population Health**

Joseph Dake, Chair and Public Health Program Director
Henry Marshall, Healthcare Administration Program Director
Nilgun Sezgini, Health Information Administration Program Director

The Department of Population Health offers undergraduate degree programs in healthcare administration, health information administration, and public health. A minor in public health is available.

**Accreditation**

- The BS in Health Information Administration degree program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM).

**Degrees Offered**

- BS in Healthcare Administration (p. 314)
- BS in Healthcare Administration 2 + 2 (p. 315)
- BS in Health Information Administration (p. 316)
- BS in Public Health (p. 317)
- Minor in Public Health (p. 320)

**HCAR 3000 Introduction to Health Care Administration**
[3 credit hours]
Studies the structure of the U.S. health care delivery system, provider organizations, and the health care professionals who staff these organizations. Opportunities and challenges of health care administration are discussed.
**Term Offered:** Spring, Summer, Fall

**HCAR 4360 Quality Improvement In Health Care**
[3 credit hours]
Purpose and philosophy of quality assessment and system design. Selection/application of tools for data collection, analysis and problem resolution. Incorporates requirements of Joint Commission on the Accreditation of Healthcare Organizations.
**Term Offered:** Spring, Summer, Fall

**HCAR 4530 Problem Solving In Health Care Environment**
[4 credit hours]
The theory, practice, and management of healthcare administration in effective decision making within the dynamics of current health care organizations.
**Prerequisites:** HCAR 3000 with a minimum grade of D- and HCAR 4360 with a minimum grade of D-
**Term Offered:** Spring, Summer, Fall
HCAR 4540 Internship In Health Management
[3 credit hours]
Internship in institutional health care focusing on mid-management.
Term Offered: Spring, Summer, Fall

HCAR 4545 Project Management in Healthcare
[3 credit hours]
This course provides an applied approach to creating an Electronic Medical Record system project implementation plan utilizing several approaches to achieve this goal.
Prerequisites: HCAR 4530 with a minimum grade of D- and HCAR 4570 with a minimum grade of D-

HCAR 4550 Health Care Finance
[3 credit hours]
Study of financial problems and current sources of reimbursement to health care organizations. Emphasis on departmental financial management as integrated with financial management of organizations.
Prerequisites: BUAD 2050 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

HCAR 4560 Services in Healthcare
[3 credit hours]
This class will describe the services provided by hospitals, the healthcare provider teams and how departments are organized in the provision of care. This course will have specific concentration on hospital services, structure and operations.

HCAR 4570 Resources in Healthcare
[4 credit hours]
This four (4) hour hybrid course focuses on the study of resources in healthcare and how these resources impact the daily operations in a health care environment.
Prerequisites: HCAR 3000 with a minimum grade of D- and HCAR 4560 with a minimum grade of D-

HCAR 4580 Leadership and Management in Healthcare
[3 credit hours]
This three (3) hour class will focus on learning strategies and tools for leading and managing the unique challenges of healthcare organizations. The course will investigate the foundations of leadership, core competencies of health care leadership and techniques to hardwired goals and strategies in leadership and development of a strong organizational culture.
Prerequisites: HCAR 3000 with a minimum grade of D- and HCAR 4550 with a minimum grade of D-

HEAL 1310 Nutrition for Fitness & Health
[1 credit hour]
The student will learn basic nutrition as it applies physical fitness and overall health. Students will learn principles of planning a healthful diet that meets fitness goals.
Term Offered: Spring, Fall

HEAL 1320 Nutrition for Weight Management
[1 credit hour]
The student will learn principles of weight management, nutrition as it applies to healthy weight control, and overall health and will learn to plan individual approach to healthy diet.
Term Offered: Spring, Fall

HEAL 1360 Alcohol and Contemporary Issues in College Life
[1 credit hour]
This course provides students with an overview of the health, legal, and academic risks associated with excessive alcohol consumption among college students. Various prevention and treatment issues will be examined.
Term Offered: Spring, Fall

HEAL 1500 First Aid
[2 credit hours]
Provides the knowledge, skills, and confidence necessary to provide care for victims of sudden illness and injury. CPR, AED, and First Aid certification upon successful completion of the course.
Term Offered: Spring, Fall

HEAL 1700 Introduction to Health Careers
[3 credit hours]
An introduction to health and human service careers through an examination of the health care system, health career educational requirements, job outlook, and professional settings in which they operate.
Term Offered: Spring, Fall

HEAL 1700 Medical Terminology
[3 credit hours]
Study of the origin and structure of medical words, their prefixes, suffixes, special endings and singular to plural forms. Medical terms relating to the body and to clinical procedures will be explored.
Term Offered: Spring, Summer, Fall

HEAL 2000 Foundations Of Health Education
[3 credit hours]
Designed to introduce students to the field of health education by acquainting them with basic information, history, philosophy and competencies unique to health educators.
Term Offered: Fall

HEAL 2400 General Safety
[3 credit hours]
An analysis of accident causation and disasters occurring in the home, workplace and community, and the presentation of a framework for developing accident counter-measures.
Term Offered: Spring, Fall

HEAL 2500 Personal Health
[3 credit hours]
Information is presented on the prevention and control of health problems including heart disease, cancer, infectious diseases, mental health, nutrition, human sexuality and other pertinent personal health issues.
Term Offered: Spring, Summer, Fall

HEAL 2600 Mental Health
[3 credit hours]
An examination of the principles of mental health, mental illnesses, mental health professionals and mental health facilities.
Term Offered: Spring, Summer, Fall
HEAL 2700 Introduction to Public Health
[3 credit hours]
Introduces students to the structure, organization and methods of public health including an emphasis on protecting and improving the health of populations via research, needs assessment, program planning, program implementation, and program evaluation.
Term Offered: Spring, Fall

HEAL 2750 Introduction to Epidemiology
[3 credit hours]
This course provides students with a basic understanding of epidemiologic methods and study design and of the place of epidemiology in preventive and clinical medicine, disease investigation, program evaluation and public policy.
Term Offered: Fall

HEAL 2800 Principles Of Nutrition
[3 credit hours]
Students learn basic nutrition concepts. Personal nutritional practices are analyzed and evaluated to plan improvements. Encourages making informed decisions about nutrition by critically analyzing nutrition information which abounds in popular media.
Term Offered: Spring, Summer, Fall

HEAL 2940 Practicum In Community Health
[2 credit hours]
Supervised field experience with community health agency. Students work under direct supervision of the agency's staff and a University supervisor.
Term Offered: Spring, Summer, Fall

HEAL 3000 Global Health
[3 credit hours]
This is an introductory course focused on applying public health principles in developing as well developed countries designed to fulfill a global studies distribution requirement.
Term Offered: Spring, Fall

HEAL 3200 Consumer Health
[3 credit hours]
An examination of responsible and fraudulent practices in the health field. Evaluation of selected health services, products, fads and types of quackery.

HEAL 3300 Drug Awareness
[3 credit hours]
Focuses on the impact of drug abuse and misuse on the individual and society. Explores physiological, psychological and rehabilitative aspects of drug misuse and abuse. Prevention strategies are discussed.
Term Offered: Spring, Summer, Fall

HEAL 3500 Environmental Health
[3 credit hours]
An overview of the environmental effects of factors such as population growth, pollution, energy use, agriculture practices and waste disposal on the environment. Consideration will be given to solutions.
Term Offered: Spring, Summer

HEAL 3500 Prevention And Control Of Disease
[3 credit hours]
An examination of the etiology, pathogenesis, prevention and control of acute and chronic diseases. Current techniques of prevention, control and detection are examined.
Term Offered: Spring, Summer, Fall

HEAL 3700 Foundations Of Human Sexuality
[3 credit hours]
The course is designed to provide an introduction to the scientific study of human sexuality. The topic is approached from a variety of perspectives, including the historical, psychological, sociological, biological, ethical and legal.
Term Offered: Spring, Summer, Fall

HEAL 3800 Death And Dying
[3 credit hours]
The course is designed to analyze the relationship between death and health with emphasis upon the biological, psychological, bioethical and legal aspects of death in contemporary society.
Term Offered: Spring, Summer, Fall

HEAL 4100 Health Behavior
[3 credit hours]
Examines the major theories and models of health behavior and explores how those theories/models can be used to promote health and wellness in individuals, groups and populations.
Prerequisites: (HEAL 2000 with a minimum grade of B- and HEAL 2700 with a minimum grade of B-)
Term Offered: Fall

HEAL 4200 Methods And Materials In Community Health
[3 credit hours]
Designed for senior-level students to advance their knowledge and skills in needs assessment, program design, program implementation, program management, and program evaluation.
Prerequisites: HEAL 2000 with a minimum grade of D- and HEAL 2700 with a minimum grade of D-
Term Offered: Fall

HEAL 4250 Program Evaluation
[3 credit hours]
Provides students with the fundamental knowledge of the types (formative, outcome, summative) of program evaluation and the purposes and importance behind program evaluation. Additionally, students will learn how to develop theory based evaluation methods.
Prerequisites: HEAL 4200 with a minimum grade of C
Term Offered: Spring

HEAL 4400 Health Problems Of Youth
[3 credit hours]
Provides education majors the knowledge and skills necessary to help identify, understand, and prevent preadolescent and adolescent health problems and risky health behaviors which directly impact school and future success.
Term Offered: Spring, Fall

HEAL 4500 Women's Health Care
[3 credit hours]
The course is designed to consider personal health topics of special interest and applicability to women. The focus is upon the role of self-understanding and self-help in promotion of health and well-being.
Term Offered: Spring, Summer, Fall
HEAL 4560 Health Problems Of Aging
[3 credit hours]
Acquaints students with physical changes and socio-psychological problems that occur with aging. Focus is on personal adjustment important in maintaining health throughout the aging process.
Term Offered: Spring, Summer, Fall

HEAL 4700 Nutritional Science
[3 credit hours]
Introduces basic human nutritional needs. Examines the role of diet and health and disease throughout the lifestyle, including weight control and fitness issues. Personal nutritional practices are analyzed and evaluated.
Prerequisites: KINE 2530 with a minimum grade of D- or KINE 2560 with a minimum grade of D- or KINE 2570 with a minimum grade of D- or HHS 2570 with a minimum grade of D- or EXSC 2530 with a minimum grade of D- or EXSC 2560 with a minimum grade of D- or EXSC 2570 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

HEAL 4750 Obesity And Eating Disorders
[3 credit hours]
Examines the issues of obesity and eating disorders. Consideration of effects on the individual as well as the public health implications. Explores causes, health and emotional impact, and treatment approaches.
Prerequisites: HEAL 2800 with a minimum grade of D-
Term Offered: Summer, Fall

HEAL 4800 Public Health Research And Statistics
[3 credit hours]
An examination of research and statistical techniques commonly employed in the health field. Topics will include research design, ethics of research, hypothesis testing and critiques of published research in health journals.
Prerequisites: HEAL 2750 (may be taken concurrently) with a minimum grade of B- and HEAL 3600 with a minimum grade of B-
Term Offered: Spring

HEAL 4900 Health Education Seminar
[1-3 credit hours]
Seminars are developed around selected topics of interest and allow in-depth consideration of the subject. They provide the student with advanced study in the area.
Term Offered: Spring, Summer, Fall

HEAL 4940 Senior Field Experience
[6 credit hours]
Provides students the opportunity to develop the competencies necessary to assume responsibilities as an entry-level public health specialist through on-site work experiences in a public health agency, organization, or industry. Students will work under direct supervision of the agency’s staff and a University supervisor.
Prerequisites: HEAL 2940 with a minimum grade of D- and HEAL 4100 with a minimum grade of D- and HEAL 4800 with a minimum grade of D-
Term Offered: Spring, Summer, Fall

HEAL 4960 Political Determinants of Health
[3 credit hours]
An examination of the political determinants of health, that is, the upstream political forces and policy decisions that are the causal sources of the social conditions that lead to health inequities. This course introduces the importance of power, politics, advocacy, and policy in public health. Students will learn models of health equity and the political determinants of health and apply these to contemporary case studies with particular attention to the health effects of racism.
Term Offered: Spring, Fall

Multicultural US Diversity

HEAL 4990 Independent Study In Health Education
[1-3 credit hours]
Directed individual study. Specialty title, seminar sheet and permission of instructor are required.
Term Offered: Spring, Summer, Fall

HIM 2210 Medical and Pharmacological Terminology
[3 credit hours]
Provide the student with a solid working knowledge of the medical language and basic pharmacology, especially the vocabulary and terminology used in medical coding, classification systems, and ancillary care.
Term Offered: Spring, Fall

HIM 2230 Healthcare Document Requirement
[3 credit hours]
Inpatient and ambulatory health care data requirements will be identified and analyzed, including collection, analysis, and implementation. This course also includes aspects related to medical staff, personnel requirements, licensing, certifying, and accrediting agencies.
Term Offered: Spring, Fall

HIM 2260 Legal Issues in HIM
[2 credit hours]
This course covers overview of the US legal system, identification of laws and regulations applicable to healthcare topics and related the health information management. Hardcopy and electronic health record legal issues examined in detail.
Term Offered: Spring, Fall

HIM 2300 Healthcare Resources, Payers
[3 credit hours]
Introduction to roles of professionals in meeting standards of regulatory agencies and voluntary organizations in healthcare delivery systems. Data collection, quality, access, retention, technology and impact on healthcare financing.
Term Offered: Spring, Summer, Fall
HIM 2310 Acute Care Clinical Classification Systems And Services
[4 credit hours]
Principles of coding disease conditions and procedures using the International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM) and 10th Revision Procedure Classification System (ICD-10-PCS) are covered. Manual and computerized methods will be utilized to assign codes following Official Coding Guidelines required for reporting data.
Prerequisites: (KINE 1460 with a minimum grade of C or EXSC 1460 with a minimum grade of C and KINE 1560 with a minimum grade of C or EXSC 1560 with a minimum grade of C and KINE 2580 with a minimum grade of C or EXSC 2580 (may be taken concurrently) with a minimum grade of C) and (HIM 2210 with a minimum grade of C and HIM 2230 with a minimum grade of C)
Term Offered: Fall

HIM 2320 Ambulatory Clinical Classifications Systems And Services
[4 credit hours]
Principles of coding with the Healthcare Common Procedure Coding System (HCPCS) are discussed, and the assignments of codes using both manual and computerized methods are practiced.
Prerequisites: HIM 2210 with a minimum grade of C and (KINE 1460 with a minimum grade of C or EXSC 1460 with a minimum grade of C and KINE 1560 with a minimum grade of C or EXSC 1560 with a minimum grade of C)
Term Offered: Spring

HIM 2350 Reimbursement Methodologies
[2 credit hours]
MS-DRGs, APCs, RBRVS, and other reimbursement methods used by federal, state, and private insurance carriers are identified and reviewed. Compliance issues, including coding, billing, and chargemaster accuracy are identified and reviewed. Case mix and its implications for providing and improving healthcare quality also discussed.
Prerequisites: HIM 2310 with a minimum grade of C and HIM 2320 with a minimum grade of C

HIM 3240 Health Information Administration Practices
[4 credit hours]
Management theory and principles related to health information management in the acute and non-acute care environments are examined. Business techniques beneficial to health information administrators are identified and analyzed. Management theory and principles related to administration of healthcare service organizations are examined. Focus on strategic planning, accreditation/licensure, marketing, and institutional issues.
Prerequisites: BUAD 1020 with a minimum grade of D- and HIM 2300 with a minimum grade of C
Term Offered: Spring, Fall

HIM 3940 Healthcare Content and Record Management
[4 credit hours]
Generalized health information administrative duties in regards to staffing, managing, record release, storage and retrieval, coding, abstracting, utilization management, quality improvement, computer applications in health information practice.
Prerequisites: HIM 3240 with a minimum grade of C
Term Offered: Spring, Fall

HIM 4210 Healthcare Statistics, Registries, Research
[4 credit hours]
Theory of healthcare statistics will be reviewed and students will apply practical application of statistical methods used in healthcare to produce reports. Surveillance mechanisms, including database management used in registries to track various disease processes or injuries will be investigated and researched.
Prerequisites: MATH 2600 (may be taken concurrently) with a minimum grade of D-
Term Offered: Spring, Summer, Fall

HIM 4230 Compliance and Ethical Issues
[3 credit hours]
This course presents an overview of the compliance and ethical issues facing the health care industry. The importance of corporate compliance programs and standards, policies, and procedures healthcare organizations should have in place to assure compliance with government funded programs will be the focus of the course. Senior standing status required.
Term Offered: Spring, Fall

HIM 4300 Performance Improvement and Quality Outcomes in Healthcare
[3 credit hours]
This course encompasses the philosophy and purposes of quality improvement methods in health care organizations through application of tools for data collection, data analysis, and problem resolution. Continuous monitoring and performance improvement (PI) methods are investigated and applied to the management and evaluation of PI programs, the review of PI outcomes and implementation of action plans.
Prerequisites: INF5 3250 with a minimum grade of D- and CMPT 2460 with a minimum grade of D- and CMPT 1420 with a minimum grade of D-
Term Offered: Fall

HIM 4500 Health Informatics & Information Management
[4 credit hours]
This course introduces students to informatics as it applies to healthcare. Healthcare information systems are identified and the importance of the technology and its effect on healthcare delivery, communication, confidentiality, financing, and education are examined. An introduction to key medical areas in which computers are used will be discussed.

HIM 4910 Integrative Capstone Experience
[4 credit hours]
The course consists of a demonstration of proficiencies and competencies in Health Information Administration (HIA) core courses and an extensive examination of the cognitive levels required to pass the national Registered Health Information Administration (RHIA) exam and to become an effective healthcare information supervisor. Senior standing and instructor permission required.
Term Offered: Spring, Fall

HIM 4940 Professional Practice Experience
[4 credit hours]
Specialized administrative assignment within health information management in a facility, agency or organization. Students submit a major project for the site and members of the related HIM community of practice. Senior standing and instructor permission required.
Prerequisites: HIM 3240 with a minimum grade of C
Term Offered: Spring, Summer, Fall
PUBH 4110 Intro Spanish for Healthcare
[1-3 credit hours]
This course introduces the Spanish language in a medical context. Through development of oral and aural skills, enables more effective communication with Spanish speaking patients.

PUBH 4120 Adv Med Spanish Hlth Care Pro
[3 credit hours]
Prerequisites: Previous experience in Spanish language and/or completion of PUBH 411. Builds upon previous Spanish in a medical context and development of oral and aural skills for more effective communication, improving interaction with Spanish speaking patients.

BS in HealthCare Administration

The University of Toledo offers a bachelor of science degree in healthcare administration. This degree requires 120 credit hours for graduation. The health care administration program provides students with knowledge and skills to act as healthcare administrators in a variety of settings, such as hospitals, long term care and outpatient facilities, physician offices, and public health agencies. This interdisciplinary program introduces students to managerial concepts and related skills. The health care core courses enhance students' knowledge in a variety of related subjects, including current health issues, legislation affecting health care, and management theories and decision making, all of which are important in health care administration. The degree program includes a minor in business. The program can be completed online.

Healthcare Administration Internship

The healthcare administration internship is designed to provide students with an opportunity to apply educational achievements in a health care setting. Students will be exposed to health care administration operations through project-based work. Project opportunities will vary and reflect both the participant's learning goals and the needs of the health care organization.

To be considered for the internship, students need to:

• Declare healthcare administration as their major at least one semester before beginning the internship.
• Complete at least 12 credit hours in health care administration required courses with a minimum grade of "C" in each course.
• Have a current minimum 2.5 overall grade point average.
• Apply to the healthcare administration internship prior to their last semester before graduating.
• Complete the healthcare administration internship application three months prior to the internship semester.
• Provide resume to healthcare administration faculty.
• Interview with healthcare administration faculty and health care organization.
• Be able to provide their own transportation to the health care organization.
• Attend the health care organization's orientation.
• Complete required immunizations from the health care organization.
• Have approval from healthcare administration faculty to complete internship.

Below is a sample plan of study. Consult your degree audit for your program requirements. Grades of "C" or better are required in all HCAR courses.

Students who enroll in the degree completion program must have an earned associate's degree in a health-related field. Students who select this program are often already gainfully employed in the health care field (nurses, sonographers, etc.). They wish to further their education to better prepare themselves for administrative positions. This program can be completed online.

To complete the 2+2 degree, a student must take a minimum of 120 credit hours and maintain a minimum GPA of 2.0 at the University of Toledo. A minimum of 64 hours must be taken at the 2000 to 4000 levels, with a minimum of 32 hours at the 3000 and 4000 levels. University core curriculum requirements must be met. See your advisor for details. Below is a sample program of study. Consult your degree audit for your program requirements. Grades of "C" or better are required in all HCAR courses.

### BS in Health Care Administration 2+2

The University of Toledo offers a bachelor of science degree completion program in health care administration. This degree requires 120 credit hours for graduation. The health care administration degree completion program provides students with knowledge and skills to act as health care administrators in a variety of settings, such as hospitals, long term care and outpatient facilities, physician offices, and public health agencies. This interdisciplinary program introduces students to managerial concepts and related skills. The health care core courses enhance students’ knowledge in a variety of related subjects, including current health issues, legislation affecting health care, and management theories and decision making, all of which are important in health care administration.
Communication: Develop the ability to communicate effectively orally and in writing with individuals and groups.
Leadership: Develop the skills to help attain the organization’s strategic mission successfully.
Ethics and Professionalism: Develop the skills that align personal and organizational conduct with ethical and professional standards that include a responsibility to the healthcare community.
Students are able to demonstrate understanding of key concepts

BS in Health Information Administration

The University of Toledo offers a bachelor of science degree in health information administration. This degree requires 120 credit hours for graduation and can be completed online. It encompasses a broad range of disciplines including medicine, health, business, informatics and information management. Graduates serve in a variety of health care managerial and administrative roles, including planning, organizing, controlling and evaluating health information systems; applying legal principles, policies, regulations and standards and analyzing their impact on risk management; and supervising personnel in various health care settings. Health information managers are responsible for health records and must assure adequate documentation for accurate classifying and indexing of diagnoses, treatments and procedures for the purpose of planning and reimbursement. Health information administrators are responsible for planning, engineering, workflow applications, research, reporting and policy administration.

The Health Information Administration is the first undergraduate program at the University to have all core courses certified by Quality Matters. Quality Matters certification demonstrates the program has the correct level of teaching materials, course expectations are clear, and the curriculum produces learning outcomes that can be measured.

The Health Information Administration program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM). Graduates of the HIA program at The University of Toledo are eligible to sit for the certification examination. The American Health Information Management Association (AHIMA) grants successful examination candidates recognition as Registered Health Information Administrators (RHIA).

Professional practice experience (PPE) is an integral part of the health information administration curriculum. The PPE is project oriented with students acting as project managers, creating a proposal letter and project forms, deliverable(s), presentation, survey and follow up analysis. Sites and projects vary by location. Students are required to meet all site requirements including immunizations and background checks. Students must provide their own transportation to the site.

Public health majors help people improve their quality of life. Studying public health teaches students how to design, implement, and evaluate programs to promote health and prevent disease. The program explores critical health issues such as nutrition, substance abuse, human sexuality, health behaviors, environmental health, and disease prevention. Students learn through hands-on practice by shadowing health professionals in their first year. In their second year, students earn credit through a "mini-internship" with a community agency or organization. Finally, fourth year students gain real-world experience through a 400-hour internship with the agency or organization of their choice.

**Public Health Pre-Medical track**

The public health pre-medical track is a 120 credit hour option within the existing bachelor of science in public health degree program. The pre-medical track is targeted toward those students who are interested in impacting the health and well-being of communities and want to build upon that with a medical degree following completion of the bachelor's degree. This track provides several options upon completion of the degree:

- meet requirements for admission into most medical schools and also have additional coursework that will provide a strong foundation for a physician;
- obtain a career in the field of public health education which the Bureau of Labor Statistics predicts to have a 21% growth by 2022; or
- seek graduate education in a public health field.

The public health field is growing increasingly competitive. To enroll in the core requirement courses, including the sophomore level practicum and 400-hour senior internship, a minimum 2.7 GPA is required. Because of the strong engagement with the community, students are held to a high level of professionalism. Students are expected to:

- perform with excellence in the classroom;
- act with a high level of professionalism in all areas;
- join and actively participate in Eta Sigma Gamma, our student organization;
- attend local, state, and/or regional professional conferences;
- get involved in research with faculty members; and
- participate in community service.

### Code | Title | Hours
--- | --- | ---
HEAL 2000 | Foundations Of Health Education | 3
HEAL 2500 | Personal Health | 3

- HEAL 4200 | Methods And Materials In Community Health | 3

---

**BS in Public Health**

The University of Toledo offers a bachelor of science degree in public health. This degree requires 120 credit hours for graduation. The public health program is designed to prepare students to work in non-profit health organizations, in local, state and national government health agencies, or in worksite wellness. The mission of the undergraduate public health program is to prepare students to use theory-driven approaches to promote health and prevent disease within specific populations.

### Required courses:

- HIM 4210 | Healthcare Statistics, Registries, Research (FL) | 4
- HIM 4230 | Compliance and Ethical Issues (FL) | 3
- HIM 4300 | Performance Improvement and Quality Outcomes in Healthcare (FL) | 3
- Upper Division Supporting Elective | 3
- Core Elective | 3
- Professional Practice Experience | 14
- Integrative Capstone Experience (SP) | 4
- Elective: Foreign Language Recommended | 2
- Total Hours | 120
HEAL 4250 | Program Evaluation | 3
HEAL 4800 | Public Health Research And Statistics | 3
HEAL 4940 | Senior Field Experience | 6

**Public Health Content** - select six courses from the following:
- COMM 3760 | Health Communication
- HEAL 1800 | Medical Terminology
- HEAL 2400 | General Safety
- HEAL 2600 | Mental Health
- HEAL 3200 | Consumer Health
- HEAL 3300 | Drug Awareness
- HEAL 3700 | Foundations Of Human Sexuality
- HEAL 3800 | Death And Dying
- HEAL 4500 | Women's Health Care
- HEAL 4560 | Health Problems Of Aging
- HEAL 4700 | Nutritional Science

**Public Health Supporting** - select two courses from the following:
- ANTH 3330 | Food, Health, Society
- ANTH 4760 | Medical Anthropology
- CMPT 1100 | Microsoft Office Applications
- COMM 2000 | Mass Communication And Society
- COMM 2600 | Public Presentations
- COMM 2820 | Group Communication
- PHIL 3370 | Medical Ethics
- PSY 2200 | Abnormal Psychology
- PSY 2510 | Lifespan Developmental Psychology
- PSY 2700 | Social Psychology
- SOC 1020 | Social Problems
- SOC 2640 | Race, Class, And Gender
- SOC 4160 | Health And Gender
- SOC 4180 | Medical Sociology

- Bachelor of Science in Public Health (p. 318)
- Bachelor of Science in Public Health: Pre-Medical track (p. 319)

A “C” or better is required in this course.

Courses noted with FL or SP are only offered in those semesters.

- Identify the historical foundations for public health
- Describe social determinants of health and how they impact communities
- Identify major health related issues and how public health can impact them
- Describe why evidence-based approaches are an essential part of public health practice.
- Describe the basic principles and methods of epidemiology and their application to public health
- Describe leading global health concerns including their causes, distribution, and response strategies
- Describe the relationship between the environment and the health of individuals and communities
- Explain personal impacts on the environment and how that can impact health.
- Explain factors that lead to increased risk for infectious and chronic disease and strategies to reduce these risks.
- Use health theories/models to explain why people engage in behaviors that promote and/or compromise health
- Demonstrate how health theories/models are used as the foundation for interventions/programs
- Describe how to plan for the implementation of health promotion/disease prevention programs
• Demonstrate cultural humility through the design of culturally appropriate methods and materials for health promotion/disease prevention programs
• Describe various types of program evaluation and when they are most appropriately used
• Demonstrate how to align program goals, objectives, activities and evaluation.
• Apply public health skills in community settings to impact the health of a local population
• Describe various research methods that are used in the public health field
• Conduct basis statistical analyses on health related data
• Describe ethical considerations when conducting public health research

Minor in Public Health

Public health is a diverse and dynamic field. Public health professionals come from varying educational backgrounds and can specialize in an array of fields. A host of specialists, including teachers, medical professionals, journalists, researchers, administrators, social workers, environmentalists, laboratory sciences, demographers, and attorneys work to protect the health of the public.

The Institute of Medicine (IOM) determined that keeping the public healthy required a well educated public health workforce and educated citizens. The IOM recommends that all undergraduates have access to education in public health. Furthermore, the changing health care system in America will undoubtedly place more emphasis on primary prevention in the future. As specialists in prevention, students with a public health background will be well suited to meet these societal demands. Additionally, students with this minor will be better prepared should they desire graduate education in the field of public health.

A minimum of 21 credit hours is required to complete the minor. The internship includes 150 hours of field experience.

College of Medicine and Life Sciences
UnderGRADUATE CATALOG 2022-2023

The University of Toledo College of Medicine and Life Sciences is dedicated to improving health in the communities and region we serve. We do this by educating excellent clinicians and scientists, by providing patient centered and high-quality care and by producing nationally recognized research in focused area.

The College of Medicine offers a world-class education with medical degrees, dual degree programs, graduate degrees, graduate certificates, and undergraduate certificates in Emergency Medical Services (EMS).

Our state-of-the-art Interprofessional Immersive Simulation Center (http://www.utoledo.edu/centers/iisc/) reflects today’s reality of medicine. Students in differing specialties are learning the importance of interdisciplinary teamwork and collaboration. The three-story, 65,000-square-foot facility is the first in the nation to incorporate three integrated simulation centers: a progressive anatomy and surgical skills center, an advanced clinical simulation center, and a virtual immersive reality center.

MISSION
The mission of The University of Toledo College of Medicine and Life Sciences is to improve health in the communities and region we serve. We do this by educating excellent clinicians and scientists, by providing patient centered and high-quality care and by producing nationally recognized research in focused area.

VISION
The University of Toledo College of Medicine and Life Sciences, with its partner ProMedica, is nationally recognized for education and focused research, and regionally distinguished for comprehensive clinical care.

Christopher J. Cooper, M.D.
Executive Vice President for Clinical Affairs
Dean of the College of Medicine & Life Sciences

Emergency Medical Services (EMS) Education

Emergency Medical Services, more commonly known as EMS, is a system that provides emergency medical care. Once it is activated by an incident that causes serious illness or injury, the focus of EMS is emergency medical care of the patient(s).

EMS is most easily recognized when emergency vehicles or helicopters are seen responding to emergency incidents. But EMS is much more than a ride to the hospital. It is a system of coordinated response and emergency medical care, involving multiple people and agencies. A comprehensive EMS system is ready every day for every kind of emergency. EMS does not exist in isolation, but is integrated with other services and systems intended to maintain and enhance the community's health and safety.

The University of Toledo Emergency Medical Services (EMS) Program offers Basic EMT courses over one- and two-semester options, as well as Paramedic courses over a one-year (three semester) certificate program under UToledo’s College of Medicine and Life Sciences (https://www.utoledo.edu/med/).

We use experienced instructors and a variety of other well trained medical professionals to facilitate training using low and high fidelity simulation for scenario based learning and cadaveric experiences for real life skill and procedural performance.

The University of Toledo Emergency Medical Services (EMS) Program (https://www.utoledo.edu/med/ems/about.html) produces competent entry level emergency medical responders in the area of cognitive, psychomotor, and effective/behavioral domains.

The program boasts a 100% pass rate (https://www.utoledo.edu/med/ems/outcomes.html) for NREMT-P, which is the national registry test necessary to become a licensed Paramedic, a 100% pass rate for the State of Ohio DPS EMS Paramedic Certified status, and a 100% employment rate in the EMS field.

With cutting edge technologies and wide variety of opportunities for interprofessional interactions, UToledo’s EMS students are trained and prepared for real patient interaction like no other students in the Midwest. Students trained through UToledo’s EMS Education program will receive college credit for coursework completed and receive some of the most cutting edge and high tech training available in the U.S. Students have access to many of UToledo’s cutting edge training and simulation centers such as The Interprofessional Immersive Simulation Center (IISC) (https://www.utoledo.edu/centers/iisc/) and the Hillebrand Clinical Skills Center (https://www.utoledo.edu/centers/csc/) Through various forms of training and simulation, students gain hands on experience in areas such as:

1) Gross Anatomy: Hands on experience with both fresh and embalmed cadavers is provided for students as they complete their coursework in anatomy & physiology and advanced airway skills development.

2) Clinical Skills: Utilizing both pre-programmed mechanical and real-life (actor) patients, students develop and evaluate communication and assessment skills, and receive timely feedback and debriefing to enforce the educational benefit. Student’s also have access to hands-on skill labs for individual skill development.

3) Simulated Patient Scenarios: Students often have the opportunity to interact interprofessionally with students from other professions in controlled simulated scenarios. Student’s train with state of the art computerized simulated patients for team scenarios. Events can be recorded and provided the ability to debrief and provide immediate feedback to individuals and teams, reinforcing performance concepts.

4) Virtual Immersive Reality (VIR) and Computer Aided Learning Modules: Technologies used include virtual immersive stereoscopic 3D model modules along with a variety of advanced educational learning modules.

The successful completion of the coursework supports the application for the state of Ohio’s EMS certificate and National Registry.
• EMT Basic, Certificate (p. 326)
• Emergency Medical Services (EMS)/Paramedic Program Certificate (p. 324)

EMS 1220 Emergency Medical Technician Basic 1
[3 credit hours]
Emergency Medical Technicians are entry level health care providers of emergency medical services. EMTs are clinicians, trained to respond quickly to emergency situations regarding medical issues, traumatic injuries and accident scenes. This course provides fundamental knowledge and training across the breadth of Emergency Medical Services (EMS). This is part one of three sections needed for licensure. Successful completion of EMT-B1, EMT-B2 and EMT Field Experience courses makes student eligible for state and national certification.

Term Offered: Fall

EMS 1230 Emergency Medical Technician Basic 2
[3 credit hours]
Emergency Medical Technicians are entry level health care providers of emergency medical services. EMTs are clinicians, trained to respond quickly to emergency situations regarding medical issues, traumatic injuries and accident scenes. This course provides fundamental knowledge and training across the breadth of Emergency Medical Services (EMS). This is part two of three courses needed for licensure. Successful completion of EMT-B1, EMT-B2 and EMT Field Experience courses makes student eligible for state and national certification.

Prerequisites: EMS 1220 with a minimum grade of D-

Term Offered: Spring

EMS 1240 Emergency Medical Technician Field Experience
[1 credit hour]
Emergency Medical Technicians are entry level health care providers of emergency medical services. EMTs are clinicians, trained to respond quickly to emergency situations regarding medical issues, traumatic injuries and accident scenes. This course provides fundamental knowledge and training across the breadth of Emergency Medical Services (EMS). This is part 3 of 3 sections needed for licensure. This is to be arranged with instructors and clinical coordinator during EMT-B1 OR EMT-B2. Successful completion of EMT-B1, EMT-B2 and EMT Field Experience courses makes student eligible for state and national certification.

Corequisites: EMS 1230

Term Offered: Spring

EMS 1300 Anatomy & Physiology for the Prehospital Provider
[4 credit hours]
The systemic approach to anatomy and physiology is presented to the student. The knowledge is a fundamental portion of the education of any health care provider and is paramount for successful practice as an EMS provider. Under the current national paramedic curriculum, it has become necessary to expose students to a broader range of information. It will be the focus of this course to better equip the student with structure and function of the human body that will allow a student to recognize the homeostatic state.

Term Offered: Summer

EMS 1310 Paramedic I
[10 credit hours]
This is the first of three courses that provide training for students to become certified paramedics. The course covers a variety of preparatory topics such as legal considerations, assessment, pharmacology, venous access, medication administration, EKG interpretation, and assessment/management of cardiovascular emergencies. It also incorporates hands-on application through skill labs, simulation, and direct patient contact in a clinical environment. Upon successful completion of this course, the student will be eligible enroll in Paramedic II. In addition to EMS Basic EMT certification, an applicant for this course must have successfully completed an approved Anatomy class and an EMS Program Entrance Examination.

Term Offered: Fall

EMS 1320 Paramedic II
[10 credit hours]
This is the second of three courses that provide training for students to become certified paramedics. This course covers a variety of medical emergencies (ie: respiratory, neurology, endocrinology, etc.) as well as obstetric and gynecological emergencies, childbirth and neonatology, assessment and management of various conditions that involve pediatrics and geriatrics. It also incorporates hands-on application through skill labs, simulation, and direct patient contact in a clinical environment. Upon successful completion of this course, the student will be eligible enroll in Paramedic III.

Prerequisites: EMS 1310 with a minimum grade of D-

Term Offered: Spring

EMS 1330 Paramedic III
[10 credit hours]
This is the last of three courses that provide training for students to become certified paramedics. This course will complete the remaining paramedic curriculum with Operational topics such as Rescue, Mass Casualties, etc. The student will also finish all necessary field and clinical requirements, and must demonstrate "street readiness" while completing EMS field Internship hours. Upon successful completion, students are eligible to take the National Registry Examination for certification as a Paramedic.

Prerequisites: EMS 1320 with a minimum grade of C

Term Offered: Summer

EMS Paramedic Certificate

Emergency Medical Services, more commonly known as EMS, is a system that provides emergency medical care. Once it is activated by an incident that causes serious illness or injury, the focus of EMS is emergency medical care of the patient(s).

EMS is most easily recognized when emergency vehicles or helicopters are seen responding to emergency incidents. But EMS is much more than a ride to the hospital. It is a system of coordinated response and emergency medical care, involving multiple people and agencies. A comprehensive EMS system is ready every day for every kind of emergency. EMS does not exist in isolation, but is integrated with other services and systems intended to maintain and enhance the community’s health and safety.

The University of Toledo Emergency Medical Services (EMS) Program offers Basic EMT courses over one- and two-semester options,
as well as Paramedic courses over a one-year (three semester) certificate program under UT's College of Medicine and Life Sciences (https://www.ut.edu/med/).

We use experienced instructors and a variety of other well trained medical professionals to facilitate training using low and high fidelity simulation for scenario based learning and cadaveric experiences for real life skill and procedural performance.

The University of Toledo Emergency Medical Services (EMS) Program (https://www.ut.edu/med/ems/about.html) produces competent entry level emergency medical responders in the area of cognitive, psychomotor, and effective/behavioral domains.

The program boasts a 100% pass rate (https://www.ut.edu/med/ems/outcomes.html) for NREMT-P which is the national registry test necessary to become a licensed Paramedic, a 100% pass rate for the State of Ohio DPS EMS Paramedic Certified status, and a 100% employment rate in the EMS field.

With cutting edge technologies and wide variety of opportunities for interprofessional interactions, UT's EMS students are trained and prepared for real patient interaction like no other students in the Midwest. Students trained through UT's EMS Education program will receive college credit for coursework completed and receive some of the most cutting edge and high tech training available in the U.S. Students have access to many of UT's cutting edge training and simulation centers such as The Interprofessional Immersive Simulation Center (IISC) (https://www.ut.edu/centers/iisc/) and the Hillebrand Clinical Skills Center (https://www.ut.edu/centers/csc/) Through various forms of training and simulation, students gain hands on experience in areas such as:

1) **Gross Anatomy:** Hands on experience with both fresh and embalmed cadavers is provided for students as they complete their coursework in anatomy & physiology and advanced airway skills development.

2) **Clinical Skills:** Utilizing both pre-programmed mechanical and real-life (actor) patients, students develop and evaluate communication and assessment skills, and receive timely feedback and debriefing to enforce the educational benefit. Student's also have access to hands-on skill labs for individual skill development.

3) **Simulated Patient Scenarios:** Students often have the opportunity to interact interprofessionally with students from other professions in controlled simulated scenarios. Student's train with state of the art computerized simulated patients for team scenarios. Events can be recorded and provided the ability to debrief and provide immediate feedback to individuals and teams, reinforcing performance concepts.

4) **Virtual Immersive Reality (VIR) and Computer Aided Learning Modules:** Technologies used include virtual immersive stereoscopic 3D model modules along with a variety of advanced educational learning modules.

The successful completion of the coursework supports the application for the state of Ohio's EMS certificate and National Registry.

1. Demonstrate knowledge of Human Systems, as related to emergency medical care.
2. Distinguish between the needs and care of pediatric, adult, and geriatric patients in emergency medical care.
3. Demonstrate proficiency in airway control of medical and trauma patients in emergency medical situations.
4. Evaluate and properly treat dangerous cardiac rhythms, according to American Heart Association guidelines, in all patient types in emergency medical situations.
5. As a member of an EMS team, evaluate, assess, treat, and transport a variety of patient types, in diverse settings in the community, in an emergency medical situation.
6. As a member of an EMS team, demonstrate the ability to assess, treat, and transport a variety of patient types, in a wide range of realistic simulation scenarios.
7. As a member of an EMS Team, act as the lead Paramedic in charge, and assess and treat 20 patients in the Capstone Experience. Each student in the capstone will delegate tasks to other paramedic members of the team, communicate with med control, and properly mitigate any emergencies, in accordance with local protocols, and recognized best standard of care.
8. Properly demonstrate the acquisition of the following skills: mechanical ventilation of a patient, endotracheal intubation, use of a King airway device, appropriate oxygen administration, use of a cervical collar and backboard, EKG acquisition with proper interpretation and treatment, defibrillation, cardioversion and cardiac pacing, treatment of burns, splinting and treatment of fractures, administration of medications, preparation and insertion of an IV (adult and pediatric), administration of an intramuscular and subcutaneous injection, and bleeding control.
9. Describe the body's physiologic response to changes in perfusion. Define shock and the pathophysiology of compensated and decompensated shock, and demonstrate the management of different types of shock.
10. Distinguish between the priorities of medical versus trauma patients.
11. Describe the role of communication in EMS, and demonstrate proper communication with other crew members, hospital staff, medical control, patients and their families.
12. Outline and demonstrate the prehospital management of cerebral injuries.
13. Describe and demonstrate the principals of triage and operations at a mass casualty incident.
14. Discuss and demonstrate general safety principals that EMS personnel should follow at every incident.
15. Discuss actions to take when responding to possible terrorists events.
16. Discuss and demonstrate the principals of out of hospital births and their proper management, along with other prehospital obstetrical emergencies.
17. Demonstrate the care and treatment of prehospital pediatric emergencies, from neonate to adolescents.

*Explain how concepts involving legal considerations, ethical decisions, roles, responsibilities, medical research, and quality improvement are integrated within EMS systems to provide the highest quality of patient care.
*Explain the importance and impact of taking appropriate steps to ensure the utilization of injury and illness prevention techniques, and consideration of various life styles in order to maintain a healthy and safe workplace.
*Discriminate between styles and techniques that can be used to effectively communicate with patients presenting with various cultural, age, and physical barriers.
*Describe the key anatomical parts and the function of each of the body's systems using medical terminology.
*Discriminate between the growth, development, and social traits of neonates, infants, toddlers, school-aged children, adolescents, adults, and geriatrics.
*Demonstrate the ability to assess and appropriately manage the airway, breathing, and oxygenation of a patient utilizing a variety of techniques and adjuncts.
*Perform a physical assessment, gather appropriate information, formulate an appropriate and thorough care plan for the management of a patient and document the events on a Patient Care Report (PR).
*Describe the pathophysiology, physical findings, symptoms and an appropriate treatment plan for a patient with a cardiovascular condition.
*Students will be expected to successfully demonstrate their ability to perform randomly selected skills covered throughout the course.
(Students will be provided with specific skill forms at the beginning of the semester).

Mission Statement
The Faculty of The University of Toledo's College of Natural Sciences and Mathematics seek to build and disseminate foundational and applicable knowledge through excellence in teaching, research and discovery, and community engagement; foster the advancement of science, mathematics and technology locally, regionally, and globally; and serve as a transformative force within a diverse, interdisciplinary, and collaborative education environment for improving our world through science and mathematics.

**Degrees Offered**

- Department of Biological Sciences (p. 342)
  - BA in Biology (p. 346)
  - BS in Biology (p. 348)
  - BS in Medical Technology (p. 353)
  - Minor in Biology (p. 355)
- Department of Chemistry & Biochemistry (p. 355)
  - BA in Biochemistry (p. 362)
  - BA in Chemistry (p. 364)
  - BS in Biochemistry (p. 366)
  - BS in Chemistry (p. 368)
  - Minor in Chemistry (p. 369)
  - Minor in Green Chemistry & Engineering (p. 370)
- Department of Environmental Sciences (p. 370)
  - BA in Environmental Studies (p. 377)
  - BS in Environmental Sciences (p. 381)
  - BS in Environmental Geology (p. 379)
  - BS in Biology with a Concentration in Ecology and Organismal Biology (p. 378)
  - Minor in Environmental Sciences (p. 383)
  - Minor in Geology (p. 383)
- Department of Mathematics and Statistics (p. 384)
  - BA in Mathematics (p. 391)
  - BS in Mathematics (p. 395)
  - Minor in Mathematics (p. 402)
- Department of Physics and Astronomy (p. 402)
  - BA in Astronomy (p. 407)
  - BA in Physics (p. 408)
  - BS in Physics (p. 410)
  - Minor in Astrophysics (p. 417)
  - Minor in Physics (p. 417)
  - Minor in Renewable Energy (p. 417)
  - BS in Data Science (p. 335)
  - BS in General Studies (p. 340)

**Accreditation**

The College of Natural Sciences and Mathematics’ Bachelor of Science in Medical Technology program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). In addition, the Bachelor of Science in Chemistry and the Bachelor of Science in Biochemistry are certified by the American Chemical Society (ASC).

**Admission Policies**

**New first-year students:**

Applying test-optional: 2.75 GPA
Applying with test scores: 2.75 GPA or 21 ACT/1060 SAT

Students not meeting these requirements will be admitted to the Department of Exploratory Studies.

BS in Biology (Department of Biological Sciences)

Applying test-optional: 2.75 GPA
Applying with test scores: 2.75 GPA and 21 ACT/1060 SAT; students meeting the college requirements, but not meeting the BS in Biology requirements will be admitted to the BA in Biology.

**Change of College**

Students in good standing (i.e. with a cumulative UT GPA of 2.0 or higher) who wish to change from another college at The University of Toledo to the College of Natural Sciences and Mathematics should make an appointment with a college adviser in the College Student Services Office to discuss their change of college and have their academic records reviewed. All requirements, including core, major and related requirements, must be fulfilled as specified in the catalog for the year in which the student enters the College of Natural Sciences and Mathematics. Credit restrictions and level requirements for Natural Sciences and Mathematics students will apply.

**Change of Catalog Year**

In some circumstances, students can benefit from program modifications to expedite graduation progress, and may change to the current catalog year from the catalog year under which they were admitted. Important to note, once a catalog year term is updated students may not revert back to previous catalog year term. Interested students should visit the Student Services Office and meet with their academic advisor to officially declare their new catalog year.

**Admission with Transfer Credit from Another Institution**

No more than 90-94, depending on the specific degree, of semester hours of credit earned at other institutions may apply toward a degree in the College of Natural Sciences and Mathematics. Course work from other institutions is accepted at the level the equivalent course is taught at The University of Toledo. Students with transfer credit are generally expected to fulfill all University and College course requirements for a degree in the College of Natural Sciences and Mathematics as specified in the catalog for the year in which they enter the College of Natural Sciences and Mathematics. In some cases, not all the credits that transfer into The University of Toledo will apply toward a degree in the College of Natural Sciences and Mathematics, e.g., developmental courses. Transfers from other institutions shall take at least 30 semester hours at The University of Toledo, including 12 semester hours of work in their major field and 9 semester hours in their minor field, regardless of the number of hours transferred.

Students transferring to the University of Toledo in Spring 2007 or later, including transfer readmits, must meet minimum GPA requirements in their Natural Sciences and Mathematics majors and minors with both:

1. the grades of all courses attempted at UT and
2. in a second calculation, the grades of all courses attempted at all institutions (including UT).
The grades of all courses (from all institutions) which are used by those students to satisfy UT Core requirements must be used in the calculation of the UT General Education GPA.

UT students who attend other institutions as guests or transient students must also meet minimum GPA requirements in their Natural Sciences and Mathematics majors and minors with:

1. the grades of all courses attempted at UT and
2. in a second calculation, the grades of all courses attempted at all institutions (including UT).

The grades of all courses (from all institutions) which are used by those students to satisfy UT Core requirements must be used in the calculation of the UT General Education GPA.

For the purposes of meeting minimum cumulative GPA’s in a student’s Natural Sciences and Mathematics major(s) and/or minor(s) and the UT Core, the grades of all courses attempted at all institutions will be included in the GPA calculation(s). Consult a college staff advisor if you have questions.

Transfer students should note that The University of Toledo will include all course work taken at all institutions of higher education in the calculation to determine if a student will graduate with honors. All college course work ever taken is computed in determining eligibility for graduation with honors, although no student will be awarded a level of honors above that indicated by The University of Toledo cumulative grade point average (GPA). Note: The University of Toledo requires a minimum of 30 semester hours of standard letter graded courses from UT in order to qualify for graduation with honors.

An applicant who has undertaken courses at a regionally accredited college or university and who submits through the Office of Undergraduate Admission for Adult, Transfer and Military Students an official transcript listing courses and grades and giving evidence of good standing will be admitted to the College of Natural Sciences and Mathematics, provided the student has maintained a minimum GPA of 2.0 on a 4.0 scale.

Exceptions to this minimum admission requirement are rarely made and require the applicant to demonstrate, in a written petition to the committee on academic standing, that there are special circumstances that warrant waiver of the requirement. Approval of the petition is not automatic, and those students who are admitted by petition will be placed on special probationary status and must meet certain conditions to remain enrolled.

If the college from which the applicant lacks proper accreditation, the student may be denied transfer credit on the basis of the transcript, but may be allowed to obtain credit by passing advanced standing examinations with at least a C grade. Official transcripts of records from all schools previously attended must be on file with the Office of Undergraduate Admission for Adult, Transfer and Military Students before the student will be permitted to register.

A Second Degree at The University of Toledo

A Second Degree within the College of Natural Sciences and Mathematics:

A student earning a degree at The University of Toledo in the College of Natural Sciences and Mathematics may simultaneously earn a second degree in a different department within the College of Natural Sciences and Mathematics (NSM) by completing the requirements of both degrees. General education courses that meet the requirements of both degrees will count for both. The two degrees must be of a different type (e.g. – BS and BA) and both must be offered by NSM. A student who has previously earned a BA degree in the College of Natural Sciences and Mathematics may return to complete a BS degree in the same major by fulfilling the major and related field requirements for the BS degree as described in the catalog for the year of readmission. A student who previously earned either a BA or BS degree in the College of Natural Sciences and Mathematics may return to complete either a BA or BS in a different department by fulfilling the NSM college, major and related field requirements for the degree and major desired, as described in the catalog for the year of readmission. General education courses and NSM college requirements will count for both degrees. Courses in the Related Area of the first major may count towards the second major unless other related courses are required.

A Second Major within a Bachelor of Science or Bachelor of Arts degree in the College of Natural Sciences and Mathematics:

A student earning a Bachelor of Science or a Bachelor of Arts in the College of Natural Sciences and Mathematics may simultaneously earn a second major in a different department by completing the requirements of both majors as specified for the same degree program (BA or BS). Courses in the Related Area of the first major may count towards the second major unless other related courses are required. It is important to understand that completing this pathway will result in the achievement of a single degree, but with dual majors, from the College of Natural Sciences and Mathematics. All requirements for both majors must be completed in the same graduation term.

A Second Degree in the College of Natural Sciences and Mathematics at The University of Toledo:

A student earning a degree in another College at The University of Toledo may earn a second degree simultaneously in the College of Natural Sciences and Mathematics through the completion of all requirements of both degrees. A student who previously earned a degree in another College at the University of Toledo [or elsewhere] may earn a second degree in the College of Natural Sciences and Mathematics through the completion of all requirements of the College of Natural Sciences and Mathematics degree. General education courses and NSM college requirements will count for both degrees.

Requirements for Students with an Associate’s Degree

Students holding an Associate of arts or Associate of science degree from an accredited college are encouraged to enroll in the College of Natural Sciences and Mathematics and, in many instances, may expect to earn an appropriate baccalaureate upon completion of two years of full-time study. Students with an Associate’s degree in a technical program will likely require more time to complete a bachelor’s degree. The following regulations apply:
• Students must complete the equivalent of the specified University and college core and distributive requirements for a bachelor's degree.
• In all baccalaureate programs, a minimum of 64 hours must be taken at the 2000 to 4000 levels; of these, a minimum of 32 hours must be taken at the 3000 to 4000 levels in baccalaureate degree-granting colleges. Course work from other institutions is accepted at the level the equivalent course is taught at The University of Toledo.
• Students may enroll in any departmental, interdepartmental or interdisciplinary program for which they meet the admission criteria. All of the usual major and related area requirements must be fulfilled as specified in the catalog for the year in which the student entered the College of Natural Sciences and Mathematics.

Readmission
Students who have withdrawn from the former College of Arts and Sciences or the College of Natural Sciences and Mathematics and The University of Toledo and have not attended any other institution in the Interim may be readmitted, provided they were eligible to continue enrollment in the college at the time they discontinued attendance. Such students should readmit at the College Student Services Office. Students who have been suspended from the College of Natural Sciences and Mathematics must submit a written letter of petition. Students who readmit after more than 12 consecutive months' absence must comply with existing college requirements at the time of readmission https://www.utoledo.edu/offices/student-services/reinstatement-policy1.html.

Academic Policies
Refer to UToledo Policy website (http://www.utoledo.edu/policies/) for academic policies that apply to all students.

LIST OF UNDERGRADUATE ACADEMIC POLICIES found at the above web address.
3364-71-01_Academic Standing
3364-71-02_Enrollment status: full time, part time, and audit
3364-71-03_Class Rank
3364-71-04 Academic dishonesty
3364-71-05 Academic Grievance
3364-71-06 Academic forgiveness
3364-71-07 Repeating a course and calculating GPA
3364-71-08 Adding and/or dropping a Course
3364-71-09 Dual Degrees
3364-71-10 Residency requirement for a degree
3364-71-11 Grades and grading
3364-71-12 Priority registration
3364-71-13 Graduation with honors distinction; Dean's list; President's list
3364-71-14 Missed class policy
3364-71-15 Confidentiality of student records (FERPA)
3364-71-16 Administrative adjustment for extenuating circumstances
3364-71-17 Credit for prior learning
3364-71-18 Veteran and service members support and assistance
3364-71-19 Posthumous degree awards
3364-71-20 International baccalaureate diploma
3364-71-21 Diploma replacement
3364-71-22 Semester academic calendar and academic year

3364-71-23 Academic credit hour

Student Services
Academic Advising
Academic advising is a process intended to help students derive as many benefits as possible from their educations. This occurs when advisors help students develop and reach academic and career goals. While the ultimate responsibility for making personal and educational decisions rests with the student, advisors assist by helping to identify and assess alternatives and the consequences of decisions. Advising can be much more than selecting courses. The more frequently students arrange to meet with their advisors, the better their needs can be served. New students, transfer students, students changing colleges, and continuing general studies students are advised in the College of Natural Sciences and Mathematics Student Services Office by college staff advisors. See the Student Services (http://www.utoledo.edu/offices/student-services/) web page for more information. They:
• provide essential information;
• help students select courses to meet University General Education and college skill area and distributive requirements;
• suggest courses for the exploration of majors and minors; and
• help students evaluate academic progress and adjustment to university life.

Students with declared majors and/or minors are advised by departmental major or program advisors, faculty who provide general information as well as more specialized information about majors and minor programs, departmental course offerings, and career and graduate opportunities. They help students select courses for general, major, related, and other requirements. Students seeking more than one major or degree, a minor, or admission to professional school should meet periodically with one or more additional advisors. A complete list of academic advisors is available on the college website or in the College office.

Student Responsibilities
Students are responsible for correctly selecting courses for their programs of study each semester and for fulfilling all degree requirements. Although advisers will assist wherever possible, the final responsibility rests with the student. Students are expected to make sure that they are fulfilling all degree requirements, as published in the issue of the catalog of the College Natural Sciences and Mathematics under which they entered. Students who have been out of the College of Natural Sciences and Mathematics for 12 consecutive months are responsible for the requirements in the University catalog under which they reenter.

Transcripts and Degree Audit Reports
A transcript is a complete chronological list of a student's academic course work (including all courses attempted and grades earned). It does not show how specific courses apply or do not apply to University and college requirements as stipulated in this catalog. For example, developmental, non-repeatable and certain other courses are not counted toward minimum credits for degrees, but appear on transcripts. The Degree Audit Report (DAR) details all requirements applicable to a student's academic program (degree, major, minor) and applies
the student's courses on the transcript (including transfer credit) to those requirements. The DAR should be used to identify requirements remaining when all registered courses are completed. Students may view their transcript and DAR through the myUT (http://myut.utoledo.edu) portal with Student Self-Service.

**Declaring or Changing a Major or Minor**

To declare a major or minor or change one previously declared, students should connect with the College Student Services Office (https://www.utoledo.edu/offices/studentservices/).

**Sequence of Courses**

There is no single prescribed sequence of courses, except that all first-year students should take NSM 1000 and any courses required on the basis of placement testing and/or high school deficiencies. Students should consult the later sections of the catalog devoted to study and course offerings, and they should review their programs with their academic advisors to ensure they complete courses in the proper sequences. In addition, students should use their Degree Audit Reports to track their progress.

Entering students majoring in mathematics or in one of the areas of the natural sciences usually should begin the special courses designated as prerequisite for advanced courses in their first year. For example, calculus is a prerequisite for other mathematics courses and for later courses in physics, chemistry and geology. General Chemistry I and II, the Biology Fundamentals of Life Science sequence, and Fundamentals of Geology are prerequisites for succeeding courses required for majors in these areas.

**Study Abroad**

Students who plan to study abroad must be sure that their proposed course of study is properly accredited. Students should ascertain in advance from their advisors whether the course work will count toward their general requirements, majors, or related areas or only be regarded as elective. Information about study abroad programs is generally available from advisors in many college programs and departments and from the Center for International Studies and Programs (Education Abroad Office) (http://www.utoledo.edu/cisp/).

**Transient (Guest) Enrollment at Another Institution**

College of Natural Sciences and Mathematics students must have advance permission both to enroll elsewhere as a guest and to take specific courses. The Transient Student form for this purpose is available in the College Student Services Office and on the college website. Students enrolling without permission will be considered transfer readmits upon their return to UT. Natural Sciences and Mathematics students enrolled as transients or guests at another institution must submit an official transcript to the UT Office of Admission at the conclusion of the enrolled term. Grades of all courses attempted in the major, minor, and UT Core will be used in cumulative GPA calculations.

**GPA Recalculation for Repeated Courses**

The College of Natural Sciences and Mathematics permits a maximum of 18 semester hours of course work to be deleted from the UT GPA calculation. Students who have had their GPAs recomputed under the Academic Forgiveness Policy are not eligible for grade deletions. Criteria governing this policy are given in the Undergraduate Policy 3364-71-05: GPA Recalculation: https://www.utoledo.edu/policies/academic/undergraduate/pdfs/3364-71-07%20Repeating%20a%20course%20and%20recalulation%20of%20GPA.pdf. Students should check with the College Student Services Office for more specific information on this policy. Students may not use repeat courses taken at other institutions to qualify for a GPA recalculation.

**Withdrawal Policy (W Grades)**

The number of credit hours of W is limited to 22 hours for all undergraduate students in degree programs in the College of Natural Sciences and Mathematics. Once a student has accumulated 22 hours of W further withdrawals will be counted as F's in computation of the student's UT GPA for purposes of probation or suspension. In addition, students who receive financial aid risk the loss of financial aid if they accumulate excessive hours of W. Students who transfer into the College of Natural Sciences and Mathematics from another college at The University of Toledo will bring with them the number of W's accumulated in their previous work.

**Academic Probation**

A student whose cumulative GPA is less than 2.0 is automatically placed on probation until a 2.0 cumulative GPA is achieved (See Withdrawal Policy above). It is recommended that a student on probation not enroll for more than 12 to 14 credits.

**Academic Suspension**

Academic suspension means that a student is prohibited from registering at The University of Toledo for a period of at least one semester. Students are subject to academic suspension if their GPA falls below the minimum GPA listed below or if they fail to make sufficient progress toward attainment of the degree. (See Withdrawal Policy). Students may remove Incompletes while under suspension. A student on probation not enroll.

**Trial Readmission Policy**

After the required suspension period, a student may petition for readmission to the College of Natural Sciences and Mathematics to the Director of the Student Services Office. The petition must be received by the posted deadline on the Student Services reinstatement website (link below). If the petition is accepted, the college committee will determine the terms of the conditional registration agreement, under which the student will be permitted to re-enroll. Suspended students
who are granted readmission must maintain the designated GPA for each semester thereafter and meet the conditions of their readmission agreement. Students failing to meet these conditions are subject to a one-year suspension. Full details including procedures, deadlines, and how to file a petition for reinstatement can be found on the Student Services website (https://www.utoledo.edu/offices/studentservices/reinstatementpolicy1.html).

**Dismissal Policy**

Students who fail to meet the conditions for readmission after their second suspension are subject to dismissal and are not eligible for readmission to the College of Natural Sciences and Mathematics for at least three years. Criteria governing this policy are detailed in the undergraduate policy 3365-71-06: Academic Forgiveness: http://www.utoledo.edu/policies/academic/undergraduate/pdfs/3365-71-06%20Academic%20Forgiveness.pdf.

**Academic Grievance**

A student has the responsibility and right to call to the attention of an instructor any grade that the student believes to be in error or unfair. A student may appeal the decision of the instructor, in order, to the department Chair, the Dean, then to the college appeals committee if the problem is not resolved. If the problem is not resolved at the college level, the student may appeal to the student grievance council. (See also the Academic Grievance section of the Policies and Procedures of the College of Natural Sciences and Mathematics at http://www.utoledo.edu/nsm/pdfs/NSM Policies and Procedures.pdf for more information on the steps and timeline of the appeals process within the College, prior to the petitioning the Student Grievance Council). If a student chooses to appeal to the university level Student Grievance Council the student file the appeal no later than the last day of classes of the semester (including summers) following the one in which the grievance arose. The procedures for making an appeal to the student grievance council may be found on the Provosts Website: http://www.utoledo.edu/offices/provost/academicgrievance/.

**Statement on Academic Dishonesty**

A student found to be academically dishonest by a faculty member may appeal, in order, to the department Chair, the Dean, the college appeals committee and the University student grievance council. The procedures for making an appeal to the student grievance council, as outlined for academic grievance in the previous section. Criteria governing this policy are detailed in undergraduate policy 3364-71-04: Academic Dishonesty: http://www.utoledo.edu/policies/academic/undergraduate/pdfs/3364-71-04%20Academic%20Dishonesty.pdf.

**College Level Examination Program (CLEP)**

The College of Natural Sciences and Mathematics will accept a maximum of 21 semester hours of CLEP through successful completion of the four general examinations. Additional credit may be earned through satisfactory scores on individual subject examinations. Refer to the University of Toledo Registrar's CLEP Credit web page (https://www.utoledo.edu/uc/pdfs/Standardized%20Testing%20Catalog) for specific information on minimum scores needed to award UT Credit and specific credit awarded.

**Advanced Placement Program**

Refer to the University of Toledo Registrar’s web page (http://www.utoledo.edu/offices/registrar/student_records/advan_credits.html) for specific information on minimum scores and credits awarded for Advanced Placement examinations administered by the College Board Advanced Placement Program.

**Pass/No Credit Option**

Students may elect to enroll in certain undergraduate courses for Pass/No Credit rather than an A-F grade. Students must complete a petition to take a class Pass/No Credit and obtain the approval of their college before the end of the 15th calendar day of the term. Grades of C or better will be changed to PS, and grades of C-, D+, D, D-, and F will be changed to NC. The grades of PS and NC do not affect the grade point average. Refer to programs of study (p. 332) in the College of Natural Sciences and Mathematics section of this catalog for the limitations on pass/no credit grading in effect for different majors. Undeclared students, as a general rule, should not elect pass/no credit grading in major-level courses.

**Graduation Progress Evaluation**

As a student approaches 80 earned credit hours, the student should sit down with an advisor to complete a Graduation Progress Evaluation. This process is initiated by the student. Please contact the Student Services office at alsmadvising@utoledo.edu or 419.530.2671 to schedule this appointment. Detailed information regarding Graduation can also be found here: https://www.utoledo.edu/offices/registrar/graduation.html

**Field Experience/Internship**

Policies and procedures for incorporating field experiences or internships in academic programs vary from major to major. Some majors require a field experience or internship; for other majors, they are optional. Students should seek information from their major departments and obtain advance approval for all field experiences or internships.

**Degree Requirements**

The College of Natural Sciences and Mathematics offers both Bachelor of Arts and Bachelor of Science degrees. Requirements differ based on degree as indicated below.

**A. Grade Point Averages**

A cumulative grade point average (GPA) reflects all grades earned, including grades of F and grades in repeated courses. Candidates must earn a minimum overall cumulative GPA of C (that is, a 2.0 GPA on a 4.0 scale) for all UT course work. In addition, candidates must earn a minimum cumulative GPA of C in the major, minors (optional) and UT General Education, with the grades of all courses attempted at all institutions included in the GPA calculation. Some programs require a higher GPA in the major. For example, BS Chemistry, BS Biochemistry, and BS Geology require a 2.5 GPA. Criteria governing this policy are given in Undergraduate Policy 3364-71-07: GPA Recalculation: http://www.utoledo.edu/policies/academic/

B. Residency Requirement

Students transferring from other institutions must earn at least 30 hours of credit at The University of Toledo; at least 12 of these must be in the major area, and for students pursuing a minor, at least 9 hours must be earned at The University of Toledo.

C. Credit Hours and Levels

1. Students must complete a minimum of 120 hours of course work that must include the University General Education and college course requirements, and either major and course work related to the major, or an interdisciplinary program. Individual programs may require more than 120 hours of coursework to complete.
2. In all baccalaureate programs, a minimum of 64 hours must be taken at the 2000 to 4000 levels; of these a minimum of 32 hours must be taken at the 3000 to 4000 levels.
3. Students are cautioned to make use of their degree audit and review remaining requirements with their adviser before every registration in order to make progress toward completion of their requirements in an orderly, timely manner. Insofar as a student can complete the basic courses and the courses required for a chosen major (as outlined in sections E - J below) in fewer than the 120 hours required for a degree, the student must choose elective courses to complete the total of 120 hours, subject to the restrictions outlined below.

D. Credit Restrictions

Total earned hours shown on a student’s transcript may not all be applicable to the minimum 120 credits required for a degree, as follows:

1. Students with entrance deficiencies in mathematics and other students who are required or choose to take developmental course work will need to complete additional hours.
2. No courses in typing, shorthand or keyboarding will apply toward the degree.
3. No more than two hours in skill courses in physical education or recreation courses at the 1000 level will apply toward the degree.
4. No more than two hours in Student Leadership Development I and II will apply toward the degree.
5. Duplicate credit – except for courses identified as repeatable courses, students will not receive credit for repeated courses (taking the same course twice), whether taken at The University of Toledo or elsewhere.
6. The college reserves the right to deny credit for other specific courses (including most SKLS courses) and for blanket technical credit not applicable to a student’s specific program.

E. University General Education Requirements

Students earning baccalaureates in all colleges and programs are required to complete a minimum of 36 credit hours of courses that comprise the General Education Curriculum. Those courses are distributed in the areas of English composition, humanities/fine arts, social sciences, natural sciences, mathematics, and multicultural studies courses. Students should view their Degree Audit Report or contact their academic department or college office for specific details.

F. Natural Sciences and Mathematics Skill Area Requirements

Students are placed into mathematics courses by ACT scores or placement tests in those subjects. Students are placed into foreign language courses through placement testing. With careful planning, students will be able to satisfy UT General Education Curriculum and College of Natural Sciences and Mathematics requirements by taking the minimum required hours.

| 7. Mathematics | ENGL 1020 Writing And Grammar For Students Of English As A Second Language | 3-8   |
| 8. First Year Experience | ENGL 1110 College Composition I (ESL section) | 2     |
| 10. Professional and Business Writing | ENGL 2960 Professional and Business Writing | 2     |
b. Bachelor of Science (BS)

Select one of the following calculus sequences:

<table>
<thead>
<tr>
<th>MATH 1750 &amp; MATH 1760</th>
<th>Calculus For The Life Sciences With Applications I and Calculus For The Life Sciences With Applications II</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1830 &amp; MATH 1840</td>
<td>Calculus I For Mathematicians, Scientists And Educators and Calculus II For Mathematicians, Scientists And Educators</td>
</tr>
<tr>
<td>MATH 1850 &amp; MATH 1860</td>
<td>Single Variable Calculus I and Single Variable Calculus II</td>
</tr>
</tbody>
</table>

4. Writing Across the Curriculum (WAC) Requirement

Select two writing intensive courses approved by adviser.

5. Natural Sciences/Mathematics

Select 2-3 courses based on degree as indicated:

a. Bachelor of Arts (BA)

Select two science/mathematics courses from two different departments outside of the student's major.

b. Bachelor of Science (BS)

Select three science/mathematics courses from three different departments outside of the student's major.

6. Cultural Experience (BA Requirement Only)

Select 0 to 8 hours foreign language or one semester of Study Abroad.

7. Humanities and Fine Arts required courses (BA Requirement Only)

<table>
<thead>
<tr>
<th>English Literature</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select 3 hours of English Literature</td>
</tr>
<tr>
<td>History</td>
</tr>
<tr>
<td>Select 3 hours of history</td>
</tr>
<tr>
<td>Fine Arts</td>
</tr>
<tr>
<td>Select 3 hours of Fine Arts from appreciation or theory courses, not studio or skills courses</td>
</tr>
</tbody>
</table>

Electives

Select 6 hours of humanities or fine arts electives.

Social Sciences Courses (BA Requirement Only)

Select 9 hours of social science courses.

1. All new first-year students are required to take NSM 1000. The course is optional for transfer students.

2. University of Toledo General Education and College of Natural Sciences and Mathematics requirement - 6 hours. To earn a degree in the College of Natural Sciences and Mathematics, students must pass both Composition I and II with a C or better. The College of Natural Sciences and Mathematics recommends that these requirements be met before completing 45 credit hours.

3. Students will take an English placement test to determine appropriate starting level.

4. UT General Education and College of Natural Sciences and Mathematics requirement.

5. Students must pass two writing intensive courses approved by their advisor. Many courses will require completion of Composition I and II as prerequisites. The College of Natural Sciences and Mathematics recommends that the first of these writing intensive courses be completed within the first 65 and the second within the first 90 hours. At least one of these courses must be taken within the student's major. In consultation with their advisors, students with dual or interdisciplinary majors will meet this requirement by selecting a course within one of their chosen majors.

6. UT General Education requirement is two courses for 6 hours; College of Natural Sciences and Mathematics requirement differs based on degree as indicated.

7. Students may select courses from biology, chemistry, environmental sciences, mathematics, and physics and astronomy. Courses must be major-level. See DAR for more information.

8. Bachelor of Arts (BA) requirement only, not required for Bachelor of Science (BS) - 0 to 8 hours (foreign languages 1110 and 1120 (or 1500) or one semester of Study Abroad).

Every student enrolled in a BA degree program in the College of Natural Sciences and Mathematics is required to demonstrate proficiency in a single foreign language (Arabic, Chinese, French, German, Japanese, Latin, Spanish, or American Sign Language) through the elementary (foreign languages 1120) level by successfully completing a foreign language course at this level or by achieving an appropriate score on a proficiency/placement test administered by the department of foreign languages that reflects the equivalent. Students beginning a foreign language should enroll in their chosen language at the elementary 1110 level and will take two semesters of foreign language. Those continuing a foreign language or attempting to demonstrate competency by examination should take a proficiency/placement test. Alternatively, students may satisfy the cultural experience requirement by studying abroad for at least once semester in an approved study abroad/exchange program for academic credit.

9. UT General Education requirement is two courses for six hours; students enrolled in a BA degree program in the College of Natural Sciences and Mathematics are required to take an additional 9 hours. Students will take five courses (15 hours) in the humanities in addition to those taken to meet the English composition and foreign language requirements. Students may select humanities courses that also will satisfy a UT General Education humanities or multicultural requirement. No more than two courses under each departmental code in satisfying the Fine arts and Humanities requirements. Students may select courses from art, art history, communication, English, film, foreign languages (courses higher than 1120/1500 or culture courses 1080 and 1090, or a second foreign language), history, humanities, music, philosophy, religious studies and theatre. Higher-level humanities courses will satisfy these requirements and may be taken if student has met the prerequisites.

10. UT General Education requirement is two courses for six hours; Students in a BA degree program in the College of Natural Sciences and Mathematics are required to take one additional course for a total of nine hours. Students may select social science courses that also will meet a UT General Education social science requirement and one multicultural requirement. Students may select courses from anthropology, economics, geography, political science, psychology, and sociology. No more than two courses can be from a single discipline.
G. Major Area

Every student must complete either a departmental major or an interdisciplinary major. Courses given in other colleges of the University may be credited to the major only with the approval of the Dean of the College of Natural Sciences and Mathematics upon recommendation of the department Chair. Waiver of a required course or the substitution of a course from another department does not necessarily reduce the minimum credits required in the major.

1. Departmental Major

- See the complete list of departmental majors under "Degrees Offered" in the College of Natural Sciences and Mathematics section of this catalog.
- A student may have two majors from two different departments provided the requirements of both programs are satisfied. Work in the second major may be accepted as fulfilling the related course requirement upon the approval of the advisers in both departments. A student cannot use courses from the first major to satisfy the second and vice-versa. See section on "Earning a Second Degree (p. 328)" for statement on requirements when two or more desired major programs are offered as different degrees.

2. Interdisciplinary Majors

- The College of Natural Sciences and Mathematics offers interdisciplinary majors in Data Science (p. 335) and General Studies (p. 340). A student completing a departmental major and a second major in an interdisciplinary or interdepartmental major cannot use courses from the first major to satisfy the second or vice-versa. See the complete list of interdisciplinary majors under "Degrees Offered" in the College of Natural Sciences and Mathematics section of this catalog.

H. Related Courses

Students in some majors also must complete courses related to the major. These courses must be in addition to courses taken to fulfill the basic requirements listed above. Each department defines the areas from which courses may be chosen by its majors, and these listings are given in the later sections of this catalog under Programs of Study. For most programs, related courses must be chosen from courses acceptable for credit in a College of Natural Sciences and Mathematics major. Generally, these are upper-level courses.

Courses given in other colleges of the University may be credited to the major or to related courses only if indicated in later sections of the this catalog under Programs of Study or with the approval of the Dean of the College of Natural Sciences and Mathematics upon recommendation of the department Chair.

I. Minors

Many College of Natural Sciences and Mathematics departments offer minors. Departmental requirements for particular minors are given in later sections of the catalog under Programs of Study. Students wishing to pursue minors should consult with their primary program advisor and then with an advisor in Student Services office. Not all minors can be added to all degree programs. Courses selected for the minor must be chosen from courses acceptable for credit toward a major in that department. In meeting requirements for some majors, work in the minor may be accepted as fulfilling the required hours of related courses, but only with the approval of the student’s major advisor. Students completing a minor must be sure that at least 12 credit hours of the minor requirements are unique to that minor, and are not being used to satisfy requirements in the major or another minor. A minimum GPA of 2.0 is required in the minor. At least nine of those hours must be completed at The University of Toledo.

BS in Data Science

The B.S. in Data Science is an interdisciplinary program that requires a minimum of 120 hours of coursework and is designed to provide the combination of programming skills, mathematical and statistical expertise, and experience working with big data that is needed for a successful career in data science. The program includes 17-20 credit hours of study in a specific area of concentration that includes working with and applying the results of the data analysis to solving real world problems. Students may choose to concentrate in public health data, astrophysics data, or environmental science data; minors in geographic information science and technology, economics, computer science and engineering or physics also constitute concentrations; students interested in other areas should consult with their advisor. Students interested in a concentration in mathematics or statistics should choose the BS in Mathematics with a Concentration in Data Science as their preferred program of study.

Questions regarding the program should be directed to Adam Hintz (adam.hintz2@utoledo.edu) in the Office of Student Services.

</table>

In addition, in an area of study where an existing concentration in the data science major is not available, a related minor can be selected in consultation with the student’s academic advisor and the approval of the Data Analytics/Data Science Program Oversight Committee to fulfill the concentration requirement of the degree. For minors that are less than 18 credits, additional courses to equal at least 18 credits in the same discipline as the minor must be included. Courses selected within the minor must include at least two courses that focus on the collection, discipline as the minor must be included. Courses selected within the same discipline as the minor must be included. Courses selected within the minor must include at least two courses that focus on the collection, management and/or analysis of data in the minor. The following minors are already approved as meeting this requirement:
- Minor in Geographic Information Science and Technology
- Minor in Economics
- Minor in Computer Science and Engineering
- Minor in Physics

Students interested in a concentration in mathematics or statistics should choose the BS in Mathematics with a Concentration in Data Science as their preferred program of study.

---

1. Students will be able to explain and apply mathematical, statistical and computational principles to different data types collected from natural phenomena and human activities.

2. Students will construct databases from data sets, manipulate and use them to extract meaningful answers to questions of interest in the natural sciences, human health or wellbeing.

3. Students will be able to select and apply the appropriate computational algorithms, statistical software packages, and programming skills that based on the evaluation of a specific data set and problem under investigation.

4. Students will be able to describe current issues in a disciplinary area in the natural sciences, human health or wellbeing that large data can provide insight into and apply the appropriate data analytics tools to their investigation.

5. Students will describe and evaluate various social and ethical issues related to the collection, analysis and applications of data.
6. Students will effectively communicate their work and results through written and/or oral presentations.

Honors in Data Science is available to students pursuing both a B.S. degree in Data Science and Honors through the Jesup Scott Honors College. To receive an undergraduate degree with Honors in Data Science, all requirements for the B.S. degree must be met, including at least 12 credit hours of Honors coursework in the major, with at least two Honors courses in the selected Data Science concentration. In addition, a project leading to a thesis under the direction of a research-active faculty member in the major or concentration in the major must be completed. Students are required to submit a written Honors Thesis to the program advisor before completion of their senior year.

BS in General Studies

Degree Requirements

The General Studies program has been established in recognition of the fact that existing majors may not satisfy the needs of all students desiring a liberal education. General Studies is an interdisciplinary program that allows students to select an area of concentration and related course work not offered in traditional majors. Students who plan to pursue graduate or professional degree programs or enter certain employment areas that require established curricular backgrounds may find it to their advantage to consider existing majors offered within the college rather than the General Studies option. The standard majors have wider acceptance and more readily identify the nature and quality of an individual's academic background. Students should declare this major before they have completed 90 hours. Students seeking admission to this program will be interviewed by an adviser in the college Student Services Office and must have sound reasons for their choice. Once accepted into the program, students must have their programs approved by the General Studies advisor.

Under this program, the University and college general education requirements specified in the Degree Requirements section of this catalog must be fulfilled, and an area of concentration in the natural sciences or mathematics must be identified for the purpose of determining education requirements. Students must take at least 64 hours of courses at the 2000 level or higher and at least 32 hours of courses at the 3000/4000 level and have earned a minimum of 120 hours to be eligible for graduation.

In lieu of a major, students must take at least 15 but not more than 34 hours of course work in a single department to serve as the core area and 16-35 hours of course work to serve as the cognate for a total of 50 hours. Students must meet an minimum GPA average of 2.0 in a GPA calculation of the core area as well as a secondary GPA calculation of the core area and the cognate.

Courses used for the core concentration and cognate must be courses that would count in the major in those departments.

Students will demonstrate depth of knowledge in a field and are able to produce field-appropriate applications, drawing on both their major field of study and other fields.

Students will demonstrate proficiency in using and integrating intellectual skills, including communication, across the curriculum.

Students will demonstrate the knowledge required for responsible citizenship, both from their formal studies and from community-based learning.

Students will demonstrate their ability to integrate and apply their learning in complex projects and assignments, including collaborative efforts.

Pre-Medical, Pre-Dental and Pre-Veterinary Concentrations

Deborah Hendricks, Ed.D., CFLE
Director, Pre-Health Advising Center, Mindfulness Coach
deborah.hendricks@utoledo.edu

Shavron Kelley, M.A.
Program Coordinator, Pre-Health Advising Center
shavron.kelley@utoledo.edu

Students interested in professional medical, dental or veterinary careers may choose to apply for the pre-medical, pre-dental and pre-veterinary concentrations. Students choosing this option must also complete the requirements for a major in a specific discipline or in an interdisciplinary baccalaureate program.

Because admission to a professional school is very competitive, students need to maintain high GPAs, both cumulative and in the sciences. The Advisors in the Pre-Health Advising Office will continually monitor a student's academic performance and make recommendations as to whether this program should be continued.

Advisors in the Pre-Health Advising Office will assist the student in determining the entrance requirements of the professional school being considered, since these requirements vary among schools. In general, these professional schools specify for entrance a core set of science courses that include one year (two semesters) each of biology, general chemistry, organic chemistry, physics and mathematics. Most schools recommend that candidates plan a broad course of study leading to either a B.A. or a B.S. degree in any discipline.

For more information regarding Pre-Health options and advising, visit the Pre-Health Advising Center. (https://www.utoledo.edu/success/pre-health-advising/)

Honors

Honors in the College of Natural Sciences and Mathematics is available to its academically talented and highly motivated students, and is offered in conjunction with the University of Toledo Jesup Scott Honors College. To graduate with College Honors, a minimum of 27 hours of Honors credits, a minimum cumulative UT GPA of 3.3, and completion of departmental or interdisciplinary program specific requirements for Honors in one of the departments or interdisciplinary programs of NSM are required. Departmental honors alone can be earned by completing the Departmental Honors requirements alone. The departmental honors requirements and curriculum offered by individual departments within the College of Natural Sciences and Mathematics is described under the departmental entries in this catalog.

Student Selection and Admission Criteria

Admission to the Honors College is competitive and limited to academically talented students. Students entering directly from high school are admitted based on a review of application materials, which include a high school transcript, a reference, an essay, and an extracurricular resume. Motivated students a minimum high school GPA of 3.5 are encouraged to apply. Currently enrolled University of Toledo students and transfer students may apply for admission to the Honors College if they have completed at approximately 15 but not more than 60 graded semester hours of college work, and earned a minimum GPA of 3.3 (on a 4.0 scale).

Program Requirements

In order to graduate with the Honors College diploma, a student must:

- Complete all requirements for an approved degree program within the College of Natural Sciences and Mathematics.
- Complete a minimum of 27 semester hours of honors courses. Honors courses are of two kinds — those offered by the Honors College and those offered by various departments and colleges. Of the 27 hours required, the following must be completed by all Honors College students:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>HON 1010</td>
<td>Ideas and Society</td>
<td>3</td>
</tr>
<tr>
<td>A minimum of three semester hours of the following:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>HON 2010</td>
<td>Multicultural Toledo</td>
<td>3</td>
</tr>
<tr>
<td>HON 2030</td>
<td>Multicultural Literatures: The Non-European World-Honors-WAC</td>
<td></td>
</tr>
<tr>
<td>A minimum of three semester hours of two upper-division interdisciplinary seminars offered through the Honors program:</td>
<td></td>
<td></td>
</tr>
<tr>

<tr>
<td>HON 4960</td>
<td>Honors Seminar</td>
<td></td>
</tr>
</tbody>
</table>

All requirements for departmental or interdisciplinary honors in their major. This includes the completion of an honors thesis or project supervised by a faculty member in the major department.

- Earn a minimum overall GPA of 3.3

Note: For a student pursuing more than one major, or an interdisciplinary major, the Honors College's departmental honors requirement may be fulfilled through meeting requirements for one of the majors.

Retention Standards

To remain in good standing in the Honors College, a student must:
• Earn a minimum overall GPA of:
  • 3.0 by the end of the first year (typically at least 30 semester hours);
  • 3.1 by the end of the second year (typically at least 60 semester hours); and
  • 3.2 by the end of the third year (typically at least 90 semester hours).
• Make satisfactory progress toward fulfillment of the requirements for a degree with honors in the college.

Departmental Honors
Requirements for departmental honors designations are set by the various departments of the College of Natural Sciences and Mathematics and are described under the departmental entries in this catalog. All departments, however, require successful completion of an honors thesis or project supervised by a faculty member in that department. It is possible for a student to fulfill all departmental requirements and earn the departmental honors citation upon graduation without participating in the Honors College. The reverse is not possible, however, as departmental honors is required to earn the Honors College diploma. Interdisciplinary majors are not eligible for stand-alone Departmental Honors recognition, and must be aligned with the Jesup Scott Honors College designation.

Department of Biological Sciences
Song-Tao Liu, Chair
William Taylor, Associate Chair
Heather Conti, Director of Undergraduate Research
Beth Denzel, Undergraduate Advisor, Honors advisor
Catherine McCoy, Medical Technology Program Director and advisor
Brian Ashburner, Advisor for the University of Salford Exchange Program

Mission
The Department of Biological Sciences exists to provide the best possible educational experiences for all undergraduate and graduate students under its jurisdiction, to advance the frontiers of biology through research and to serve as an intellectual resource to the community at large.

Description
The Department of Biological Sciences is highly interdisciplinary with faculty employing a wide range of innovative experimental approaches and model systems to study topics such as cancer, immunology, reproductive biology, neurobiology, and virology. Our students benefit from the vibrant research and training atmosphere of our department, with undergraduate and graduate students working closely with faculty to find their passion for biology both within the lecture halls and at the lab bench. Together with other departments across the university, we strive to provide an integrative environment to prepare the next generation of leaders in the life sciences.

Degrees Offered
The Department of Biological Sciences offers degree programs for a Bachelor of Science in Biology, and a Bachelor of Arts in Biology. A concentration in neuroscience is available to students in either the Bachelor of Science or Bachelor of Arts in Biology programs. The Department of Environmental Sciences also offers a degree program for a Bachelor of Science in Biology, with a concentration in ecology and organismal biology (see that department’s section for requirements).

Advanced Placement
• Students with a score of 3 will receive credit for BIOL 1120;
• students with a score of 4 will receive credit for BIOL 2170;
• students with a score of 5 will receive credit for BIOL 2150 and BIOL 2170.

Students earning Advanced Placement (AP) scores of 4 or 5 may receive credit for BIOL 2160 and/or BIOL 2180 upon evaluation of their AP laboratory materials by the Department of Biological Sciences.

Junior Year Studies in England for Biology Majors
The Department of Biological Sciences participates in a well-established exchange program with the University of Salford, England. Selected University of Toledo biology (and pre-medical, pre-dental and pre-veterinary) students have the opportunity to spend their junior year at Salford. Participants in the program will pay their instructional and general fees to The University of Toledo. Eligibility to participate in the program is based on criteria established by the Department of Biological Sciences. Information on the program may be obtained from the departmental exchange program advisor, Dr. Brian Ashburner. Details are available on academic issues, living accommodations, recreational opportunities and life in England on the departmental Web site at http://www.utoledo.edu/nsm/bio/salford/.

Degrees Offered
• BA in Biology (p. 346)
• BS in Biology (p. 348)
• BS in Medical Technology (p. 353)
• Minor in Biology (p. 355)

BIOL 1120 Survey Of Biology
[3 credit hours]
A survey of major biological principles and phenomena in various plants and animals with emphasis on man. (not for major credit).
Term Offered: Spring, Summer, Fall
Core Natural Sciences, Trans Mod Natural Science

BIOL 1220 Survey Of Biology Laboratory
[1 credit hour]
(Not for major credit) A series of laboratory exercises that supplement the material discussed in BIOL 1120.
Corequisite: BIOL 1120
Term Offered: Spring, Fall
Core Natural Sciences
**BIOL 2010 Major Concepts In Biology**  
[3 credit hours]  
This course will discuss topics related to the major concepts of biology such as evolution, the cell, the gene and homeostasis. This course is designed for students majoring in science, engineering or other fields that require biology as a prerequisite who have not had sufficient preparation to begin the Fundamentals of Life Science series (BIOL 2150 or BIOL 2170).  
**Term Offered:** Spring, Fall  
Core Natural Sciences

**BIOL 2050 Fundamentals of Neuroscience I**  
[3 credit hours]  
Introduction to the structure and function of the nervous system at cellular and anatomical levels, with an emphasis on neuronal communication, information flow, and integration among major nervous system components.  
**Prerequisites:** BIOL 2170 with a minimum grade of C and CHEM 1230 with a minimum grade of C  
**Term Offered:** Spring, Fall

**BIOL 2150 Fundamentals Of Life Science: Diversity Of Life, Evolution And Adaptation**  
[4 credit hours]  
An introduction to the diversity of multicellular life on earth, evolution and physiological adaptations. Completion of BIOL 2170 prior to enrolling is strongly advised. Prerequisites description: Either (CHEM 1090 or CHEM 1230 or BIOL 2010 or BIOL 2170) with a minimum grade C, or a minimum ALEKS Online Chemistry Initial Placement Assessment result of 50%, or an ACT minimum composite score of 21.  
**Prerequisites:** BIOL 2170 with a minimum grade of C or CHEM 1090 with a minimum grade of C or CHEM 1230 with a minimum grade of C or ACT Composite with a score of 21 or BIOL 2170 with a minimum grade of C or Aleks Chem Placement Highest with a score of 50  
**Term Offered:** Spring, Summer, Fall  
Core Natural Sciences, Trans Mod Natural Science

**BIOL 2160 Fundamentals Of Life Science Laboratory: Diversity Of Life, Evolution And Adaptation**  
[1 credit hour]  
A series of laboratory exercises which supplement the material discussed in BIOL 2150.  
**Corequisites:** BIOL 2150  
**Term Offered:** Spring, Summer, Fall  
Core Natural Sciences, Trans Mod Natural Science

**BIOL 2170 Fundamentals Of Life Science: Biomolecules, Cells, and Inheritance**  
[4 credit hours]  
A general introduction to cell structure and function, energy processing in plants and animals, basic genetics, molecular biology and development. Prerequisites description: Either (CHEM 1090 or CHEM 1230 or BIOL 2010 or BIOL 2150) with a minimum grade C, or a minimum ALEKS Online Chemistry Initial Placement Assessment result of 50%, or an ACT minimum composite score of 21.  
**Prerequisites:** CHEM 1090 with a minimum grade of C or CHEM 1230 with a minimum grade of C or BIOL 2150 with a minimum grade of C or BIOL 2170 with a minimum grade of C or ACT Composite with a score of 21 or Aleks Chem Placement Highest with a score of 50  
**Term Offered:** Spring, Summer, Fall  
Core Natural Sciences, Trans Mod Natural Science

**BIOL 2180 Fundamentals of Life Science Laboratory: Biomolecules, Cells, and Inheritance**  
[1 credit hour]  
A series of laboratory exercises which supplement the material discussed in BIOL 2170.  
**Corequisites:** BIOL 2170  
**Term Offered:** Spring, Summer, Fall

**BIOL 2910 Biological Research**  
[1 credit hour]  
A discussion/demonstration of opportunities for undergraduate research in Biology at the University of Toledo and elsewhere.  
**Term Offered:** Spring

**BIOL 2980 Special Topics in Biology**  
[1-4 credit hours]  
Selected topics in biology for biology majors and non-majors.  
**Prerequisites:** ENGL 1110 with a minimum grade of D- or MATH 1180 with a minimum grade of D-  
**Term Offered:** Spring, Summer, Fall

**BIOL 3010 Molecular Genetics**  
[3 credit hours]  
The principles of heredity at the molecular level, covering gene and chromosome structure, replication and repair, recombination, control of gene expression, control of cell division.  
**Prerequisites:** BIOL 2170 with a minimum grade of C and (CHEM 1230 with a minimum grade of C or CHEM 1240 with a minimum grade of C-)  
**Term Offered:** Spring, Summer, Fall

**BIOL 3020 Molecular Genetics Laboratory**  
[2 credit hours]  
A laboratory course in experimental molecular biology involving gene cloning, analysis of cloned product and other techniques of modern molecular genetics.  
**Corequisites:** BIOL 3010  
**Term Offered:** Spring, Fall

**BIOL 3030 Cell Biology**  
[3 credit hours]  
A study of the internal organization of the eukaryotic cell, organelle and membrane function, cell-cell signaling, cell movement, cell adhesion, and the extracellular matrix.  
**Prerequisites:** BIOL 2170 with a minimum grade of C and CHEM 1240 with a minimum grade of C-  
**Term Offered:** Spring, Summer, Fall

**BIOL 3040 Cell Biology Laboratory**  
[2 credit hours]  
Laboratory exercises involving cell culturing, protein analysis, protein localization and other techniques of modern cell biology.  
**Corequisites:** BIOL 3030  
**Term Offered:** Spring, Summer, Fall

**BIOL 3050 Fundamentals of Neuroscience II**  
[3 credit hours]  
Exploration of the major neural mechanisms that generate, transform, integrate, and store information, drive behavior, maintain physiological homeostasis, and cause neurological disease when compromised.  
**Prerequisites:** NSCI 2050 with a minimum grade of C and CHEM 1240 with a minimum grade of C  
**Term Offered:** Fall
BIOL 3060 Neuroscience Laboratory  
[2 credit hours]  
A practical course providing training in foundational laboratory techniques in the neurosciences.  
**Prerequisites:** NSCI 3050 with a minimum grade of C and BIOL 2180 with a minimum grade of C  
**Term Offered:** Spring  

BIOL 3070 Human Physiology  
[3 credit hours]  
Detailed structural and functional analysis of the human endocrine, nervous, reproductive, circulatory, respiratory, digestive and excretory systems. An emphasis will be placed on system-system interactions and homeostatic mechanisms.  
**Prerequisites:** BIOL 3030 with a minimum grade of C  
**Term Offered:** Spring, Summer, Fall  

BIOL 3090 Developmental Biology  
[3 credit hours]  
Lectures on molecular and cellular interactions in animal and plant embryogenesis and development.  
**Prerequisites:** BIOL 3030 with a minimum grade of C  
**Term Offered:** Spring, Fall  

BIOL 3100 Developmental Biology Laboratory  
[1 credit hour]  
An analysis of development by biochemical and biological methods using live materials.  
**Prerequisites:** BIOL 3090 (may be taken concurrently) with a minimum grade of C  
**Term Offered:** Fall  

BIOL 3210 Human Nutrition  
[3 credit hours]  
Lectures covering nutrition and transport in humans, role of nutrition in growth and development, nutritional diseases.  
**Prerequisites:** BIOL 3070 with a minimum grade of C  
**Term Offered:** Spring, Fall  

BIOL 3510 Comparative Vertebrate Anatomy  
[4 credit hours]  
A comparative treatment of the evolutionary and developmental history of the major vertebrate organ systems.  
**Prerequisites:** (BIOL 2150 with a minimum grade of C and BIOL 2160 with a minimum grade of C and BIOL 2170 with a minimum grade of C and BIOL 2180 with a minimum grade of C)  
**Term Offered:** Fall  

BIOL 3910 Research Project Laboratory  
[2-3 credit hours]  
Provides hands-on authentic research experience and comprehensive understanding of the scientific process. May be repeated once for credit, a maximum of 3 hours may be applied to BIOL elective credits in the major or minor.  
**Prerequisites:** BIOL 2170 with a minimum grade of D- and BIOL 2180 with a minimum grade of D-  
**Term Offered:** Spring, Fall  

BIOL 4010 Molecular Biology  
[3 credit hours]  
Analysis of the regulatory mechanisms for nucleic acid and protein synthesis; genome structure; recombination; genetic damage and repair.  
**Prerequisites:** BIOL 3030 with a minimum grade of C  
**Term Offered:** Spring, Fall  

BIOL 4030 Microbiology  
[3 credit hours]  
Lectures on the principles of modern microbiology and virology, including metabolism, growth, cellular morphology, genetics and host-parasite relationships. Bacterial and viral diseases will be illustrated.  
**Prerequisites:** BIOL 3030 with a minimum grade of C and CHEM 2410 with a minimum grade of C  
**Term Offered:** Spring, Fall  

BIOL 4031 Cell Biology of Neurons and Glia  
[3 credit hours]  
An advanced course examining the cell biology of neurons and glia in normal nervous system function and disease.  
**Prerequisites:** NSCI 3050 with a minimum grade of C and BIOL 3030 with a minimum grade of C  
**Term Offered:** Fall  

BIOL 4040 Microbiology Laboratory  
[1 credit hour]  
Laboratories utilizing basic microbiological techniques and illustrating principles of growth, identification and genetics and control of microbes.  
**Prerequisites:** BIOL 4030 (may be taken concurrently) with a minimum grade of C  
**Term Offered:** Spring, Fall  

BIOL 4050 Immunology  
[3 credit hours]  
Lectures on the chemical, genetic and cellular basis of the immune response.  
**Prerequisites:** BIOL 3030 with a minimum grade of C  
**Term Offered:** Spring, Fall  

BIOL 4060 Immunology Laboratory  
[1 credit hour]  
Laboratory studies of the immune response.  
**Corequisites:** BIOL 4050  
**Term Offered:** Spring, Fall  

BIOL 4090 Cancer Biology  
[3 credit hours]  
Introduction to carcinogenesis and the cellular and molecular features of malignancy. Methods to diagnose and treat malignancies will also be presented.  
**Prerequisites:** (BIOL 3030 with a minimum grade of C and BIOL 3010 with a minimum grade of C)  
**Term Offered:** Fall  

BIOL 4110 Human Genetics and Genomics  
[3 credit hours]  
A systematic survey of genetic variation in man with emphasis on modern research methodology including genomics.  
**Prerequisites:** BIOL 3030 with a minimum grade of C  
**Term Offered:** Spring, Fall
BIOL 4170 Developmental Genetics
[3 credit hours]
Survey of animal and plant developmental genetics. Basic principles and methods of genetic analysis, model systems, genetic basis of tissue patterning, evolutionary implications and applications in tissue and plant engineering.
Prerequisites: BIOL 3010 with a minimum grade of C
Term Offered: Spring

BIOL 4210 Molecular Basis of Disease
[3 credit hours]
Examines the genetic, molecular, and biochemical defects associated with some of the most common human diseases. Includes a review of current research into the molecular causes of selected diseases.
Prerequisites: BIOL 3010 with a minimum grade of C and BIOL 3030 with a minimum grade of C
Term Offered: Spring, Fall

BIOL 4230 Comparative Animal Physiology
[3 credit hours]
Lectures on the comparative and environmental physiology of vertebrates and invertebrates including metabolism, temperature regulation, respiration, circulation, excretion and osmotic regulation.
Prerequisites: (BIOL 3030 with a minimum grade of C and BIOL 3070 with a minimum grade of C)
Term Offered: Spring

BIOL 4250 Introduction to Neurobiology
[3 credit hours]
An introduction to the molecular, genetic and cellular aspects of neurobiology in humans and model organisms. Topics include neuronal physiology and signaling, neural development, sensation, muscle control, learning and memory.
Prerequisites: BIOL 3030 with a minimum grade of C
Term Offered: Spring, Fall

BIOL 4330 Parasitology
[3 credit hours]
A study of the host-parasite interaction including aspects of parasite morphology, taxonomy, development and ecology.
Prerequisites: (BIOL 2150 with a minimum grade of C and BIOL 2170 with a minimum grade of C)
Term Offered: Spring, Fall

BIOL 4700 Biological Literature And Communication
[3 credit hours]
A writing intensive course that focuses on reading original literature in biology in a variety of formats. Required of all biology majors.
Prerequisites: BIOL 3030 with a minimum grade of C
Term Offered: Spring, Summer, Fall

BIOL 4790 Biology Field Trip
[2-4 credit hours]
Faculty directed course that incorporates extensive field experience and individual projects.
Term Offered: Spring

BIOL 4910 Undergraduate Research
[1-3 credit hours]
Faculty directed research. Both oral and written reports of results required.
Term Offered: Spring, Summer, Fall

BIOL 4940 Extramural Research
[1-4 credit hours]
Prior consent of both the department and the proposed supervisor. Scientist-supervised study of research done in an extramural research institute or scientific laboratory. Written and oral reports to the department required. Maximum of 6 hours may count toward BIOL electives.
Prerequisites: (BIOL 2150 with a minimum grade of C and BIOL 2170 with a minimum grade of C)
Term Offered: Spring, Summer, Fall

BIOL 4950 Internship In Biology
[1-12 credit hours]
Supervised practical experience in the field of biology. Maximum of 6 hours may be used as biology elective credit for BS degree.
Term Offered: Spring, Summer

BIOL 4980 Advanced Topics In Biology
[1-3 credit hours]
An advanced course for Biology majors in an important area of biology. May be repeated for credit under different specialty numbers (topics).
Term Offered: Spring

BIOL 4990 Independent Study In Biology
[1-3 credit hours]
Faculty directed readings or projects in a specific area of biology.
Term Offered: Spring, Summer, Fall

Honors in Biology

The Department of Biological Sciences Honors Program is available for qualified majors. Interested students should contact the departmental honors advisor before the beginning of the sophomore year.

To receive an undergraduate degree with honors in biology, all requirements for the B.S. or B.A. degree plus an additional 6 credits of Undergraduate Research/Honors Thesis (BIOL 4910) must be completed with a minimum GPA of 3.2 overall and in BIOL courses. The program of study must include honors sections of at least two BIOL courses in addition to BIOL 4910. No more than 3.0 hours of undergraduate research can be taken in any one semester. The Undergraduate Research/Honors Thesis credits are completed under the direction of a faculty research director selected by the student. Students must submit a written Honors Thesis to the department before completion of their senior year and make a formal public presentation of their research (typically at the spring Biology Undergraduate Research Symposium). The requirement of Honors Thesis research may be fulfilled in one of three ways:

1. Laboratory research in a Department of Biological Sciences faculty member’s laboratory;
2. Laboratory research in a summer or academic year program, in which the student carries out full-time independent research for at least 10 weeks under the direction of a senior scientist on a topic approved by the departmental honors advisor and/or the department chair;
3. Laboratory research in the laboratory of a senior scientist who is not a member of the Department of Biological Sciences on a topic approved by the departmental honors advisor and/or the department chair.

For options 2 and 3, it is very important that the student get his/her proposed thesis research project approved in advance by the
departmental honors advisor and/or the department chair, who will monitor progress and direct the BIOL 4910 courses.

**BA in Biology**

The Bachelor of Arts degree in Biology requires a minimum of 120 hours of coursework and provides students with a balance of liberal arts and cutting-edge knowledge in the biological sciences to prepare them for rewarding careers applying biological knowledge to solving real world problems. Because of its broad focus, the Bachelor of Arts degree is ideal preparation for careers such as biology educator, health-care specialist, laboratory technician, nutritionist, patent lawyer, regulatory affairs specialist, physician's assistant and many more.

Program includes:
- Biology, BA
- Biology-Neuroscience Concentration, BA

**Biology, BA**

For the B.A. degree in biology a minimum of 33 hours of BIOL courses are required.

The following courses must be included:
- BIOL 2170 Fundamentals of Life Science: Biomolecules, Cells, and Inheritance
- BIOL 2180 Fundamentals of Life Science Laboratory: Biomolecules, Cells, and Inheritance
- BIOL 2190 Fundamentals Of Life Science: Diversity Of Life, Evolution And Adaptation
- BIOL 2160 Fundamentals Of Life Science Laboratory: Diversity Of Life, Evolution And Adaptation
- BIOL 3010 Molecular Genetics
- BIOL 3030 Cell Biology
- BIOL 3070 Human Physiology
- BIOL 4700 Biological Literature and Communication

A minimum of eleven hours of advanced elective BIOL courses (3000 - 4000 level). A maximum of three credit hours of BIOL 4910 not applied to Departmental Honors may be used to fulfill the advanced elective credits.

The following related courses in mathematics, physics and chemistry are also required:

- MATH 2600 Introduction To Statistics (or MATH 2640 or PSY 2100)
- MATH 1320 & MATH 1330 College Algebra and Trigonometry (or MATH 1340 or (MATH 1750 and MATH 1760))
- CHEM 1230 General Chemistry I
- CHEM 1280 General Chemistry Lab I
- CHEM 1240 General Chemistry II
- CHEM 1290 General Chemistry Lab II
- CHEM 2410 Organic Chemistry I
- CHEM 2460 Organic Chemistry Laboratory I for Non-Majors
- CHEM 2420 Organic Chemistry II
- CHEM 2470 Organic Chemistry Laboratory II for Non-Majors
- PHYS 2070 General Physics I (or PHYS 2130)
- PHYS 2080 General Physics II (or PHYS 2140)

No classes used to satisfy the requirements of the Biology major, including related courses, may be taken P/NC with the exceptions of BIOL 4910, BIOL 4950, and BIOL 4990

**Biology-Neuroscience Concentration, BA**

For the B.A. degree in biology a minimum of 33 hours of BIOL courses are required.

The following courses must be included:
- BIOL 2170 Fundamentals of Life Science: Biomolecules, Cells, and Inheritance
- BIOL 2180 Fundamentals of Life Science Laboratory: Biomolecules, Cells, and Inheritance
- BIOL 2190 Fundamentals Of Life Science: Diversity Of Life, Evolution And Adaptation
- BIOL 2160 Fundamentals Of Life Science Laboratory: Diversity Of Life, Evolution And Adaptation
- BIOL 3010 Molecular Genetics
- BIOL 3030 Cell Biology
- BIOL 3070 Human Physiology
- BIOL 4700 Biological Literature and Communication

A minimum of eleven hours of advanced elective BIOL courses (3000 - 4000 level). A maximum of three credit hours of BIOL 4910 not applied to Departmental Honors may be used to fulfill the advanced elective credits.

The following related courses in mathematics, physics and chemistry are also required:

- MATH 2600 Introduction To Statistics (or MATH 2640 or PSY 2100)
- MATH 1320 & MATH 1330 College Algebra and Trigonometry (or MATH 1340 or (MATH 1750 and MATH 1760))
- CHEM 1230 General Chemistry I
- CHEM 1280 General Chemistry Lab I
- CHEM 1240 General Chemistry II
- CHEM 1290 General Chemistry Lab II
- CHEM 2410 Organic Chemistry I
- CHEM 2460 Organic Chemistry Laboratory I for Non-Majors
- CHEM 2420 Organic Chemistry II
- CHEM 2470 Organic Chemistry Laboratory II for Non-Majors
- PHYS 2070 General Physics I (or PHYS 2130)
- PHYS 2080 General Physics II (or PHYS 2140)

No classes used to satisfy the requirements of the Biology major may be taken P/NC with the exceptions of BIOL 4910, BIOL 4950, and BIOL 4990

**Neuroscience Concentration**: A concentration in neuroscience is available to students pursuing a BA in Biology. Students must apply the following courses towards their BA in Biology degree:

- BIOL 4250 Introduction to Neurobiology
- BIOL 4910 Undergraduate Research (in a section with a neuroscience focus)
- BIOL 4700 Biological Literature And Communication (in a section with a neuroscience focus, usually offered only one semester a year)
- PSY 3400 Cognitive Neuropsychology or
  - PSY 3610 Behavioral Neuroscience
Biology, BA

Below is a sample plan of study. Consult your degree audit for your program requirements.

First Term
- NSM 1000 Natural Sciences & Mathematics 2
- ENGL 1110 College Composition I 3
- CHEM 1230 General Chemistry I 4
- CHEM 1280 General Chemistry Lab I 1
- MATH 1320 College Algebra 3
- Arts/Humanities Core 3
- Hours 16

Second Term
- BIOL 2170 Fundamentals of Life Science: Biomolecules, Cells, and Inheritance 4
- BIOL 2180 Fundamentals of Life Science Laboratory: Biomolecules, Cells, and Inheritance 1
- CHEM 1240 General Chemistry II 4
- CHEM 1290 General Chemistry Lab II 1
- MATH 1330 Trigonometry 3
- ENGL 1130 College Composition II: Academic Disciplines And Discourse 3
- Hours 16

Third Term
- BIOL 2150 Fundamentals Of Life Science: Diversity Of Life, Evolution And Adaptation 4
- BIOL 2160 Fundamentals Of Life Science Laboratory: Diversity Of Life, Evolution And Adaptation 1
- CHEM 2410 Organic Chemistry I 3
- CHEM 2460 Organic Chemistry Laboratory I for Non-Majors 1
- Elementary Foreign Language I 4
- Social Sciences Core 3
- Hours 16

Fourth Term
- BIOL 3010 Molecular Genetics 3
- CHEM 2420 Organic Chemistry II 3
- CHEM 2470 Organic Chemistry Laboratory II for Non-Majors 1
- Elementary Foreign Languages II 4
- Arts/Humanities Core 3
- Hours 14

Fifth Term
- BIOL 3030 Cell Biology 3
- PHYS 2070 General Physics I 5
- Fine Arts College Requirement 3
- Writing Across the Curriculum (WAC) 3
- Hours 14

Sixth Term
- BIOL 3070 Human Physiology 3
- PHYS 2080 General Physics II 5
- Diversity of US 3
- Social Sciences College Requirement 3
- Hours 14

Seventh Term
- MATH 2600 Introduction To Statistics 3
- or MATH 2640 or Statistics for Applied Science 3
- BIOL 3000-4000 Level Electives 6
- English Literature College Requirement 3
- Non-US Diversity 3
- Hours 15

Eighth Term
- BIOL 4700 Biological Literature And Communication (WAC) 3
- BIOL 3000-4000 Level Elective 6
- History Core College Requirement 3
- Social Science Core 3
- Hours 15

Total Hours 120

Biology-Neuroscience Concentration, BA

Below is a sample plan of study. Consult your degree audit for your program requirements.

First Term
- NSM 1000 Natural Sciences & Mathematics 2
- ENGL 1110 College Composition I 3
- CHEM 1230 General Chemistry I 4
- CHEM 1280 General Chemistry Lab I 1
- MATH 1320 College Algebra 3
- Arts/Humanities Core 3
- Hours 16

Second Term
- BIOL 2170 Fundamentals Of Life Science: Diversity Of Life, Evolution And Adaptation 4
- BIOL 2180 Fundamentals Of Life Science Laboratory: Diversity Of Life, Evolution And Adaptation 1
- CHEM 1240 General Chemistry II 4
- CHEM 1290 General Chemistry Lab II 1
- MATH 1330 Trigonometry 3
- ENGL 1130 College Composition II: Academic Disciplines And Discourse 3
- Hours 16

Third Term
- BIOL 3010 Molecular Genetics 3
- CHEM 2420 Organic Chemistry II 3
- CHEM 2470 Organic Chemistry Laboratory II for Non-Majors 1
- Elementary Foreign Languages II 4
- Arts/Humanities Core 3
- Hours 14

Fourth Term

**Hours** 15

**Total Hours** 120

1. Students will demonstrate a thorough understanding of fundamental concepts of cell and molecular biology, chemistry, biochemistry, evolutionary biology, and physiology. (Broad and integrated knowledge)
2. Students will demonstrate the ability to use fundamental concepts of biological science to analyze and evaluate biological observations. (Applied and collaborative learning)
3. Students will act effectively as a member of a team. (Applied and collaborative learning)
4. Students will understand and comply with ethical behavior in coursework, research, and the use of biological information. (Civic and global learning)
5. Students will be able to perform effective primary literature searches and identify relevant primary literature. (Specialized knowledge)
6. Students will be able to read primary biological literature and apply critical thinking to the analysis and interpretation of biological experiments. (Applied and collaborative learning)
7. Students will demonstrate appropriate oral and written skills to communicate concepts in biology to the public, peers, and specialists. (Intellectual and communication skills/Applied and collaborative learning)
8. Students will demonstrate the ability to incorporate diverse view and perspectives. (Civic and global learning)
9. Students will demonstrate competence in cultural diversity and to be able to read, write, and converse at a basic level in a foreign language. (Civic and global learning)

**BS in Biology**

The Bachelor of Science degree in Biology requires a minimum of 120 hours of coursework and provides students with a strong foundation in molecular and cellular biology and develops their critical thinking skills, to prepare for careers in research, medicine, dentistry, bioinformatics, veterinary medicine, and many others. This degree is ideal for students planning on attending professional school or pursuing a master’s or Ph.D. degree in the biological sciences.

Program includes:
- Biology, BS
  - Biology-Bioinformatics Concentration, BS
  - Biology-Neuroscience Concentration, BS

**Bachelor of Science in Biology**

The following courses must be included:
- BIOL 2170 Fundamentals of Life Science: Biomolecules, Cells, and Inheritance
- BIOL 2180 Fundamentals of Life Science Laboratory: Biomolecules, Cells, and Inheritance
- BIOL 2150 Fundamentals Of Life Science: Diversity Of Life, Evolution And Adaptation
- BIOL 2160 Fundamentals Of Life Science Laboratory: Diversity Of Life, Evolution And Adaptation
- BIOL 3010 Molecular Genetics
- BIOL 3030 Cell Biology
- BIOL 3070 Human Physiology
- BIOL 3090 Developmental Biology
- BIOL 4700 Biological Literature and Communication

A minimum of nine hours of advanced elective BIOL courses (3000 - 4000 level), including two laboratory or field experiences. A maximum of three credit hours of BIOL 4910 not applied to Departmental Honors may be used to fulfill the advanced elective credits.

The following related courses in mathematics, physics and chemistry are also required:
BACHELOR OF SCIENCE IN BIOLOGY (Bioinformatics CONCENTRATION)

Please note: In order to declare this concentration you must be pursuing the BS in Biology + MS in Bioinformatics dual degree pipeline program.

The following biology courses must be included:

- BIOL 2150 (https://catalog.utoledo.edu/search/?P=BIOL%202150) Fundamentals Of Life Science: Diversity Of Life, Evolution And Adaptation (4 credits)
- BIOL 2160 (https://catalog.utoledo.edu/search/?P=BIOL%202160) Fundamentals Of Life Science Laboratory: Diversity Of Life, Evolution And Adaptation (1 credit)
- BIOL 2170 (https://catalog.utoledo.edu/search/?P=BIOL%202170) Fundamentals of Life Science: Biomolecules, Cells, and Inheritance (4 credits)
- BIOL 2180 (https://catalog.utoledo.edu/search/?P=BIOL%202180) Fundamentals of Life Science Laboratory: Biomolecules, Cells, and Inheritance (1 credit)
- BIOL 3010 (https://catalog.utoledo.edu/search/?P=BIOL%203010) Molecular Genetics (3 credits)
- BIOL 3030 (https://catalog.utoledo.edu/search/?P=BIOL%203030) Cell Biology (3 credits)
- BIOL 4010 (https://catalog.utoledo.edu/search/?P=BIOL%204010) Molecular Biology (3 credits)
- OR BIOL 4110 (https://catalog.utoledo.edu/search/?P=BIOL%204110) Human Genetics and Genomics (3 credits)
- OR BIOL 4210 (https://catalog.utoledo.edu/search/?P=BIOL%204210) Molecular Basis of Disease (3 credits) (replaces later required graduate course)
- BIOL 4700 (https://catalog.utoledo.edu/search/?P=BIOL%204700) Biological Literature and Communication (3 credits)
- BIOL 3020 (https://catalog.utoledo.edu/search/?P=BIOL%203020) Molecular Genetics Lab (2 credits)
- BIOL 4910 (https://catalog.utoledo.edu/search/?P=BIOL%204910) Undergraduate Research (1 credit)

Honors students in the Bioinformatics Concentration may co-apply three credit hours of BIOL4910 to both the Honors and Bioinformatics Concentration requirements (provided the research was conducted in a laboratory making significant use of bioinformatic analyses). However, consistent with Honors Program policy, any BIOL4910 credit hours used to satisfy Honors requirements cannot be applied towards the two Laboratory or Field Experience requirements of the BS degree, regardless of whether they are applied within the Bioinformatics Concentration.

No classes used to satisfy the requirements of the Biology major may be taken P/NC with the exceptions of BIOL 4910 (https://catalog.utoledo.edu/search/?P=BIOL%204910), BIOL 4950 (https://catalog.utoledo.edu/search/?P=BIOL%204950), and BIOL 4990 (https://catalog.utoledo.edu/search/?P=BIOL%204990).

Bioinformatics Concentration: A concentration in bioinformatics is available to students pursuing a BS in Biology. This is only part of a pipeline program, for students seeking to earn both a BS in Biology and a Masters in Bioinformatics in 5-5.5 years. Students must apply the following courses towards their BS in Biology degree. Note that three of these are graduate-level courses, open only to students in the pipeline program, and those nine credits will count towards BOTH the BS in Biology AND the MS in Bioinformatics:

- BIPG 5100 (https://catalog.utoledo.edu/search/?P=BIPG%205100) Fundamentals of Bioinformatics (3 credits)
- BIPG 5200 (https://catalog.utoledo.edu/search/?P=BIPG%205200) Statistical Methods in Bioinformatics (3 credits)
- BIPG 6100 (https://catalog.utoledo.edu/search/?P=PSY%206100) Bioinformatic Computation (3 credits)

Total Credits: 34

The following related courses in mathematics, physics and chemistry are also required:

- MATH 2600 (https://catalog.utoledo.edu/search/?P=MATH%202600) Introduction To Statistics (or MATH 2640 or PSY 2100)
- MATH 1750 (https://catalog.utoledo.edu/search/?P=MATH%201750) Calculus for the Life Sciences with Applications I (or MATH 1830 (https://catalog.utoledo.edu/search/?P=MATH%201830) or MATH 1850 (https://catalog.utoledo.edu/search/?P=MATH%201850))
- MATH 1760 (https://catalog.utoledo.edu/search/?P=MATH%201760) Calculus for the Life Sciences with Applications I (or MATH 1840 (https://catalog.utoledo.edu/search/?P=MATH%201840) or MATH 1860 (https://catalog.utoledo.edu/search/?P=MATH%201860))
- CHEM 1230 (https://catalog.utoledo.edu/search/?P=CHEM%201230) General Chemistry I
- CHEM 1280 (https://catalog.utoledo.edu/search/?P=CHEM%201280) General Chemistry Lab I
CHEM 1240 (https://catalog.utoledo.edu/search/?P=CHEM %201240) General Chemistry II
CHEM 1290 (https://catalog.utoledo.edu/search/?P=CHEM %201290) General Chemistry Lab II
CHEM 2410 (https://catalog.utoledo.edu/search/?P=CHEM %202410) Organic Chemistry I
CHEM 2460 (https://catalog.utoledo.edu/search/?P=CHEM %202460) Organic Chemistry Laboratory I for Non-Majors
CHEM 2420 (https://catalog.utoledo.edu/search/?P=CHEM %202420) Organic Chemistry II
CHEM 3510 (https://catalog.utoledo.edu/search/?P=CHEM %203510) Biochemistry I
CHEM 3520 (https://catalog.utoledo.edu/search/?P=CHEM %203520) Biochemistry II
PHYS 2070 (https://catalog.utoledo.edu/search/?P=PHYS %202070) General Physics I (or PHYS 2130 (https://catalog.utoledo.edu/search/?P=PHYS%202130))
PHYS 2080 (https://catalog.utoledo.edu/search/?P=PHYS %202080) General Physics II (or PHYS 2140 (https://catalog.utoledo.edu/search/?P=PHYS%202140))

Bachelor of Science in Biology (Neuroscience Concentration)

The following courses must be included:

BIOL 2170 Fundamentals of Life Science: Biomolecules, Cells, and Inheritance
BIOL 2180 Fundamentals of Life Science Laboratory: Biomolecules, Cells, and Inheritance
BIOL 2150 Fundamentals Of Life Science: Diversity Of Life, Evolution And Adaptation
BIOL 2160 Fundamentals Of Life Science Laboratory: Diversity Of Life, Evolution And Adaptation
BIOL 3010 Molecular Genetics
BIOL 3030 Cell Biology
BIOL 3070 Human Physiology
BIOL 3090 Developmental Biology
BIOL 4700 Biological Literature and Communication

A minimum of nine hours of advanced elective BIOL courses (3000 - 4000 level), including two laboratory or field experiences. A maximum of three credit hours of BIOL 4910 can be applied to Departmental Honors. The following related courses in mathematics, physics and chemistry are also required:

MATH 2600 Introduction to Statistics (or MATH 2640 or PSY 2100)
MATH 1750 Calculus for the Life Sciences with Applications I (or MATH 1830 or MATH 1850)
MATH 1760 Calculus for the Life Sciences with Applications II (or MATH 1840 or MATH 1860)
CHEM 1230 General Chemistry I
CHEM 1280 General Chemistry Lab I
CHEM 1240 General Chemistry II
CHEM 1290 General Chemistry Lab II
CHEM 2410 Organic Chemistry I
CHEM 2460 Organic Chemistry Laboratory I for Non-Majors
CHEM 2420 Organic Chemistry II
CHEM 3510 Biochemistry I
CHEM 3520 Biochemistry II
PHYS 2070 General Physics I (or PHYS 2130)
PHYS 2080 General Physics II (or PHYS 2140)

No classes used to satisfy the requirements of the Biology major or minor may be taken P/NC with the exceptions of BIOL 4910, BIOL 4950, and BIOL 4990.

Neuroscience Concentration: A concentration in neuroscience is available to students pursuing a BS in Biology. Students must apply the following courses towards their BS in Biology degree:

BIOL 4250 Introduction to Neurobiology
BIOL 4910 Undergraduate Research (in a section with a neuroscience focus)
BIOL 4700 Biological Literature And Communication (in a section with a neuroscience focus)
PSY 3400 Cognitive Neuropsychology or PSY 3610 Behavioral Neuroscience

Note: Honors students in the Neuroscience Concentration may co-apply three credit hours of BIOL 4910 to both the Honors and Neuroscience Concentration requirements (provided the research was conducted in a neuroscience laboratory). However, consistent with Honors Program policy, any BIOL 4910 credit hours used to satisfy Honors requirements cannot be applied towards the two Laboratory or Field Experience requirements of the BS degree, regardless of whether they are applied within the Neuroscience Concentration.

Concentration in Ecology and Organismal Biology: See the Department of Environmental Sciences (p. 370) section of this catalog.

BIOL 4700  Biological Literature And Communication ((Neuro))  3
Electives to get to 120 hours  6
Diversity of US  3

Hours  15

Total Hours  120-121

1 May take different 3000-4000 level lab in different semester, 2 are required.
2 9 hours of 3000-4000 level BIOL electives are required. Hours from the 3000-4000 level BIOL lab requirement count toward requirement.

The recommended Composition II option for students in the Medical Technology program is ENGL 2950 Science And Technical Report Writing.

BS in Medical Technology

This degree program prepares you for certification as a Medical Laboratory Scientist (Medical Technology Scientist). You will complete three years of baccalaureate college work, and then complete 12 months of hospital based clinical training in medical technology. A certification examination is taken at the successful completion of a hospital training program. The requirements for certification are established by the Board of Certification of the American Society of Clinical Pathologists.

Acceptance into the clinical year of the program is competitive and application is made during the fall of the Junior year. In order to be admitted to the clinical year, completion of 90 semester hours of college work with an accumulated GPA of no less than 2.5 overall and a grade of C or better in the pre-clinical science courses is required.

The following foundational science and math courses are required to be completed with a grade of C or better prior to beginning study in the clinical year:

CHEM 1230 General Chemistry I
CHEM 1280 General Chemistry Lab I
CHEM 1240 General Chemistry II
CHEM 1290 General Chemistry Lab II
CHEM 2410 Organic Chemistry I
CHEM 2460 Organic Chemistry Laboratory I for Non-Majors
CHEM 2420 Organic Chemistry II
CHEM 2470 Organic Chemistry Laboratory II for Non-Majors

BIOL 2170 Fundamentals of Life Science: Biomolecules, Cells, and Inheritance
BIOL 2180 Fundamentals of Life Science Laboratory: Biomolecules, Cells, and Inheritance
BIOL 2150 Fundamentals Of Life Science: Diversity Of Life, Evolution And Adaptation
BIOL 2160 Fundamentals Of Life Science Laboratory: Diversity Of Life, Evolution And Adaptation
BIOL 3010 Molecular Genetics
BIOL 3030 Cell Biology
BIOL 3070 Human Physiology
Human or Vertebrate Anatomy with lab (either EXSC 2510 & EXSC 2520 or BIOL 3510)

BIOL 4030 & BIOL 4040 Microbiology with Laboratory
BIOL 4050 & BIOL 4060 Immunology With Laboratory
PHYS 2070 General Physics I
PHYS 2080 General Physics II
MATH 1320 College Algebra
MATH 2600 Introduction To Statistics
MEDT 2010 Clinical Laboratory Techniques

The clinical program in the fourth year includes externship sites at the University of Toledo Medical Center laboratory and ProMedica hospital laboratories. A grade of C or better is required in all the clinical year.
courses (MEDT 4000+) in order to successfully complete the program. Upon successful completion, you will be awarded the degree of Bachelor of Science in Medical Technology and you are then eligible to take the national certification examination.

A description of the program is available at https://www.utoledo.edu/nsm/bio/undergraduate/BS-medical-technology.html. The description includes a sample 4-year curriculum. The medical technology adviser will assist students in planning the sequence in which the pre-clinical courses are taken during the student’s years at the university. Therefore, interested applicants should consult with the medical technology program advisor, before selecting this professional career option.

Below is a sample plan of study. Consult your degree audit for your program requirements.

Demonstrate a level of knowledge of the field that is commensurate with that expected for ASCP certified Medical Laboratory Scientists. Perform routine and complex analytical tests on all specimens received in the laboratory, such as blood, body fluids and other types of specimens.
Operate routinely used laboratory instruments and follow their preventive maintenance protocols. Be able to identify malfunctions and make minor repairs or adjustments.

Utilize basic scientific principles in developing new techniques and procedures and be able to evaluate the usefulness and practicality for the laboratory situation presented, i.e., finance, personnel, physical space. Correlate data from other sections of the laboratory in deciding whether results are correct and accurate; confirm abnormal findings and timely report critical findings according to the institution’s established protocols.

Examine and evaluate quality control results and institute correcting procedures if results are out of control.

Demonstrate concern for and cooperation with other members of the health care team, patients, their family members and visitors.

Recognize the need for continued educational growth within the profession to ensure progress toward professional competence.

Respect patient’s rights and privacy and the confidentiality of patient’s health information.

Abide by the laboratory’s safety policies. Recognize unsafe conditions, correct them and/or report them to the supervisor.

Abide by the code of ethics for the profession.

If placed in a supervisory position, understand and apply the principles of management and supervision.

### Minor in Biology

The minor in biology requires 22 credits including the following required courses and a minimum GPA of 2.0 in these courses.

No classes used to satisfy the requirements of the Biology minor, may be taken P/NC with the exceptions of BIOL 4910, BIOL 4950, and BIOL 4990.

### Department of Chemistry & Biochemistry

Jon Kirchhoff, Chair and Distinguished University Professor
Cora Lind-Kovacs, Associate Chair
Steven Sucheck, Director of Graduate Studies
Jianglong Zhu, Undergraduate Advising Coordinator
John Bellizzi, Honors Advisor
Xiche Hu, Undergraduate Advisor
Eric Findsen, Undergraduate Advisor
Dragan Isailovic, Undergraduate Advisor
Timothy Mueser, Undergraduate Advisor
Joseph Schmidt, Undergraduate Advisor, Honors Advisor
Wei Li, Undergraduate Advisor

### Degrees Offered

The Department of Chemistry and Biochemistry offers degree programs for a Bachelor of Arts or a Bachelor of Science in chemistry or biochemistry.

Both the Bachelor of Science degrees in chemistry and in biochemistry are certified by the American Chemical Society Committee on Professional Training (https://www.acs.org/content/acs/en/about/governance/committees/professional-training.html)

A minor in chemistry and a minor in Green Chemistry and Engineering are also available.

### Department Mission

The Department of Chemistry and Biochemistry strives (1) to present outstanding teaching and the highest quality education in chemistry and biochemistry to students at all levels and in all disciplines, (2) to develop and maintain leading research programs with national and international reputations, both in support of our teaching programs and to add to scientific and technological base of the State of Ohio and the Nation, (3) to advance the development of teaching and research qualifications of our students and faculty, (4) to continuously improve the high quality undergraduate and graduate programs with emphasis on hands on training, and (5) to serve the University, the Community, and Society through the unique experiences and talents of our students, staff and faculty.

### Advanced Placement

- Students with a score of 3 on the Chemistry Advanced Placement Exam will receive credit for CHEM 1100 and placement into CHEM 1230 and CHEM 1280;
- Students with a score of 4 will receive credit for CHEM 1230 and CHEM 1280;
- Students with a score of 5 will receive credit for CHEM 1230, CHEM 1280, CHEM 1240, and CHEM 1290.

### Experience in Research

The department offers experience in research under faculty guidance at all levels, in CHEM 2910, CHEM 3910 and CHEM 4910. Students are encouraged to talk with faculty members about research participation and to consult with more than one faculty member about appropriate projects. A student who wishes to participate in research should obtain the consent of a faculty member who agrees to guide this work and the approval of a departmental undergraduate advisor before the first day of the first semester that he/she enrolls for CHEM 2910, CHEM 3910 or CHEM 4910. Students may enroll in the different courses, CHEM 2910, CHEM 3910 and CHEM 4910, with different faculty members.

### Junior Year Studies in England for Chemistry and Biochemistry Majors

The University of Toledo has an exchange program agreement with the University of Salford, England. Selected University of Toledo students
spend their junior years at Salford, and students in the Salford threeyear chemistry honors program spend their second year at the University of Toledo. Eligibility is based on scholastic standing. Participants in the program pay their instructional and general fees to their home institutions. Information on the program may be obtained from Dr. Brian Ashburner, Director of the UTOLeido-Salford Exchange Program.

**Degrees Offered**

- BA in Biochemistry (p. 362)
- BA in Chemistry (p. 364)
- BS in Biochemistry (p. 366)
- BS in Chemistry (p. 368)
- Minor in Chemistry (p. 369)
- Minor in Green Chemistry & Engineering (p. 370)

**CHEM 1090 Elementary Chemistry**

[3 credit hours]

For students who major in science, engineering or other fields which require chemistry as a prerequisite subject who have not had a previous course in chemistry and whose preparation is not sufficient to begin General Chemistry (CHEM 1230).

**Prerequisites:** MATH 1200 with a minimum grade of C or MATH 1320 with a minimum grade of C or MATH 1750 with a minimum grade of C or MATH 1830 with a minimum grade of C or MATH 1850 with a minimum grade of C or ACT Math with a score of 20 or Aleks Math Placement Test with a score of 046 or Math - Coll Algebra Placement with a score of 10 or MATH SECTION SCORE with a score of 510

**Term Offered:** Spring, Summer, Fall

**CHEM 1100 Chemistry And Society**

[3 credit hours]

An introduction to basic chemistry and a survey of the impact that chemistry has on society. Topics include: power, energy, and fuels; water and pollution; soaps and detergents; nutrition; poisons and toxins; plastics and polymers; drugs.

**Term Offered:** Spring, Summer, Fall

**CHEM 1110 Elementary Chemistry for the Health Sciences**

[3 credit hours]

The study of chemistry for students that are studying nursing or other allied health related fields who have not had a previous course in chemistry or whose preparation in chemistry is not sufficient to begin Chemistry for the Health Sciences (CHEM 1120).

**Prerequisites:** ACT Math with a score of 20 or MATH SECTION SCORE with a score of 520 or Aleks Math Placement Test with a score of 046 or Math - Coll Algebra Placement with a score of 10 or MATH 1200 with a minimum grade of C or MATH 1320 with a minimum grade of C or MATH 1340 with a minimum grade of C or MATH 1750 with a minimum grade of C or MATH 1830 with a minimum grade of C or MATH 1850 with a minimum grade of C

**Term Offered:** Spring, Fall

**CHEM 1120 Chemistry For Health Sciences**

[4 credit hours]

The study of chemistry for students majoring in nursing and other health-related fields. This course includes general, organic and biochemical topics in condensed form. The impact of chemistry in health fields will be emphasized.

**Prerequisites:** CHEM 1110 with a minimum grade of C or Aleks Health Science Placement with a score of 39 or Aleks Health Science Retest with a score of 39

**Term Offered:** Spring, Summer, Fall

**CHEM 1150 Chemistry And Society Laboratory**

[1 credit hour]

Laboratory introduction to the concepts of chemistry to accompany Chemistry 1100. Demonstrations by laboratory experiments of lessons developed in the accompanying lecture course. Two hours of laboratory per week.

**Term Offered:** Spring, Fall

**CHEM 1200 Problem Solving In General Chemistry**

[1 credit hour]

Problem solving and skill development for students enrolled in CHEM 1230 who obtained a satisfactory score on the chemistry placement test but need additional assistance in selected topics. May be taken only as P/NC. Pre-requisites: CHEM 1090 with a minimum grade of C or better OR pass placement exam.

**Prerequisites:** CHEM 1090 with a minimum grade of C or Aleks Chem Placement Highest with a score of 50 or Chemistry Placement with a score of 17

**Term Offered:** Spring, Fall

**CHEM 1230 General Chemistry I**

[4 credit hours]

An introduction to atomic structure, chemical bonding, kinetic-molecular theory, energy relationships and structural concepts. This sequence is for students who major in science, engineering or other fields which require chemistry as a prerequisite subject. Three hours lecture and one hour discussion per week.

**Prerequisites:** CHEM 1090 with a minimum grade of C or Chemistry Placement with a score of 17 or Aleks Chem Placement Highest with a score of 50

**Term Offered:** Spring, Summer, Fall

**CHEM 1240 General Chemistry II**

[4 credit hours]

An introduction to solutions, equilibrium, acid-base theory, energy relationships and structural concepts. This sequence is for students who major in science, engineering or other fields which require chemistry as a prerequisite subject. Three hours lecture and one hour discussion per week.

**Prerequisites:** CHEM 1230 with a minimum grade of C or (CHEM 1230 with a minimum grade of D- and CHEM 1300 with a minimum grade of C)

**Term Offered:** Spring, Summer, Fall
CHEM 1280 General Chemistry Lab I
[1 credit hour]
Experiments over topics covered in CHEM 1230 lectures. Approved chemistry safety goggles meeting the American National Standard Z87.1-1968 must be worn by every student during every laboratory class meeting. Three hours of laboratory per week.
Prerequisites: CHEM 1230 (may be taken concurrently) with a minimum grade of C
Term Offered: Spring, Summer, Fall
Core Natural Sciences, Trans Mod Natural Science

CHEM 1290 General Chemistry Lab II
[1 credit hour]
Experiments over topics covered in CHEM 1240 lectures. Approved chemistry safety goggles meeting the American National Standard Z87.1-1968 must be worn by every student during every laboratory class meeting. Three hours of laboratory per week.
Prerequisites: CHEM 1240 (may be taken concurrently) with a minimum grade of C and CHEM 1280 with a minimum grade of C
Term Offered: Spring, Summer, Fall
Core Natural Sciences, Trans Mod Natural Science

CHEM 1300 Principles of General Chemistry
[2 credit hours]
This is an accelerated course with selected topics from general chemistry including matter, units, ionic compounds, molecular compounds, aqueous solutions, precipitation reactions, acid-base reactions, oxidation-reduction reactions, concentration, enthalpy, calorimetry, polarity, Lewis structures, dipole moment, and intermolecular forces. This course is for students who major in science, engineering or other fields which require CHEM1240. Students who earned a C-/D+/D/D- in CHEM1230 may take this course in place of the prerequisite grade of C in CHEM1230 such that they are eligible to advance to CHEM1240 without having to retake CHEM1230. Students can also take this course to improve preparation and performance in CHEM1240. This is a DL course with a 2 hour meeting on campus for a final exam.
Prerequisites: CHEM 1230 with a minimum grade of D-

CHEM 1910 Survey Of Research
[1 credit hour]
Survey of current research areas at the frontiers of chemistry, including topics that cross the boundaries with other disciplines. May be taken only as P/NC.
Term Offered: Spring

CHEM 2410 Organic Chemistry I
[3 credit hours]
Study of structure and reactions of organic compounds. Three hours lecture per week.
Prerequisites: CHEM 1240 with a minimum grade of C-
Term Offered: Spring, Summer, Fall

CHEM 2420 Organic Chemistry II
[3 credit hours]
Study of structure and reactions of organic compounds. Three hours lecture per week.
Prerequisites: CHEM 2410 with a minimum grade of C-
Term Offered: Spring, Summer, Fall

CHEM 2430 Recitation For Organic Chemistry I
[1 credit hour]
Optional recitation sections that discuss concepts and solve practice questions in CHEM2410.
Prerequisites: CHEM 1240 with a minimum grade of C-
Term Offered: Spring, Fall

CHEM 2440 Recitation For Organic Chemistry II
[1 credit hour]
Optional recitation sections that discuss concepts and solve practice questions in CHEM2420.
Prerequisites: CHEM 2410 with a minimum grade of C-
Term Offered: Spring, Fall

CHEM 2460 Organic Chemistry Laboratory I for Non-Majors
[1 credit hour]
Practice of organic laboratory techniques. Four hours of laboratory per week. Approved chemical safety goggles meeting the American National Standard Z87.1-1968 must be worn by every student during every laboratory class meeting. This course is for students in majors other than chemistry or biochemistry. Chemistry (BS, BA) or biochemistry majors (BS) should take CHEM 2480.
Prerequisites: CHEM 1240 with a minimum grade of C- and CHEM 1290 with a minimum grade of C- and CHEM 2410 (may be taken concurrently) with a minimum grade of C-
Term Offered: Spring, Summer, Fall

CHEM 2470 Organic Chemistry Laboratory II for Non-Majors
[1 credit hour]
Practice of organic laboratory techniques. Four hours of laboratory per week. Approved chemical safety goggles meeting the American National Standard Z87.1-1968 must be worn by every student during every laboratory class meeting. This course is for students in majors other than chemistry or biochemistry. Chemistry (BS, BA) or biochemistry majors (BS) should take CHEM 2490.
Prerequisites: CHEM 2460 with a minimum grade of C- and CHEM 2420 (may be taken concurrently) with a minimum grade of C-
Term Offered: Spring, Summer, Fall

CHEM 2480 Organic Chemistry Laboratory I for Majors: Separations and Elementary Synthesis
[0-2 credit hours]
For Chemistry/Biochemistry majors. Introduction to theory and laboratory practice in modern methods of physical separation techniques, and introduction to organic synthetic methods. Special emphasis is made on spectroscopic techniques used in the organic laboratory. Approved chemistry safety goggles meeting the American National Standard Z87.1-1968 must be worn by every student during every laboratory class meeting.
Prerequisites: CHEM 1240 with a minimum grade of C- and CHEM 1290 with a minimum grade of C- and CHEM 2410 (may be taken concurrently) with a minimum grade of C-
Term Offered: Fall
CHEM 2490 Organic Chemistry Laboratory II for Majors: Synthesis and Identification
[2 credit hours]
For Chemistry/Biochemistry majors. Application of synthetic methods to elementary organic synthesis with special emphasis on instrumental approaches to problem solving in organic chemistry. Approved laboratory safety goggles meeting the American National Standard 287.1-1968 must be worn by every student during every laboratory class meeting.
Prerequisites: CHEM 2410 with a minimum grade of C- and CHEM 2480 with a minimum grade of C- and CHEM 2420 (may be taken concurrently) with a minimum grade of C-
Term Offered: Spring

CHEM 2500 Instrumental Methods For Organic Chemistry
[0-2 credit hours]
A bridge course for students wishing to major in chemistry or biochemistry at the B.S. level after taking the organic non-major lab sequence. Introduction to major instrumental methods employed in the organic laboratory. Approved chemical safety goggles meeting the American National Standard 287.1-1968 must be worn by every student during every laboratory class meeting.
Prerequisites: CHEM 2420 with a minimum grade of C- and CHEM 2470 with a minimum grade of C-
Term Offered: Spring, Summer, Fall

CHEM 2910 Undergraduate Research I
[1-3 credit hours]
An introduction to research under the guidance of a faculty member. May be repeated. A maximum accumulated credit of 4 hours in 2910 and total of 10 hours in 2910, 3910, 4910 may be applied toward a degree. May be taken only as P/NC.
Prerequisites: CHEM 1240 (may be taken concurrently) with a minimum grade of C-
Term Offered: Spring, Summer, Fall

CHEM 2920 Readings In Chemistry
[1-2 credit hours]
Readings from the literature of chemistry. May be taken only as P/NC.
Term Offered: Spring, Summer, Fall

CHEM 3310 Analytical Chemistry
[2 credit hours]
Theory and applications of chemical equilibria to gravimetric, volumetric and separation techniques. Emphasis on the quantitative aspects of analytical chemistry. Two hours lecture per week.
Prerequisites: CHEM 1240 with a minimum grade of C-
Term Offered: Fall

CHEM 3360 Analytical Chemistry Laboratory
[2 credit hours]
Practice of quantitative analytical methods of analysis. Six hours laboratory per week. Approved laboratory safety goggles meeting the American National Standard 287.1-1968 must be worn by every student during every laboratory class meeting.
Prerequisites: CHEM 3310 with a minimum grade of C- and CHEM 1290 with a minimum grade of C-
Term Offered: Spring

CHEM 3510 Biochemistry I
[3 credit hours]
The chemistry of living systems, beginning with the structures and molecular and biological functions of proteins, nucleic acids, carbohydrates and lipids. Other topics include enzyme kinetics and mechanism, biological membranes and membrane transport, and signal transduction.
Prerequisites: CHEM 2420 with a minimum grade of C-
Term Offered: Summer, Fall

CHEM 3520 Biochemistry II
[3 credit hours]
Continuing study of the chemistry of living systems. Topics include the metabolism of carbohydrates, lipids and amino acids, energy transductions and photosynthesis, mechanisms and regulation of nucleic acid and protein synthesis.
Prerequisites: CHEM 3510 with a minimum grade of C-
Term Offered: Spring

CHEM 3560 Biochemistry Laboratory
[2 credit hours]
Practice of biochemistry laboratory techniques. Six hours of laboratory per week.
Prerequisites: CHEM 3510 with a minimum grade of C-
Term Offered: Spring

CHEM 3610 Inorganic Chemistry I
[3 credit hours]
The application of modern theories to the elements and their inorganic compounds. Physical chemical principles are used throughout.
Prerequisites: CHEM 2420 with a minimum grade of C- or CHEE 2230 with a minimum grade of C- and CHEE 2330 with a minimum grade of C-
Term Offered: Spring

CHEM 3710 Physical Chemistry For The Biosciences I
[3 credit hours]
Physical and mathematical laws applied to chemistry with examples from biologically important processes. No credit given if Chemistry 3730-3740 are taken.
Prerequisites: (MATH 1860 with a minimum grade of D- and PHYS 2070 with a minimum grade of D- and PHYS 2080 with a minimum grade of D-) or (MATH 1860 with a minimum grade of D- and PHYS 2130 with a minimum grade of D-) or (MATH 1860 with a minimum grade of D- and PHYS 2140 with a minimum grade of D-)
Corequisites: CHEM 3712
Term Offered: Fall

CHEM 3712 Recitation for Chem 3710
[1 credit hour]
Recitation section that discusses concepts and solves practice questions for CHEM 3710. Must be taken simultaneously with CHEM 3710. Not for major/minor credit.
Prerequisites: CHEM 2420 with a minimum grade of D- and CHEM 3710 (may be taken concurrently) with a minimum grade of D-
Term Offered: Fall
CHEM 3720 Physical Chemistry For The Biosciences II
[3 credit hours]
Physical and mathematical laws applied to chemistry with examples from biologically important processes. No credit given if Chemistry 3730-3740 are taken.
Prerequisites: CHEM 3710 with a minimum grade of D-
Corequisites: CHEM 3722
Term Offered: Spring
CHEM 3722 Recitation For Chem 3720
[1 credit hour]
Optional recitation section that discusses concepts and solves practice questions for CHEM 3720. Must be taken simultaneously with CHEM 3720. Not for major/minor credit.
Prerequisites: CHEM 3710 with a minimum grade of C- and CHEM 3720 (may be taken concurrently) with a minimum grade of C-
Term Offered: Spring
CHEM 3730 Physical Chemistry I
[3 credit hours]
Fundamental theories and basic laws of chemistry with emphasis on their mathematical development. Thermodynamics, equilibrium, electrochemistry, classical chemical kinetics.
Prerequisites: CHEM 2420 with a minimum grade of C- and CHEM 2470 with a minimum grade of C- or CHEM 2490 with a minimum grade of C- and MATH 2850 with a minimum grade of C- and PHYS 2140 with a minimum grade of C-
Term Offered: Fall
CHEM 3732 Recitation for Chem 3730
[1 credit hour]
Optional recitation section that discusses concepts and solves practice questions for CHEM 3730. Must be taken simultaneously with CHEM 3730, Physical Chemistry I. Not for major/minor credit.
Prerequisites: CHEM 2420 with a minimum grade of C- and CHEM 3730 (may be taken concurrently) with a minimum grade of C-
Term Offered: Fall
CHEM 3740 Physical Chemistry II
[3 credit hours]
Fundamental theories and basic laws of chemistry with emphasis on their mathematical development. Structure of matter, statistical and quantum mechanics, reaction dynamics, spectroscopy.
Prerequisites: CHEM 3730 with a minimum grade of C- or CHEE 2230 with a minimum grade of C- and CHE 2330 with a minimum grade of C-
Term Offered: Spring
CHEM 3742 Recitation For Chem 3740
[1 credit hour]
Optional recitation section that discusses concepts and solves practice questions for CHEM 3740. Must be taken simultaneously with CHEM 3740, Physical Chemistry II. Not for major/minor credit.
Prerequisites: CHEM 3730 with a minimum grade of C- and CHEM 3740 (may be taken concurrently) with a minimum grade of C-
Term Offered: Spring
CHEM 3810 Chemistry of Sustainable Energy Resources
[3 credit hours]
Application of the principles of chemistry to understand the issues related to implementing and optimizing a sustainable supply of energy.
Prerequisites: CHEM 1240 with a minimum grade of C- and CHEM 1290 with a minimum grade of C- and PHYS 3400 with a minimum grade of C-
Term Offered: Spring, Fall
CHEM 3860 Advanced Laboratory I
[0-2 credit hours]
Laboratory experiments and techniques relating to subjects developed in CHEM 3710, 3730, or 4570. Three-hour laboratory and one-hour discussion per week. Approved chemical safety goggles meeting the American National Standard Z87.1-1968 must be worn by every student during every laboratory class meeting.
Prerequisites: (CHEM 2420 with a minimum grade of C- and CHEM 2470 with a minimum grade of C-) or CHEM 2490 with a minimum grade of C- and (CHEM 3710 (may be taken concurrently) with a minimum grade of C- or CHEM 3730 (may be taken concurrently) with a minimum grade of C- or CHEM 4570 (may be taken concurrently) with a minimum grade of C-)
Term Offered: Fall
CHEM 3870 Advanced Laboratory II
[2 credit hours]
Laboratory experiments and techniques relating to subjects developed in 3710/3720, 3730/3740. Six hours of laboratory per week. Approved chemical safety goggles meeting the American National Standard Z87.1-1968 must be worn by every student during every laboratory class meeting.
Prerequisites: CHEM 3860 with a minimum grade of C- and CHEM 3740 (may be taken concurrently) with a minimum grade of C- or CHEM 3720 (may be taken concurrently) with a minimum grade of C-
Term Offered: Spring
CHEM 3910 Undergraduate Research II
[1-3 credit hours]
Research under the guidance of a faculty member. A written report is required. May be repeated. A maximum accumulated credit of 10 hours in CHEM 2910, 3910 and 4910 may be applied toward a degree. May be taken only as P/NC.
Prerequisites: CHEM 2420 (may be taken concurrently) with a minimum grade of C- and CHEM 3740 (may be taken concurrently) with a minimum grade of C-
Term Offered: Spring, Summer, Fall
CHEM 3920 Readings In Chemistry II
[1-2 credit hours]
Readings from the literature of chemistry. May be taken only as P/NC.
Term Offered: Spring, Summer, Fall
CHEM 4200 Green Chemistry
[3 credit hours]
Introduction to the principles and applications of green chemistry, including industrial applications, atom economy, safer solvent substitutions, chemical alternatives assessment, green chemistry metrics, basic life cycle assessment, and an introduction to chemical toxicology. Students need CHEM 2420 or permission of instructor.
Prerequisites: CHEM 2420 with a minimum grade of D-
CHEM 4210 Environmental Chemistry
[3 credit hours]
This course will focus on the chemistry of air, water, and soil with specific emphasis on the effects of human-made chemical products and byproducts on the environment. Connections with green chemistry will be highlighted. Students need CHEM 2420 or permission of instructor.
Prerequisites: CHEM 2420 with a minimum grade of D-

CHEM 4300 Instrumental Analysis
[2 credit hours]
An introduction to modern chemical instrumentation and applications to chemical analysis. Topics include electrical, magnetic, nuclear and spectroscopic instrumentation.
Prerequisites: CHEM 3310 with a minimum grade of C- and CHEM 3360 with a minimum grade of C- or CHEM 3710 (may be taken concurrently) with a minimum grade of C- or CHEM 3720 (may be taken concurrently) with a minimum grade of C- or CHEM 4570 (may be taken concurrently) with a minimum grade of C-

Term Offered: Fall

CHEM 4305 Advanced Analytical Chemistry
[4 credit hours]
An overview of new techniques in analytical chemistry. Topics include sample preparation and sampling, spectroscopic, separation, electrochemical, surface characterization and thermal methods.
Prerequisites: CHEM 3310 with a minimum grade of C

Term Offered: Fall

CHEM 4310 Separation Methods
[3 credit hours]
The theory, design and application of separation methods. Topics include extraction techniques, gas, liquid, and supercritical fluid chromatography, affinity and chiral separation, and capillary electrophoresis.
Prerequisites: CHEM 3310 with a minimum grade of C or CHEM 3400 with a minimum grade of C

Term Offered: Spring

CHEM 4320 Electrochemistry
[4 credit hours]
A fundamental study of electrochemical concepts, methods, instrumentation and applications.
Prerequisites: CHEM 3400 with a minimum grade of C

Term Offered: Spring

CHEM 4330 Spectroscopic Methods
[4 credit hours]
A comprehensive study of theory and instrumentation. Applications of spectroscopic methods including spectral interpretation. Topics include a study of absorption, emission, Raman, NMR, ESR, mass spectrometry, and related subjects. Important methodology and strategy in organic synthesis including disconnection and retrosynthetic analysis.
Prerequisites: CHEM 2410 with a minimum grade of C

Term Offered: Spring

CHEM 4350 Separation Methods Laboratory
[1 credit hour]
Experiments covering topics discussed in CHEM 4310 lectures. Five hours of laboratory per week. Approved chemical safety goggles meeting the American National Standard 287.1-1968 must be worn by every student during every laboratory class meeting.
Prerequisites: CHEM 3310 with a minimum grade of C and CHEM 3360 with a minimum grade of C or CHEM 4300 with a minimum grade of C and CHEM 4880 with a minimum grade of C
Corequisites: CHEM 4310

Term Offered: Spring

CHEM 4400 Advanced Organic Chemistry
[4 credit hours]
This course deals with chemical structure and reactivity of organic molecules. Important methodology and strategy in organic synthesis including disconnection and retrosynthetic analysis.

Term Offered: Fall

CHEM 4410 Organic Synthesis
[4 credit hours]
Important methodology and strategy in organic synthesis including disconnection and retrosynthetic analysis.

Term Offered: Spring

CHEM 4430 Medicinal Chemistry
[4 credit hours]
Qualitative and quantitative aspects of the design of new therapeutic agents are discussed. Approaches to the design of drugs and new therapeutic modalities directed at enzymes, receptors, membrane transport proteins and nucleic acids will be examined.

Term Offered: Fall

CHEM 4450 Advanced Biological Chemistry
[4 credit hours]
The chemistry of cellular and molecular transformations in biochemical systems. Molecular structure of proteins, nucleic acids and membranes. Metabolism and biosynthesis of carbohydrates, amino acids and lipids; gene regulation and replication.

Prerequisites: CHEM 3520 with a minimum grade of C

Term Offered: Fall

CHEM 4510 Protein Chemistry
[4 credit hours]
A detailed analysis of the structure and function of proteins. Current methodology for the analysis of structure, the basis for molecular associations and relationships between structure and biological function.

Prerequisites: CHEM 3510 with a minimum grade of C

Term Offered: Spring

CHEM 4520 Enzymology
[4 credit hours]
Survey of current methods to study enzyme-catalyzed reactions, and application to examples from major enzyme, groups. Current topics in enzymology include abzymes and ribozymes, artificial enzymes, and enzymes, and enzyme engineering.

Prerequisites: CHEM 3510 with a minimum grade of C

Term Offered: Spring
CHEM 4530 Nucleic Acid Chemistry
[4 credit hours]
The structural and chemical properties of nucleic acids and the resulting biological consequences. Topics include: 3D structures, conformation, protein/nucleic acid interactions, physical properties and chemical reactions, mutagenesis, damage/repair, and recombination.
Prerequisites: CHEM 3510 with a minimum grade of C-
Term Offered: Spring

CHEM 4540 Macromolecular Crystallography
[2 credit hours]
Fundamental theory and practical application of X-ray diffraction to macromolecular structure determination, including protein crystallization and manipulation, data collection and reduction, phase solution, electron density interpretation, structural refinement.
Prerequisites: CHEM 4850 with a minimum grade of D-

CHEM 4550 Practical Protein Crystallography
[2 credit hours]
Hands-on training in protein crystallography. Laboratory projects include: protein crystallization, crystal manipulation and mounting, X-ray diffraction data collection, data reduction, structure solution, electron density interpretation, and refinement.
Prerequisites: CHEM 4850 with a minimum grade of D-

CHEM 4560 Biophysical Chemistry Laboratory - WAC
[2 credit hours]
Data Analysis of modern biophysical measurements related to the topics discussed in CHEM 4570 (Biophysical Chemistry), an introduction to scientific writing, and the preparation of scientific manuscripts. Six hours of laboratory per week.
Prerequisites: CHEM 3520 with a minimum grade of C-

CHEM 4570 Biophysical Chemistry
[4 credit hours]
Principles and applications of physical chemistry as applied to biological macromolecules (i.e., proteins and nucleic acids in solution), including thermodynamics, kinetics and spectroscopy of macromolecular interactions.
Prerequisites: PHYS 2080 with a minimum grade of C- and CHEM 3520 with a minimum grade of C-
Term Offered: Fall

CHEM 4580 Bioinorganic Chemistry
[4 credit hours]
Survey of biologically important metals and metal-ligand complexes, and the role of metal ions in proteins, metal ion transport and regulation, and metals in medicine.
Prerequisites: CHEM 3520 with a minimum grade of C-

CHEM 4600 Physical Inorganic Chemistry
[4 credit hours]
Symmetry, bonding theories, magnetism, and spectroscopic characterization of inorganic compounds are described. Coverage of spectroscopic techniques such as NMR, EPR, UV/VIS, IR, AND Mossbauer focus on applications to inorganic systems.
Prerequisites: CHEM 3610 with a minimum grade of C
Term Offered: Fall

CHEM 4610 Chemistry of the Transition and Post-Transition Elements
[4 credit hours]
The organometallic chemistry of the transition metals, lanthanides and actinides is described. Synthesis, structure, bonding, and reactivity are considered. Applications in catalysis, bioinorganic, and materials chemistry are discussed.
Prerequisites: CHEM 3610 with a minimum grade of C
Term Offered: Fall

CHEM 4620 Inorganic Chemistry II
[3 credit hours]
The application of modern theories to the elements and their inorganic compounds-advanced topics. Physical chemical principles are used throughout.
Prerequisites: CHEM 3610 with a minimum grade of C-

CHEM 4625 Chemistry of Main Group Elements
[4 credit hours]
The inorganic and organometallic chemistry of main group elements is described. Synthesis, structure, bonding, and reactivity are considered. The use of main group reagents in synthesis, catalysis, and materials chemistry are discussed.
Prerequisites: CHEM 3610 with a minimum grade of C
Term Offered: Spring

CHEM 4700 Advanced Physical Chemistry
[4 credit hours]
Chemical systems and processes in the context of classical equilibrium thermodynamics. It introduces non-equilibrium and statistical thermodynamics to elucidate chemical changes and the connection between molecular and macroscopic system properties.
Prerequisites: CHEM 3740 with a minimum grade of C- or CHEM 3730 with a minimum grade of C-

CHEM 4710 Quantum Chemistry and Spectroscopy
[4 credit hours]
Fundamental principles of quantum mechanics and their application to model systems, atoms and molecules; Introduction to molecular spectroscopy.
Term Offered: Spring

CHEM 4720 Modern Topics in Physical Chemistry
[4 credit hours]
Advanced topics of current interest in physical chemistry. Examples of topics include nanomaterials science, spectroscopic techniques, or molecular modeling.
Prerequisites: CHEM 3740 with a minimum grade of C- or CHEM 3730 with a minimum grade of C-

CHEM 4725 Physical Chemistry Laboratory - WAC
[2 credit hours]
Hands-on training in protein crystallography. Laboratory projects include: protein crystallization, crystal manipulation and mounting, X-ray diffraction data collection, data reduction, structure solution, electron density interpretation, and refinement.
Prerequisites: CHEM 3520 with a minimum grade of D-

CHEM 4800 Advanced Materials Chemistry
[4 credit hours]
Introduction to important classes of solids, including conductors, magnetic materials, ferroelectrics, glasses, microporous materials, organic solids. Traditional and novel synthetic approaches, structure/property relationships, and characterization methods specific to solids.
Prerequisites: CHEM 3740 with a minimum grade of C
Term Offered: Spring
CHEM 4810 Materials Science I
[4 credit hours]
A generic materials science approach to the study of crystalline structure and defects (point, line and planar) in crystalline materials. The mechanisms and kinetics of diffusion in the condensed state.
Term Offered: Fall

CHEM 4820 Materials Science II
[4 credit hours]
A materials science approach to the thermodynamics of condensed state equilibria. Phase transformation kinetics.
Term Offered: Fall

CHEM 4850 X-Ray Crystallography
[4 credit hours]
Prerequisites: MATH 1840 with a minimum grade of C or MATH 1860 with a minimum grade of C-

CHEM 4880 Advanced Laboratory III
[2 credit hours]
Laboratory experiments and techniques relating to subjects developed in CHEM 4300. Six hours of laboratory per week. Approved chemical safety goggles meeting the American National Standard Z87.1-1968 must be worn by every student during every laboratory class meeting.
Prerequisites: CHEM 3860 (may be taken concurrently) with a minimum grade of C- or CHEM 4560 (may be taken concurrently) with a minimum grade of C- and CHEM 4300 (may be taken concurrently) with a minimum grade of C-

CHEM 4910 Undergraduate Research III
[1-3 credit hours]
Thesis level research under the guidance of a faculty member. May be repeated. A minimum of three hours and an acceptable thesis required for credit toward the B.S. major. A maximum accumulated credit of 10 hours in CHEM 2910, 3910 and 4910 may be applied toward a degree. A written report is required. May be taken only as P/NC. Prerequisite: GPA (overall and in chemistry courses) above 2.5 and permission of department
Corequisite: CHEM 3740 or 4570
Prerequisites: CHEM 3740 (may be taken concurrently) with a minimum grade of C- or CHEM 4570 (may be taken concurrently) with a minimum grade of C-

CHEM 4920 Readings In Chemistry III
[1-2 credit hours]
Readings from the literature of chemistry. May be taken only as P/NC.
Term Offered: Spring, Summer, Fall

CHEM 4980 Special Topics In Chemistry
[2-4 credit hours]
An advanced course for chemistry majors in an important area of chemistry. Consult the undergraduate adviser for details. Course may be repeated for credit under different specialty numbers (topics).
Prerequisites: (CHEM 2420 with a minimum grade of C- and CHEM 3740 with a minimum grade of C-)

CHEM 4985 Special Topics In Chemistry
[2-4 credit hours]
Basics of symmetry, diffraction, and reciprocal space. Hands-on training with advanced instrumentation in modern facilities.
Prerequisites: (CHEM 2420 with a minimum grade of C- and CHEM 3740 with a minimum grade of C-)

Qualfied students may be invited to work for the citation "honors in chemistry or biochemistry."

1. Admission: The honors program is open to all chemistry or biochemistry majors studying toward the B.S. degree and to other students with the consent of the departmental honors advisor and the Chair of the department. The program may be undertaken concurrently with University Honors. Admission to the departmental Honors Program is based on academic standing, recommendations by instructors and an interview with the departmental honors advisor. A minimum overall GPA of 3.3 and a minimum GPA of 3.5 in chemistry course work are required for admission and to maintain good standing in the honors program. Any student may petition the departmental honors advisor for admission to the program. A student should normally begin the program no later than the end of the sophomore year.

2. Requirements: In addition to the credits required to complete the major, each honors student must satisfactorily complete CHEM 4910 with a written thesis and an oral research report upon completion of the research project. A minimum of six hours of the required chemistry courses at the 3000 and 4000 levels, in addition to CHEM 4910 must be taken for honors. These courses must be in at least two different areas of chemistry, to be selected from among analytical chemistry, biochemistry, inorganic chemistry, organic chemistry and physical chemistry. The instructor in each of these courses will plan activities above the normal requirements of the course for the honors student, in line with the aims of the Honors Program, to encourage independent scholarship. Outside reading and writing may be important components of each Honors course assignment. Students enrolled in the departmental Honors Program also are encouraged to participate in the department's colloquium program. In order to graduate with departmental honors, a minimum overall GPA of 3.3 and a minimum GPA of 3.5 in chemistry course work must be earned.

BA in Biochemistry

The Bachelor of Arts (B.A.) degree in Biochemistry requires a minimum of 120 hours of coursework.

Biochemistry majors focus on the intersection of the fields of biology and chemistry to study living organisms at the cellular and molecular levels. It is easy to see how biochemistry applies to biological problems such as medicine and understanding diseases, but biochemistry is central to many other fields, as well, including agriculture (fertilizers, pesticides and herbicides), food science (food safety and preservation, and flavor chemistry), cosmetics, and forensics (DNA analysis).

The BA degree provides students with a strong foundation
- in the traditional subdiscipline of biochemistry in a mathematically less rigorous track
- in laboratory skills emphasizing hands-on training with advanced instrumentation in modern facilities
- in a secondary field as a dual-major combined with for example, a B.S. degree in biology or chemical engineering

Prepares students to
- gain employment in laboratory positions in chemical or biopharmaceutical industries
- enter the business or sales end of the chemical or biopharmaceutical industry
- enter professional programs such as law, business, medicine, and forensic or veterinary science

Students pursuing a chemistry or biochemistry major may not elect the P/NC option in major or related courses, or prerequisites for these courses, except as noted in specific course descriptions. Students pursuing a BS/BA in Biochemistry cannot double major with a BS/BA in Chemistry, or minor in Chemistry. The minor in Green Chemistry and Engineering is permitted.

For the Bachelor of Arts degree in biochemistry, 35 hours of CHEM courses are required. The following courses must be included:

<table>

The BA degree in Chemistry provides students with a strong foundation in the traditional subdisciplines of chemistry—analytical, inorganic, organic, and physical—in a mathematically less rigorous track. Chemistry majors study the properties, composition and structure of matter—and how matter changes and impacts everyday life. Chemistry is considered a cornerstone of the natural sciences and can lead to a wide range of careers in many different and diverse fields.

The Bachelor of Arts (B.A.) in Chemistry requires a minimum of 120 hours of coursework.

Courses which satisfy the College and University degree requirements can be determined by running a degree audit and looking at the list of courses presented as satisfying the requirement. Always try to take courses in which you have an interest.

Students in the Biochemistry BA degree program must be able to describe data and results in both written and oral formats.

Preparations for the Bachelor of Arts degree in Chemistry, 37 hours of CHEM courses are required.

For the Bachelor of Arts degree in chemistry, 37 hours of CHEM courses are required.

The following courses must be included:

- CHEM 1230 General Chemistry I
- CHEM 1240 General Chemistry II
- CHEM 1280 General Chemistry Lab I
- CHEM 1290 General Chemistry Lab II
- CHEM 2410 Organic Chemistry I
- CHEM 2420 Organic Chemistry II
- CHEM 2480 Organic Chemistry Laboratory I for Majors: Separations and Elementary Synthesis
- CHEM 2490 Organic Chemistry Laboratory II for Majors: Synthesis and Identification
- CHEM 3310 Analytical Chemistry
- CHEM 3360 Analytical Chemistry Laboratory
- CHEM 3710 Physical Chemistry For The Biosciences I
- CHEM 3720 Physical Chemistry For The Biosciences II
- CHEM 3510 Biochemistry I or CHEM 3610 Inorganic Chemistry
- CHEM 3860 Advanced Laboratory I
- Additional 3000 or 4000 level CHEM courses to reach 37 hours in the major, excluding CHEM 3712, CHEM 3722, CHEM 3732, CHEM 3742, CHEM 3910, CHEM 3920, CHEM 4910 and CHEM 4920

The following related courses are also required:

- MATH 1830 and MATH 1840, or MATH 1850 and MATH 1860 (Calculus I and II)
- PHYS 2070 and PHYS 2080, or PHYS 2130 and PHYS 2140 (Physics I and II)

And One of the following:

- MATH 2850, MATH 2890, MATH 3610
- BIOL 2170, or a 4000 level BIOL course
- EEES 2010, EEES 2200, EEES 2400, EEES 3050, EEES 4220, or EEES 4450.

1 If taking, or have taken MATH 2850, this can be an elective.
2 FL Foreign Language to be decided by student and adviser.
3 Excluding CHEM 3712, CHEM 3722, CHEM 3732, CHEM 3742, CHEM 3910, CHEM 3920, CHEM 4910, CHEM 4920.

See course catalog for pre- and co-requisites.
Courses which satisfy the College and University degree requirements can be determined by running a degree audit and looking at the list of courses presented as satisfying the requirement. Always try to take courses in which you have an interest.

Students in the Chemistry BA degree program must be able to solve, with the appropriate non-calculus based mathematical techniques, and analyze any problem from the core areas of chemistry. Students in the Chemistry BA degree program must be able to conduct and analyze experimental procedures explain uncertainties associated with the measurements.

Students in the Chemistry BA degree program must be able to describe data and results in both written and oral formats.

**BS in Biochemistry**

The Bachelor of Science (B.S.) degree in biochemistry is the professional degree in the field of biochemistry and requires a minimum of 120 hours of course work and upon completion, students meet the minimum standards of the American Chemical Society as specified by its Committee on Professional Training. Degree recipients are therefore certified by the American Chemical Society and are eligible for full membership in the world's largest scientific society.

Biochemistry majors focus on the intersection of the fields of biology and chemistry to study living organisms at the cellular and molecular levels. It is easy to see how biochemistry applies to biological problems such as medicine and understanding diseases, but biochemistry is central to many other fields, as well, including agriculture (fertilizers, pesticides and herbicides), food science (food safety and preservation, and flavor chemistry), cosmetics, and forensics (DNA analysis).

The B.S. degree in Biochemistry provides students with a strong foundation

- in the traditional subdisciplines of chemistry- analytical, biochemistry, inorganic, organic, and physical- with the B.S. degree in biochemistry having a more biological chemistry related focus
- in laboratory skills emphasizing hands-on training with advanced instrumentation in modern facilities
- in research working with faculty on projects that span the entire field of chemistry and biochemistry

Prepares students to

- continue their studies in graduate school toward the Masters or Ph.D. in chemistry or biochemistry
- enter professional programs such as law, business, medicine, and forensic or veterinary science
- gain employment with significant responsibility in laboratories in the chemical, pharmaceutical, biotech, clinical and allied professional industries.

Students pursuing a chemistry or biochemistry major may not elect the P/NC option in major or related courses, or prerequisites for these courses, except as noted in specific course descriptions. Students pursuing a BS/BA in Biochemistry cannot double major with a BS/BA in Chemistry, or minor in Chemistry. The minor in Green Chemistry and Engineering is permitted.

**For the bachelor of science degree in biochemistry**, 49 hours of CHEM courses are required. The following required courses must be included:

- CHEM 1230 General Chemistry I
- CHEM 1240 General Chemistry II
- CHEM 1280 General Chemistry Lab I
- CHEM 1290 General Chemistry Lab II
- CHEM 2410 Organic Chemistry I
- CHEM 2420 Organic Chemistry II
- CHEM 2480 Organic Chemistry Laboratory I for Majors: Separations and Elementary Synthesis
- CHEM 2490 Organic Chemistry Laboratory II for Majors: Synthesis and Identification
- CHEM 3310 Analytical Chemistry
- CHEM 3360 Analytical Chemistry Laboratory
- CHEM 3510 Biochemistry I
- CHEM 3520 Biochemistry II
- CHEM 3560 Biochemistry Laboratory
- CHEM 3610 Inorganic Chemistry I
- CHEM 4300 Instrumental Analysis
- CHEM 4560 Biophysical Chemistry Laboratory - WAC
- CHEM 4570 Biophysical Chemistry
- CHEM 4580 One advanced laboratory: (CHEM 3910, CHEM 4880, or CHEM 4910)

One advanced biochemistry course: (CHEM 4500, CHEM 4510, CHEM 4520, CHEM 4530, CHEM 4580, or CHEM 4980 (with a biochemistry focus))

The following related courses are also required:

- MATH 1750 and MATH 1760, MATH 1830 and MATH 1840, or MATH 1850 and MATH 1860 (Calculus I and II)
- PHYS 2070 and PHYS 2080, or PHYS 2130 and PHYS 2140 (Physics I and II)
- BIOL 2170 and BIOL 3030 (Fundamentals of Life Science: Biomolecules, Cells, and Inheritance and Cell Biology)

A minimum cumulative GPA of 2.5 in chemistry is required for graduation with this degree.

Below is a plan of study. Consult your degree audit for your program requirements.

1 Listed twice because courses offered in different semesters; only need one course.

See course catalog for pre- and co-requisites.

Courses which satisfy the College and University degree requirements can be determined by running a degree audit and looking at the list of courses presented as satisfying the requirement. Always try to take courses in which you have an interest.

Students completing the Bachelor of Science Degree in Biochemistry at the University of Toledo should be able to:

1. Demonstrate a mastery of foundational concepts in math, physics and chemistry.

2. Demonstrate a mastery of concepts in biochemistry and biology, including energy transduction in living systems, macromolecular structure and function, and biological information storage and flow, and the importance of evolution and homeostasis.

3. Make observations, formulate hypotheses, understand the conceptual basis and practical application of fundamental biochemical and molecular biological laboratory techniques and instrumentation, design and carry out experiments, analyze and interpret data, and use equations, models and statistics to test and apply these concepts.

4. Communicate technical information clearly and accurately in written, oral and visual formats.

5. Locate and use information in the primary literature and research databases.
6. Critically read, assess, and evaluate scientific publications, presentations and data.

7. Understand and observe proper safety, ethical, and professional practices.

8. Apply the concepts and practices of chemistry and biochemistry to areas outside the laboratory, including health and policy issues.

BS in Chemistry

The Bachelor of Science (B.S.) degree in Chemistry is the professional degree in the field of chemistry and requires a minimum of 120 hours of course work and upon completion, students meet the minimum standards of the American Chemical Society as specified by its Committee on Professional Training. Degree recipients are therefore certified by the American Chemical Society and are eligible for full membership in the world’s largest scientific society. The bachelor program in chemistry at UT Toledo has been continuously certified for over 70 years.

Chemistry majors study the properties, composition and structure of matter- and how matter changes and impacts everyday life. Chemistry is considered a cornerstone of the natural sciences and can lead to a wide range of careers in many different and diverse fields.

The B.S. degree in Chemistry provides students with a strong foundation in the traditional subdisciplines of chemistry- analytical, biochemistry, inorganic, organic, and physical, in laboratory skills emphasizing hands-on training with advanced instrumentation in modern facilities, in research working with faculty on projects that span the entire field of chemistry and biochemistry.

Prepares students to continue their studies in graduate school toward the Masters or Ph.D. in chemistry or biochemistry, enter professional programs such as law, business, medicine, and forensic or veterinary science, gain employment with significant responsibility in laboratories in the chemical, pharmaceutical, biotech, clinical and allied professional industries.

Students pursuing a chemistry or biochemistry major may not elect the P/NC option in major or related courses, or prerequisites for these courses, except as noted in specific course descriptions. Students pursuing a BS/BA in Chemistry cannot double major with a BS/BA in Biochemistry, or minor in Chemistry. The minor in Green Chemistry and Engineering is permitted.

For the bachelor of science degree in chemistry 44 hours of CHEM courses are required.

The following courses must be included:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1230</td>
<td>General Chemistry I</td>
<td>4</td>

</tr>
</tbody>
</table>

Optional advanced chemistry courses include any other 3000 or 4000 level CHEM courses except the following: CHEM 3712, CHEM 3722, CHEM 3732, CHEM 3742, CHEM 3910, CHEM 3920, and CHEM 4920.

The following related courses are also required:

MATH 1830 and MATH 1840, or MATH 1850 and MATH 1860 (Calculus I and II); MATH 2850 Elementary Multivariable Calculus

PHYS 2130 and PHYS 2140 (Physics I and II)

A minimum cumulative GPA of 2.5 in chemistry courses is required for graduation with this degree.

Below is a sample plan of study. Consult your degree audit for your program requirements.

**Electives - to reach 120 hours** 9

**Total Hours** 120-121

See course catalog for pre- and co-requisites.

Electives without recommendation are to be determined by the student using Banner Degree Audit program to determine which courses fulfill requirements and then by student interest of courses presented as satisfying the requirement.

Students completing the Bachelor of Science Degree in Chemistry at the University of Toledo should be able to:

1. Demonstrate a mastery of foundational concepts in mathematics and physics.
2. Demonstrate a mastery of fundamental concepts, principles, and methods in organic, inorganic, physical, analytical and biochemistry, including atomic and molecular structure, thermodynamics principles, chemical kinetics, chemical reactivity, and synthetic methodology.
3. Make observations, formulate hypotheses, understand theory and application of chemical instrumentation, design and carry out experiments, analyze and interpret data, and use equations, models and statistics to test and apply these concepts.
4. Communicate technical information clearly and accurately in written, oral and visual formats.
5. Locate and use information in the primary literature and research databases.
6. Critically read, assess, and evaluate scientific publications, presentations and data.
7. Understand and observe proper safety, ethical, and professional practices.
8. Apply the concepts and practices of chemistry to areas outside the laboratory, including societal and policy issues.

**Minor in Chemistry**

The minor in chemistry is designed to complement the objectives of students in a variety of majors. A minimum of 22 hours of chemistry courses and a minimum GPA of 2.0 in those courses are required for the minor in chemistry. No courses in the minor may be taken P/NC except CHEM 4920. The following courses must be included:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1230</td>
<td>General Chemistry I</td>

Select one of the following:
Students completing the Minor in Green Chemistry and Engineering must be sure that at least 12 credit hours of the minor requirements are unique to the minor, and are not being used to satisfy requirements in the major or another minor.

**Department of Environmental Sciences**

Jonathan M. Bossenbroek, Chair  
Trisha Spanbauer, honors advisor  
Timothy Fisher, undergraduate advisor (environmental sciences)  
Todd Crail, undergraduate advisor (environmental studies)  
Richard Becker, undergraduate advisor (geology)  
Scott Heckathorn, undergraduate advisor (environmental sciences)  
Timothy Fisher, undergraduate advisor (environmental sciences)  
Von Sigler, Associate Chair, undergraduate advisor (BIOM)  
Jonathan M. Bossenbroek, Chair  
Trisha Spanbauer, honors advisor  
Timothy Fisher, undergraduate advisor (environmental sciences)  
Todd Crail, undergraduate advisor (environmental studies)  
Richard Becker, undergraduate advisor (geology)  
Scott Heckathorn, undergraduate advisor (environmental sciences)  
Timothy Fisher, undergraduate advisor (environmental sciences)  
Von Sigler, Associate Chair, undergraduate advisor (BIOM)  

**Degrees Offered**

The Department of Environmental Sciences is an interdisciplinary group of ecologists and geologists whose research and teaching interests address human impacts on the environment, earth surface processes and ecosystem science. The two main areas of focus in our department include biology: organismal/ecology and geology: surficial/environmental. We are committed to providing you with an excellent educational experience that includes real-life problem solving, and field and laboratory work.

The Department of Environmental Sciences offers degree programs for a Bachelor of Arts in environmental studies, a Bachelor of Science in environmental science, a Bachelor of Science in geology, and a Bachelor of Science in biology with a concentration in ecology and organismal biology (BIOM). http://www.utoledo.edu/nsm/envsciences/undergrad/

**Mission Statement**

The Mission of the Department of Environmental Sciences is to conduct research to create today’s environmental solutions, teach to train tomorrow’s environmental leaders, and serve to promote global environmental awareness.

**General Description**

The Toledo region offers potential students an ideal natural laboratory for studies in ecology, geology, and environmental sciences because it is located where unique natural habitats and landforms occur in proximity to high human population and natural resource use. Toledo is in northwestern Ohio, on the western shore of Lake Erie at the mouth of the Maumee River. The greater metropolitan area is characterized by glacial terrains, and agricultural, urban, and natural ecosystems. Local rivers, Lake Erie’s productive fisheries and wetlands, the remarkable diversity of the Oak Openings savannas and woodlands, and wetland remnants of the Great Black Swamp, make the Toledo region a dynamic location for the study of environmental sciences as well as an enjoyable place to live and work.

The Department’s strengths in education and research are in the areas of: Earth surface processes; aquatic, landscape, microbial, plant, soil, systems, and vertebrate ecology; and bioremediation and phytoremediation. Research in other areas of both ecology and geology

---

**Minor in Green Chemistry & Engineering**

The minor in green chemistry and engineering is designed for students who want to expand the breadth of their undergraduate majors by incorporating the principles of green chemistry and green engineering into their BA and BS degrees in chemistry, chemical engineering, environmental science or a related area. A minimum of 21 hours of coursework and a minimum GPA of 2.0 in those courses are required for the minor. No courses in the minor may be required to the minor, and are not being used to satisfy requirements in the major or another minor.

**Additional courses to reach 22 hours may include any 3000 or 4000 level CHEM course except the following:**

- CHEM 3712 Recitation for CHM 3710
- CHEM 3722 Recitation For Chem 3720
- CHEM 3732 Recitation for Chem 3730
- CHEM 3742 Recitation For Chem 3740
- CHEM 3910 Undergraduate Research II
- CHEM 3920 Undergraduate Research III
- CHEM 3940 Undergraduate Research IV

**Total Hours**: 22-24

1) MBC 3550 and MBC 3560 may be substituted for CHEM 3510 and CHEM 3520.

One additional elective from above lists 3

1) Chemical Engineering students may substitute one additional elective class in place of CHEE 4010

**Total Hours**: 21
is also conducted. Much of this research occurs in the Toledo region, and often in other parts of the US and the world.

**Junior Year Studies at the University of Hertfordshire in England for Environmental Studies/Sciences Majors**

The College of Natural Sciences and Mathematics of The University of Toledo participates in an exchange program with the University of Hertfordshire, England. Selected UT students have the opportunity to spend their junior year at Hertfordshire. Participants in the program will pay their instructional and general fees to The University of Toledo. Eligibility to participate in the program is based on scholastic criteria. Information on the program may be obtained from the departmental exchange program advisor (W. Von Sigler). Details are available on academic issues, living accommodations, recreational opportunities and life in England.

**Junior Year Studies at the University of Salford in England for Environmental Sciences and Biology Majors**

Selected UT students in the Department of Environmental Sciences have the opportunity to spend their junior year at Salford. Participants in the program will pay their instructional and general fees to The University of Toledo. Eligibility to participate in the program is based on criteria established by the Department of Environmental Sciences. Information on the program may be obtained from the departmental exchange program advisor (W. Von Sigler) or from Dr. Brian Ashburner, Director of the UT-Salford Exchange Program. Details are available on academic issues, living accommodations, recreational opportunities and life in England on the departmental Web site at http://www.utoledo.edu/nsm/bio/salford/

**Degrees offered**

- BA in Environmental Studies (p. 377)
- BS in Biology with a Concentration in Ecology and Organismal Biology (p. 378)
- BS in Environmental Sciences (p. 381)
- BS in Geology (p. 379)
- Minor in Environmental Biology (p. 383)
- Minor in Environmental Sciences (p. 383)
- Minor in Geology (p. 383)

**EEES 1010 Physical Geology**

[3 credit hours]

Introduction to the physical processes and composition of the Earth, including plate tectonics, internal structure, origin and classification of rocks and minerals, causes of geologic hazards such as earthquakes and volcanoes, surficial processes, water and natural resources, and geologic time. No credit if EEES2100 is taken. Natural sciences core course. Optional 1-credit lab, EEES 1020.

*Term Offered:* Spring, Summer, Fall

Core Natural Sciences, Trans Mod Natural Science

**EEES 1020 Introductory Geology Laboratory**

[1 credit hour]

Investigations of fundamental geological processes, the materials of the Earth, and geologic time. Identification of rocks and minerals. Interpretation of geologic features and processes from maps, aerial images and physical models. This lab supports the introductory geology courses EEES 1010, 1050 and 2100. Natural sciences lab core course.

*Prerequisites:* EEES 1010 (may be taken concurrently) with a minimum grade of D- or EEES 2100 (may be taken concurrently) with a minimum grade of D-

*Term Offered:* Spring, Summer, Fall

Core Natural Sciences, Trans Mod Natural Science

**EEES 1050 Geological Hazards And The Environment**

[3 credit hours]

Introduction to risk mitigation involving hazardous geological processes and materials: volcanic eruptions, earthquakes, floods, ground subsidence and collapse, radon, asbestos and others.

*Term Offered:* Spring, Summer, Fall

Core Natural Sciences, Trans Mod Natural Science

**EEES 1070 Marine Biology**

[3 credit hours]

An exploration of life in the world’s oceans, emphasizing how marine organisms thrive in broadly diverse environments. Topics include the major ocean habitats, and ecological relationships among associated flora/fauna.

*Term Offered:* Spring, Fall

Core Natural Sciences

**EEES 1090 Down To Earth: Environmental Science**

[3 credit hours]

Evaluation of environmental controversies using ecology, economics and human values. Issues range from global change, overpopulation, food production, pollution, disease, endangered species, to unique habitats including rainforests and coral reefs. (not for credit in the major)

*Term Offered:* Spring, Fall

Natural Sciences core course.

**EEES 1090 Environmental Solutions Laboratory**

[1 credit hour]

Basic scientific methods are used to conduct laboratory and field studies relevant to contemporary environmental issues.

*Term Offered:* Spring, Summer, Fall

Core Natural Sciences

**EEES 1110 Marine Biology**

[3 credit hours]

An exploration of life in the world’s oceans, emphasizing how marine organisms thrive in broadly diverse environments. Topics include the major ocean habitats, and ecological relationships among associated flora/fauna.

*Term Offered:* Spring, Fall

Core Natural Sciences

**EEES 1130 Plants And Society**

[3 credit hours]

This course centers on the importance of plants to our planet. Includes an introduction to botany and discussion of plants that provide food, materials, spices, medicines, drugs and poisons. (not for major credit)

*Core Natural Sciences*

**EEES 1170 Microbes And Society**

[3 credit hours]

A survey course focused on how microbes impact everyday life including discussions of infectious disease, food safety, and bioterrorism. Natural Sciences core course.

*Term Offered:* Spring, Summer

Core Natural Sciences
EEES 1180 Marine Biology Coral Reef Lab
[1 credit hour]
A virtual laboratory-based exploration of the coral reef environment and the dynamics of the coral reef ecosystem. The web of life on reefs will be examined at multiple levels, including living and non-living components and specialized roles among species, with emphasis on the delicate balance of natural processes and impacts of various stressors. Online data labs will be enhanced with at-home activities including creating and manipulating a physical model of a reef ecosystem. This course fulfills the university requirement for a natural science laboratory.
Term Offered: Spring
Core Natural Sciences

EEES 2010 Introduction To Environmental Studies
[3 credit hours]
Introduction to issues currently affecting environmental quality. Fundamental scientific concepts relating to those issues and ethical, economic, legal and political considerations that affect the resolution of environmental problems.
Term Offered: Spring, Fall

EEES 2050 Marine Biology Field Methods Lab
[3 credit hours]
Field exercises relevant to data collection, data analysis, and use of standard field methods and equipment in local ecosystems around Toledo. Field trips will focus on developing testable hypotheses, collecting data to answer those hypotheses using standard methods and equipment, analyzing data, and writing and presenting results in a scientific format.
Prerequisites: EEES 2150 with a minimum grade of C- or EEES 2100 with a minimum grade of C-
Term Offered: Spring, Fall

EEES 2060 Field Methods Lab
[3 credit hours]
Field exercises relevant to data collection, data analysis, and use of standard field methods and equipment in local ecosystems around Toledo. Field trips will focus on developing testable hypotheses, collecting data to answer those hypotheses using standard methods and equipment, analyzing data, and writing and presenting results in a scientific format.
Prerequisites: EEES 2150 with a minimum grade of C- or EEES 2100 with a minimum grade of C-
Term Offered: Spring, Fall

EEES 2080 Advanced Computer Applications
[2 credit hours]
Desktop computers used by scientists: word processing, spreadsheets, databases, GPS, processing GPS files, contour and mapping software.
Term Offered: Spring, Fall

EEES 2100 Fundamentals Of Geology
[4 credit hours]
Consideration of earth materials and the dynamic external and internal processes active on earth; the physical and biological history of the earth. Intended for science majors.

EEES 2150 Biodiversity
[4 credit hours]
Exploration of biodiversity and general biological processes and problems as they are experienced by all living organisms: genetics, reproduction, evolution, and ecology.
Term Offered: Spring, Summer, Fall
Core Natural Sciences, Trans Mod Natural Science

EEES 2160 Biodiversity Laboratory
[1 credit hour]
Laboratory exercises designed to complement the material covered in EEES 2150.
Corequisites: EEES 2150
Term Offered: Spring, Fall
Core Natural Sciences

EEES 2170 Geologic Time
[3 credit hours]
Fundamental scientific concepts relating to those issues and ethical, economic, legal and political considerations that affect the resolution of environmental problems.
Term Offered: Spring, Fall

EEES 2180 Marine Biology Coral Reef Lab
[1 credit hour]
A virtual laboratory-based exploration of the coral reef environment and the dynamics of the coral reef ecosystem. The web of life on reefs will be examined at multiple levels, including living and non-living components and specialized roles among species, with emphasis on the delicate balance of natural processes and impacts of various stressors. Online data labs will be enhanced with at-home activities including creating and manipulating a physical model of a reef ecosystem. This course fulfills the university requirement for a natural science laboratory.
Term Offered: Spring
Core Natural Sciences

EEES 2190 Geomorphology
[3 credit hours]
The morphology and paleoecology of fossil taxa, significant strata, and tectonic events important to the interpretation of paleoenvironments and Earth history are stressed. Field trip(s) required.
Prerequisites: EEES 1010 with a minimum grade of C- or EEES 2100 with a minimum grade of C-
Term Offered: Spring

EEES 2200 Climate Change
[3 credit hours]
An overview of the understanding of climate change and role of human activities, including atmospheric processes, greenhouse effect, carbon cycling, physical evidence, impacts, and proposed global actions in response.
Term Offered: Spring, Summer, Fall

EEES 2250 Environmental Science Laboratory
[1-4 credit hours]
A lower division undergraduate course covering some aspect of environmental sciences not covered in the formal course offerings of the department. Students may repeat the course for different topics.
Term Offered: Spring, Fall
EEES 2990 Independent Study  
[1-4 credit hours]  
Student selects an appropriate approved subject for individualized study and prepares a report or gives equivalent evidence of mastery of the selected subject.  
Term Offered: Summer, Fall  
EEES 3000 Geology Of National Parks  
[3 credit hours]  
Study of regional geology of the U.S., focusing on national parks and monuments with the aim of furthering the student's geological knowledge and encouraging visitation as a tourist.  
Prerequisites: EEES 1010 with a minimum grade of C- or EEES 2100 with a minimum grade of C-  
Term Offered: Fall  
EEES 3050 General Ecology  
[3 credit hours]  
The structure, function and regulation of populations, communities and ecosystems, emphasizing human activities and their ecological consequences.  
Prerequisites: EEES 2150 with a minimum grade of C- or BIOL 2150 with a minimum grade of C-  
Term Offered: Spring, Fall  
EEES 3060 General Ecology Laboratory  
[1 credit hour]  
Laboratory and field exercises demonstrating ecological principles.  
Corequisites: EEES 3050  
Term Offered: Fall  
EEES 3100 Surficial Processes  
[3 credit hours]  
Description and study of the earth's surface features from the point of view of their origin, including landforms created by glaciers, rivers, the wind, along coasts, tectonics and erosional/depositional processes. Field trip required.  
Prerequisites: EEES 1010 with a minimum grade of C- or EEES 2100 with a minimum grade of C-  
Term Offered: Fall  
EEES 3210 Mineralogy and Petrology  
[4 credit hours]  
Mineralogy: Occurrence, characteristics and crystal chemistry, identification and geologic environments of formation of common minerals. Igneous and Metamorphic Petrology: Igneous and metamorphic rock characteristics, origins, classification and interpretation of conditions of formation. Laboratory: Using megascopically observable physical properties to identify and classify common minerals and infer crystal chemistry. Megascopical identification and classification of igneous and metamorphic rocks, identification of mineral associations and interpretation of conditions of formation.  
Prerequisites: EEES 1010 with a minimum grade of C- or EEES 2100 with a minimum grade of C-  
CHEM 1230 with a minimum grade of C-  
Term Offered: Spring, Fall  
EEES 3220 Sedimentary Petrology and Stratigraphy  
[3 credit hours]  
Megascopical description of sediments and sedimentary rocks, including their characteristics, classification and diagenesis; introduction to depositional processes and environments of sediments, and stratigraphic relationships of sedimentary rocks.  
Prerequisites: EEES 2100 with a minimum grade of C- or EEES 1010 with a minimum grade of C-  
Term Offered: Spring, Fall  
EEES 3250 Engineering Geology  
[3 credit hours]  
An introduction to the application of geologic principles to engineering practices through a series of readings, laboratory exercises and practical problems. First the fundamentals of geology are presented including: plate tectonics and the resulting distributions of geologic materials and phenomena; mineral, rock and soil characterization; geologic structures; and construction and use of geologic maps. The remainder of the course investigates specific geologic processes and applications to engineering practices.  
Prerequisites: MATH 1750 with a minimum grade of C- or MATH 1830 with a minimum grade of C- or MATH 2450 with a minimum grade of C-  
Term Offered: Fall  
EEES 3310 Field Methods: Structural Geology and Mapping  
[3 credit hours]  
Rock deformation and its expression on maps; applying geometrical and trigonometric principles to solve problems involving dipping strata; stereonet applications, interpreting geological maps, constructing cross sections, geological GIS applications.  
Prerequisites: EEES 2100 with a minimum grade of C- or EEES 1010 with a minimum grade of C-  
Term Offered: Spring, Fall  
EEES 3360 Oceanography  
[3 credit hours]  
An exploration of the geological, physical, chemical and biological nature of the oceans. Emphasis on the origin and evolution of ocean basins, plate tectonics, properties of seawater, and physical processes of circulation, especially as related to climate, the hydrologic cycle, and life in the oceans.  
Prerequisites: EEES 2100 (may be taken concurrently) with a minimum grade of C- or EEES 1010 (may be taken concurrently) with a minimum grade of C- and (MATH 1210 (may be taken concurrently) with a minimum grade of C-) or MATH 1320 (may be taken concurrently) with a minimum grade of C-) or MATH 1340 (may be taken concurrently) with a minimum grade of C-)  
Term Offered: Spring, Summer, Fall  
EEES 3800 Botany  
[4 credit hours]  
A detailed introduction for science majors to general plant biology, via lecture and laboratory. Topics include plant structure, function, evolution, diversity, agriculture and other non-food uses, and ecology.  
Prerequisites: EEES 2150 with a minimum grade of D- and BIOL 2170 with a minimum grade of D-  
Term Offered: Spring
EEES 3810 Science of Gardening  
[3 credit hours]  
This course explores the science underlying gardening, and it is designed to foster understanding of basic scientific knowledge and the scientific process, as well as the practical application of science. The course focuses on how plants are affected by their biotic and abiotic environment, especially light, water, temperature, nutrients, soil, and enemies and partners.  
Prerequisites: EEES 2150 with a minimum grade of C-  
Term Offered: Spring, Fall  

EEES 3900 Literature And Communications In The Environmental Sciences  
[3 credit hours]  
Survey and analysis of environmental issues featuring guest experts from a variety of environment-related occupations, readings from the environmental literature and student reports.  
Prerequisites: ENGL 1110 with a minimum grade of C-  
Term Offered: Spring, Fall  

EEES 4100 Glacial Geology  
[3 credit hours]  
To understand glaciers and glacial landscapes. Topics include mass balance, ice flow, hydrology, erosion, deposition, landforms, glacial lakes and development of the Ohio glacial landscape. Field trip is mandatory.  
Prerequisites: EEES 3100 with a minimum grade of C-  
Term Offered: Spring, Fall  

EEES 4150 Evolution  
[3 credit hours]  
The modern theory of evolution is presented within a general framework of biological and geological evidence focusing on the fossil record, early biomolecules, protein synthesis, genetics, phylogeny and vertebrate evolution.  
Prerequisites: (EEES 2150 with a minimum grade of C- or BIOL 2150 with a minimum grade of C-) and CHEM 1230 with a minimum grade of C-  
Term Offered: Spring, Summer, Fall  

EEES 4160 Environmental Data Management  
[3 credit hours]  
An introductory course in data management for environmental science seniors covering the basics of data management practices and the use of Excel and R for data preparation, evaluation, analysis, visualization, and interpretation. Prerequisite: EEES 2500 or approval of instructor.  
Prerequisites: EEES 2500 with a minimum grade of C-  
Term Offered: Spring, Fall  

EEES 4200 Quaternary Geology  
[3 credit hours]  
To provide understanding of such cyclical events as climate change, sea level fluctuations, vegetation change and ice sheet paleogeography during the Quaternary Period and to explore future changes for planet Earth. Field trip is mandatory.  
Prerequisites: EEES 3100 with a minimum grade of C-  
Term Offered: Spring  

EEES 4220 Environmental Geochemistry  
[3 credit hours]  
Chemical reactions of environmental concern. Water and soil chemistry related to contaminant fate and mobility. Computer software used.  
Prerequisites: CHEM 1230 with a minimum grade of C-  
Term Offered: Spring, Fall  

EEES 4240 Soil Science  
[3 credit hours]  
Basic principles of soil formation, physics, and chemistry with emphasis on their influence on fluid and chemical migration and preservation of soil quality from geological, agricultural and environmental perspectives.  
Prerequisites: CHEM 1230 with a minimum grade of C- or CHEM 1090 with a minimum grade of C-  
Term Offered: Spring  

EEES 4250 Soil Ecology  
[3 credit hours]  
Underlying concepts and theory of modern soil ecology will be reviewed including the biogeochemical cycles and ecological functions of soil, and the effects of human activities. (Spring, alternate years, odd)  
Prerequisites: EEES 3050 with a minimum grade of C- or EEES 4240 with a minimum grade of C-  
Term Offered: Spring, Fall  

EEES 4260 Soil Ecology Laboratory  
[1 credit hour]  
Laboratory exercises designed to complement the material covered in EEES 4250.  
Corequisites: EEES 4250  
Term Offered: Spring, Fall  

EEES 4300 Field Botany  
[3 credit hours]  
Introduction to the principles and methodology of plant taxonomy with particular attention to the native plant species.  
Prerequisites: EEES 2150 with a minimum grade of D- or BIOL 2150 with a minimum grade of D-  

EEES 4330 Vertebrate Ecology And Systematics  
[4 credit hours]  
Ecology, systematics and conservation of the vertebrates, with special emphasis on forms native to North America.  
Prerequisites: EEES 2150 with a minimum grade of C-  
Term Offered: Spring, Fall  

EEES 4350 Ecology and Conservation of Reptiles and Amphibians  
[3 credit hours]  
The ecology, diversity, evolution, and conservation of amphibians and reptiles. Lectures will discuss natural history, trait diversity, evolutionary context, and ecological implications of amphibians and reptiles. Hands-on activities include taxonomy and identification of local species, survey and field methods, and discussions of scientific literature. Throughout this course, the biology of amphibians and reptiles will be emphasized in the context of conservation.  
Prerequisites: EEES 3050 with a minimum grade of C-  

EEES 4355 Ecology and Conservation of Reptiles and Amphibians Lab  
[1 credit hour]  
Laboratory and field exercises relevant to the conservation and biology of reptiles and amphibians. This course includes field trips, data collection, and analysis of data and samples. Field trips will focus on standard methods of catching, handling, and marking reptiles and amphibians, along with field techniques relevant to studying the ecology and conservation of reptiles and amphibians.  
Corequisites: EEES 4350
EEES 4410 Hydrogeology
[3 credit hours]
Fundamentals of groundwater/earth interactions are introduced concentrating on physical aspects of groundwater flow with applications to the field of water resources and contaminant investigations. This course is designed as the fundamental course in groundwater for students who plan to use hydrogeology in their careers, e.g., environmental geologists, civil and environmental engineers, environmental specialists and scientists, and petroleum geologists.
Prerequisites: MATH 1750 with a minimum grade of C- or MATH 1830 with a minimum grade of C- or MATH 1850 with a minimum grade of C- or MATH 2450 with a minimum grade of C-
Term Offered: Spring

EEES 4450 Hazardous Waste Management
[3 credit hours]
Environmental regulations concerning hazardous waste, characteristics of hazardous waste and disposal technologies, toxicology, characteristics of organic chemicals and heavy metals, biodegradation, soil science, groundwater contamination, risk assessment, site investigation.
Prerequisites: CHEM 1230 with a minimum grade of C- or CHEM 1090 with a minimum grade of C-
Term Offered: Fall

EEES 4480 GIS Applications in Environmental Science
[3 credit hours]
An applications course focused on using GIS techniques and applications in environmental problems and research.
Prerequisites: EEES 2500 with a minimum grade of C- and EEES 2100 with a minimum grade of C-
Term Offered: Spring, Fall

EEES 4490 Remote Sensing of The Environment
[4 credit hours]
Introduction to theory, methods and techniques used to gather and analyze remote sensor data. Topics range from low altitude air photo interpretation through satellite image acquisition.
Prerequisites: GEPL 2010 with a minimum grade of C- or EEES 1010 with a minimum grade of C- or EEES 2100 with a minimum grade of C-
Term Offered: Fall

EEES 4510 Environmental Microbiology
[3 credit hours]
The diversity of microbial life and activities, the functioning of microbial ecosystems in energy and carbon flow and remediation of polluted environments, and the detection and control of pathogens.
Prerequisites: (EEES 2150 with a minimum grade of C- and CHEM 1230 with a minimum grade of C-)
Term Offered: Fall

EEES 4520 Bioremediation
[3 credit hours]
The environmental fate and transport of contaminants; their transformation and biodegradation by plants and microorganisms; bioremediation strategies, including solid phase, slurry phase, and vapor-phase treatments, and natural attenuation.
Prerequisites: (EEES 2150 with a minimum grade of C- and CHEM 1230 with a minimum grade of C-)

EEES 4540 Microbial Ecology
[2 credit hours]
Students will learn the underlying processes that drive microbial population structure and function in the context of the environment and public health, and become familiar with classical and current methodology used in microbial community analysis.
Prerequisites: EEES 2150 with a minimum grade of C- or BIOL 2170 with a minimum grade of C-
Term Offered: Fall

EEES 4550 Methods Of Microbial Investigation
[3 credit hours]
Student will learn the classical and current methodologies (biochemical and molecular) used in microbial community analysis while developing an understanding of experimental design sample handling and data analysis.
Prerequisites: EEES 4540 with a minimum grade of C-

EEES 4610 Geophysics
[3 credit hours]
Survey of theory, field applications, interpretation principles of solid earth and exploration geophysics. Two hours lecture, three hours methods laboratory.
Prerequisites: (EEES 1010 with a minimum grade of C- or EEES 2010 with a minimum grade of C-) and (MATH 1750 with a minimum grade of C- or MATH 2450 with a minimum grade of C-)

EEES 4630 Numerical Methods In Geophysics
[3 credit hours]
Numerical filters and matrix operations used to process potential field data and wave forms, isolating anomalies and signals of interest; derivative maps, upward and downward continuation; current interpretation software. Term project.
Prerequisites: EEES 4610 with a minimum grade of C-

EEES 4650 Geology Field Course
[1-4 credit hours]
Intensive field studies in various areas of geologic interest. Studies may involve various geologic field methods and descriptive techniques. Course may be repeated multiple times. Fall and Spring.
Prerequisites: EEES 1010 with a minimum grade of C- or EEES 2100 with a minimum grade of C-

EEES 4730 Aquatic Ecology
[3 credit hours]
The biology of populations, communities and ecosystems with emphasis on aquatic environments. Includes the application of principles and theory from aquatic ecology to help understand and solve management problems in aquatic systems.
Prerequisites: EEES 3050 with a minimum grade of C-

EEES 4740 Aquatic Ecology Laboratory
[1 credit hour]
Laboratory exercises on the biology of aquatic populations, communities and ecosystems.
Corequisites: EEES 4730
Term Offered: Fall
EEES 4750 Conservation Biology
[3 credit hours]
The application of principles of ecology, biogeography, genetics, economics, philosophy and other disciplines to the study and maintenance of biological diversity in temperate, subtropical and tropical systems.
Prerequisites: EEES 3050 with a minimum grade of C-
Term Offered: Spring, Fall

EEES 4755 Conservation Biology Lab
[1 credit hour]
Laboratory and field exercises relevant to the conservation biology of populations, communities and ecosystems. This course includes field trips, sample analyses and computer-based approaches to biodiversity inventories and reserve design.
Prerequisites: EEES 4750 (may be taken concurrently) with a minimum grade of C-

EEES 4760 Landscape Ecology
[3 credit hours]
A general introduction to the theory and practice of landscape ecology, including landscape-analysis, pattern-process relationship, and potential management applications at multiple spatial and temporal scales.
Prerequisites: EEES 3050 with a minimum grade of C-
Term Offered: Spring, Fall

EEES 4790 Ecology Field Trip
[2-4 credit hours]
Field study of globally significant ecosystem(s), including analysis of structural and functional relationship within and between ecosystems. Opportunities for individual student projects. Prerequisite: EEES 3050 or equivalent.
Prerequisites: EEES 3050 with a minimum grade of C-
Term Offered: Spring, Summer

EEES 4910 Directed Research
[1-5 credit hours]
Research under guidance of faculty member. An acceptable thesis is required for credit toward major.
Term Offered: Spring, Summer, Fall

EEES 4920 Senior Geology Seminar
[2 credit hours]
Survey of geology at a senior level using readings, class discussions and some lectures. The final exam will be one of the assessment measures for the Geology Program.
Term Offered: Spring

EEES 4940 Internship
[1 credit hour]
The student identifies and communicates with a community professional to earn a short-term, volunteer or paid position that will provide practical experience relevant to the student’s plan of study. Student must enroll during the term service is performed.
Term Offered: Spring, Summer, Fall

EEES 4960 Senior Seminar
[1 credit hour]
The intent of the course is to provide senior students with an opportunity to identify relevant positions, create appropriate resumes/CVs and cover letters, and develop necessary interview skills as they plan for their professional careers. Prerequisite: senior standing in ENST, ENSC, GEOL, or BIOL, requiring permission of instructor.
Term Offered: Spring, Fall

EEES 4970 Senior Environmental Capstone
[3 credit hours]
A project-based capstone course focused on integration, synthesis and applications of course work students have taken in their program of study. Departmental majors with different academic backgrounds work in small teams to complete a practical, interdisciplinary project for a client culminating in a scope of work, team-presentation and project report. Clients might include a conservation organization, governmental agency, private industry, school, or other.
Prerequisites: EEES 3050 with a minimum grade of C-
Term Offered: Spring, Fall

EEES 4980 Special Topics: Advanced Undergraduate
[1-4 credit hours]
An advanced undergraduate course covering some aspect of the environmental sciences not covered in the formal upper-division undergraduate curriculum. Students may repeat the course for different topics.
Term Offered: Spring, Summer, Fall

EEES 4990 Independent Study: Advanced Undergraduate
[1-4 credit hours]
Student selects an appropriate approved subject for individualized study and prepares a report or gives equivalent evidence of mastery of the selected subject.
Term Offered: Spring, Summer, Fall

Departmental Honors

Qualified sophomores, juniors and seniors working on degree programs within the department of environmental sciences may be invited to work for one of the following citations, consistent with their degree program: “honors in biology,” “honors in environmental sciences,” “honors in environmental studies” or “honors in geology.”

1. Admission: The departmental Honors Program is open to all department majors and may be taken concurrently with College Honors. Admission to the departmental Honors Program is based on academic achievement. Normally, students invited to participate will have achieved a 3.3 or better overall GPA by the end of the sophomore year.

2. Requirements: A student must satisfactorily complete from three to six credits of EEES 4910 and graduate with a minimum overall GPA of 3.3 in order to receive the honors citation. Candidates must prepare a written thesis based on their research and present an oral report at an open forum. Candidates also will provide two unbound copies of the approved thesis to the department for binding, one each for the research Advisor and department. This program provides an opportunity for the exceptional student to work closely with a faculty Advisor on an independent research topic. This research experience.
often leads to publication and is an excellent preparation for graduate studies.

**BA in Environmental Studies**

The Bachelor of Arts degree in Environmental Studies requires a minimum of 120 hours, including a minor. Students in this degree program take a broad, interdisciplinary approach that combines science with social science and humanities courses. Students are required to minor in a non-science discipline. This degree provides a foundation for students in the sciences that explain the human impacts to the environment, and the social and human dimensions of these issues including environmental politics, ethics, geography, and economics. Students with this degree are prepared for graduate school and career opportunities with federal and state regulatory agencies; wildlife and zoological parks; state, county and city parks; state natural resource agencies; university and secondary schools; and nonprofit and non-government organizations (NGOs).

**For the Bachelor of Arts degree in Environmental Studies (ENST)** following courses are required:

**The completion of the Environmental Studies Major requires a minor approved by your advisor.** Common minors include Geography and Planning (p. 73), and Communications (p. 51).

Students also are required to complete a 100-hr environment-related internship (EEES 4940) in an agency, corporation, university laboratory or other approved location.

With the exception of EEES 4940 students may not take any courses required in the major as P/NC.

Below is a sample plan of study. Consult your degree audit for your program requirements.

BS in Biology with a Concentration in Ecology and Organismal Biology

The Bachelor of Science degree in Biology with a concentration in Ecology and Organismal Biology requires a minimum of 120 hours. Students in this degree focus on the ecology of animals, plants and microorganisms and their roles in the biosphere. This degree prepares students for employment or graduate school in life sciences fields, such as wildlife biology, freshwater biology, zoology, conservation biology and forestry.

NOTE: Students pursuing a BS in Biology with a Concentration in Ecology and Organismal Biology cannot double major with a BS in Environmental Sciences/Biology Minor.

The Bachelor of Science degree in biology with a concentration in ecology and organismal biology (BIOM) requires the following courses:

</table>

1. Students will be able to describe general taxonomic organization of life on earth and the evolutionary processes that underlie biological diversity.
2. Students will be able to explain how both abiotic factors, such as climate and pollution, and biotic factors, such as competition and disease, affect organisms, communities, and ecosystems.
3. Students will be able to describe how scientific and social (economic or political) factors constrain solutions to environmental quality problems;
4. Students will demonstrate an increase in their knowledge of the relationships between the biosphere, atmosphere, geosphere and hydrosphere in northwest Ohio.
5. Students will be able to explain how human activities impact the biosphere, atmosphere, geosphere, and hydrosphere in northwest Ohio.
6. Students will be able to identify science-based information or research that can contribute to communicating environmental issues to the public and contribute to solutions to environmental issues.
7. Students will be able to develop and propose informed solutions to environmental issues while taking into account economic considerations and political compromises.

### Total Hours
- **120-121**

1. Choose from any upper level EEES course (4000 level) for which prerequisites are met.
2. Appropriate lab courses to be chosen with consent of BIOM advisor (Dr. Sigler).

**PLO 1.** Students will be able to demonstrate a thorough understanding of the fundamental concepts of cell and molecular biology, biochemistry, evolutionary biology and physiology and use these concepts to analyze and evaluate biological observations, in written and mathematical terms, and predict the behavior of biological manipulations.

**PLO 2.** Students will be able to read primary biological literature and apply critical thinking skills to analyze and interpret conclusions from biological experiments. They should be able to perform effective literature searches and identify relevant primary literature.

**PLO 3.** Students will be able to clearly discuss, analyze and evaluate subjects relating to biological sciences in both written and spoken presentations. They should be able to interpret these discoveries in the context of current understanding.

### BS in Environmental Geology
The Bachelor of Science in Environmental Geology requires a minimum of 120 hours. Environmental geology majors have a foundation in geology, particularly in near surface geology at the intersection of geology and the environment. Students are also taught to think critically and develop communication skills. Students with this degree are prepared for graduate school and career opportunities with environmental consulting firms and industry, state natural-resource agencies and geological surveys, planning commissions and water-resource agencies, state and national regulatory agencies, universities, colleges and secondary schools.

**NOTE:** Students pursuing a BS in Environmental Geology cannot double major with a BS in Environmental Sciences/Geology Minor.

The Bachelor of Science degree in geology requires a minimum of 45-46 hours in the major, including the following:

- EEES 1020  Introductory Geology Laboratory
- EEES 2100  Fundamentals Of Geology
- EEES 2230  Earth History: Historical Geology and Paleontology (WAC)
- EEES 2500  Computer Applications In Environmental Sciences
- EEES 3210  Mineralogy and Petrology
- EEES 3220  Sedimentary Petrology and Stratigraphy
- EEES 3310  Field Methods: Structural Geology and Mapping
- EEES 3900  Literature and communication in the Environmental Sciences (WAC)
- EEES 4650  Geology Field Course
EEES 4920  Senior Geology Seminar

Select an additional 6 courses from the following three groups with at least 2 from each group:

Group A
EEES 2400 Oceanography And Water Resources  
EEES 3100 Surficial Processes  
EEES 4100 Glacial Geology  
EEES 4240 Soil Science  
EEES 4200 Quaternary Geology

Group B
EEES 4150 Evolution  
EEES 4220 Environmental Geochemistry  
EEES 4410 Hydrogeology  
EEES 4450 Hazardous Waste Management  
EEES 4490 Remote Sensing of The Environment  
EEES 4610 Geophysics

Group C
EEES 2100 Introduction to the Environment: Energy and Climate  
EEES 2300 Introduction to the Environment: Land-use and Water  
EEES 2200 Climate Change  
EEES 2510 Advanced Computer Applications  
EEES 4480 GIS Applications in Environmental Science  
ECON 3240 Environmental Economics  
PSC 4340 Environmental Policy

NOTE: Students may request credit for EEES 4980 Special Topics to qualify as an elective. Discuss individual courses and topics with your academic advisor in the Department.

The following related courses are also required:
CHEM 1230 General Chemistry I  
CHEM 1280 General Chemistry Lab I  
CHEM 1240 General Chemistry II  
CHEM 1290 General Chemistry Lab II

Calculus I and II: (MATH 1750 & MATH 1760, or MATH 1850 & MATH 1860, or MATH 1830 & MATH 1840)  
Two semesters of general physics either algebra or calculus based: (PHYS 2070 and PHYS 2080, or PHYS 2130 and PHYS 2140)

Students must achieve a minimum GPA of 2.5 in the major to graduate. Students may not take any required course in the major or related areas as P/NC.

Below is a sample plan of study. Consult your degree audit for your program requirements.

First Term
NSM 1000 Natural Sciences & Mathematics  2
EEES 2100 Fundamentals Of Geology  4
EEES 1020 Introductory Geology Laboratory  1
EEES 2500 Computer Applications In Environmental Sciences  1
ENGL 1110 College Composition I  3
Social Sciences Core  3
Total Hours  14

Second Term
EEES 2230 Earth History: Historical Geology and Paleontology  4
ENGL 1130 College Composition II: Academic Disciplines And Discourse  3
CHEM 1230 General Chemistry I  4
CHEM 1280 General Chemistry Lab I  1
Arts/Humanities Core  3
Total Hours  15

Third Term
EEES 3210 Mineralogy and Petrology  4
CHEM 1240 General Chemistry II  4
CHEM 1290 General Chemistry Lab II  1
EEES 2500 Computer Applications In Environmental Sciences  1
Select one of the following:  4
MATH 1750 Calculus For The Life Sciences With Applications I  
MATH 1830 Calculus I For Mathematicians, Scientists And Educators  
MATH 1850 Single Variable Calculus I
Diversity of US  3
Total Hours  17

Fourth Term
EEES 3220 Sedimentary Petrology and Stratigraphy  3
EEES 4650 Geology Field Course  3
EEES 3900 Literature And Communications In The Environmental Sciences (WAC)  3
Select one of the following:  3-4
MATH 1760 Calculus For The Life Sciences With Applications II  
MATH 1840 Calculus II For Mathematicians, Scientists And Educators  
MATH 1850 Single Variable Calculus I
Non-US Diversity  3
Total Hours  15-16

Fifth Term
PHYS 2070 General Physics I  5
EEES 3310 Field Methods: Structural Geology and Mapping  3
Select one geology group A elective, for example:  3
EEES 3100 Surficial Processes  
Select one geology group B elective, for example:  3
EEES 4410 Hydrogeology  
Total Hours  14

Sixth Term
PHYS 2080 General Physics II  5
Select one geology group A elective, for example:  3
EEES 4100 Glacial Geology  
Social Sciences Core  3
Electives 6

Seventh Term

Select one geology group C electives, for example: 3

EEES 2200 Climate Change

Select one geology group C elective, for example: 3

EEES 4480 GIS Applications in Environmental Science

Electives 5

Arts/Humanities Core 3

Hours 14

Eighth Term

EEES 4920 Senior Geology Seminar 2

Select one geology group B elective, for example: 3

EEES 4610 Geophysics

Electives 9

Hours 14

Total Hours 120–121

A. Students will be able to apply the common tools necessary for a field investigation in geology.
B. Students will be able to identify and classify Earth materials, including minerals, rocks and common fossils.
C. Students will be able to apply the concepts of plate tectonics to the analysis of other geologic processes, such as the distribution of earthquakes, creation of landforms, and sedimentary depositional environments.
D. Students will be able to explain and discuss the basic principles concerning the origin and distribution of minerals (mineralogy) and rocks (petrology).
E. Students will be able to evaluate the record of rock behavior under stress (structural geology) within the lithosphere.
F. Students will be able to analyze field maps or other images to interpret the processes and interactions among the primary Earth systems that produce features on the Earth surface.
G. Students will be able to evaluate environmental issues in the context of geological principles, and to design practical potential solutions.
H. Students in Earth science must also be able to apply the tools from chemistry, physics, biology, mathematics, and computing for solving problems.
I. Students will be able to explain the two fundamental paradigms in geology: plate tectonics and evolution.

BS in Environmental Sciences

The Bachelor of Science in Environmental Sciences requires a minimum of 120 hours including a minor. Students in this degree program take a broad, interdisciplinary approach that combines science with social science and humanities courses. Students are required to minor in a science to develop a deeper understanding of a specialized scientific field. Students with this degree are prepared for graduate school and career opportunities federal and state regulatory agencies; wildlife ranges and zoological parks; environmental consulting firms; state, county and city parks; state natural resource agencies; university and secondary schools; and nonprofit and non-government organizations (NGOs)

NOTE: Students pursuing a BS in Environmental Sciences cannot double major in a BS in Biology with a Concentration in Ecology and Organismal Biology nor BS in Environmental Geology.

For the Bachelor of Science degree in Environmental Sciences (ENSC) The following courses must be included:

EEES 1020 Introductory Geology Laboratory
EEES 2020 Introduction to the Environment: Energy and Climate
EEES 2030 Introduction to the Environment: Land-use and Water
EEES 2100 Fundamentals Of Geology
EEES 2150 Biodiversity
EEES 2160 Biodiversity Laboratory
EEES 2500 Computer Applications In Environmental Sciences
EEES 2510 Advanced Computer Applications

One of the following:

EEES 2760 Field Methods or EEES 2600 Analytical Methods

EEES 3050 General Ecology
EEES 3060 General Ecology Lab

One of the following:

EEES 2400 Oceanography and Water Resources or EEES 3100 Surficial Processes or EEES 4240 Soil Science

EEES 3900 Literature And Communications In The Environmental Sciences
EEES 4940 Internship
EEES 4970 Environmental Capstone
EEES 4960 Senior Seminar

One advanced EEES laboratory course

The following RELATED courses are also required:

MATH 2640 Statistics for Applied Science
Calculus I and II: (MATH 1750 and MATH 1760, or MATH 1850 and MATH 1860)
CHEM 1230 General Chemistry I
CHEM 1280 General Chemistry Lab I
CHEM 1240 General Chemistry II
CHEM 1290 General Chemistry Lab II

Four of following RELATED courses, including at least 1 in each of the social sciences and humanities groups:

Social Science group:
GEPL 3900 Environmental Planning
PSC 4340 Environmental Policy
ECON 3240 Environmental Economics
ECON 3270 Natural Resource Economics

Humanities group
REL 2980 Religion and Environment
PHIL 3180 Environmental Ethics
PJS 2500 Peace Education

The completion of the Environmental Sciences Major requires a minor approved by your advisor. Common minors include Environmental Biology (p. 383), and Geology (p. 379). Other possible minors include the Minor in Renewable Energy (p. 417) or Minor Green Chemistry and Engineering (p. 370).
Students also are required to complete a 100-hr environment-related internship (EEES 4940 for 1 credit hour) in an agency, corporation, university laboratory or other approved location. With the exception of EEES 4940, students may not take any courses required in the major as P/NC.

Below is a sample plan of study (for the Environmental Biology Minor\(^1\)). Consult your advisor and the degree audit for your program requirements.

### Total Hours

- **120**

A. Environmental Science requires a basic understanding of geology, including an understanding of earth materials and landforms.
1. Students will be able to identify and classify minerals, rocks (igneous, sedimentary, and metamorphic), and common fossils.
2. Students will be able to identify landforms and interpret formative processes of landforms from maps and digital elevation models.

B. Environmental Science uses the principles of biology to understand how organisms are affected by the environment.
1. Students will be able to explain how both abiotic factors, such as climate and pollution, and biotic factors, such as competition and disease, affect organisms, communities, and ecosystems.

C. Environmental Scientists interact with Social Scientists to understand the human context in which environmental problems exist.
1. Students will be able to propose and discuss public policy and planning options for improving or managing factors that impact the environment.

D. Environmental Scientists provide the science to address the impacts and solutions of environmental problems.
1. Students will be able to analyze the major environmental problems that are affecting our earth and well-being, including climate change, pollution, and resource management.

E. Environmental Science is a field-oriented science conducted, in part, through field investigations, which requires expertise in collecting field-based data.

1. Students will be able to organize and conduct data collection for a field-based investigation.

F. Environmental Scientists require technical skills, including computing, statistics, and communication.

1. Students will be able to analyze data both graphically and statistically.

2. Students will be able to interpret and report results of a research project, in both audio-visual and written forms, using appropriate technology.

G. Environmental Science is multi-disciplinary, but our students must have an area of concentration, such as Biology, Geology, or Chemistry (within Environmental Science).

1. Students should be able to describe and explain examples of the linkages among their area of concentration and the other areas of Environmental Science.

**Minor in Environmental Sciences**

The Minor in Environmental Sciences requires a minimum of 21 hours of which at least 12 credit hours must be unique to that minor. Students in this minor are exposed to the science that underlies and helps to solve our environmental issues.

Students electing to minor in environmental sciences must complete at least 21 hours of course work consisting of the following:

**CORE REQUIRED COURSES**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>EEES 2100</td>
<td>Fundamentals Of Geology</td>
<td>4</td>
</tr>
<tr>
<td>EEES 2020</td>
<td>Introduction to the Environment: Energy and Climate</td>
<td>3</td>
</tr>
<tr>
<td>EEES 2030</td>
<td>Introduction to the Environment Land-Use and Water</td>
<td>3</td>
</tr>
<tr>
<td>EEES 2150</td>
<td>Biodiversity</td>
<td>4</td>
</tr>
<tr>
<td>EEES 2500</td>
<td>Computer Applications In Environmental Sciences</td>
<td>1</td>
</tr>
</tbody>
</table>

Choose any 2000–4000-level EEES courses, in consultation with your advisor, to achieve 21, or more, total credit hours.

**Total Hours**: 21

A minimum GPA of 2.0 in the EEES course work is required, and the program must be approved in advance by the departmental ENSC minor advisor (Dr. Fisher).

**NOTE**: EEES 3050 (Fundamentals of Ecology) is a prerequisite course for several of the advanced EEES courses.

**Minor in Geology**

The Minor in Geology requires a minimum of 21 hours of which at least 12 credit hours must be unique to that minor. Students in this minor have a foundation in geology, particularly in near surface geology at the intersection of geology and the environment. Students electing to minor in geology must complete the following:

**REQUIRED COURSES**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>EEES 1020</td>
<td>Introductory Geology Laboratory</td>
<td>1</td>
</tr>
<tr>
<td>EEES 2100</td>
<td>Fundamentals Of Geology</td>
<td>4</td>
</tr>
</tbody>
</table>

**AT LEAST TWO COURSES FROM THE FOLLOWING FOUR**

Students completing a the Environmental Biology minor must be sure that at least 12 credit hours of the minor requirements are unique to the minor, and are not being used to satisfy requirements in the major or another minor.

**Minor in Environmental Biology**

**CORE REQUIRED COURSES**

<td>1-4</td>
</tr>
</tbody>
</table>

Students will be able to describe the basics of inheritance, including genes, chromosomes and DNA structure.

Students will be able to identify the basic structures of a cell and describe basic cellular functions, including mitosis, meiosis, metabolism, respiration and photosynthesis.

Students will be able to describe and explain examples for how both abiotic and biotic factors define the distribution of organisms.

Students will be able to explain the basic tenets of evolution, including speciation and natural selection.

Students will be able to examine an ecological issue from a statistical perspective and debate results.

Students will be able to describe and discuss examples of the linkages among biology and the other natural sciences.
CHOOSE AT LEAST 8–10 UNIQUE CREDITS FROM THIS LIST OF COURSES to make up a minimum of 21 credit hours. *Only one of EEES4480 or EEES4490 can be used to fulfill these credits.

**Total Hours**

**Students will be able to identify and classify Earth materials, including minerals, rocks and common fossils.**

**Students will be able to apply the common tools necessary for a field investigation in geology.**

**Students will be able to explain the two fundamental paradigms in geology: plate tectonics and evolution.**

**Students will be able to apply the concepts of plate tectonics to the analysis of other geologic processes, such as the distribution of earthquakes, creation of landforms, and sedimentary depositional environments.**

**Students will be able to explain and discuss the basic principles concerning the origin and distribution of minerals (mineralogy) and rocks (petrology).**

**Students will be able to evaluate the record of rock behavior under stress (structural geology) within the lithosphere.**

**Students will be able to analyze field maps or other images to interpret the processes and interactions among the primary Earth systems that produce features on the Earth surface.**

**Students will be able to evaluate environmental issues in the context of geological principles, and to design practical potential solutions.**

**Department of Mathematics and Statistics**

Geoffrey Martin, Chair  
Ekaterina Shemyakova, Associate Chair  
Seung-Moon Hong, Undergraduate Advisor – Pure Mathematics, Applied Mathematics, Mathematics with Computer Science  
Zhiwei Chen, Undergraduate Advisor - Actuarial Science  
Qin Shao, Undergraduate Advisor - Data Science

**MISSION**

The mission of the undergraduate programs in the mathematical science offered by the Department of Mathematics and Statistics is to provide our majors with the skills and conceptual understanding required to succeed as professionals in occupations requiring training in the mathematical sciences or to succeed in further study at the graduate level.

**Degrees Offered**

The Department of Mathematics and Statistics offers degree programs for a Bachelor of Arts or a Bachelor of Science in Mathematics.

**Advanced Placement**

- Students with a score of 3 or better on AB calculus will receive credit for MATH 1850.
- Students with a score of 3, 4 or 5 on the BC calculus test will receive credit for both MATH 1850 and MATH 1860.
- Students with a score below 3 may be able to obtain credit by taking a departmental test.
• Students with a score of 3 or better on the Statistics Test will receive credit for MATH 2600.

Degrees Offered

• BA in Mathematics (p. 391)
• BS in Mathematics (p. 395)
• Minor in Mathematics (p. 402)

MATH 1010 Applied Business Mathematics
[3 credit hours]
Mathematics used in solving business problems related to simple and compound interest, annuities, payroll, taxes, promissory notes, consumer credit, insurance, markup and markdown, mortgage loans, discounting, financial statement ratios and break-even analysis. Course is not applicable toward the undergraduate Mathematics major requirements.
Term Offered: Fall

MATH 1180 Reasoning With Mathematics
[3 credit hours]
Reasoning with Mathematics will prepare students for an increasingly information-based society. Students will acquire the skills necessary to make rational decisions based on real data and evaluate numerical information. They will be exposed to general methods of inquiry that apply in a wide variety of settings. They will be able to critically assess arguments and make rational decisions. Finally, students will develop the ability to judge the strengths and limitations of quantitative approaches.
Term Offered: Spring, Summer, Fall
Core Mathematics, Trans Mod Mathematics

MATH 1200 Mathematical Modeling and Problem Solving
[4 credit hours]
Mathematical modeling of data using linear, quadratic, rational, and radical functions in their numerical, symbolic, graphic, and verbal forms. Problem solving methods and strategies will be emphasized. Course is not applicable toward the undergraduate Mathematics major requirements. Math core course.
Term Offered: Spring, Summer, Fall
Core Mathematics, Trans Mod Mathematics

MATH 1210 Mathematics For Education Majors I
[3 credit hours]
Principles of elementary number theory, base systems, foundations of arithmetic operations, fractions, decimals and problem solving techniques. Course is not applicable toward the undergraduate Mathematics major requirements.
Prerequisites: MATH 1180 with a minimum grade of C-
Term Offered: Spring, Fall
Core Mathematics

MATH 1220 Mathematics For Education Majors II
[3 credit hours]
Development of integers, rational numbers and real numbers; probability, statistics, informal geometry, geometric figures and measurements. Course is not applicable toward the undergraduate Mathematics major requirements.
Prerequisites: MATH 1210 with a minimum grade of C-
Term Offered: Spring, Summer, Fall
Core Mathematics, Trans Mod Mathematics

MATH 1320 College Algebra
[3 credit hours]
Number system; elementary theory of equations and inequalities; functions and relations; exponentials and logarithms; systems of equations and topics in analytic geometry. Course is not applicable toward the undergraduate Mathematics major requirements. No credit given for students who have credit for MATH 1340.
Prerequisites: MATH 1200 with a minimum grade of C- or ACT Math with a score of 20 or SAT Mathematics with a score of 480 or Aleks Math Placement Test with a score of 46 or Aleks Math Placement Retest with a score of 61 or Math - Coll Algebra Placement with a score of 10 or MATH SECTION SCORE with a score of 510
Term Offered: Spring, Summer, Fall
Core Mathematics, Trans Mod Mathematics

MATH 1330 Trigonometry
[3 credit hours]
Definitions and graphs of trigonometric functions and their inverses, solving trigonometric equations, applications and topics in analytic geometry. Course is not applicable toward the undergraduate Mathematics major requirements. No credit given for students who have credit for MATH 1340.
Prerequisites: MATH 1320 with a minimum grade of C- or ACT Math with a score of 22 or SAT Mathematics with a score of 520 or Aleks Math Placement Test with a score of 61 or Aleks Math Placement Retest with a score of 510 or Math - Coll Algebra Placement with a score of 15 or MATH SECTION SCORE with a score of 550
Term Offered: Spring, Summer, Fall
Core Mathematics, Trans Mod Mathematics

MATH 1340 College Algebra And Trigonometry
[0-5 credit hours]
Functions and graphs, exponential and logarithmic functions, trigonometric functions and applications, systems of equations and topics in analytic geometry. No credit for students who have credit for MATH 1320 or 1330.
Prerequisites: ACT Math with a score of 24 or SAT Mathematics with a score of 560 or Aleks Math Placement Test with a score of 68 or Aleks Math Placement Retest with a score of 68 or (Math - Coll Algebra Placement with a score of 12 and Math - Trigonometry Placement with a score of 9) or MATH SECTION SCORE with a score of 580
Term Offered: Spring, Fall
Core Mathematics, Trans Mod Mathematics
MATH 1730 Calculus with Applications to Business and Finance
[0-5 credit hours]
An introduction to differential and integral calculus. Topics include limits, derivatives, maxima/minima, indefinite and definite integrals with an emphasis on business applications and technology use.
Prerequisites: MATH 1320 with a minimum grade of C- or MATH 1340 with a minimum grade of C- or MATH - Coll Algebra Placement with a score of 15 or ACT Math with a score of 24 or SAT Mathematics with a score of 560 or Aleks Math Placement Test with a score of 68 or Aleks Math Placement Retest with a score of 68 or MATH SECTION SCORE with a score of 580
Term Offered: Spring, Summer, Fall
Core Mathematics, Trans Mod Mathematics

MATH 1750 Calculus For The Life Sciences With Applications I
[0-4 credit hours]
Definitions of trigonometric functions, solving trigonometric equations, functions, limits and derivatives, exponential and logarithmic functions, and applications. Course is not applicable toward the undergraduate Mathematics major requirements.
Prerequisites: MATH 1320 with a minimum grade of C- or MATH 1340 with a minimum grade of C- or MATH - Coll Algebra Placement with a score of 15 or ACT Math with a score of 24 or SAT Mathematics with a score of 560 or Aleks Math Placement Test with a score of 68 or Aleks Math Placement Retest with a score of 68 or MATH SECTION SCORE with a score of 580
Term Offered: Spring, Summer, Fall
Core Mathematics, Trans Mod Mathematics

MATH 1760 Calculus For The Life Sciences With Applications II
[0-3 credit hours]
Indefinite and definite integrals, probability, vectors, least squares, differential equations. Course is not applicable toward the undergraduate Mathematics major requirements.
Prerequisites: MATH 1750 with a minimum grade of C- or MATH 1850 with a minimum grade of C- or MATH 1830 with a minimum grade of C-
Term Offered: Spring, Summer, Fall
Core Mathematics, Trans Mod Mathematics

MATH 1830 Calculus I For Mathematicians, Scientists And Educators
[4 credit hours]
Applications and techniques of integration, polar coordinates and calculus of plane curves, infinite series and Taylor series, vectors and geometry of space. The emphasis is on the rigorous aspects and foundational ideas of calculus. Of interest to students requiring a conceptual understanding of calculus.
Prerequisites: MATH 1340 with a minimum grade of C- or Aleks Math Placement Test with a score of 76 or Aleks Math Placement Retest with a score of 76) or (MATH 1320 with a minimum grade of C- or ACT Math with a score of 27 or SAT Mathematics with a score of 610 or MATH SECTION SCORE with a score of 630 or Math - Coll Algebra Placement with a score of 15) and (MATH 1330 with a minimum grade of C- or Math - Trigonometry Placement with a score of 12)
Term Offered: Fall
Core Mathematics, Trans Mod Mathematics

MATH 1840 Calculus II For Mathematicians, Scientists And Educators
[4 credit hours]
Applications and techniques of integration, polar coordinates and calculus of plane curves, infinite series and Taylor series, vectors and geometry of space. The emphasis is on the rigorous aspects and foundational ideas of calculus. Of interest to students requiring a conceptual understanding of calculus.
Prerequisites: MATH 1830 with a minimum grade of C- or MATH 1850 with a minimum grade of C- or MATH 1920 with a minimum grade of C-
Term Offered: Spring, Fall
Core Mathematics, Trans Mod Mathematics

MATH 1850 Single Variable Calculus I
[0-4 credit hours]
Limits, differentiation, Fundamental Theorem of Calculus, curve sketching, maxima/minima, definite and indefinite integrals, applications. Course is not applicable toward the undergraduate Mathematics major requirements.
Prerequisites: (MATH 1340 with a minimum grade of C- or Aleks Math Placement Test with a score of 76 or Aleks Math Placement Retest with a score of 76) or (MATH 1320 with a minimum grade of C- or ACT Math with a score of 27 or SAT Mathematics with a score of 610 or MATH SECTION SCORE with a score of 630 or Math - Coll Algebra Placement with a score of 15) and (MATH 1330 with a minimum grade of C- or Math - Trigonometry Placement with a score of 12)
Term Offered: Spring, Summer, Fall
Core Mathematics, Trans Mod Mathematics

MATH 1860 Single Variable Calculus II
[0-4 credit hours]
Applications and techniques of integration, polar coordinates and calculus of plane curves, infinite series and Taylor series, vectors and geometry of space.
Prerequisites: MATH 1830 with a minimum grade of C- or MATH 1850 with a minimum grade of C-
Term Offered: Spring, Summer, Fall
Core Mathematics, Trans Mod Mathematics

MATH 1890 Elementary Linear Algebra
[3 credit hours]
Matrix algebra, systems of linear equations, determinants, vector spaces, linear transformations, eigenvalues and eigenvectors, applications, additional topics chosen from Google’s page rank algorithm, Digital Image Compression, and others.
Prerequisites: MATH 1840 with a minimum grade of C- or MATH 1860 with a minimum grade of C-
Term Offered: Spring, Fall
Core Mathematics, Trans Mod Mathematics

MATH 1980 Topics In Mathematics
[1-4 credit hours]
Selected topics in mathematics.
Term Offered: Spring, Fall
MATH 2190 Foundations of Mathematics
[3 credit hours]
This course lays the logical and set-theoretic foundations for upper level mathematics courses. Topics include: logical connectives, quantifiers; techniques of proof; set operations; functions; equivalence classes; partitions, cardinality, natural numbers, rationals, real numbers.
Prerequisites: MATH 1830 with a minimum grade of C- or MATH 1850 with a minimum grade of C-
Term Offered: Spring

MATH 2450 Calculus For Engineering Technology I
[0-4 credit hours]
Differential calculus of algebraic and trigonometric functions, including limits, curve sketching, motion, maxima/minima, related rates, integral calculus of algebraic functions.
Prerequisites: (MATH 1340 with a minimum grade of C- or Aleks Math Placement Test with a score of 76 or Aleks Math Placement Retest with a score of 76) or (MATH 1320 with a minimum grade of C- or ACT Math with a score of 27 or SAT Mathematics with a score of 610 or MATH SECTION SCORE with a score of 630 or Math - Coll Algebra Placement with a score of 15) and (MATH 1330 with a minimum grade of C- or MATH - Trigonometry Placement with a score of 12)
Term Offered: Spring, Summer, Fall
Core Mathematics, Trans Mod Mathematics

MATH 2460 Calculus For Engineering Technology II
[0-4 credit hours]
Transcendental functions, methods of integration, applications of the integral, polar coordinates, vectors and vector operation, lines and planes, parametric equations.
Prerequisites: MATH 2450 with a minimum grade of C- or MATH 1850 with a minimum grade of C-
Term Offered: Spring, Summer, Fall
Core Mathematics, Trans Mod Mathematics

MATH 2500 Introduction To Statistics
[3 credit hours]
An introduction to descriptive and inferential statistical methods including point and interval estimation, hypothesis testing and regression. No credit allowed if taken after MATH 3610 or 4680; credit not allowed for both MATH 2500 and 2630. Course is not applicable toward the undergraduate Mathematics major requirements.
Prerequisites: MATH 1200 with a minimum grade of C- or MATH 1850 with a minimum grade of C-
Term Offered: Spring, Summer, Fall
Core Mathematics, Trans Mod Mathematics

MATH 2600 Introduction To Statistics
[3 credit hours]
An introduction to statistical methods. Modeling relationships between variables. Basic concepts in probability. Introduction to design of experiments, surveys and observational studies. Overview of statistical procedures used in applied science literature.
Prerequisites: MATH 1200 with a minimum grade of C- or MATH 1850 with a minimum grade of C-
Term Offered: Spring, Summer, Fall
Core Mathematics

MATH 2620 Discrete Probability
[3 credit hours]
Sample spaces, events, counting techniques, probability distributions and their applications. No credit if taken after 4680. Course is not applicable toward the undergraduate Mathematics major requirements.
Prerequisites: MATH 1180 with a minimum grade of C- or MATH 1200 with a minimum grade of C-
Term Offered: Spring

MATH 2640 Statistics for Applied Science
[3 credit hours]
Introduction to statistical methods. Modeling relationships between variables. Basic concepts in probability. Introduction to design of experiments, surveys and observational studies. Overview of statistical procedures used in applied science literature.
Prerequisites: MATH 1200 with a minimum grade of C- or MATH 1850 with a minimum grade of C-
Term Offered: Spring, Summer, Fall
Core Mathematics

MATH 2650 Elementary Multivariable Calculus
[4 credit hours]
Geometry of functions of several variables, partial differentiation, multiple integrals, vector algebra and calculus (including Theorems of Green, Gauss and Stokes), and applications.
Prerequisites: MATH 1840 with a minimum grade of C- or MATH 1860 with a minimum grade of C-
Term Offered: Spring, Summer, Fall

MATH 2850 Elementary Multivariable Calculus
[4 credit hours]
Geometry of functions of several variables, partial differentiation, multiple integrals, vector algebra and calculus (including Theorems of Green, Gauss and Stokes), and applications.
Prerequisites: MATH 1840 with a minimum grade of C- or MATH 1860 with a minimum grade of C-
Term Offered: Spring, Summer, Fall

MATH 2860 Elementary Differential Equations
[3 credit hours]
An introduction to the analysis and solution of ordinary differential equations with emphasis on the fundamental techniques for solving linear differential equations.
Prerequisites: MATH 2850 with a minimum grade of C-
Term Offered: Spring, Summer, Fall

MATH 2890 Numerical Methods And Linear Algebra
[3 credit hours]
Topics include: matrices, characteristic roots, solution of linear and nonlinear equations, curve fitting, integration, differentiation and numerical solution of ordinary differential equations. MATLAB is introduced and used to analyze problems. Additional topics are chosen from Google's page rank algorithm, Digital Image Compression, and others.
Prerequisites: MATH 1830 with a minimum grade of C- or MATH 1850 with a minimum grade of C-
Term Offered: Spring, Summer, Fall
MATH 3000 Symbolic Logic
[3 credit hours]
A study of propositional and predicate logic, the symbolic techniques used to evaluate deductive arguments. Topics may include computability, set theory, Bayesianism and other formal systems with mathematical or philosophical relevance.
Prerequisites: MATH 1180 with a minimum grade of C-
Term Offered: Spring, Fall

MATH 3190 Introduction To Mathematical Analysis
[3 credit hours]
This course is intended to introduce students to mathematical analysis. The focus will be on learning to write clear, rigorous proofs. Topics include set theory and logic, the real number system and its topology, sequences, limits and continuity.
Prerequisites: MATH 1840 with a minimum grade of C- or MATH 1860 with a minimum grade of C-
Term Offered: Spring, Fall

MATH 3200 Number Theory
[3 credit hours]
Divisibility, congruences, diophantine equations, numerical functions, quadratic reciprocity.
Prerequisites: MATH 2190 with a minimum grade of C- or MATH 3190 with a minimum grade of C-
Term Offered: Spring

MATH 3320 Introduction To Abstract Algebra
[3 credit hours]
Sets and mappings, integers, groups, rings and applications.
Prerequisites: MATH 2190 with a minimum grade of C- or MATH 3190 with a minimum grade of C-
Term Offered: Spring

MATH 3440 Fundamentals Of Modern Geometry I
[3 credit hours]
Euclidean geometry from a modern viewpoint, constructions and transformations. Primarily for students in secondary education.
Prerequisites: MATH 1840 with a minimum grade of C- or MATH 1860 with a minimum grade of C-
Term Offered: Fall

MATH 3450 Fundamentals Of Modern Geometry II
[3 credit hours]
Euclidean geometry from a modern viewpoint, constructions and transformations. Primarily for students in secondary education.
Prerequisites: MATH 3440 with a minimum grade of C-
Term Offered: Spring

MATH 3510 History Of Mathematics
[3 credit hours]
Contributions to the development of mathematics by various groups and individuals from the earliest history to the present, with special emphasis on the elementary branches: arithmetic, algebra, geometry and calculus.
Prerequisites: MATH 1840 with a minimum grade of C- or MATH 1860 with a minimum grade of C-
Term Offered: Fall

MATH 3610 Statistical Methods I
[3 credit hours]
Basic probability, sampling, descriptive statistics, statistical inference, regression, correlation, analysis of variance, goodness of fit, model formulation and testing.
Prerequisites: MATH 1840 with a minimum grade of C- or MATH 1860 with a minimum grade of C-
Term Offered: Summer, Fall

MATH 3620 Statistical Methods II
[3 credit hours]
Multiple regression, analysis of covariance, standard experimental designs, contingency tables, nonparametric methods and methods for sample surveys.
Prerequisites: MATH 3610 with a minimum grade of C-
Term Offered: Spring

MATH 3920 Junior Readings
[1-3 credit hours]
Selected subjects in mathematics of special interest to students and the professor.
Term Offered: Spring, Summer, Fall

MATH 4300 Linear Algebra I
[3 credit hours]
Theory of vector spaces and linear transformations, including such topics as matrices, determinants, inner products, eigenvalues and eigenvectors, and rational and Jordan canonical forms.
Prerequisites: MATH 2190 with a minimum grade of C-
Term Offered: Fall

MATH 4310 Linear Algebra II
[3 credit hours]
Hermitean and normal operators, multilinear forms, spectral theorem and other topics.
Prerequisites: MATH 4300 with a minimum grade of C-
Term Offered: Spring

MATH 4330 Abstract Algebra I
[3 credit hours]
Arithmetic of the integers, unique factorization and modular arithmetic; group theory including normal subgroups, factor groups, cyclic groups, permutations, homomorphisms, the isomorphism theorems, abelian groups and p-groups.
Prerequisites: MATH 2190 with a minimum grade of C- or MATH 3190 with a minimum grade of C-
Term Offered: Fall

MATH 4340 Abstract Algebra II
[3 credit hours]
Ring theory including integral domains, field of quotients, homomorphisms, ideals, Euclidean domains, polynomial rings, vector spaces, roots of polynomials and field extensions.
Prerequisites: MATH 4330 with a minimum grade of C-
Term Offered: Spring
MATH 4350 Applied Linear Algebra
[3 credit hours]
Matrices, systems of equations, vector spaces, linear transformations, determinants, eigenvalues and eigenvectors, singular value decomposition, pseudoinverses, rank, numerical methods and applications to various areas, e.g., the Google Matrix or Digital Image Compression or others.
Prerequisites: MATH 1890 with a minimum grade of C- or MATH 2890 with a minimum grade of C-
Term Offered: Spring, Summer

MATH 4380 Discrete Structures And Analysis Of Algorithms
[3 credit hours]
Discrete mathematical structures for applications in computer science such as graph theory, combinatorics, and groups theory, asymptotics, recurrence relations and analysis of algorithms.
Prerequisites: MATH 3320 with a minimum grade of C- or MATH 4330 with a minimum grade of C-
Term Offered: Spring, Summer

MATH 4450 Introduction To Topology I
[3 credit hours]
Metric spaces, topological spaces, continuous maps, bases and subbases, closure and interior operators, products, subspaces, sums, quotients, separation axioms, compactness and local compactness.
Prerequisites: MATH 2190 with a minimum grade of C- or MATH 3190 with a minimum grade of C-
Term Offered: Fall

MATH 4460 Introduction To Topology II
[3 credit hours]
Connectedness and local connectedness, convergence, metrization, function spaces. The fundamental groups and its properties, covering spaces, classical applications, e.g. Jordan Curve Theorem, Fundamental Theorem of Algebra, Brouwer’s Fixed Point Theorem.
Prerequisites: (MATH 4450 with a minimum grade of C- and MATH 3320 with a minimum grade of C) or (MATH 4450 with a minimum grade of C- and MATH 4330 with a minimum grade of C)
Term Offered: Spring

MATH 4540 Classical Differential Geometry I
[3 credit hours]
Smooth curves in Euclidean space including the Frenet formulae. Immersed surfaces with the Gauss map, principal curvatures and the fundamental forms. Special surfaces including ruled surfaces and minimal surfaces. Intrinsic Geometry including the Gauss Theorem Egregium.
Prerequisites: MATH 2860 with a minimum grade of C-

MATH 4550 Classical Differential Geometry II
[3 credit hours]
Tensors, vector fields, and the Cartan approach to surface theory, Bonnet’s Theorem and the construction of surfaces via solutions of the Gauss Equation. Geodesics parallel transport, and Jacobi Fields. Theorems of a global nature such as Hilbert’s Theorem or the Theorem of Hopf-Rinow.
Prerequisites: MATH 4540 with a minimum grade of C-

MATH 4600 Advanced Statistical Methods I
[3 credit hours]
Basics of descriptive statistics, study designs and statistical inference. Properties of, and assumptions required for, inference for means, variances, and proportions from one and two-sample paired and unpaired studies. Introduction to ANOVA with multiple comparisons. Model assessment and diagnostics. Statistical software will be employed. Opportunities to apply procedures to real data. Emphasis placed on the foundations to approaches in introductory statistics.
Prerequisites: MATH 2600 with a minimum grade of D- or MATH 2640 with a minimum grade of D- or MATH 3610 with a minimum grade of D- or MATH 4690 with a minimum grade of D-
Term Offered: Fall

MATH 4610 Applications Of Statistics II
[3 credit hours]
Continuation of Applications of Statistics I.
Prerequisites: MATH 4600 with a minimum grade of C-
Term Offered: Spring

MATH 4620 Theory Of Interest
[3 credit hours]
This course covers the measurement of interest, certain annuities, yield rates, amortization and sinking funds, bonds and other securities and application of interest theory.
Prerequisites: MATH 1840 with a minimum grade of C- or MATH 1860 with a minimum grade of C-
Term Offered: Spring, Fall

MATH 4640 Statistical Computing
[3 credit hours]
Modern statistical computing, including programming tools, modern programming methodologies, design of data structures and algorithms, numerical computing and graphics. Additional topics selected from simulation studies, rejection sampling, importance sampling, Monte Carlo integration, and bootstrapping.
Prerequisites: MATH 3610 with a minimum grade of C- or MATH 4600 with a minimum grade of C- or MATH 4690 with a minimum grade of C-
Term Offered: Fall

MATH 4680 Introduction To Theory Of Probability
[3 credit hours]
Probability spaces, random variables, probability distributions, moments and moment generating functions, limit theorems, transformations and sampling distributions.
Prerequisites: MATH 2850 with a minimum grade of C-
Term Offered: Summer, Fall

MATH 4690 Introduction To Mathematical Statistics
[3 credit hours]
Sampling distributions, point and interval estimation, hypothesis testing, regression and analysis of variance.
Prerequisites: MATH 4680 with a minimum grade of C-
Term Offered: Spring
MATH 4710 Methods Of Numerical Analysis I
[3 credit hours]
Floating point arithmetic; polynomial interpolation; numerical solution of nonlinear equations; Newton's method. Likely topics include: numerical differentiation and integration; solving systems of linear equations; Gaussian elimination; LU decomposition; Gauss-Seidel method.
Prerequisites: MATH 2860 with a minimum grade of C-
Term Offered: Spring, Fall

MATH 4720 Methods Of Numerical Analysis II
[3 credit hours]
Likely topics include: Computation of eigenvalues and eigenvectors; solving systems of nonlinear equations; least squares approximations; rational approximations; cubic splines; fast Fourier transforms; numerical solutions to initial value problems; ordinary and partial differential equations.
Prerequisites: MATH 4710 with a minimum grade of C-
Term Offered: Spring

MATH 4740 Advanced Applied Mathematics I
[3 credit hours]
Continuation of Actuarial Mathematics I. Multiple decrement models, premiums and reserves and multiple life functions are some topics covered in this course.
Prerequisites: MATH 4680 with a minimum grade of C-
Term Offered: Spring

MATH 4750 Advanced Applied Mathematics II
[3 credit hours]
Continuation of vector analysis, introduction to complex analysis, partial differential equations, Fourier series and integrals.
Prerequisites: MATH 4740 with a minimum grade of C-
Term Offered: Fall

MATH 4760 Actuarial Mathematics I
[3 credit hours]
Survival distributions and life tables, life insurance, life annuities, benefit premiums and reserves and multiple life functions are some topics covered in this course.
Prerequisites: MATH 4680 with a minimum grade of C-
Term Offered: Spring

MATH 4770 Actuarial Mathematics II
[3 credit hours]
Continuation of Actuarial Mathematics I. Multiple decrement models, collective risk models and applications of risk theory.
Prerequisites: MATH 4760 with a minimum grade of C-
Term Offered: Fall

MATH 4780 Advanced Calculus
[3 credit hours]
Extrema for functions of one or more variables, Lagrange multipliers, indeterminate forms, inverse and implicit function theorems, uniform convergences, power series, transformations, Jacobians, multiple integrals.
Prerequisites: MATH 2850 with a minimum grade of C-

MATH 4800 Ordinary Differential Equations
[3 credit hours]
Modern theory of differential equations; transforms and matrix methods; existence theorems and series solutions; and other selected topics.
Prerequisites: MATH 2860 with a minimum grade of C-
Term Offered: Spring, Fall

MATH 4810 Partial Differential Equations
[3 credit hours]
First and second order equations; numerical methods; separation of variables; solutions of heat and wave equations using eigenfunction techniques; and other selected topics.
Prerequisites: MATH 2860 with a minimum grade of C-
Term Offered: Spring

MATH 4820 Introduction To Real Analysis I
[3 credit hours]
The real number system; continuity and differentiability of functions; convergence of sequences and series; applications.
Prerequisites: MATH 2190 with a minimum grade of C- or MATH 3190 with a minimum grade of C-
Term Offered: Fall

MATH 4830 Introduction To Real Analysis II
[3 credit hours]
The real number system; continuity and differentiability of functions; convergence of sequences and series; applications. Optional topics include differentiable functions on R^n; the Implicit and Inverse Function Theorems.
Prerequisites: MATH 4820 with a minimum grade of C-
Term Offered: Spring

MATH 4840 Calculus Of Variations And Optimal Control I
[3 credit hours]
Conditions for an extrema (Euler’s equations, Erdman corner conditions, conditions of Legendre, Jacobi, and Weierstrass, fields of extremals, Hilbert’s invariant integral); Raleigh-Ritz method; isoperimetric problems; Lagrange, Mayer-Bolza problems. Recommended: MATH 4820.
Prerequisites: MATH 1890 with a minimum grade of C- or MATH 2890 with a minimum grade of C-
Term Offered: Spring

MATH 4850 Calculus Of Variations And Optimal Control II
[3 credit hours]
Pontryagin’s maximum principle; necessary and sufficient conditions for optimal control, controllability, time optimal control, existence of optimal controls, relationship to the calculus of variations.
Prerequisites: MATH 4860 with a minimum grade of C-
Term Offered: Spring

MATH 4860 Complex Variables
[3 credit hours]
Analytic functions; Cauchy’s theorem; Taylor and Laurent series; residues; contour integrals; conformal mappings, analytic continuation and applications.
Prerequisites: MATH 2860 with a minimum grade of C-
Term Offered: Spring

MATH 4900 Senior Seminar
[1-3 credit hours]
Seminar on a topic not usually covered in a course. Library research and paper to be expected.
Term Offered: Spring, Summer, Fall

MATH 4920 Senior Readings
[1-3 credit hours]
Selected subjects in mathematics of special interest to students and the professor. (By arrangement with professor and student.)
Term Offered: Spring, Summer, Fall
MATH 4940 Internship in the Mathematical Sciences
[3 credit hours]
MATH 4940 Co-Op Experience [3 credit hours] Approved internship experience. Course may be repeated for credit with departmental permission. Terms Offered: Spring, Summer, Fall
Term Offered: Spring, Summer, Fall
MATH 4960 Actuarial Science Problem Seminar
[1-3 credit hours]
The primary activity will be student solution and presentation of problems of a type given on actuarial exams.
Term Offered: Spring, Fall

Honors in Mathematics

1. Admission: Students are normally admitted to departmental honors after completing honors sections of:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1850</td>
<td>Single Variable Calculus I</td>
<td>4</td>
</tr>
<tr>
<td>MATH 1860</td>
<td>Single Variable Calculus II</td>
<td>4</td>
</tr>
</tbody>
</table>

In addition Departmental Honors requires students to enroll in 3 additional honors sections of courses in the major numbered 2190 or higher.

Total Hours 17

Students may also be admitted to the program at the discretion of the Math Majors Committee and should consult the departmental undergraduate advisor.

2. Requirements: Graduation with honors in mathematics depends upon doing a substantial amount of work in mathematics beyond the requirements of the bachelor's degree. To graduate with departmental honors in mathematics a student must ordinarily maintain a GPA in mathematics greater than 3.5 and write an expository paper on a topic in mathematics that demonstrates knowledge of the subject matter significantly beyond the expectations of the student's coursework. The research and writing of the paper is conducted under the supervision of a faculty member with an interest in the subject, and as a part of fulfilling this requirement the student must enroll in either the junior or senior reading class, MATH 3920 or MATH 4920, that counts as an elective in the major. The actual details of the student's program are determined by consulting with the Department's honors advisor and the student's topic supervisor.

BA in Mathematics

The Bachelor of Arts degree in Mathematics requires a minimum of 120 hours of coursework, with a minimum of 35 credits of MATH courses, including those in a specific BA concentration. In addition, 18 hours of course work in a specific related area must be included.

BA in Mathematics with a concentration in Pure Mathematics

Prepares students for further study in mathematics at the graduate level, for jobs in the service or public sectors where a high level of quantitative skills is prerequisite, particularly in the financial industry, or with further pedagogical training for careers as secondary educators. The concentration provides the foundations for an appreciation of the broad area of modern mathematics namely topology/geometry, algebra and analysis.

BA in Mathematics with a concentration in Applied Mathematics

Prepares students for further study in mathematics at the graduate level, for jobs in the service or public sectors where a high level of quantitative skills is prerequisite. Examples of such career path include technical mathematicians, and financial analysts. The concentration provides the foundation for an understanding of the theoretical and computational principles of applied mathematics with an emphasis on modeling real world phenomena.

BA in Mathematics with a concentration in Statistics

Prepares students for further study in statistics at the graduate level, for jobs in the service or public sectors where a knowledge of statistics is prerequisite. Examples of such career path include business or financial analysts, data scientists, or market researchers. The concentration provides the foundation for understanding of both the theory and applications of statistics, including the application of statistical methodology to real world problems and the proficient use of statistics software.

For the Bachelor of Arts degree in mathematics, a minimum of 35 credits of MATH courses, including those in a specific BA concentration must be completed. In addition, 18 hours of course work in a specific related area must be included.

Pure Mathematics Concentration Course List

The following courses are required:

- MATH 1840 Calculus II For Mathematicians, Scientists And Educators or
- MATH 1860 Single Variable Calculus II
- MATH 1890 Elementary Linear Algebra or MATH 2890 Numerical Methods And Linear Algebra
- MATH 2850 Elementary Multivariable Calculus
- MATH 2190 Foundations of Mathematics or MATH 3190 Introduction To Mathematical Analysis

Pure Mathematics Concentration courses

- MATH 2860 Elementary Differential Equations
- MATH 4330 Abstract Algebra I
- MATH 4820 Introduction To Real Analysis I
- MATH 4880 Complex Variables
- Select two of the following
  - MATH 4300 Linear Algebra I
  - MATH 4450 Introduction To Topology I
  - MATH 4540 Classical Differential Geometry I
  - MATH 4830 Introduction To Real Analysis II
  - MATH 4340 Abstract Algebra II
- One advanced MATH elective course for 3 credits 3000 or 4000 level approved by the advisor

RELATED COURSES IN BACHELOR OF ARTS

The 18 semester hours of related area course (at 2000 to 4000 levels) should be chosen according to the interests of the student in view of his or her anticipated career in mathematics. The B.A. degree is awarded to those students who choose a related area in the humanities.
or social sciences, such as economics, foreign language, philosophy and psychology, or education.

Choices include courses numbered 2000 to 4990 for the following departments: AMST, ARTH, COMM, DST, FILM, GEPL, GLST, HIST, HON, LST, PHIL, PSC, PSY, REL, SOC, THR, WGST; or courses numbered 3000 to 4990 for the following departments: CLC, ENGL, FREN, GERM, HUM, JAPN, LAT, LING, SPAN; plus AFST 2100 to 4990, ANTH 2100 to 4990, ART 1080 to 4990, ECON 1150, 1200, 2000 to 4000, FLAN 3440, 2260, 2270, 2280, 2410, 2420, 2610, 2620, 3000 to 4000, excluding MUS 3010, 3020, 3030, 3040, 3050, 3090, 3130, 3140, 3150, 3160, 3170, 3180, 3190, 3800, 4800.

**APPLIED MATHEMATICS CONCENTRATION COURSE LIST**

The following courses are required:

- MATH 1840 Calculus II For Mathematicians, Scientists And Educators
- MATH 1850 Single Variable Calculus II
- MATH 1890 Elementary Linear Algebra or MATH 2890 Numerical Methods And Linear Algebra
- MATH 2850 Elementary Multivariable Calculus
- MATH 2010 Foundations of Mathematics or MATH 3190 Introduction To Mathematical Analysis

**Applied Mathematics Concentration Courses**

- MATH 3320 Introduction To Abstract Algebra or MATH 4330 Abstract Algebra I
- MATH 2860 Elementary Differential Equations
- MATH 4300 Linear Algebra I or MATH 4350 Applied Linear Algebra
- MATH 4820 Introduction To Real Analysis I or MATH 4880 Complex Variables

Select one of the following two-semester sequences:

- MATH 4710 Methods Of Numerical Analysis I & MATH 4720 Methods Of Numerical Analysis II
- MATH 4740 Advanced Applied Mathematics I & MATH 4750 Advanced Applied Mathematics II

One advanced MATH elective course for 3 credits 3000 or 4000 level approved by the advisor.

**RELATED COURSES IN BACHELOR OF ARTS**

The 18 semester hours of related area course (at 2000 to 4000 levels) should be chosen according to the interests of the student in view of his or her anticipated career in mathematics. The B.A. degree is awarded to those students who choose a related area in the humanities or social sciences, such as economics, foreign language, philosophy and psychology, or education.

Choices include courses numbered 2000 to 4990 for the following departments: AMST, ARTH, COMM, DST, FILM, GEPL, GLST, HIST, HON, LST, PHIL, PSC, PSY, REL, SOC, THR, WGST; or courses numbered 3000 to 4990 for the following departments: CLC, ENGL, FREN, GERM, HUM, JAPN, LAT, LING, SPAN; plus AFST 2100 to 4990, ANTH 2100 to 4990, ART 1080 to 4990, ECON 1150, 1200, 2000 to 4000, FLAN 3440, 2260, 2270, 2280, 2410, 2420, 2610, 2620, 3000 to 4000, excluding MUS 3010, 3020, 3030, 3040, 3050, 3090, 3130, 3140, 3150, 3160, 3170, 3180, 3190, 3800, 4800.

**Statistics CONCENTRATION COURSE LIST**

The following courses are required:

- MATH 1840 Calculus II For Mathematicians, Scientists And Educators
- MATH 1850 Single Variable Calculus II
- MATH 1890 Elementary Linear Algebra or MATH 2890 Numerical Methods And Linear Algebra
- MATH 2850 Elementary Multivariable Calculus
- MATH 2190 Foundations of Mathematics or MATH 3190 Introduction To Mathematical Analysis

**Statistics Concentration Courses**

- MATH 3610 Statistical Methods I
- MATH 3620 Statistical Methods II
- MATH 4350 Applied Linear Algebra
- MATH 4600 Advanced Statistical Methods I
- MATH 4610 Applications Of Statistics II
- MATH 4680 Introduction To Theory Of Probability
- MATH 4690 Introduction To Mathematical Statistics

**Related Courses in Bachelor of Arts**

The 18 semester hours of related area course (at 2000 to 4000 levels) should be chosen according to the interests of the student in view of his or her anticipated career in mathematics. The B.A. degree is awarded to those students who choose a related area in the humanities or social sciences, such as economics, foreign language, philosophy and psychology, or education.

Bachelor of Art in Mathematics: Concentration: Applied Mathematics

Below is a sample plan of study. Consult your degree audit for your program requirements.

First Term
- MATH 1830 or MATH 1850: Calculus I For Mathematicians, Scientists And Educators
  - 4
- ENGL 1110: College Composition I
  - 3
- MATH 1890 or MATH 2890: Elementary Linear Algebra or Numerical Methods And Linear Algebra
  - 3
- Non-US Diversity
  - 3
- Arts/Humanities Core
  - 3
- NSM Science Elective
  - 3
- Total Hours: 15

Second Term
- MATH 1840 or MATH 1860: Calculus II For Mathematicians, Scientists And Educators
  - 4
- ENGL 1130: College Composition II: Academic Disciplines And Discourse
  - 3
- MATH 1890 or MATH 2890: Elementary Linear Algebra or Numerical Methods And Linear Algebra
  - 3
- Arts/Humanities Core
  - 3
- Social Sciences Core
  - 3
- Total Hours: 15

Third Term
- MATH 2850: Elementary Multivariable Calculus
  - 4
- MATH 3190 or MATH 2190: Introduction To Mathematical Analysis or Foundations of Mathematics
  - 3
- Non-US Diversity
  - 3
- Arts/Humanities Core
  - 3
- NSM Science Elective
  - 3
- Total Hours: 15

Fourth Term
- MATH 4330: Introduction To Abstract Algebra
  - 3
- MATH 4300: Linear Algebra I
  - 3
- MATH 4540: Classical Differential Geometry I
  - 3
- Advanced Math Elective
  - 3
- Arts/Humanities Core (Fine Arts)
  - 3
- Related Elective
  - 3
- Total Hours: 16

Fifth Term
- MATH 4710 or MATH 4740: Methods Of Numerical Analysis I
  - 3
- MATH 4820: Complex Variables
  - 3
- MATH 4450: Advanced Math Elective
  - 3
- Arts/Humanities Core
  - 3
- NSM Science Elective
  - 3
- Total Hours: 16

Sixth Term
- MATH 4820: Introduction To Real Analysis I
  - 3
- MATH 4300: Linear Algebra I
  - 3
- MATH 4540: Classical Differential Geometry I
  - 3
- Advanced Math Elective
  - 3
- Arts/Humanities Core (Fine Arts)
  - 3
- Related Elective
  - 3
- Total Hours: 16

Seventh Term
- Select one of the following:
  - MATH 4450: Introduction To Topology I
  - MATH 4300: Linear Algebra I
  - MATH 4540: Classical Differential Geometry I
  - Advanced Math Elective
  - Arts/Humanities Core (Fine Arts)
  - Related Elective
- Total Hours: 15

Eighth Term
- Arts/Humanities Core (English Lit)
  - 3
- MATH 4340: Abstract Algebra II or MATH 4830: or Introduction To Real Analysis II
  - 3
- Related Elective
  - 3
- Total Hours: 15

Hours
- Total Hours: 120

Recommended 3000/4000 elective

Bachelor of Arts in Mathematics: Concentration: Applied Mathematics

Below is a sample plan of study. Consult your degree audit for your program requirements.

First Term
- MATH 1830 or MATH 1850: Calculus I For Mathematicians, Scientists And Educators
  - 4
- ENGL 1110: College Composition I
  - 3
- MATH 1890 or MATH 2890: Elementary Linear Algebra or Numerical Methods And Linear Algebra
  - 3
- Non-US Diversity
  - 3
- Arts/Humanities Core
  - 3
- NSM Science Elective
  - 3
- Total Hours: 15

Second Term
- MATH 1840 or MATH 1860: Calculus II For Mathematicians, Scientists And Educators
  - 4
- ENGL 1130: College Composition II: Academic Disciplines And Discourse
  - 3
- MATH 1890 or MATH 2890: Elementary Linear Algebra or Numerical Methods And Linear Algebra
  - 3
- Arts/Humanities Core
  - 3
- Social Sciences Core
  - 3
- Total Hours: 15

Third Term
- MATH 2850: Elementary Multivariable Calculus
  - 4
- MATH 3190 or MATH 2190: Introduction To Mathematical Analysis or Foundations of Mathematics
  - 3
- Non-US Diversity
  - 3
- Arts/Humanities Core
  - 3
- NSM Science Elective
  - 3
- Total Hours: 15

Fourth Term
- MATH 3320: Introduction To Abstract Algebra
  - 1
- MATH 2860: Elementary Differential Equations
  - 3
- Arts/Humanities Core
  - 3
- Social Sciences Core
  - 3
- Diversity of US
  - 3
- Total Hours: 16

Fifth Term
- MATH 4340: Abstract Algebra II or MATH 4830: or Introduction To Real Analysis II
  - 3
- Related Elective
  - 3
- Total Hours: 15

Hours
- Total Hours: 120

Recommended 3000/4000 elective
Bachelor of Art in Mathematics: Concentration: Statistics

Below is a sample program of study. Consult your degree audit for your program requirements.

1 May take MATH 4330 instead in fall semester.
2 May take MATH 4820 instead in fall semester.
3 May take MATH 4300 instead in fall semester.
Students will produce and judge the validity of rigorous mathematical arguments. Students will explain and illustrate mathematical ideas and arguments. Students will read and construct mathematical proofs. Students will construct proofs and/or derivations of mathematical statements.

**BS in Mathematics**

The Bachelor of Science degree in Mathematics requires a minimum of 120 hours of coursework, with a minimum of 38 credits of MATH courses, including those in a specific BS concentration. In addition 26 hours of coursework is a specific related area must be included.

**BS in Mathematics with a concentration in Pure Mathematics**

Prepares students for further study in mathematics at the graduate level, for jobs in service or public sectors where a high level of quantitative skills is prerequisite, particularly in the financial industry, or with further pedagogical training for careers as secondary educators. The concentration provides the foundation for an understanding of the broad area of modern mathematics namely topology/geometry, algebra and analysis.

**BS in Mathematics with a concentration in Applied Mathematics**

Prepares students for further study in applied mathematics at the graduate level, for jobs in industrial, service or public sectors where a high level of quantitative skills is prerequisite. Examples of such career path include technical mathematicians, financial analysts, software engineers. The concentration provides the foundation for an understanding of the theoretical and computational principles of applied mathematics with an emphasis on modeling real world phenomena.

**BS in Mathematics with a concentration in Statistics**

Prepares students for further study in statistics at the graduate level, for jobs in industrial, service or public sectors where a knowledge of statistics is prerequisite. Examples of such career path include business or financial analysts, data scientists, or market researchers. The concentration provides the foundation for understanding of both the theory and applications of statistics, including the application of statistical methodology to real world problems and the proficient use of statistical software.

**BS in Mathematics with a concentration in Applied Mathematics with Computer Science**

Prepares students for further study in applied mathematics or computer science at the graduate level, for jobs in the industrial, service or public sectors where a high level of quantitative skills is combined with knowledge of computing is prerequisite. Examples of such career path include technical mathematicians, financial analysts, software engineers. The concentration provides foundation for an understanding of the theoretical and computational principles of applied mathematics with emphasis on the coding skills needed to solve real world problems.

**BS in Mathematics with a concentration in Actuarial Science**

Prepares students to enter the actuarial profession. Actuaries work in finance, business and government and are concerned with the estimation of risk. They make a crucial contribution in the insurance industry. The concentration provides the foundations in mathematics and finance needed to pass the examinations offered by the Society of Actuaries that are the gateway to the profession.

**BS in Mathematics with a concentration in Data Science**

Prepares student for further study of data science at the graduate level, for jobs business, industry and government that require a thorough understanding for the statistical and computational principles required to extract information from data. Examples of career path include data scientist, business or financial analyst, security analyst, or research assistant in various biomedical fields. The concentration provides the foundations for both the computational skills needed to manipulate data and the statistical background needed to analyze it.

For the Bachelor of Science degree in mathematics, a minimum of 38 credits of MATH courses, including those in a specific BS concentration must be completed. In addition 26 hours of course work is a specific related area must be included.

**Pure Mathematics Concentration**

The following courses must be included:

- MATH 1840 Calculus II For Mathematicians, Scientists And Educators I
- MATH 1890 Elementary Linear Algebra or MATH 2890 Numerical Methods And Linear Algebra
- MATH 2850 Elementary Multivariable Calculus
- MATH 2190 Foundations of Mathematics or MATH 3190 Introduction To Mathematical Analysis

**Pure Mathematics Courses**

- MATH 2860 Elementary Differential Equations
- MATH 4330 Abstract Algebra I
- MATH 4820 Introduction To Real Analysis I
- MATH 4880 Complex Variables

Select one of the following:

- MATH 4300 Linear Algebra I
- MATH 4450 Introduction To Topology I
- MATH 4540 Classical Differential Geometry I

Select one of the following:

- MATH 4830 Introduction To Real Analysis II
- MATH 4340 Abstract Algebra II

Two advanced MATH courses for 6 credits at the 3000 or 4000 level approved by the advisor.

**RELATED COURSES IN BACHELOR OF SCIENCE**

The 26 semester hours of related area course work should be chosen according to the interests of the student in view of his or her anticipated career in mathematics. These courses could be in Accounting, Astronomy, Biology, Chemistry, Economics, Environmental Science, Engineering, Finance, Operations Analysis, Philosophy, Physics, Pharmacy and Pharmaceutical Sciences, Medicine and Life Sciences.

Choices include courses numbered 2000 to 4990 for the following departments: ACCT, ASTR, BUAD, BIOE, CHEE, CHEM, CIVE, EBUS, EEES, FINA, GEOI, IBUS, IE, INBT, INBY, ISOM, ME, MIME, MGMT, MKTG, NASC, PHYS, PLSL, and TE; plus BIOL 2150 to 2180, 3000 to 4000; ECON 1150, 1200, 2000 to 4990; EECS 1100 to 4990.
Applied Mathematics Concentration
The following courses must be included:

MATH 1840 Calculus II For Mathematicians, Scientists And Educators
or MATH 1860 Single Variable Calculus II
MATH 1890 Elementary Linear Algebra or MATH 2890 Numerical
Methods And Linear Algebra
MATH 2850 Elementary Multivariable Calculus
MATH 2190 Foundations of Mathematics or MATH 3190 Introduction To
Mathematical Analysis

Applied Mathematics Courses:

MATH 3320 Introduction To Abstract Algebra or MATH 4330 Abstract
Algebra I
MATH 2860 Elementary Differential Equations
MATH 4300 Linear Algebra I or MATH 4350 Applied Linear Algebra
MATH 4820 Introduction To Real Analysis I or MATH 4880 Complex
Variables
Select one of the following two-semester sequences:
   MATH 4710 Methods Of Numerical Analysis I & MATH 4720 Methods
Of Numerical Analysis II
   MATH 4740 Advanced Applied Mathematics I & MATH 4750 Advanced
Applied Mathematics II
Select one of the following:
   MATH 3610 Statistical Methods I
   MATH 4680 Introduction To Theory Of Probability
   MATH 4800 Ordinary Differential Equations
   MATH 4810 Partial Differential Equations
   MATH 4860 Calculus Of Variations And Optimal Control I
One advanced MATH elective course for 3 credits at the 3000 or 4000
level approved by the advisor.

RELATED COURSES IN BACHELOR OF SCIENCE
The 24 semester hours of related area course work should be chosen
according to the interests of the student in view of his or her anticipated
career in mathematics. These courses could be in Accounting,
Astronomy, Biology, Chemistry, Economics, Environmental Science,
Engineering, Finance, Operations Analysis, Philosophy, Physics,
Pharmacy and Pharmaceutical Sciences, Medicine and Life Sciences.

Choices include courses numbered 2000 to 4990 for the following
departments:  ACCT, ASTR, BUAD, BIOE, CHEE, CHEM, CIVE, EBUS, EEES,
FINA, GEOL, IBUS, IE, INBT, INBY, ISOM, ME, MIME, MGMT, MKTG, NASC,
PHYS, PLSL, and TE; plus BIOL 2150 to 2180, 3000 to 4000; ECON 1150,
1200, 2000 to 4990; EECS 1100 to 4990.

Statistics Concentration
The following courses must be included:

MATH 1840 Calculus II For Mathematicians, Scientists And Educators
or MATH 1860 Single Variable Calculus II
MATH 1890 Elementary Linear Algebra or MATH 2890 Numerical
Methods And Linear Algebra
MATH 2850 Elementary Multivariable Calculus
MATH 2190 Foundations of Mathematics or MATH 3190 Introduction To
Mathematical Analysis

Statistics Courses:

MATH 3610 Statistical Methods I
MATH 3620 Statistical Methods II
MATH 4350 Applied Linear Algebra
MATH 4600 Advanced Statistical Methods I
MATH 4610 Applications Of Statistics II
MATH 4680 Introduction To Theory Of Probability
MATH 4690 Introduction To Mathematical Statistics
MATH 2860 or one advanced MATH elective course for 3 credits at the
3000 or 4000 level approved by the advisor.

RELATED COURSES IN BACHELOR OF SCIENCE
The 24 semester hours of related area course work should be chosen
according to the interests of the student in view of his or her anticipated
career in mathematics. These courses could be in Accounting,
Astronomy, Biology, Chemistry, Economics, Environmental Science,
Engineering, Finance, Operations Analysis, Philosophy, Physics, Pharmacy and Pharmaceutical Sciences, Medicine and Life Sciences.

Choices include courses numbered 2000 to 4990 for the following departments: ACCT, ASTR, BUAD, BIOE, CHEE, CHEM, CIVE, EBUS, EEES, FINA, GEOL, IBUS, IE, INBT, INBY, ISOM, ME, MIME, MGMT, MKTG, NASC, PHYS, PLSL, and TE; plus BIOL 2150 to 2180, 3000 to 4000; ECON 1150, 1200, 2000 to 4990; EECS 1100 to 4990.

**Actuarial Sciences Concentration**

The following courses must be included:

- MATH 1840 Calculus II For Mathematicians, Scientists And Educators
- MATH 1890 Elementary Linear Algebra or MATH 2890 Numerical Methods And Linear Algebra
- MATH 2850 Elementary Multivariable Calculus
- MATH 2190 Foundations of Mathematics or MATH 3190 Introduction To Mathematical Analysis

**Actuarial Science Courses:**

- MATH 3610 Statistical Methods I
- MATH 3620 Statistical Methods II
- MATH 2860 Elementary Differential Equations
- MATH 4620 Theory Of Interest
- MATH 4680 Introduction To Theory Of Probability
- MATH 4690 Introduction To Mathematical Statistics
- MATH 4760 Actuarial Mathematics I
- MATH 4770 Actuarial Mathematics II

The related area courses should include the following:

- ECON 1150 Principles Of Macroeconomics
- ECON 1200 Principles Of Microeconomics
- BUAD 1020 Micro-Computer Applications In Business
- BUAD 2040 Financial Accounting Information
- BUAD 2050 Accounting For Business Decision-Making
- BUAD 3040 Principles Of Financial Management
- FINA 3600 Risk Management
- INFS 3150 Principles Of Structured Computer Programming And Problem Solving

**Related Courses in Bachelor of Science**

The 26 semester hours of related area course work should be chosen according to the interests of the student in view of his or her anticipated career in mathematics. These courses could be in Accounting, Astronomy, Biology, Chemistry, Economics, Environmental Science, Engineering, Finance, Operations Analysis, Philosophy, Physics, Pharmacy and Pharmaceutical Sciences, Medicine and Life Sciences.

Minor in Mathematics

Recommended 3000/4000 elective

Students will produce and judge the validity of rigorous mathematical arguments.
Students will explain and illustrate mathematical ideas and arguments.
Students will read and construct mathematical proofs.
Students will construct proofs and/or derivations of mathematical statements.

Department of Physics and Astronomy

Nikolas Podraza, Chair
Rupali Chandar, Associate Chair
Song Cheng, Graduate Program Director
Sanjay V. Khare, Coordinator, Minor in Renewable Energy

Advisors:
- BA - Astronomy: Rupali Chandar: Rupali.Chandar@utoledo.edu
- BA - Physics: Xunming Deng: Xunming.Deng@utoledo.edu
- BS - Physics, concentration Astrophysics: Michael Cushing: Michael.Cushing@utoledo.edu
- BS - Physics, concentration Applied Physics: Xunming Deng: Xunming.Deng@utoledo.edu
- BS - Physics, concentration Medical Physics: Aniruddha Ray: Aniruddha.Ray@utoledo.edu
- BS - Physics, concentration Physics: Xunming Deng: Xunming.Deng@utoledo.edu

Degrees Offered

The Department of Physics and Astronomy offers courses of study leading to the Bachelor of Science degree in physics, the Bachelor of Arts in physics and the Bachelor of Arts in astronomy.
Advanced Placement

- Students with a score of 3, 4 or 5 on the Physics B test will receive credit for PHYS 2070 and PHYS 2080.
- Students with a score of 3, 4 or 5 on the Physics C Mechanics test will receive credit for PHYS 2130;
- Students with a score of 3, 4 or 5 on the Physics C Electricity and Magnetism test will receive credit for PHYS 2140.

Degrees Offered

- BA in Astronomy (p. 407)
- BA in Physics (p. 408)
- BS in Physics (p. 410)
- Minor in Astrophysics (p. 417)
- Minor in Physics (p. 417)
- Minor in Renewable Energy (p. 417)

**ASTR 1010 Survey Of Astronomy**
[3 credit hours]
Not for major credit; not open to science majors; no credit after 2010, 2020. General astronomy, including appearance of the sky and nature and evolution of the Earth, Moon, solar system, stars, galaxies and the Universe.
Term Offered: Spring, Summer, Fall
Core Natural Sciences, Trans Mod Natural Science

**ASTR 2010 Solar System Astronomy**
[3 credit hours]
A quantitative introduction to the contents, origin and evolution of the solar system, as revealed by recent advances in space exploration. High school mathematics at the level of graphs, algebra and elementary logarithms is required.
Prerequisites: ACT Math with a score of 22 or MATH SECTION SCORE with a score of 550 or Aleks Math Placement Test with a score of 61 or Aleks Math Placement Retest with a score of 61 or Math - Coll Algebra Placement with a score of 12 or MATH 1320 with a minimum grade of C- or MATH 1330 with a minimum grade of C- or MATH 1340 with a minimum grade of C- or MATH 1320 with a minimum grade of C- or MATH 1330 with a minimum grade of C- or MATH 1340 with a minimum grade of C- or ACT Math with a score of 22 or MATH SECTION SCORE with a score of 550 or Aleks Math Placement Test with a score of 61 or Aleks Math Placement Retest with a score of 61 or Math - Coll Algebra Placement with a score of 12 or MATH 1320 with a minimum grade of C- or MATH 1330 with a minimum grade of C- or MATH 1340 with a minimum grade of C-
Term Offered: Fall
Core Natural Sciences, Trans Mod Natural Science

**ASTR 2020 Stars, Galaxies, And The Universe**
[3 credit hours]
A quantitative introduction to the contents, origin and evolution of stars, galaxies and the universe, as revealed by observation and physical theory. High school mathematics at the level of graphs, algebra and elementary logarithms is required.
Prerequisites: ACT Math with a score of 22 or MATH SECTION SCORE with a score of 550 or Aleks Math Placement Test with a score of 61 or Aleks Math Placement Retest with a score of 61 or Math - Coll Algebra Placement with a score of 12 or MATH 1320 with a minimum grade of C- or MATH 1330 with a minimum grade of C- or MATH 1340 with a minimum grade of C-
Term Offered: Spring
Core Natural Sciences, Trans Mod Natural Science

**ASTR 2050 Elementary Astronomy Laboratory**
[1 credit hour]
Laboratory exercises and observational measurements in elementary astronomy. Two hours laboratory per week. (not for major credit)
Term Offered: Spring, Fall
Core Natural Sciences, Trans Mod Natural Science

**ASTR 2310 Mars**
[3 credit hours]
The history of observations of Mars, information gathered during the space program, potential for human exploration and colonization and related contemporary science fiction. High school algebra and graphs will be used.
Prerequisites: ASTR 1010 with a minimum grade of D- or ASTR 2010 with a minimum grade of D-
Term Offered: Fall

**ASTR 2320 Life In The Universe**
[3 credit hours]
The astronomical factors involved in the emergence of life in the universe, the search for extraterrestrial intelligence and the likelihood of advanced civilizations in the Galaxy. May be offered as writing intensive.
Prerequisites: ASTR 1010 with a minimum grade of D- or ASTR 2010 with a minimum grade of D- or (ASTR 1010 with a minimum grade of D- or ASTR 2010 with a minimum grade of D- and ASTR 2020 with a minimum grade of D-)
Term Offered: Fall

**ASTR 2330 Black Holes, General Relativity And The Big Bang Theory**
[3 credit hours]
Descriptive discussion of the theory of general relativity, the final states of stellar evolution, black holes and history of the universe from the big bang through the formation of the solar system. May be offered as writing intensive.
Prerequisites: ASTR 1010 with a minimum grade of D- or ASTR 2010 with a minimum grade of D-
Term Offered: Fall

**ASTR 2340 New Frontiers In Astronomy**
[3 credit hours]
Descriptive treatment of recent developments in astronomy from spacecraf, such as the Hubble Space Telescope, or from the newest, very large ground based telescopes. May be offered as a writing intensive.
Prerequisites: ASTR 1010 with a minimum grade of D- or ASTR 2010 with a minimum grade of D- or ASTR 2020 with a minimum grade of D-
Term Offered: Fall

**ASTR 3880 Foundations of Astronomy**
[4 credit hours]
Positional Astronomy and Time; Telescopes and Optics; Detection and Characterization of Light (Imaging, Photometry and Spectroscopy); Data Reduction and Measurements; Fundamental Techniques of Astronomy (Parallax, Magnitudes, Interstellar Extinction, Doppler Shift and Spectral Line Widths, Stellar Classification, Color-Magnitude and Color-Color Diagrams, Lightcurves, and Redshifts); Measuring Properties of Stars, Star Clusters, Galaxies, and the Universe.
Prerequisites: ASTR 2020 with a minimum grade of D- and PHYS 3310 with a minimum grade of D- and MATH 3610 with a minimum grade of D-
ASTR 4800 Astronomy In The Planetarium
[3 credit hours]
Theory and practice of astronomical outreach programming. Sky and
calendar, mythology, constellations, astrophysics, buying and using
small telescopes, operating and maintaining planetarium projectors, sky
simulation software, projects and program production.
Prerequisites: ASTR 1010 with a minimum grade of D- or ASTR 2010 with
a minimum grade of D- or ASTR 2020 with a minimum grade of D-

ASTR 4810 Astrophysics I
[3 credit hours]
Spherical coordinate systems, astronomical time, celestial mechanics,
the solar system and planetary physics, photometry, radiative transfer,
stellar spectra and classification, binary stars and stellar masses.
Prerequisites: ASTR 3880 with a minimum grade of D-
Term Offered: Spring

ASTR 4820 Astrophysics II
[3 credit hours]
Stellar structure and evolution, close binaries, origin of the elements, the
sun, variable stars, star clusters, the interstellar medium, the Milky Way
Galaxy, stellar statistics, galaxy structure and evolution, cosmology.
Prerequisites: ASTR 4810 with a minimum grade of D-
Term Offered: Fall

ASTR 4880 Astrophysical Measurements
[3 credit hours]
Astronomical, optical and electronic principles of operation of a modern
astronomical observatory. Observing with the 1 meter telescope of Ritter
Observatory, introduction to reduction, analysis and interpretation of
astrophysical data. Six hours laboratory per week. May be offered as
writing intensive.
Prerequisites: ASTR 3880 with a minimum grade of D-
Term Offered: Fall

PHYS 1050 The World Of Atoms
[3 credit hours]
The atomic structure of matter and the ideas of quantum physics. The
sizes of objects from galaxies to nucleons. Molecules, solids, the wave
nature of the electron, quarks and gluons.
Core Natural Sciences

PHYS 1300 Physics In Everyday Life
[3 credit hours]
Not for major credit. Selected subjects of current interest, with their
relation to the principles and concepts of physics. Content may vary from
year to year. No special science or mathematics background needed.
Term Offered: Fall
Core Natural Sciences

PHYS 1320 Jurassic Physics
[3 credit hours]
Not for major credit. Mechanics, energy, sound and thermodynamics
of dinosaurs. The physics of vision and hearing. Fluids and flight.
Radioactivity. Climate and the effects of an asteroid collision with the
Earth.
Term Offered: Spring
Core Natural Sciences

PHYS 1340 The Nature Of Science
[3 credit hours]
An interdisciplinary course that discusses major scientific discoveries,
the role of hypothesis testing in science, the use of mathematics in
science; data presentation, and moral and ethical issues that stem from
science.
Core Natural Sciences

PHYS 1750 Introduction To Physics
[4 credit hours]
Not for major credit. High school mathematics including plane geometry,
trigonometry and two years of algebra is strongly recommended.
Fundamental laws of nature pertaining to mechanics, thermodynamics,
waves, electricity, magnetism, optics, atoms and particles.
Term Offered: Fall
Core Natural Sciences, Trans Mod Natural Science

PHYS 1910 Frontiers Of Physics And Astronomy
[3 credit hours]
An examination of our current understanding of the physical world at the
conceptual level. Topics may include the ultimate structure of matter,
quantum theory, relativity, astrophysics, cosmology and contemporary
applications.
Term Offered: Fall

PHYS 2010 Technical Physics I
[0-5 credit hours]
Topics include measurement, statics, Newton's laws, friction, work,
energy, power, impulse and momentum, and simple machines. Includes
integrated laboratory.
Prerequisites: MATH 1340 with a minimum grade of D- or MATH 1330
with a minimum grade of D-
Term Offered: Spring, Fall
Core Natural Sciences, Trans Mod Natural Science

PHYS 2020 Technical Physics II
[0-5 credit hours]
Topics include thermodynamics, electricity, and magnetism,
electromagnetic radiation, optics, atomic and nuclear physics. Includes
integrated laboratory.
Prerequisites: MATH 1340 with a minimum grade of D- or MATH 1330
with a minimum grade of D-
Term Offered: Spring, Fall
Core Natural Sciences, Trans Mod Natural Science

PHYS 2070 General Physics I
[5 credit hours]
Calculus not required. Mechanics of energy and motion, gravitation,
harmonic motion, fluids, heat, entropy and the laws of thermodynamics.
Four hours lecture and discussion, two hours laboratory per week.
Prerequisites: (MATH 1320 with a minimum grade of D- and MATH 1330
with a minimum grade of D-) or MATH 1340 with a minimum grade of
D- or MATH 1750 with a minimum grade of D- or MATH 1850 with a
minimum grade of D-
Term Offered: Spring, Summer, Fall
Core Natural Sciences, Trans Mod Natural Science
PHYS 2080 General Physics II
[5 credit hours]
Calculus not required. Electricity and magnetism, capacitors and inductors, electromagnetic waves, optics, atomic physics, nuclear physics, and elementary particles. Four hours lecture and discussion, two hours laboratory per week.
Prerequisites: PHYS 2070 with a minimum grade of D-
Term Offered: Spring, Summer, Fall
Core Natural Sciences, Trans Mod Natural Science

PHYS 2100 Physics With Calculus
[2 credit hours]
A bridge course for students wishing to continue in physics after taking PHYS 2070-2080. The application of calculus and elementary differential equations in various physical contexts. No credit for students who take PHYS 2130-2140.
Prerequisites: (PHYS 2080 with a minimum grade of D- and MATH 1860 with a minimum grade of D-) or (PHYS 2080 with a minimum grade of D- and MATH 1840 with a minimum grade of D-) or (PHYS 2080 with a minimum grade of D- and MATH 1930 with a minimum grade of D-)
Term Offered: Spring, Fall

PHYS 2130 Physics For Science And Engineering Majors I
[5 credit hours]
Calculus based general physics. Mechanics of motion and energy, rotation, gravitation, harmonic motion, waves, fluids and the laws of thermodynamics. Five hours lecture and discussion, two hours laboratory per week.
Prerequisites: MATH 1830 (may be taken concurrently) with a minimum grade of C or MATH 1850 (may be taken concurrently) with a minimum grade of C or MATH 1920 (may be taken concurrently) with a minimum grade of C
Term Offered: Spring, Summer, Fall
Core Natural Sciences, Trans Mod Natural Science

PHYS 2140 Physics For Science And Engineering Majors II
[5 credit hours]
Calculus based general physics. Electricity and magnetism, capacitors and inductors, electromagnetic oscillations, Maxwell’s equations and electromagnetic radiation, optics, images, interference, and diffraction. Five hours lecture and discussion, two hours laboratory per week.
Prerequisites: PHYS 2130 with a minimum grade of D-
Term Offered: Spring, Summer, Fall
Core Natural Sciences, Trans Mod Natural Science

PHYS 2070-2080
[5 credit hours]
Electromagnetic theory, ray and wave optics including matrix methods, polarization, interference, diffraction, basic laser physics and survey of current laser systems.
Prerequisites: PHYS 2140 with a minimum grade of D-
Term Offered: Spring, Fall

PHYS 2100 Physics With Calculus
[2 credit hours]
A bridge course for students wishing to continue in physics after taking PHYS 2070-2080. The application of calculus and elementary differential equations in various physical contexts. No credit for students who take PHYS 2130-2140.
Prerequisites: (PHYS 2080 with a minimum grade of D- and MATH 1860 with a minimum grade of D-) or (PHYS 2080 with a minimum grade of D- and MATH 1840 with a minimum grade of D-) or (PHYS 2080 with a minimum grade of D- and MATH 1930 with a minimum grade of D-)
Term Offered: Spring, Fall

PHYS 2130 Physics For Science And Engineering Majors I
[5 credit hours]
Calculus based general physics. Mechanics of motion and energy, rotation, gravitation, harmonic motion, waves, fluids and the laws of thermodynamics. Five hours lecture and discussion, two hours laboratory per week.
Prerequisites: MATH 1830 (may be taken concurrently) with a minimum grade of C or MATH 1850 (may be taken concurrently) with a minimum grade of C or MATH 1920 (may be taken concurrently) with a minimum grade of C
Term Offered: Spring, Summer, Fall
Core Natural Sciences, Trans Mod Natural Science

PHYS 2140 Physics For Science And Engineering Majors II
[5 credit hours]
Calculus based general physics. Electricity and magnetism, capacitors and inductors, electromagnetic oscillations, Maxwell’s equations and electromagnetic radiation, optics, images, interference, and diffraction. Five hours lecture and discussion, two hours laboratory per week.
Prerequisites: PHYS 2130 with a minimum grade of D-
Term Offered: Spring, Summer, Fall
Core Natural Sciences, Trans Mod Natural Science

PHYS 2070-2080
[5 credit hours]
Electromagnetic theory, ray and wave optics including matrix methods, polarization, interference, diffraction, basic laser physics and survey of current laser systems.
Prerequisites: PHYS 2140 with a minimum grade of D-
Term Offered: Spring, Fall

PHYS 2100 Physics With Calculus
[2 credit hours]
A bridge course for students wishing to continue in physics after taking PHYS 2070-2080. The application of calculus and elementary differential equations in various physical contexts. No credit for students who take PHYS 2130-2140.
Prerequisites: (PHYS 2080 with a minimum grade of D- and MATH 1860 with a minimum grade of D-) or (PHYS 2080 with a minimum grade of D- and MATH 1840 with a minimum grade of D-) or (PHYS 2080 with a minimum grade of D- and MATH 1930 with a minimum grade of D-)
Term Offered: Spring, Fall

PHYS 2130 Physics For Science And Engineering Majors I
[5 credit hours]
Calculus based general physics. Mechanics of motion and energy, rotation, gravitation, harmonic motion, waves, fluids and the laws of thermodynamics. Five hours lecture and discussion, two hours laboratory per week.
Prerequisites: MATH 1830 (may be taken concurrently) with a minimum grade of C or MATH 1850 (may be taken concurrently) with a minimum grade of C or MATH 1920 (may be taken concurrently) with a minimum grade of C
Term Offered: Spring, Summer, Fall
Core Natural Sciences, Trans Mod Natural Science

PHYS 2140 Physics For Science And Engineering Majors II
[5 credit hours]
Calculus based general physics. Electricity and magnetism, capacitors and inductors, electromagnetic oscillations, Maxwell’s equations and electromagnetic radiation, optics, images, interference, and diffraction. Five hours lecture and discussion, two hours laboratory per week.
Prerequisites: PHYS 2130 with a minimum grade of D-
Term Offered: Spring, Summer, Fall
Core Natural Sciences, Trans Mod Natural Science

PHYS 2070-2080
[5 credit hours]
Electromagnetic theory, ray and wave optics including matrix methods, polarization, interference, diffraction, basic laser physics and survey of current laser systems.
Prerequisites: PHYS 2140 with a minimum grade of D-
Term Offered: Spring, Fall

PHYS 2100 Physics With Calculus
[2 credit hours]
A bridge course for students wishing to continue in physics after taking PHYS 2070-2080. The application of calculus and elementary differential equations in various physical contexts. No credit for students who take PHYS 2130-2140.
Prerequisites: (PHYS 2080 with a minimum grade of D- and MATH 1860 with a minimum grade of D-) or (PHYS 2080 with a minimum grade of D- and MATH 1840 with a minimum grade of D-) or (PHYS 2080 with a minimum grade of D- and MATH 1930 with a minimum grade of D-)
Term Offered: Spring, Fall

PHYS 2130 Physics For Science And Engineering Majors I
[5 credit hours]
Calculus based general physics. Mechanics of motion and energy, rotation, gravitation, harmonic motion, waves, fluids and the laws of thermodynamics. Five hours lecture and discussion, two hours laboratory per week.
Prerequisites: MATH 1830 (may be taken concurrently) with a minimum grade of C or MATH 1850 (may be taken concurrently) with a minimum grade of C or MATH 1920 (may be taken concurrently) with a minimum grade of C
Term Offered: Spring, Summer, Fall
Core Natural Sciences, Trans Mod Natural Science

PHYS 2140 Physics For Science And Engineering Majors II
[5 credit hours]
Calculus based general physics. Electricity and magnetism, capacitors and inductors, electromagnetic oscillations, Maxwell’s equations and electromagnetic radiation, optics, images, interference, and diffraction. Five hours lecture and discussion, two hours laboratory per week.
Prerequisites: PHYS 2130 with a minimum grade of D-
Term Offered: Spring, Summer, Fall
Core Natural Sciences, Trans Mod Natural Science

PHYS 3180 Intermediate Laboratory
[3 credit hours]
Physical measurements laboratory related to the development of modern physics, emphasizing techniques such as electronics, computer-aided experimental control and data acquisition, and data analysis. May be offered as writing intensive.
Prerequisites: PHYS 2140 with a minimum grade of D- or PHYS 2100 with a minimum grade of D-
Term Offered: Spring

PHYS 3310 Modern Physics I
[3 credit hours]
Quantum mechanics: atomic and molecular structure and spectra.
Prerequisites: (PHYS 2140 with a minimum grade of D- and MATH 1840 with a minimum grade of D-) or (PHYS 2140 with a minimum grade of D- and MATH 1860 with a minimum grade of D-) or (PHYS 2140 with a minimum grade of D- and MATH 1880 with a minimum grade of D-) or (PHYS 2140 with a minimum grade of D- and MATH 1930 with a minimum grade of D-)
Term Offered: Fall

PHYS 3400 Physical Principles Of Energy Sources For Humans
[3 credit hours]
This course will involve the study of various conventional and unconventional sources of energy for human consumption. Past, present, and future energy sources will be examined on scientifically established principles and data.
Prerequisites: PHYS 2140 with a minimum grade of D- or PHYS 2080 with a minimum grade of D-
Term Offered: Spring

PHYS 3410 Thermal Physics
[3 credit hours]
Statistical mechanics, kinetic theory and thermodynamics from a unified microscopic point of view, with applications to a variety of topics from different areas of physics.
Prerequisites: PHYS 3310 with a minimum grade of D-
Term Offered: Spring

PHYS 3610 Optics And Lasers
[3 credit hours]
Electromagnetic theory, ray and wave optics including matrix methods, polarization, interference, diffraction, basic laser physics and survey of current laser systems.
Prerequisites: PHYS 2140 with a minimum grade of D-
Term Offered: Spring, Fall

PHYS 4130 Computational Physics
[3 credit hours]
Working knowledge of computer operations and programming required. Numerical accuracy, advanced programming, graphics and spreadsheet packages, numerical techniques for differentiation, integration, matrices, solving differential equations and eigenvalue problems.

PHYS 4210 Theoretical Mechanics
[3 credit hours]
Statics and dynamics of particles, work, energy, Lagrange equations of motion, small oscillations, dynamics of rigid bodies.
Prerequisites: (PHYS 2140 with a minimum grade of D- and MATH 1890 with a minimum grade of D- and MATH 2860 with a minimum grade of D-) or (PHYS 2140 with a minimum grade of D- and MATH 2890 with a minimum grade of D- and MATH 2860 with a minimum grade of D-)
Term Offered: Fall
PHYS 4230 Electricity And Magnetism I
[3 credit hours]
Mathematical formulation of electrostatic and magnetostatic fields, potential theory solution of boundary value problems, method of images, dielectric and magnetic materials.
Prerequisites: PHYS 2140 with a minimum grade of D- and MATH 1890 with a minimum grade of D- and MATH 2860 with a minimum grade of D- or (PHYS 2140 with a minimum grade of D- and MATH 2890 with a minimum grade of D- and MATH 2860 with a minimum grade of D-)
Term Offered: Fall

PHYS 4240 Electricity And Magnetism II
[3 credit hours]
Maxwell’s field equations, production and propagation of electromagnetic waves, solution of boundary value problems with application to the laws of optics and guided waves.
Prerequisites: PHYS 4230 with a minimum grade of D-
Term Offered: Spring

PHYS 4310 Quantum Mechanics
[3 credit hours]
Formalism and applications of quantum mechanics: Hilbert space, time-independent and time-dependent perturbation theories, atomic and molecular structure and spectra, and scattering theory.
Prerequisites: PHYS 3310 with a minimum grade of D- and PHYS 3410 with a minimum grade of D- or (PHYS 2140 with a minimum grade of D- and MATH 1890 with a minimum grade of D- and MATH 2860 with a minimum grade of D-)
Term Offered: Spring

PHYS 4400 Principles and Varieties of Solar Energy
[3 credit hours]
Types and extent of solar energy used in human society including photosynthesis, photovoltaic, solar thermal, and concentrating solar electric; scope of the necessary energy storage and long distance electricity transmission.
Prerequisites: CHEM 1240 with a minimum grade of D- and PHYS 2080 with a minimum grade of D- and PHYS 3400 with a minimum grade of D-
Term Offered: Spring

PHYS 4430 Medical Physics I
[3 credit hours]
This course provides an overview of the physical principles and instrumentation of the major medical imaging modalities including projection radiography, and computed tomography. In addition the course will present a general prospective on use of radiation in cancer treatment including discussions on basic conventional radiotherapy, advanced image guided radiotherapy and treatment planning. This is a companion course to PHYS 4440.
Prerequisites: PHYS 2080 with a minimum grade of D- or PHYS 2140 with a minimum grade of D- and (MATH 1760 with a minimum grade of D- or MATH 1840 with a minimum grade of D- or MATH 1860 with a minimum grade of D-)
Term Offered: Fall

PHYS 4440 Medical Physics II
[3 credit hours]
This is the second part of a two-semester Medical Physics course. The course provides an overview of the physical principles and instrumentation of the major medical imaging modalities including projection radiography, and computed tomography. In addition the course will present a general prospective on use of radiation in cancer treatment including discussions on basic conventional radiotherapy, advanced image guided radiotherapy and treatment planning. Prerequisite: PHYS 4430.
Prerequisites: PHYS 4430 with a minimum grade of D-
Term Offered: Spring

PHYS 4510 Physics Of Condensed Matter
[3 credit hours]
